Hands-on Training on “UI & UX DESIGNING” EduBridge: Learner for Learners - Series No. 2	Mr. K.J. AJAY KUMAR I Year B.Sc. Animation and Multimedia Department of Computer Science, PMIST	B.Sc. & M.Sc. Data Science Students
Date / Period : 03 - 05, March 2025 Time: 02.00 PM to 04.00 PM	UI & UX Designer, Thanjai Cloud Tech.	23

Report / Summary / Key points Discussed:

The UI & UX Design training provided students with a comprehensive understanding of designing user-centered digital products. The session covered key areas such as the fundamentals of UI (visual design) and UX (user experience), including principles like visual hierarchy, consistency, typography, and accessibility. Students learned the end-to-end design process, from user research and wireframing to prototyping and usability testing, using tool called FIGMA. Real-world case studies were analyzed to highlight successful and unsuccessful design strategies, emphasizing the importance of iterative improvement and user feedback. The training aimed to equip students with practical skills for creating intuitive and visually appealing interfaces while fostering problem-solving and collaboration abilities. Expected outcomes include enhanced design thinking, portfolio-ready projects, and proficiency in industry-standard tools. By the end of the session, students were prepared to approach design challenges with a user-first mindset, contribute to real-world projects, and pursue careers in UI/UX design, product management, and related fields.
