## Criterion 1 – Curricular Aspects

<b>Key Indicator</b>	1.3	<b>Curriculum Enrichment</b>
<b>Metric</b>	1.3.4	Percentage of students undertaking field projects / research projects / internships (Data for the latest completed academic year)

## B.TECH. BIOTECHNOLOGY

S.No	Description
1.	List of students undertaking the field projects/ research projects / internship program-wise in the last completed academic year along with the details of title, place of work etc.
2.	<ul style="list-style-type: none"> <li>• Internship / research projects completion certificate from the organization where internship / research projects was completed along with the duration.</li> <li>• Report of the field visit / sample photographs of the field visit / permission letter from the competent authority will be considered.</li> </ul>

## Summary

<b>Industrial Project / Research Project</b>	<b>Internship / IPT</b>	<b>Field / Industrial visit</b>	<b>Total</b>
24	141	85	250

## **RESEARCH PROJECTS**

**Final year A sec – Batch 2020-2024- Academic year (2023-24)**

**GLOBALINK RESEARCH INTERNSHIP (GRI) AWARD LETTER  
DISBURSEMENT INFORMATION AND PLACEMENT TERMS AND CONDITIONS**

Dear RABITHA RAMACHANDRAN,

Congratulations! You have been selected by Mitacs and Professor Tina Bott from MacEwan University to receive a 2024 Globalink Research Internship award. You are therefore invited to participate in a research project at MacEwan University. Pursuant to an agreement with MacEwan University, Mitacs will administer will administer your funding grant.

Mitacs Globalink Research Internship is a competitive program that pairs top-ranked international students with specific research expertise with faculty at Canadian academic institutions for a twelve (12) week research project of mutual interest between May and October 2024. You have been selected by your Canadian host faculty project supervisor due to your background and skills in the research area and the unique contribution you will be making to the research during your stay. The skills required for your role (as described in the research description below) were found to clearly match your skills set, education, and research experience.

**Research Internship details**

**University/Institution:** MacEwan University

**Host professor:** Tina Bott

**Research project title:** Investigating the Medicinal Potential of Invasive Weed Extracts

**NOC code:** 41201 Post-secondary teaching and research assistants

**Research description:** In this project, the student(s) will investigate how bioautography can be optimized to screen invasive plant extracts for their antimicrobial or enzyme inhibition potential. Bioautography is a small-scale technique that combines thin-layer chromatography (TLC, for compound separation) and bioassay development (antimicrobial or enzyme inhibition screening) in one. There are a few different methods by which bioautography can be performed and the preferred method will depend on the nature of the assay being utilized. As part of the planned work for this project, students will modify traditional bioassay protocols, such as the Kirby-Bauer antimicrobial disc diffusion assay, to work with the TLC-bioautography system.

**During your internship, you will:** The main role of the student will be to design, execute, and analyze laboratory experiments that will result in the development of a standardized protocol for screening plant extracts for biological activity using bioautography. They will apply this protocol to the screening of multiple plant extracts for the purpose of finding bioactive small molecules that are antimicrobials or enzyme inhibitors (drug leads). The student will work as a research assistant, designing and executing experiments based on both literature precedence and their own experimental observations. Lab techniques will be demonstrated by the supervisor. There is an expectation that as the project progresses, the student will become more independent with respect to experimental design and execution. Students will be expected to record their observations in a lab notebook and complete a final report in a format suitable for dissemination as part of a larger body of work.

**Start date:** Any time between May 1 and July 31, 2024 (unless otherwise approved by Mitacs)

**End date:** No later than October 31, 2024 (unless otherwise approved by Mitacs).

**Duration of research:** 12 weeks - Exact dates must be decided by intern and host professor. Shortened durations must be agreed upon with the host professor and Mitacs. Durations of more than twelve (12) weeks will not be permitted.
