**BOARD OF STUDIES MEETING**  
**For B.Sc. and M.Sc Mathematics PROGRAMME**

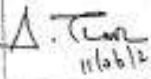

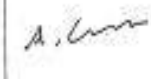

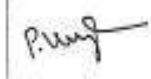

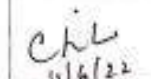

Minutes of Meeting

Date: 11.06.2022 Time: 2.00 PM Venue: Mathematics Department

The Board of Studies meeting was held on 11.06.2022 for revision of Curriculum and Syllabi of B.Sc Mathematics and M.Sc Mathematics programme of Regulation 2022.

Members present:

**Members of the BoS**

• **A. FEEDBACK ON CURRICULAR ASPECTS**

The feedback were collected and analyzed during 2018-19, 2019-20 and 2020-21 from the following stake holders

- Teachers
- Employers
- Alumni
- Students
- Industrialist

In addition, the feedback from Academic Expert, Teachers, Alumni and Students who participated in Department Advisory Committee (DAC) Meeting were presented. The action taken for the feedbacks are given as "Remarks" in Table II.

• **B. CURRICULUM INTERVENTION BASED ON CO ATTAINMENT**

The CO attainment and PO attainment for the courses of B.Sc Programme were presented to the members. The courses whose CO attainment was consistently below the target values were discussed. This has been considered as one of the point for syllabus modification for some courses and documented in the Table II.

• **C. PRESENTATION OF CURRICULUM AND SYLLABUS**

All the courses which are framed by the department of Mathematics are presented individually. The deletion, addition and introduction of new courses related details are tabulated for all courses in the following table.

**Table II:** Discussions on courses with actions as remarks - B.Sc Mathematics

| S.No | Sem | New Course Name                                  | Course content Deletion/ Addition/New | Percentage of change | Remarks                      |
|------|-----|--|---------------------------------------|----------------------|------------------------------|
| 1    | I   | Tamil - I/<br>Foundational Tamil- I              | -                                     | 100%                 | Language                     |

| 6    | Fluid Dynamics                            |
| 7    | Combinatorics                             |
| 8    | Cryptography                              |
| 9    | Computer Programming (C++ Theory and Lab) |
| 10   | Elements of Stochastic Processes          |
| 11   | Differential Geometry                     |

**Table III b:** Table of courses removed with remarks M.Sc Mathematics

| S.No | Course Code and Name           | Remarks                             |
|------|--------------------------------|-------------------------------------|
| 1    | Discrete Mathematics           | Already Studied in UG               |
| 2    | Mathematical Logic             | Feedback received from stakeholders |
| 3    | Linear Algebra                 | Already Studied in UG               |
| 4    | Analysis II                    | Feedback received from stakeholders |
| 5    | Data structures and Algorithms | Feedback received from stakeholders |
| 6    | Field Theory                   | Feedback received from stakeholders |
| 7    | Mathematical Statistics        | Feedback received from stakeholders |
| 8    | Numerical Methods              | Already Studied in UG               |
| 9    | Commutative Algebra            | Syllabus included in Algebra II     |
| 10   | Automata Theory                | Feedback received from stakeholders |
| 11   | Algebraic Number Theory        | Feedback received from stakeholders |

• **PERCENTAGE CHANGE IN THE SYLLABUS**

**b. M.Sc Mathematics**

Number of new courses added = 11 = 45 credits

Number of old courses removed = 11 = 41 credits

% change =  $(45/92) \times 100 = 48.91\%$

### MINUTES OF FORTIETH MEETING OF THE ACADEMIC COUNCIL

Date : 27.08.2022

Time : 10.30 A.M

Venue: Richard Dawkins Hall

Place : PMIST, Vallam – Thanjavur

The Fortieth Meeting of the Academic Council of the Periyar Maniammai Institute of Science & Technology (PMIST), Vallam, Thanjavur held on 27.08.2022 at 10.30 a.m.

Prof.S.Velusami, Hon'ble Vice-Chancellor, chaired the meeting.

#### The following Academic Council Members were present

|     |                             |        |
|-----|-----------------------------|--------|
| 1.  | Dr.D.Aarathi Saravanan      | Member |
| 2.  | Dr.A.Anand Jerard Sebastine | Member |
| 3.  | Dr.S.Arnmugam               | Member |
| 4.  | Dr.P.Aruna                  | Member |
| 5.  | Dr.S.Asokan                 | Member |
| 6.  | Dr.S.Buvaneshwari           | Member |
| 7.  | Dr.A.George                 | Member |
| 8.  | Dr.S.Gomathi                | Member |
| 9.  | Dr.P.Guru                   | Member |
| 10. | Dr.V.Hamsadhvani            | Member |
| 11. | Dr.R.Jayanthi               | Member |
| 12. | Dr.N.Jayanthi               | Member |
| 13. | Dr.J.Jeyachidra             | Member |
| 14. | Mr.I.Karthic Subramanayan   | Member |
| 15. | Dr.T.Kavitha                | Member |
| 16. | Dr.K.Kesavan                | Member |
| 17. | Dr.R.Krishnamurthi          | Member |
| 18. | Dr.S.P.Kulanthalvel Babu    | Member |

But, as per the recommendations of the Board of Studies the new course BBA -(Hospitality Management) is offered.

The matter is placed before the Academic Council for approval.

**Resolution**

**RESOLVED TO APPROVE** the Curriculum and Syllabi of I to VI Semester of BBA -(Hospitality Management) under Full-Time (Regulation 2022).

**DEPARTMENT OF MATHEMATICS**

**FHSM  
M.Sc.-  
Maths  
40.5.4**

**TO CONSIDER AND APPROVE** the Curriculum and Syllabi for I to IV Semester for M.Sc Mathematics programme (Regulation 2022) for the candidates admitted from 2022-23 onwards.

**Notes:**

The Board of Studies of Department of Mathematics recommended the Curriculum and Syllabi for I to IV Semester for M.Sc. Mathematics programme under full time(Regulation 2022) for the candidates admitted from 2022 -23 onwards.

The matter is placed before the Academic Council for Approval.

**Resolution**

**RESOLVED TO APPROVE** the Curriculum and Syllabi for I to IV Semester for M.Sc Mathematics programme (Regulation 2022) for the candidates admitted from 2022-23 onwards.

**FHSM  
B.Sc.-  
Maths  
40.5.5**

**TO CONSIDER AND APPROVE** the Curriculum and Syllabi for I to VI Semester for B.Sc.-Mathematics programme (Regulation 2022) for the candidates admitted from 2022-23.

**Notes:**

The Board of Studies of Department of Mathematics recommended the Curriculum and Syllabi for I to VI semester for B.Sc.-Mathematics programme under full time (Regulation 2022) for the candidates admitted from 2022-23.

The matter is placed before the Academic Council for Approval.

**Resolution**

**RESOLVED TO APPROVE** the Curriculum and Syllabi for I to VI Semester for B.Sc. -Mathematics programme (Regulation 2022) for the candidates admitted from 2022-23.

**FHSM  
Maths  
40.5.6**

**TO CONSIDER AND APPROVE** the list of Value Added Courses to be offered by the department in the academic year 2022-23.

1. Quicker Mathematics
2. C++
3. LaTeX
4. Python Programming
5. Matlab
6. SAP

**Notes:**

The Board of Studies of Department of Mathematics recommended the above list of Value Added Courses (Regulation 2022).

The matter is placed before the Academic Council for Approval.

**Resolution**

**RESOLVED TO APPROVE** the above list of Value Added Courses.

**DEPARTMENT OF COMMERCE**

**FHSM  
B.Com.  
Hons  
40.5.7**

**TO CONSIDER AND APPROVE** the Curriculum and Syllabi for B.Com (Hons) under Full-Time (Regulation 2022).

**Notes:**

The Board of Studies of Department of Commerce recommended the Curriculum and Syllabi for I to VI Semester B.Com (Hons) under Full-Time (Regulation 2022).

The matter is placed before the Academic Council for approval.

**Resolution**

**RESOLVED TO APPROVE** the Curriculum and Syllabi for B.Com (Hons) under Full-Time (Regulation 2022).

### 3.a. Curriculum and Syllabus of the programme – Before Revision

#### B.Sc. (Mathematics) Syllabus Before Revision REGULATION – 2018

|  |                 |              |
|--|-----------------|--------------|
| <b>UNIT I</b>  | <b>15</b>       |              |
| Limit and Continuity ( $\epsilon$ and $\delta$ definition), Types of discontinuities, Differentiability of functions, Successive differentiation, Leibnitz's theorem, Partial differentiation, Euler's theorem on homogeneous functions.                       |                 |              |
| <b>UNIT II</b>   | <b>15</b>       |              |
| Tangents and normals, Curvature, Asymptotes, Singular points, Tracing of curves. Parametric representation of curves and tracing of parametric curves, Polar coordinates.  |                 |              |
| <b>UNIT III</b>  | <b>15</b>       |              |
| Rolle's theorem, Mean Value theorems, Taylor's theorem with Lagrange's and Cauchy's forms of remainder, Taylor's series( Statement only) Maclaurin's series of $\sin x$ , $\cos x$ , $e^x$ , $\log(1+x)$ , $(1+x)^m$ , Maxima and Minima, Indeterminate forms. |                 |              |
| <b>UNIT IV</b>   | <b>15</b>       |              |
| Definite integrals - Integration by parts & reduction formula  |                 |              |
| <b>UNIT V</b>  | <b>15</b>       |              |
| Double integrals – changing the order of Integration – Triple Integrals.   |                 |              |

| Human Ethics and values - Understanding of oneself and others- motives and needs- Social service, Social Justice, Dignity and worth, Harmony in human relationship: Family and Society, Integrity and Competence, Caring and Sharing, Honesty and Courage, WHO's holistic development - Valuing Time, Co-operation, Commitment, Sympathy and Empathy, Self respect, Self-Confidence, character building and Personality. |   |                       |                      |          |           |          |
| <b>UNIT II GENDER EQUALITY</b>   |   |                       |                      |          |           | <b>9</b> |
| Gender Equality - Gender Vs Sex, Concepts, definition, Gender equity, equality, and empowerment. Status of Women in India Social, Economical, Education, Health, Employment, HDI, GDI, GEM. Contributions of Dr.B.R. Ambedkar, Thanthai Periyar and Phule to Women Empowerment.  |   |                       |                      |          |           |          |

|  |              |
|--|--------------|
| <b>UNIT III WOMEN ISSUES AND CHALLENGES</b>  | <b>9</b>     |
| Women Issues and Challenges- Female Infanticide, Female feticide, Violence against women, Domestic violence, Sexual Harassment, Trafficking, Access to education, Marriage. Remedial Measures – Acts related to women: Political Right, Property Rights, and Rights to Education, Medical Termination of Pregnancy Act, and Dowry Prohibition Act.   |              |
| <b>UNIT IV HUMAN RIGHTS</b>  | <b>9</b>     |
| Human Rights Movement in India – The preamble to the Constitution of India, Human Rights and Duties, Universal Declaration of Human Rights (UDHR), Civil, Political, Economical, Social and Cultural Rights, Rights against torture, Discrimination and forced Labour, Rights and protection of children and elderly. National Human Rights Commission and other statutory Commissions, Creation of Human Rights Literacy and Awareness. - Intellectual Property Rights (IPR). National Policy on occupational safety, occupational health and working environment.  |              |
| <b>UNIT V GOOD GOVERNANCE AND ADDRESSING SOCIAL ISSUES</b>   | <b>11</b>    |
| Good Governance - Democracy, People’s Participation, Transparency in governance and audit, Corruption, Impact of corruption on society, whom to make corruption complaints, fight against corruption and related issues, Fairness in criminal justice administration, Government system of Redressal. Creation of People friendly environment and universal brotherhood.   |              |

| <b>UNIT - I INTRODUCTION TO ENVIRONMENTAL STUDIES AND ENERGY</b>  |   |                        |          |                        |          | <b>12</b> |
| Definition, scope and importance – Need for public awareness – Forest resources: Use and over-exploitation, deforestation, case studies – Water resources: Use and over-utilization of surface and ground water, conflicts over water, dams-benefits and problems – Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies – Food resources: changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies – Energy resources: renewable and non-renewable energy sources – Land resources: Land as a resource, land degradation, soil erosion and desertification – Role of an individual in conservation of natural resources – Equitable use of resources for sustainable lifestyles. |   |                        |          |                        |          |           |
| <b>UNIT – II ECOSYSTEMS AND BIODIVERSITY</b>  |   |                        |          |                        |          | <b>7</b>  |
| Concept of an ecosystem – Structure and function of an ecosystem – Producers, consumers and decomposers – Energy flow in the ecosystem – Ecological succession – Food chains, food webs and ecological pyramids – Introduction, types, characteristic features, structure and function of the (a) Forest ecosystem (b) Grassland ecosystem (c) Desert ecosystem (d) Aquatic ecosystem – Introduction to Biodiversity – Definition: genetic, species and ecosystem diversity - Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.   |   |                        |          |                        |          |           |
| <b>UNIT – III ENVIRONMENTAL POLLUTION</b>   |   |                        |          |                        |          | <b>10</b> |

Definition – Causes, effects and control measures of: (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear hazards – Solid waste management – Role of an individual in prevention of pollution – Pollution case studies – Disaster management: flood, earthquake, cyclone and landslide.

**UNIT –IV SOCIAL ISSUES AND THE ENVIRONMENT** **10**

Urban problems related to energy – Water conservation, rain water harvesting, watershed management – Resettlement and rehabilitation of people; its problems and concerns, climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust, Wasteland reclamation – Consumerism and waste products – Environment Protection Act – Air (Prevention and Control of Pollution) Act – Water (Prevention and control of Pollution) Act – Wildlife Protection Act – Forest Conservation Act – Issues involved in enforcement of environmental legislation – Public awareness.

**UNIT –V HUMAN POPULATION AND THE ENVIRONMENT** **6**

Population growth, variation among nations – Population explosion– Environment and human health – HIV / AIDS– Role of Information Technology in Environment and human health. Population growth, variation among nations – Population explosion – Family welfare programme – Environment and human health – Human rights – Value education - HIV / AIDS – Women and Child welfare programme– Role of Information Technology in Environment and human health – Case studies.

| <b>COURSE OUTCOMES</b>   |   | <b>DOMAIN</b> |          | <b>LEVEL</b> |          |
| <i>On the successful completion of the course, students will be able to</i>  |   |               |          |              |          |
| CO1  | <i>Define, explain and demonstrate and Relate</i> knowledge of the basics of digital computer.  | Cognitive:    |          | Remember,    |          |
|  |   | Psychomotor:  |          | Understand   |          |
|  |   |               |          | Mechanism    |          |
| CO2  | Acquire the knowledge of INTEL 8085; <i>Analyze</i> Immediate and implicit addressing and Instruction set   | Cognitive:    |          | Analyze,     |          |
|  |   |               |          | Apply        |          |
| CO3  | <i>Understand</i> Fundamentals of assembly language programming   | Cognitive:    |          | Understand   |          |
|  |   | Affective:    |          | Receive      |          |
| CO4  | <i>Identify</i> Structure of 'C', <i>explain</i> I/O function.  | Cognitive:    |          | Remember     |          |
| CO5  | <i>Understand</i> the Data input and output and <i>describe</i> Basic functions and <i>Compare</i> automatic variables, External Variables, Static Variables. | Cognitive:    |          | Understand   |          |
|  |   | Affective:    |          | Receive      |          |
| <b>UNIT - I</b>  |   |               |          | <b>7+3</b>   |          |
| Planck's quantum, Planck's constant and light as a collection of photons; Photoelectric effect and Compton scattering. De Broglie wavelength and matter waves; Davisson-Germer |   |               |          |              |          |

experiment. Problems with Rutherford model- instability of atoms and observation of discrete atomic spectra; Bohr's quantization rule and atomic stability.

**UNIT –II** **8 + 3**

Position measurement- gamma ray microscope thought experiment; Wave-particle duality, Heisenberg uncertainty principle- impossibility of a particle following a trajectory; Estimating minimum energy of a confined particle using uncertainty principle; Energy-time uncertainty principle.

**UNIT – III** **10 + 3**

One dimensional infinitely rigid box- energy eigenvalues and eigenfunctions, normalization; Quantum dot as an example; Quantum mechanical scattering and tunneling in one dimension - across a step potential and across a rectangular potential barrier.

**UNIT –IV** **10 + 3**

Size and structure of atomic nucleus and its relation with atomic weight; Impossibility of an electron being in nucleus as a consequence of the uncertainty principle. Nature of nuclear force, NZ graph, semi-empirical mass formula and binding energy

**UNIT –V** **10 + 3**

Radioactivity: stability of nucleus; Law of radioactive decay; Mean life and half-life; -ray decay - energy released, spectrum and Pauli's prediction of neutrino;  $\beta$  decay;  $\alpha$  emission.

**COURSE OUTCOMES:**

| <b>Course outcomes:</b>   | <b>Domain</b> | <b>Level</b>            |
|---|---------------|-------------------------|
| <b>CO1: Solve</b> simple problems related to first order, higher degree differential equations solvable for x, solvable for y, solvable for dy/dx, Clairauts form – Conditions of integrability of $M dx + N dy = 0$ .  | Cognitive     | Applying                |
| <b>CO2: Solve</b> second order linear differential equations with constant coefficients, variable coefficients, and solving the equation using method of Variation of Parameters.                                       | Cognitive     | Applying                |
| <b>CO3: Formation</b> of Partial Differential Equation, <b>Solve</b> PDE of the standard forms using Lagrange's method, Charpit's method and a few standard forms.  | Cognitive     | Applying                |
| <b>CO4: Solve</b> PDE of second order homogeneous equation with constant coefficients, particular integrals of the forms $e^{ax+by}$ , $\sin(ax+by)$ , $\cos(ax+by)$ , $x^r y^s$ and $e^{ax+by} \cdot f(x,y)$ .         | Cognitive     | Applying                |
| <b>CO5: Find</b> Laplace Transforms and inverse Laplace transform of function using standard formulae, Basic theorems & simple applications <b>Use</b> of Laplace Transforms in solving ODE with constant coefficients. | Cognitive     | Remembering<br>Applying |

|   |                 |
|---|-----------------|
| <b>UNIT I</b>   | <b>15</b>       |
| First order, higher degree differential equations solvable for x, solvable for y, solvable for dy/dx, Clairauts form – Conditions of integrability of $M dx + N dy = 0$ – simple problems.                |                 |
| <b>UNIT II</b>  | <b>15</b>       |
| Particular integrals of second order differential equations with constant coefficients - Linear equations with variable coefficients – Method of Variation of Parameters ( Second Order only)             |                 |
| <b>UNIT III</b>   | <b>15</b>       |
| Formation of Partial Differential Equation – General, Particular & Complete integrals – Solution of PDE of the standard forms - Lagrange's method - Solving of Charpit's method and a few standard forms. |                 |
| <b>UNIT IV</b>  | <b>15</b>       |
| PDE of second order homogeneous equation with Constant coefficients – Particular integrals of the forms $e^{ax+by}$ , $\sin(ax+by)$ , $\cos(ax+by)$ , $x^r y^s$ and $e^{ax+by} \cdot f(x,y)$ .            |                 |
| <b>UNIT V</b>   | <b>15</b>       |
| Laplace Transforms – Standard formulae – Basic theorems & simple applications – Inverse Laplace Transforms – Use of Laplace Transforms in solving ODE with constant coefficients.                         |                 |

| <b>COURSE CONTENT</b>  |  |                                      |
| <b>UNIT I</b>  | <b>INTRODUCTION</b>  | <b>9 hrs</b>                         |
|  | Introduction – Disaster preparedness – Goals and objectives of ISDR Programme- Risk identification – Risk sharing – Disaster and development: Development plans and disaster management–Alternative to dominant approach – disaster – development linkages - Principle of risk partnership                                     |                                      |
| <b>UNIT II</b>   | <b>APPLICATION OF TECHNOLOGY IN DISASTER RISK REDUCTION</b>  | <b>9 hrs</b>                         |
|  | Application of various technologies: Data bases – RDBMS – Management Information systems – Decision support system and other systems – Geographic information systems – Intranets and extranets – video teleconferencing. Trigger mechanism – Remote sensing-an insight – contribution of remote sensing and GIS - Case study. |                                      |
| <b>UNIT III</b>  | <b>AWARENESS OF RISK REDUCTION</b>   | <b>9 hrs</b>                         |
|  | Trigger mechanism – constitution of trigger mechanism – risk reduction by education – disaster information network – risk reduction by public awareness  |                                      |
| <b>UNIT IV</b>   | <b>DEVELOPMENT PLANNING ON DISASTER</b>  | <b>9 hrs</b>                         |
|  | Implication of development planning – Financial arrangements – Areas of improvement – Disaster preparedness – Community based disaster management – Emergency response.  |                                      |
| <b>UNIT V</b>  | <b>SEISMICITY</b>  | <b>9 hrs</b>                         |
|  | Seismic waves – Earthquakes and faults – measures of an earthquake, magnitude and intensity – ground damage – Tsunamis and earthquakes   |                                      |
|  | <b>L - 45 hrs Total-45 hrs</b>   |                                      |

Sets, subsets, Set operations, the laws of set theory and Venn diagrams. Examples of finite and infinite sets.

**UNIT IV**

**6**

Finite sets and counting principle. Empty set, properties of empty set. Standard set operations. Classes of sets. Power set of a set.

**UNIT V**

**6**

Solutions of reciprocal and binomial equations. Algebraic solutions of the cubic and biquadratic. Properties of the derived functions.

examples, and characterizations, Quotient groups.

**UNIT V**

**15**

Definition and examples of rings, examples of commutative and non-commutative rings: rings from number systems,  $Z_n$  the ring of integers modulo  $n$ , ring of real quaternions, rings of matrices, polynomial rings, and rings of continuous functions. Subrings and ideals, Integral domains and fields, examples of fields:  $Z_p$ ,  $Q$ ,  $R$ , and  $C$ . Field of rational functions.

### COURSE OUTCOMES:

| Course outcomes:   | Domain    | Level         |
|--|-----------|---------------|
| <b>CO1: Explain</b> Concept of Linear Independence and examples of different bases. Subspaces of $R^2$ , $R^3$ .   | Cognitive | Understanding |
| <b>CO2: Explain</b> Matrix form of basic geometric transformations. Interpretation of eigen values and eigen vectors for such transformations and eigen spaces as invariant subspaces. | Cognitive | Understanding |
| <b>CO3: Solve</b> linear homogeneous and non-homogeneous equations with number of equations and unknowns up to four.   | Cognitive | Applying      |
| <b>CO4: Explain</b> Matrices in diagonal form up to matrices of order 3, the computation of matrix inverses using elementary row operations and to find rank of the matrix.            | Cognitive | Understanding |
| <b>CO5: Solve</b> a system of linear equations using matrices.   | Cognitive | Applying      |

### UNIT I

18

**R,  $R^2$ ,  $R^3$  as vector spaces over  $R$ . Standard basis for each of them. Concept of Linear Independence and examples of different bases. Subspaces of  $R^2$ ,  $R^3$ .**

|  |                 |              |
|--|-----------------|--------------|
| <b>UNIT II</b>   | <b>18</b>       |              |
| Translation, Dilation, Rotation, Reflection in a point, line and plane. Matrix form of basic geometric transformations. Interpretation of eigen values and eigen vectors for such transformations and eigen spaces as invariant subspaces. |                 |              |
| <b>UNIT III</b>  | <b>18</b>       |              |
| Types of matrices. Rank of a matrix. Invariance of rank under elementary transformations. Reduction to normal form, Solutions of linear homogeneous and non-homogeneous equations with number of equations and unknowns upto four.         |                 |              |
| <b>UNIT IV</b>   | <b>18</b>       |              |
| Matrices in diagonal form. Reduction to diagonal form upto matrices of order 3. Computation of matrix inverses using elementary row operations. Rank of matrix.  |                 |              |
| <b>UNIT V</b>  | <b>18</b>       |              |
| Solutions of a system of linear equations using matrices. Illustrative examples of above concepts from Geometry, Physics, Chemistry, Combinatorics and Statistics.   |                 |              |

**PREREQUISITE:** Logic and Sets

**COURSE OUTCOMES:**

| <b>Course outcomes:</b>   | <b>Domain</b>   | <b>Level</b>            |
|---|-----------------|-------------------------|
| <b>CO1: Define and Apply</b> truth tables and the rules of propositional and predicate calculus.  | Cognitive       | Remembering<br>Applying |
| <b>CO2: Apply</b> the following methods direct proof, indirect proof, and proof by contradiction, and case analysis to formulate short proofs.  | Cognitive       | Applying                |
| <b>CO3: Solve</b> linear recurrence relation with constant coefficients, non-homogeneous recurrence relations and non-homogeneous recurrence relations using methods of generating functions.   | Cognitive       | Applying                |
| <b>CO4: Explain</b> Basic theorems on Boolean Algebra, Duality principle Boolean. functions.  | Cognitive       | Understanding           |
| <b>CO5: Apply</b> Boolean algebra, Logic gates and circuits combinatorial circuits, Boolean expression and Karnaugh map.  | Cognitive       | Applying                |
| <b>UNIT I</b>   |                 | <b>18</b>               |
| Mathematical Logic- Propositional calculus- Basic Logical operators- conditional statements- Bi conditional statement- tautologies- contradictions- equivalence implications.   |                 |                         |
| <b>UNIT II</b>  |                 | <b>18</b>               |
| Norms forms- Theory of inference for the statement calculus- The predicate calculus inference theory and predicate calculus.  |                 |                         |
| <b>UNIT III</b>   |                 | <b>18</b>               |
| Recurrence relations and generating functions- recurrence relation- solution of linear recurrence relation with constant coefficients- Nonhomogeneous recurrence relations solution of Non – homogeneous recurrence relations- Methods of generating functions. |                 |                         |
| <b>UNIT IV</b>  |                 | <b>18</b>               |
| Basic theorems on Boolean Algebra- Duality principle Boolean functions.   |                 |                         |
| <b>UNIT V:</b>  |                 | <b>18</b>               |
| Boolean functions- Applications of Boolean algebra- Logic gates and circuits -combinatorial circuits- Boolean expression – Karnaugh map.  |                 |                         |
| <b>LECTURE</b>  | <b>TUTORIAL</b> | <b>TOTAL</b>            |

## LIST OF DISCIPLINE SPECIFIC ELECTIVE COURSES

### Semester – V

#### DSE – 1 (Any one of the following)

| Category | Code    | Course Name       | L | T | P | H | C |
|----------|---------|-------------------|---|---|---|---|---|
| DSE1A    | XMT503A | Numerical Methods | 4 | 1 | 0 | 5 | 5 |
| DSE1B    | XMT503B | Number Theory     | 4 | 1 | 0 | 5 | 5 |

#### DSE – 2 (Any one of the following)

| Category | Code    | Course Name           | L | T | P | H | C |
|----------|---------|-----------------------|---|---|---|---|---|
| DSE2A    | XMT504A | Graph Theory          | 4 | 1 | 0 | 5 | 5 |
| DSE2B    | XMT504B | Mathematical Modeling | 4 | 1 | 0 | 5 | 5 |

### Semester – VI

#### DSE – 3 (Any one of the following)

| Category | Code    | Course Name                     | L | T | P | H | C |
|----------|---------|---------------------------------|---|---|---|---|---|
| DSE3A    | XMT603A | Fuzzy sets and its applications | 4 | 1 | 0 | 5 | 5 |
| DSE3B    | XMT603B | Introduction to Industry 4.0    | 4 | 1 | 0 | 5 | 5 |

#### DSE – 4 (Any one of the following)

| Category | Code    | Course Name          | L | T | P | H | C |
|----------|---------|----------------------|---|---|---|---|---|
| DSE4A    | XMT604A | Astronomy            | 4 | 1 | 0 | 5 | 5 |
| DSE4B    | XMT604B | Stochastic Processes | 4 | 1 | 0 | 5 | 5 |

|   |   |               |          |              |           |          |              |
|---|---|---------------|----------|--------------|-----------|----------|--------------|

| On successful completion of this course, the students will be able to: |   |   |  |           |               |    |   |
| Course Outcomes  |   |   |  | Domain    | Level         |    |   |
| CO 1   | Apply Leibnitz rule to solve problems related to nth order derivatives  |   |  | Cognitive | Applying      |    |   |
| CO 2   | Identify maxima and minima of multivariable functions   |   |  | Cognitive | Applying      |    |   |
| CO 3   | Apply the concept and principles of differential calculus to find the curvature, radius of curvature, envelopes, evolute and involute of different curves |   |  | Cognitive | Applying      |    |   |
| CO 4   | Demonstrate the expansions of trigonometric functions in terms of $\theta$  |   |  | Cognitive | Understanding |    |   |
| CO 5   | Demonstrate the relations between hyperbolic  |   |  | Cognitive | Understanding |    |   |

|   |   |                 |            |                  |            |              |            |            |            |
|---|---|-----------------|------------|------------------|------------|--------------|------------|------------|------------|
|   | functions and circular functions  |                 |            |                  |            |              |            |            |            |
| <b>UNIT 1</b>   | <b>Successive Differentiation</b>   |                 |            |                  |            |              |            | <b>12</b>  |            |
| Successive Differentiation – The $n^{\text{th}}$ derivative – Standard results – Trigonometrical transformation – Formation of equations involving derivatives – Leibnitz formula for the $n^{\text{th}}$ derivative of a product – Proof   |   |                 |            |                  |            |              |            |            |            |
| <b>UNIT 2</b>   | <b>Partial Differentiation, Maxima and minima of functions of two variables</b> |                 |            |                  |            |              |            | <b>12</b>  |            |
| Successive partial derivatives – Function of function rule – Total differential coefficient – Implicit functions – Homogeneous functions – Partial derivatives of a function of two functions – Taylor's expansion of $f(x, y)$ - Maxima and minima of functions of two variables – Lagrange's method of undetermined multipliers.  |   |                 |            |                  |            |              |            |            |            |
| <b>UNIT 3</b>   | <b>Envelopes, Curvature of Plane curve</b>                                      |                 |            |                  |            |              |            | <b>12</b>  |            |
| Envelopes – Method of finding envelope – Curvature – Cartesian formula for radius of curvature – The coordinates of centre of curvature – Evolute and involute – Radius of curvature when the curve is given in polar co-ordinates – p-r equation; pedal equation of a curve – Chord of curvature.  |   |                 |            |                  |            |              |            |            |            |
| <b>UNIT 4</b>   | <b>Expansions</b>   |                 |            |                  |            |              |            | <b>12</b>  |            |
| Expansions of $\cos n\theta$ and $\sin n\theta$ - Expansion of $\tan n\theta$ in powers of $\tan \theta$ - Expansion of $\tan A + B + C + \dots$ - Examples on formation of equations – Expansions of $\cos^n \theta$ and $\sin^n \theta$ in terms of functions of multiples of $\theta$ - Expansion of $\cos \theta$ and $\sin \theta$ in a series of ascending powers of $\theta$ .                       |   |                 |            |                  |            |              |            |            |            |
| <b>UNIT 5</b>   | <b>Hyperbolic Functions and Logarithms of Complex quantities</b>                |                 |            |                  |            |              |            | <b>12</b>  |            |
| Hyperbolic functions – Relations between hyperbolic functions – Relations between hyperbolic functions and circular functions – Inverse hyperbolic functions – Separation into real and imaginary parts – Logarithms of complex quantities – logarithm of $x + iy$ - General value of logarithm of $x + iy$ .   |   |                 |            |                  |            |              |            |            |            |

**Prerequisite** Higher Secondary level Mathematics

On successful completion of this course, the students will be able to:

| <b>Course Outcomes</b> |  | <b>Domain</b> | <b>Level</b> |
|------------------------|--|---------------|--------------|
| <b>CO 1</b>            | <b>Identify</b> the given lines are coplanar lines and shortest distance between the skew lines                | Cognitive     | Applying     |
| <b>CO 2</b>            | <b>Identify</b> the equation of the tangent plane to a given sphere  | Cognitive     | Applying     |
| <b>CO 3</b>            | <b>Apply</b> reduction formulae to Integrate functions of a higher degree.                                     | Cognitive     | Applying     |
| <b>CO 4</b>            | <b>Apply</b> the concepts of Beta and Gamma functions and their properties to evaluate definite integral.      | Cognitive     | Applying     |
| <b>CO 5</b>            | <b>Apply</b> the concepts of multiple integral for finding the area and volume of the region bounded by curves | Cognitive     | Applying     |

**UNIT 1** Analytical Geometry 3-D – The plane – The straight line – Coplanar lines - skew lines S.D. **12**

**UNIT 2** Sphere- Tangent plane- intersection of two spheres – Equation of tangent plane to a sphere. **12**

**UNIT 3** **12**

**Properties of definite integrals - Reduction formulae of the types:**  
 $\int x^n e^{ax} dx, \int x^n \cos ax dx, \int \sin^n x dx, \int \cos^n x dx, \int \sin^m x \cos^n x dx, \int \tan^n x dx$

**UNIT 4** **12**

**Beta and Gamma Functions: Definitions – Convergence of  $\Gamma(n)$  – Recurrence formula of gamma function – Properties of beta function – relation between beta and gamma functions.**

**UNIT 5** **12**

**Multiple integral: Double integral – Evaluation of double integral - change of order of integration – Polar coordinates - Triple integrals - Application of multiple integrals.**

|------------------------|---|---------------|--------------------------------|
| <b>CO 1</b>            | <b>Identify</b> the principles of elasticity, <b>derive</b> expression for twisting couple and <b>determine</b> rigidity modulus of a wire. | Cognitive     | Remember, Understand and Apply |
| <b>CO 2</b>            | <b>Describe</b> sound, propagation, perception <b>analysis</b> of acoustical wave and effect echoes in building.                            | Cognitive     | Understand and apply           |

|  |  |                 |                              |                  |          |              |           |
|--|--|-----------------|------------------------------|------------------|----------|--------------|-----------|
| <b>CO 3</b>  | <b>Recall</b> basic concepts of specific heat capacity <b>List</b> the laws of thermodynamics.   | Cognitive       | Remember and understand      |                  |          |              |           |
| <b>CO 4</b>  | <b>Understand</b> Interference, diffraction and <b>identify</b> their applications.  | Cognitive       | Understand and Analyze       |                  |          |              |           |
| <b>CO 5</b>  | <b>Recall</b> the general properties of atoms and nucleus, <b>Discuss</b> the various models and <b>Analyze</b> various applications of X-ray. | Cognitive       | Remember Understand, analyze |                  |          |              |           |
| <b>UNIT 1</b>  | <b>Elasticity</b>  |                 | <b>12</b>                    |                  |          |              |           |
| Stress – Strain –Hooke’ law-Different moduli of elasticity - Twisting couple on a cylinder – Determination of Rigidity modulus by Static Torsion method –Bending of beams–Experimental methods for the determination of Young’s modulus by non-uniform bending.  |  |                 |                              |                  |          |              |           |
| <b>UNIT 2</b>  | <b>Sound</b>   |                 | <b>12</b>                    |                  |          |              |           |
| Introduction – characteristic of musical sound - Loudness – unit of loudness – Noise - Acoustics of buildings – Reverberation – Reverberation time- requirements for good acoustics of buildings - Echo and Echelon effect.  |  |                 |                              |                  |          |              |           |
| <b>UNIT 3</b>  | <b>Thermal Physics</b>   |                 | <b>12</b>                    |                  |          |              |           |
| Specific Heat – Specific Heat of a Liquid by Joule’s Electrical Method – Newton’s law of cooling – verification - specific heat capacity of a liquid by cooling– Conduction: Coefficient of thermal conductivity – Lee’s disc method for bad conductors – Black body radiation- Stefan’s law.  |  |                 |                              |                  |          |              |           |
| <b>UNIT 4</b>  | <b>Optics</b>  |                 | <b>12</b>                    |                  |          |              |           |
| Interference – determination of thickness of a thin wire by air wedge method – Diffraction – Fresnel’s and Fraunhofer diffraction – Diffraction grating–Dispersion- Optical instrument: Spectrometer - Determination of refractive index and dispersive power of a prism.  |  |                 |                              |                  |          |              |           |
| <b>UNIT 5</b>  | <b>Atomic and Nuclear physics</b>  |                 | <b>12</b>                    |                  |          |              |           |
| Atom Physics – Electron - spin quantum numbers – Pauli’s exclusion principle – Excitation and ionization potentials – Photoelectric effect –X – rays: continuous and characteristic–applications.<br>Nuclear Physics: Nuclear size –mass – charge – Mass defect – Binding energy – packing fraction –binding energy – nuclear fission – nuclear fusion– chain reaction –nuclear reactor. |  |                 |                              |                  |          |              |           |
| <b>Lecture</b>   | <b>45</b>  | <b>Tutorial</b> | <b>15</b>                    | <b>Practical</b> | <b>0</b> | <b>Total</b> | <b>60</b> |

**Prerequisite** Basic knowledge of physics concepts.

On successful completion of this course, the students will be able to:

| Course Outcomes |   | Domain                     | Level                            |
|-----------------|---|----------------------------|----------------------------------|
| CO 1            | <b>Describe</b> sound, propagation, perception <b>analysis</b> of acoustical wave.  | Cognitive<br>Psychomotor   | Knowledge                        |
| CO 2            | <b>Identify</b> the principles of elasticity, <b>derive</b> expression for twisting couple and <b>determine</b> rigidity modulus of a wire. | Psychomotor:<br>Affective: | Analyze,<br>Mechanism<br>Respond |
| CO 3            | <b>Define</b> heat capacity, <b>recall</b> the concepts of temperature and <b>explain</b> the specific heat capacity.                       | Cognitive<br>Psychomotor   | Evaluate                         |
| CO 4            | <b>Explain</b> interference & diffraction and <b>analysis</b> various application of diffraction and interference.                          | Psychomotor:               | Knowledge,<br>Mechanism          |
| CO 5            | <b>Know</b> the determination of wavelength and size of the micro particle.   | Cognitive<br>Psychomotor   | Comprehension, Evaluate          |
| Ex. No          | <b>Experiments (Any Eight Experiments)</b>  |                            |                                  |
| 1.              | Torsional pendulum – Determination of the rigidity modulus of thin wire.  |                            | CO2                              |
| 2.              | Young’s modulus – Non uniform bending –Pin and microscope.  |                            | CO2                              |
| 3.              | Lee’s disc –Specific heat capacity of the bad conductor.  |                            | CO3                              |

|     |  |     |
|-----|--|-----|
| 4.  | Specific heat capacity of liquid – Newton’s law of cooling                               | CO3 |
| 5.  | Spectrometer – Refractive index of a prism   | CO4 |
| 6.  | Spectrometer grating – a wavelength of various spectral line by normal incidence         | CO4 |
| 7.  | Air wedge – Thickness of wire  | CO4 |
| 8.  | Sonometer – verification of laws   | CO1 |
| 9.  | Determination specific heat capacity using Spherical Calorimeter                         | CO3 |
| 10. | Laser grating – Determination of wave length and To find the size of the micro particle. | CO5 |

|                |          |                 |          |                  |           |              |           |
|----------------|----------|-----------------|----------|------------------|-----------|--------------|-----------|
| <b>Lecture</b> | <b>0</b> | <b>Tutorial</b> | <b>0</b> | <b>Practical</b> | <b>30</b> | <b>Total</b> | <b>30</b> |
|----------------|----------|-----------------|----------|------------------|-----------|--------------|-----------|

| Course Outcomes  |   | Domain    | Level     |           |   |       |    |
|--|---|-----------|-----------|-----------|---|-------|----|
| CO 1   | Utilize Cayley Hamilton Theorem to find inverse and power of a given matrix   | Cognitive | Applying  |           |   |       |    |
| CO 2   | Utilize Newton's method to find the sum of the roots of a given polynomial equation                                 | Cognitive | Applying  |           |   |       |    |
| CO 3   | Apply Descartes' rule of signs technique to find the maximum number of positive real zeros of a polynomial function | Cognitive | Applying  |           |   |       |    |
| CO 4   | Utilize the binomial theorem to expand polynomials and to identify terms for a given polynomial                     | Cognitive | Applying  |           |   |       |    |
| CO 5   | Utilize logarithmic functions to solve equations involving exponential functions                                    | Cognitive | Applying  |           |   |       |    |
| UNIT 1   | <b>MATRICES</b>   |           | <b>12</b> |           |   |       |    |
| Characteristic roots and characteristic vectors - Linear transformation – the characteristic equation of transformation – Cayley-Hamilton theorem – Diagonalisation of a matrix – orthogonal matrices.   |   |           |           |           |   |       |    |
| UNIT 2   | <b>THEORY OF EQUATIONS</b>  |           | <b>12</b> |           |   |       |    |
| Relation between roots and coefficients- symmetric functions of the roots in terms of the coefficients- imaginary roots and irrational roots- sum of the powers of the roots of an equation.   |   |           |           |           |   |       |    |
| UNIT 3   | <b>TRANSFORMATION OF EQUATIONS</b>  |           | <b>12</b> |           |   |       |    |
| Transformation of equations – Reciprocal equations- standard forms to increase and decrease the roots of a given equation by a given quantity- Removal of terms- Descartes' rule of sign.  |   |           |           |           |   |       |    |
| UNIT 4   | <b>BINOMIAL THEOREM</b>   |           | <b>12</b> |           |   |       |    |
| Binomial theorem – positive integral index – the greatest coefficient in the expansion of $(1 + x)^n$ – Binomial theorem for a rational index – particular cases of the Binomial expansions – Numerically greatest terms – summation of a series |   |           |           |           |   |       |    |
| UNIT 5   | <b>EXPONENTIAL AND LOGARITHMIC SERIES</b>   |           | <b>12</b> |           |   |       |    |
| Exponential limit – the exponential theorem – summation – Logarithmic series - modification of the logarithmic series – summation  |   |           |           |           |   |       |    |
| Lecture  | 45  | Tutorial  | 15        | Practical | 0 | Total | 60 |
| <b>Text Books</b>  |   |           |           |           |   |       |    |

| Prerequisite |   |   | Basic knowledge of numbers . |   |   |    |   |

On successful completion of this course, the students will be able to:

| Course Outcomes |   | Domain    | Level         |
|-----------------|---|-----------|---------------|
| <b>CO 1</b>     | <b>Determine</b> if an infinite sequence is bounded, monotonic or oscillating                     | Cognitive | Evaluating    |
| <b>CO 2</b>     | <b>Determine</b> the series whether it is convergent or divergent by using the appropriate tests. | Cognitive | Understanding |
| <b>CO 3</b>     | <b>Determine</b> the series whether it is convergent or divergent by using the appropriate tests. | Cognitive | Evaluating    |
| <b>CO 4</b>     | <b>Identify</b> the sequence of partial sum for a given infinite series                           | Cognitive | Applying      |

|   |   |                 |            |                  |            |              |               |            |            |
|---|---|-----------------|------------|------------------|------------|--------------|---------------|------------|------------|
| <b>CO 5</b>   | <b>Demonstrate</b> the concepts about the Weirstrass inequalities and Cauchy's inequality |                 |            |                  |            | Cognitive    | Understanding |            |            |
| <b>UNIT 1</b>   |   |                 |            |                  |            |              | <b>12</b>     |            |            |
| Sets, Sequences – Aggregate: Upper and lower bounds – Bounded sequences - monotonic sequence always tends to a limit, finite or infinite.   |   |                 |            |                  |            |              |               |            |            |
| <b>UNIT 2</b>   |   |                 |            |                  |            |              | <b>12</b>     |            |            |
| Some general theorems concerning infinite series – series of positive terms – comparison tests – Cauchy's condensation test – D-Alembert's ratio test - Definition of convergence, Divergence and Oscillation- Necessary condition for convergence- convergence of $\sum \frac{1}{n^p}$ and Geometric series.                                       |   |                 |            |                  |            |              |               |            |            |
| <b>UNIT 3</b>   |   |                 |            |                  |            |              | <b>12</b>     |            |            |
| Cauchy's root test and their simple problems - Raabe's test – Absolutely convergent series - Alternative series with simple problems.   |   |                 |            |                  |            |              |               |            |            |
| <b>UNIT 4</b>   |   |                 |            |                  |            |              | <b>12</b>     |            |            |
| Summation of series – Summation by different series – recurring series.   |   |                 |            |                  |            |              |               |            |            |
| <b>UNIT 5</b>   |   |                 |            |                  |            |              | <b>12</b>     |            |            |
| Inequalities- Geometric and Arithmetic means- Weirstrass inequalities- Cauchy's inequality.   |   |                 |            |                  |            |              |               |            |            |
| <b>Lecture</b>  | <b>45</b>   | <b>Tutorial</b> | <b>15</b>  | <b>Practical</b> | <b>0</b>   | <b>Total</b> | <b>60</b>     |            |            |

On successful completion of this course, the students will be able to:

| <b>Course Outcomes</b> |   | <b>Domain</b> | <b>Level</b>                  |
|------------------------|---|---------------|-------------------------------|
| <b>CO 1</b>            | <b>Recall</b> Ohms law, <b>learn</b> about resistors and capacitors and <b>apply</b> knowledge to calibrate low voltmeter using potentiometer.                    | Cognitive     | Understand                    |
| <b>CO 2</b>            | <b>Recall</b> Biot–Savart's law, <b>explain</b> current passing through straight conductor, coil and <b>distinguish</b> various properties of magnetic materials. | Cognitive     | Remember, understand, analyze |
| <b>CO 3</b>            | <b>Recall</b> basic of semiconductor <b>distinguish</b> different types of diodes and their applications.   | Cognitive     | Understand<br>apply           |
| <b>CO 4</b>            | <b>Examine</b> the structure of number systems, <b>perform</b> the conversion among different number systems and <b>discuss</b> operation of all the gates.       | Cognitive     | Understand<br>Apply           |
| <b>CO 5</b>            | <b>Illustrate</b> reduction of logical expressions <b>using</b> Boolean algebra and k-map.  | Cognitive     | Understand<br>Apply           |
| <b>UNIT I</b>          | <b>ELECTRICITY</b>  |               | <b>9+3</b>                    |

Ohms law – Law of resistance in series in parallel – Specific resistance – Capacitors: capacitors in series and parallel – Kirchoff's laws – Wheatstone's Bridge – Carey Foster's bridge – measurement of specific resistance - Potentiometer – Principle – Calibration of voltmeter.

Electromagnetic induction: Laws of electromagnetic induction – self-induction - Mutual induction of coil.

|   |                      |  |            |
|---|----------------------|--|------------|
| <b>UNIT II</b>  | <b>MAGNETISM</b>     |  | <b>9+3</b> |
| Biot–Savart's law – Ampere's circuital law – Magnetic properties of materials: magnetic intensity, magnetic induction, permeability, magnetic susceptibility – brief introduction of dia, para and ferro magnetic materials. – Magnetic field due to current carrying conductor – field along the axis of a coil. |                      |  |            |
| <b>UNIT III</b>   | <b>SEMICONDUCTOR</b> |  | <b>9+3</b> |
| Properties of semiconductors – Types of semiconductors– PN junction diode –V I Characteristics– full wave   |                      |  |            |

and Bridge rectifiers – Zener diode– characteristics of Zener diode –Zener diode as voltage regulator– Photo Diode and Uses.

|                |                                      |            |
|----------------|--------------------------------------|------------|
| <b>UNIT IV</b> | <b>NUMBER SYSTEM AND LOGIC GATES</b> | <b>9+3</b> |
|----------------|--------------------------------------|------------|

**Number System:** Decimal – Binary – Octal – Hexadecimal Number Systems – Binary Arithmetic Operations – Addition – Subtraction – Multiplication – Division – 1’s Complement – 2’s Complement Binary Operation. Logic Gates: Basic Logic Gates AND, OR, NOT, NAND, NOR, XOR, X – NOR – Universal Building Blocks.

|               |  |            |
|---------------|--|------------|
| <b>UNIT V</b> | <b>BOOLEAN ALGEBRA AND KARNAUGH MAPS</b> | <b>9+3</b> |
|---------------|--|------------|

Basic law of Boolean algebra – Demorgan’s theorems – Duality Theorem – Reducing Boolean expressions Using Boolean laws – Minterms – Maxterms – Sum of Products – Products of Sums. 3 Variable K – Map – 4 - Variable K – Map sum of product only –Simplification of K-Maps.

|                |           |                 |           |                  |          |              |           |
|----------------|-----------|-----------------|-----------|------------------|----------|--------------|-----------|
| <b>Lecture</b> | <b>45</b> | <b>Tutorial</b> | <b>15</b> | <b>Practical</b> | <b>0</b> | <b>Total</b> | <b>60</b> |
|----------------|-----------|-----------------|-----------|------------------|----------|--------------|-----------|

### SEMESTER III

|  |   |          |  |  |  |               |               |          |          |
|--|---|----------|--|--|--|---------------|---------------|----------|----------|
| <b>Course Name</b>   |   |          | <b>Differential Equations and Laplace Transforms</b> |  |  | <b>L</b>      | <b>T</b>      | <b>P</b> | <b>C</b> |
| <b>Course Code</b>   |   |          | <b>XMT301</b>  |  |  | <b>3</b>      | <b>1</b>      | <b>0</b> | <b>4</b> |
| <b>C</b>   | <b>P</b>  | <b>A</b> |  |  |  | <b>L</b>      | <b>T</b>      | <b>P</b> | <b>H</b> |
| <b>4</b>   | <b>0</b>  | <b>0</b> |  |  |  | <b>3</b>      | <b>2</b>      | <b>0</b> | <b>5</b> |
| <b>Prerequisite</b>  |   |          | <b>Knowledge of Ordinary and Partial Derivatives</b> |  |  |               |               |          |          |
| On successful completion of this course, the students will be able to:   |   |          |  |  |  |               |               |          |          |
| <b>Course Outcomes</b>   |   |          |  |  |  | <b>Domain</b> | <b>Level</b>  |          |          |
| <b>CO1</b>   | <b>Identify</b> the solution of a given partial differential equation which is in the form of Clairaut's. |          |  |  |  | Cognitive     | Applying      |          |          |
| <b>CO2</b>   | <b>Demonstrate</b> the methods for finding particular integral of the partial differential equation       |          |  |  |  | Cognitive     | Understanding |          |          |
| <b>CO3</b>   | <b>Utilize</b> the concepts of variation of parameters for solving a given partial differential equations |          |  |  |  | Cognitive     | Applying      |          |          |
| <b>CO4</b>   | <b>Solve</b> a given partial differential equation using Lagrange's Method                                |          |  |  |  | Cognitive     | Applying      |          |          |
| <b>CO5</b>   | <b>Solve</b> second order differential equations using Laplace Transforms                                 |          |  |  |  | Cognitive     | Applying      |          |          |
| <b>UNIT 1</b>  |   |          |  |  |  |               | <b>9+3</b>    |          |          |
| Formation of differential equation – equation of the first order and the first degree - exact differential equation – rules for finding integrating factors – Equation of first order, but of higher degree - Clairaut's form. |   |          |  |  |  |               |               |          |          |
| <b>UNIT 2</b>  |   |          |  |  |  |               | <b>9+3</b>    |          |          |
| Linear differential equations with constant coefficients: Particular Integral – methods for finding P.I. - linear equations with variable coefficients.  |   |          |  |  |  |               |               |          |          |
| <b>UNIT 3</b>  |   |          |  |  |  |               | <b>9+3</b>    |          |          |
| Variation of parameters- Total differential equation $Pdx+Qdy+Rdz=0$ – rules for integrating $Pdx + Qdy + Rdz = 0$   |   |          |  |  |  |               |               |          |          |
| <b>UNIT</b>  |   |          |  |  |  |               | <b>9+3</b>    |          |          |

|  |             |            |            |            |            |            |            |            |            |
|--|-------------|------------|------------|------------|------------|------------|------------|------------|------------|
| 4  |             |            |            |            |            |            |            |            |            |
| Partial Differential Equation- Four standard types- Lagrange's method for solving $Pq + Qq = R$  |             |            |            |            |            |            |            |            |            |
| UNIT 5   |             |            |            |            |            |            | 9+3        |            |            |
| Laplace transform – Laplace transform of periodic functions – Some general theorems - Inverse transforms<br>- Solving second order differential equations using Laplace transform - problems   |             |            |            |            |            |            |            |            |            |
| Lecture  | 45          | Tutorial   | 15         | Practical  | 0          | Total      | 60         |            |            |

(11<sup>th</sup> revised edition)

Unit I : Chapter 5 (Sec. 5.1 - 5.4)

Unit II : Chapter 5 (Sec. 5.5- 5.5.6)

Chapter 6 (Sec. 6.1 - 6.5)

Unit III: Chapter 7 (Sec.7.1-7.3.1)

Chapter 8 (Sec.8.4, 8.4.1, 8.4.2, 8.4.5, 8.4.6, 8.5, 8.5.2 - 8.5.5)

Unit IV: Chapter 9 (Sec.9.2, 9.2.1-9.2.3, 9.2.5, 9.2.11, 9.3, 9.5, 9.8)

Unit V : Chapter 10 (Sec.10.2-10.4& 10.7)

Chapter 11 (Sec.11.1-11.2.2)

**Prerequisite** Basic higher secondary level mathematical knowledge.

On successful completion of this course, the students will be able to:

| <b>Course Outcomes</b> |  | <b>Domain</b> | <b>Level</b> |
|------------------------|--|---------------|--------------|
| <b>CO1</b>             | <b>Apply</b> the basic concepts of profit and loss, ratio & proportion to solve the problems | Cognitive     | Applying     |
| <b>CO2</b>             | <b>Apply</b> the basic concepts of partnership, chain rule to solve the problems             | Cognitive     | Applying     |
| <b>CO3</b>             | <b>Explain</b> the basic concepts of time & work, pipes & cisterns to                        | Cognitive     | Applying     |

|               |  |           |          |
|---------------|--|-----------|----------|
|               | solve the problems   |           |          |
| <b>CO4</b>    | <b>Explain</b> the basic concepts of time & distance and problems on trains to solve the problems      | Cognitive | Applying |
| <b>CO5</b>    | <b>Explain</b> the basic concepts of boats and streams and allegation or mixture to solve the problems | Cognitive | Applying |
| <b>UNIT 1</b> |  |           | <b>6</b> |

Profit & Loss, Ratio & Proportion.

|               |  |          |
|---------------|--|----------|
| <b>UNIT 2</b> |  | <b>6</b> |
|---------------|--|----------|

Partnership, Chain Rule.

|               |  |          |
|---------------|--|----------|
| <b>UNIT 3</b> |  | <b>6</b> |
|---------------|--|----------|

Time & work, Pipes & Cisterns

|               |  |          |
|---------------|--|----------|
| <b>UNIT 4</b> |  | <b>6</b> |
|---------------|--|----------|

Times & Distance, Problems on Trains.

|               |  |          |
|---------------|--|----------|
| <b>UNIT 5</b> |  | <b>6</b> |
|---------------|--|----------|

Boats & Streams, Alligation or Mixture.

|                |           |                 |          |                  |          |              |           |
|----------------|-----------|-----------------|----------|------------------|----------|--------------|-----------|
| <b>Lecture</b> | <b>30</b> | <b>Tutorial</b> | <b>0</b> | <b>Practical</b> | <b>0</b> | <b>Total</b> | <b>30</b> |

**Prerequisite** Basic knowledge about environment.

On successful completion of this course, the students will be able to:

| <b>Course Outcomes</b> |  | <b>Domain</b> | <b>Level</b> |
|------------------------|--|---------------|--------------|
| <b>CO1</b>             | <b>Understanding</b> the concepts of application of types Of disaster preparedness | Cognitive     | Apply        |
| <b>CO2</b>             | <b>Infer</b> the end conditions & <b>Discuss</b> the failures due to disaster.     | Cognitive     | Analyze      |
| <b>CO3</b>             | <b>Understanding</b> of importance of seismic waves occurring globally             | Cognitive     | Analyze      |
| <b>CO4</b>             | <b>Estimate</b> Disaster and mitigation problems.                                  | Cognitive     | Apply        |
| <b>CO5</b>             | Keen <b>knowledge</b> on essentials of risk reduction                              | Cognitive     | Apply        |
| <b>UNIT 1</b>          | <b>INTRODUCTION</b>  |               | <b>3</b>     |

Introduction–Disaster preparedness–Goals and objectives of ISDR Programme–Risk identification – Risk sharing – Disaster and development: Development plans and disaster management– Alternative to dominant approach – disaster – development linkages – Principle of risk partnership.

|               |   |          |
|---------------|---|----------|
| <b>UNIT 2</b> | <b>APPLICATION OF TECHNOLOGY IN DISASTER RISK REDUCTION</b> | <b>3</b> |
|---------------|---|----------|

Application of various technologies: Databases–RDBMS–Management Information Systems–Decision support system and other systems – Geographic information systems – Intranets and extranets–video tele conferencing. Trigger mechanism–Remote sensing–an insight–contribution of remote sensing and GIS–Case study.

|               |                                    |          |
|---------------|------------------------------------|----------|
| <b>UNIT 3</b> | <b>AWARENESS OF RISK REDUCTION</b> | <b>3</b> |
|---------------|------------------------------------|----------|

Trigger mechanism–constitution of trigger mechanism–risk reduction by education–disaster Information network–risk reduction by public awareness.

|               |   |          |
|---------------|---|----------|
| <b>UNIT 4</b> | <b>DEVELOPMENT PLANNING ON DISASTER</b> | <b>3</b> |
|---------------|---|----------|

Implication of development planning–Financial arrangements–Areas of improvement–Disaster Preparedness–Community based disaster management–Emergency response.

|   |                   |                 |            |                  |            |              |            |            |            |
|---|-------------------|-----------------|------------|------------------|------------|--------------|------------|------------|------------|
| <b>UNIT 5</b>   | <b>SEISMICITY</b> |                 |            |                  |            |              | <b>3</b>   |            |            |
| Seismic waves–Earth quakes and faults– measures of an earth quake, magnitude and intensity–ground damage– Tsunamis and earth quakes.  |                   |                 |            |                  |            |              |            |            |            |

### COs vs POs

|                         | PO 1 | PO2 | PO3 | PO4 | PO5 | PO6 | PO7 | PO8 | PO9 |
|-------------------------|------|-----|-----|-----|-----|-----|-----|-----|-----|
| CO 1                    | 3    | 3   | 3   | 2   | 3   | 1   | 1   | 1   | 1   |
| CO 2                    | 3    | 3   | 3   | 2   | 3   | 1   | 1   | 1   | 1   |
| CO 3                    | 3    | 3   | 2   | 1   | 3   | 1   | 0   | 1   | 1   |
| CO 4                    | 3    | 3   | 2   | 1   | 3   | 1   | 0   | 1   | 1   |
| CO 5                    | 3    | 3   | 2   | 1   | 3   | 1   | 0   | 1   | 1   |
| <b>TOTAL</b>            | 15   | 15  | 12  | 7   | 15  | 5   | 2   | 5   | 5   |
| <b>SCALED<br/>VALUE</b> | 3    | 3   | 3   | 2   | 3   | 1   | 1   | 1   | 1   |

0 - No Relation, 1 – Low Relation, 2- Medium Relation, 3- High Relation

1-5 →1, 6-10 →2, 11-15 →3

|                    |          |          |                  |          |          |          |          |
|--------------------|----------|----------|------------------|----------|----------|----------|----------|
| <b>Course Name</b> |          |          | <b>Mechanics</b> | <b>L</b> | <b>T</b> | <b>P</b> | <b>C</b> |
| <b>Course Code</b> |          |          | <b>XMT402</b>    | <b>3</b> | <b>1</b> | <b>0</b> | <b>4</b> |
| <b>C</b>           | <b>P</b> | <b>A</b> |                  | <b>L</b> | <b>T</b> | <b>P</b> | <b>H</b> |
| <b>4</b>           | <b>0</b> | <b>0</b> |                  | <b>3</b> | <b>2</b> | <b>0</b> | <b>5</b> |

**Prerequisite** Basic Physics knowledge

On successful completion of this course, the students will be able to:

| <b>Course Outcomes</b>   |  | <b>Domain</b> | <b>Level</b>  |
|--|--|---------------|---------------|
| <b>CO1</b>   | <b>Explain</b> about forces, velocity, acceleration, moments, couples, friction etc., in trigonometrically and geometrically | Cognitive     | Understanding |
| <b>CO2</b>   | <b>Explain</b> Newton's laws of motion and equilibrium of forces acting on a rigid body                                      | Cognitive     | Understanding |
| <b>CO3</b>   | <b>Apply</b> geometrical concepts in parallel forces, moments, and couples in physics problems                               | Cognitive     | Applying      |
| <b>CO4</b>   | <b>Analyze</b> for Newton's laws of motion and projectiles   | Cognitive     | Analyzing     |
| <b>CO5</b>   | <b>Analyze</b> the equation of central orbits  | Cognitive     | Analyzing     |
| <b>UNIT 1</b>  |  |               | <b>12</b>     |
| Basic concepts and principles –Forces acting at a point-Lami's theorem and applications-Parallel forces –Like and unlike parallel forces-Moment of a force– Couples– Related problems. |  |               |               |
| <b>UNIT 2</b>  |  |               | <b>12</b>     |

Equilibrium of three forces acting on a rigid body-Friction-Laws of friction-Angle of friction-Cone of friction- Properties and related problems.

**UNIT 3** **12**

Motion in a straight line under uniform acceleration - Newton's laws of motion. Projectiles: Definition-Path of projectile-Range on an inclined plane- Properties and problems.

**UNIT 4** **12**

Impulse and Impact: Collision of elastic Bodies-Direct and oblique impact-Loss of Kinetic Energy-Related Properties and Simple Problems.

**UNIT 5** **12**

Central Orbits: Motion under the action of central Forces - Properties and related Problems -Differential equation of central orbit-Pedal equation of central orbit-Velocities in a central orbit- Law of forces- Properties and related Problems

|                |           |                 |           |                  |          |              |           |
|----------------|-----------|-----------------|-----------|------------------|----------|--------------|-----------|
| <b>Lecture</b> | <b>45</b> | <b>Tutorial</b> | <b>15</b> | <b>Practical</b> | <b>0</b> | <b>Total</b> | <b>60</b> |
|----------------|-----------|-----------------|-----------|------------------|----------|--------------|-----------|

**Prerequisite** Basic knowledge of random variables and distributions.

On successful completion of this course, the students will be able to:

| Course Outcomes |  | Domain    | Level         |
|-----------------|--|-----------|---------------|
| CO1             | <b>Explain</b> the test of significance for large sampling | Cognitive | Understanding |
| CO2             | <b>Explain</b> the chi square distribution                 | Cognitive | Understanding |
| CO3             | <b>Explain</b> the Student's t-distribution                | Cognitive | Understanding |
| CO4             | <b>Explain</b> the F distribution                          | Cognitive | Understanding |
| CO5             | <b>Classify</b> the various types of analysis of variance  | Cognitive | Understanding |
| <b>UNIT 1</b>   | <b>Large sampling theory</b>                               |           | <b>12</b>     |

Types of sampling- test of significance- null hypothesis- error in sampling- critical regions and level of significance- test of significance for large- samples- sampling of attributes.

|               |   |           |
|---------------|---|-----------|
| <b>UNIT 2</b> | <b><math>\chi^2</math> Distribution</b> | <b>12</b> |
|---------------|---|-----------|

$\chi^2$  - variates- derivation of the  $\chi^2$  distribution (Method of M.G.F only)- M.G.F, C.G.F- mode and skewness - additive property -  $\chi^2$  probability curve - Theorems on  $\chi^2$  distribution - Application of  $\chi^2$  - distribution: Inference about a population variance – goodness of fit test.

|               |                                 |           |
|---------------|---------------------------------|-----------|
| <b>UNIT 3</b> | <b>Student's t-distribution</b> | <b>12</b> |
|---------------|---------------------------------|-----------|

Derivation of t-distribution - constants of t-distribution- limiting of t-distribution- application of t-distribution - test of single mean, difference of mean.

|               |                        |           |
|---------------|------------------------|-----------|
| <b>UNIT 4</b> | <b>F- distribution</b> | <b>12</b> |
|---------------|------------------------|-----------|

Derivation of F-distribution- constant of F-distribution- mode of F-distribution- application of F-distribution - test for equality of two population variance (only simple problems of F- distribution). – Relation between t and F and relation between F and  $\chi^2$  tests.

|               |                             |           |
|---------------|-----------------------------|-----------|
| <b>UNIT 5</b> | <b>Analysis of Variance</b> | <b>12</b> |
|---------------|-----------------------------|-----------|

Introduction - one-way, two-way classifications – Experimental designs: Randomized block design - Latin

squares.

|                |           |                 |           |                  |          |              |           |
|----------------|-----------|-----------------|-----------|------------------|----------|--------------|-----------|
| <b>Lecture</b> | <b>45</b> | <b>Tutorial</b> | <b>15</b> | <b>Practical</b> | <b>0</b> | <b>Total</b> | <b>60</b> |
|----------------|-----------|-----------------|-----------|------------------|----------|--------------|-----------|

### Text Books

Fundamentals of mathematical statistics, S.C Gupta, V. K. Kapoor (11<sup>th</sup> edition) - Sultan Chand & Sons 2002.

Unit I : Chapter: 14 (Sec. 14.1 – 14.7.2)

Unit II : Chapter: 15 (Sec. 15.1- 15.4, 15.6(15.6.1-15.6.2))

Unit III :Chapter: 16 (16.2, 16.3(16.3.1, 16.3.2))

Unit IV :Chapter: 16(16.5- 16.8)

‘Statistical Methods’ Vol. II, Dr. S.P. Gupta, Sultan Chand & Sons 2008.

Unit V:Chapter: 5, 6

### Reference

Dr. P.R. Vittal “Mathematical Statistics” Margham Publications Chennai,2009.

| <b>PREREQUISITE</b>   |   | Knowledge in the basic properties of real numbers |                      |                  |          |               |               |          |          |
| On successful completion of this course, the students will be able to:  |   |   |                      |                  |          |               |               |          |          |
| <b>Course Outcomes</b>  |   |   |                      |                  |          | <b>Domain</b> | <b>Level</b>  |          |          |
| <b>CO1</b>  | <b>Explain</b> the basics of real numbers.  |   |                      |                  |          | Cognitive     | Understanding |          |          |
| <b>CO2</b>  | <b>Explain</b> the neighborhoods and limit points.  |   |                      |                  |          | Cognitive     | Understanding |          |          |
| <b>CO3</b>  | <b>Demonstrate</b> about continuity and discontinuity of various functions in different contexts. |   |                      |                  |          | Cognitive     | Understanding |          |          |
| <b>CO4</b>  | <b>Demonstrate</b> about derivatives and continuity   |   |                      |                  |          | Cognitive     | Understanding |          |          |
| <b>CO5</b>  | <b>Explain</b> the Riemann integration and mean value theorems.                                   |   |                      |                  |          | Cognitive     | Understanding |          |          |
| <b>UNIT 1</b>   | <b>Real numbers</b>   |   |                      |                  |          |               | <b>9 + 3</b>  |          |          |
| The field axioms- Field Properties-Order in R- Absolute value- Completeness – Representation of Real numbers on a straight line – Intervals – Countable and Uncountable sets.   |   |   |                      |                  |          |               |               |          |          |
| <b>UNIT 2</b>   | <b>Neighborhoods and limit points</b>   |   |                      |                  |          |               | <b>9 + 3</b>  |          |          |
| Open sets – Closed sets –Limit points of a set – Closure of a set.  |   |   |                      |                  |          |               |               |          |          |
| <b>UNIT 3</b>   | <b>Limits and Continuity</b>  |   |                      |                  |          |               | <b>9 + 3</b>  |          |          |
| Limits – Continuous functions – Types of discontinuities- Algebra of Continuous functions – Boundedness of continuous functions.  |   |   |                      |                  |          |               |               |          |          |
| <b>UNIT 4</b>   | <b>Derivatives</b>  |   |                      |                  |          |               | <b>9 + 3</b>  |          |          |
| Introduction – Derivability and continuity- Algebra of derivatives – Inverse function theorem for derivatives – Darboux’s theorem.  |   |   |                      |                  |          |               |               |          |          |
| <b>UNIT 5</b>   |   |   |                      |                  |          |               | <b>9 + 3</b>  |          |          |
| Riemann Integration- Definition – Daurboux’s theorem – conditions for integrability – properties of integrable functions – continuity and derivability of integral functions – Mean value theorems –the fundamental theorem of Calculus and the first mean value theorem. |   |   |                      |                  |          |               |               |          |          |
| <b>Lecture</b>  | <b>45</b>   | <b>Tutorial</b>                                   | <b>15</b>            | <b>Practical</b> | <b>0</b> | <b>Total</b>  | <b>60</b>     |          |          |
| <b>Text Books</b>   |   |   |                      |                  |          |               |               |          |          |

| Recurrence relations and generating function: Recurrence-an introduction-polynomials and their evaluations- Recurrence relations- solution of finite order Homogeneous (linear) Relations- Solution of Non-Homogeneous relations.                 |  |                                    |                             |                  |          |               |              |          |          |
| <b>UNIT 2</b>   |  |                                    |                             |                  |          |               | <b>9 + 3</b> |          |          |
| Logic: TF- statements – connectives- atomic and compound statements-well formed (statements) Formulae – parsing trees.  |  |                                    |                             |                  |          |               |              |          |          |
| <b>UNIT 3</b>   |  |                                    |                             |                  |          |               | <b>9 + 3</b> |          |          |
| Logic: Truth table of a formula – Tautology- Tautological Implications and Equivalence of Formulae - Replacement process- Functionally Complete sets of connectives and Duality law.  |  |                                    |                             |                  |          |               |              |          |          |
| <b>UNIT 4</b>   |  |                                    |                             |                  |          |               | <b>9 + 3</b> |          |          |
| Lattices and Boolean Algebras: Lattices- some properties of lattices- New lattices- Modular and distributive lattices.  |  |                                    |                             |                  |          |               |              |          |          |
| <b>UNIT 5</b>   |  |                                    |                             |                  |          |               | <b>9 + 3</b> |          |          |
| Automata and Languages: Finite Automata – definition of finite automation – Representation of finite automation Acceptability of a string by a finite automation - Languages accepted by a finite automation - Non-deterministic finite automata. |  |                                    |                             |                  |          |               |              |          |          |
| <b>Lecture</b>  | <b>45</b>  | <b>Tutorial</b>                    | <b>15</b>                   | <b>Practical</b> | <b>0</b> | <b>Total</b>  | <b>60</b>    |          |          |

**Text Book**

“Discrete Mathematics” by Dr. M.K. Venkatraman, Dr.N. Sridharan, N. Chandrasekeran, the National Publishing Company, 2003.

Unit I :Chapter: 5 Sec 1-5 (Pages: 5.01- 5.19)

Unit II : Chapter: 9 Sec 1- 5 (Pages: 9.1- 9.20)

Unit III : Chapter: 9 Sec 6- 10 (Pages: 9.21- 9.42)

Unit IV : Chapter: 10 Sec 1- 4 (Pages: 10.1- 10.32)

Unit V : Chapter: 12 Sec 1 –7 (Pages: 12.1- 12.16)

| <b>Course Outcomes</b>  |  |                 |                      |                  |          | <b>Domain</b> | <b>Level</b> |               |          |
| <b>CO1</b>  | <b>Apply</b> the Euclidean algorithm to compute the gcd of two integers.       |                 |                      |                  |          | Cognitive     | Applying     |               |          |
| <b>CO2</b>  | <b>Apply</b> the Dirichlet product to Mobious functions.                       |                 |                      |                  |          | Cognitive     | Applying     |               |          |
| <b>CO3</b>  | <b>Apply</b> the Dirichlet multiplication to Mangold functions.                |                 |                      |                  |          | Cognitive     | Applying     |               |          |
| <b>CO4</b>  | <b>Solve</b> the number theoretic problems on averages arithmetic functions    |                 |                      |                  |          | Cognitive     | Applying     |               |          |
| <b>CO5</b>  | <b>Solve</b> the linear congruences using the concepts of congruence relations |                 |                      |                  |          | Cognitive     | Applying     |               |          |
| <b>UNIT 1</b>   |  |                 |                      |                  |          |               |              | <b>12 + 3</b> |          |
| The Fundamental Theorem of Arithmetic: Introduction- Divisibility - Greatest Common divisor - Prime numbers - The fundamental theorem of arithmetic - The series of reciprocals of the primes - The Euclidean algorithm - The greatest Common divisor of more than two numbers.       |  |                 |                      |                  |          |               |              |               |          |
| <b>UNIT 2</b>   |  |                 |                      |                  |          |               |              | <b>12 + 3</b> |          |
| Arithmetical Functions and Dirichlet multiplication: The mobius function (n) - The Euler totient function- A relation connecting and - A product formula for (n) - the Dirichlet product of arithmetical functions - Dirichlet inverses and the Mobius inversion formula.             |  |                 |                      |                  |          |               |              |               |          |
| <b>UNIT 3</b>   |  |                 |                      |                  |          |               |              | <b>12 + 3</b> |          |
| The Mangoldt function (n) - multiplicative functions- Multiplicative function and Dirichlet multiplication - The inverse of a completely multiplicative function - Liouville's function A (n) - the divisor functions $\sigma_a(n)$ - Generalized convolutions - formal power series. |  |                 |                      |                  |          |               |              |               |          |
| <b>UNIT 4</b>   |  |                 |                      |                  |          |               |              | <b>12 + 3</b> |          |
| Averages of Arithmetical Functions: The big oh notation Asymptotic equality of functions – Euler’s summation formula - some elementary asymptotic formulas - the average order of d (n).  |  |                 |                      |                  |          |               |              |               |          |
| <b>UNIT 5</b>   |  |                 |                      |                  |          |               |              | <b>12 + 3</b> |          |
| Congruences: Definition and basic properties of congruence’s - Residue classes complete residue systems - Linear congruence’s – solved problems and examples.   |  |                 |                      |                  |          |               |              |               |          |
| <b>Lecture</b>  | <b>60</b>  | <b>Tutorial</b> | <b>15</b>            | <b>Practical</b> | <b>0</b> | <b>Total</b>  | <b>75</b>    |               |          |

**Text Book**

Analytic Number Theory by Tom.M.Apostol, Springer Science & Buisness Media, 2013.

Unit I Chapter 1 (1.1 - 1.8)

Unit II Chapter 2 (2.1 - 2.7)

Unit III Chapter 3 (2.8 – 2.15)

Unit IV Chapter 5 (3.1- 3.5)

Unit V Chapter 9 (5.1- 5.3)

On successful completion of this course, the students will be able to:

| <b>Course Outcomes</b> |   | <b>Domain</b> | <b>Level</b>  |
|------------------------|---|---------------|---------------|
| <b>CO1</b>             | <b>Explain</b> the basic concepts graphs and operation on graph                       | Cognitive     | Understanding |
| <b>CO2</b>             | <b>Demonstrate</b> the concepts of walks, trails, paths, connectedness and components | Cognitive     | Understanding |
| <b>CO3</b>             | <b>Infer</b> the characterization of trees and centre of a tree                       | Cognitive     | Understanding |
| <b>CO4</b>             | <b>Outline</b> the basics of matchings and planarity                                  | Cognitive     | Understanding |
| <b>CO5</b>             | <b>Relate</b> the four colour theorem and five colour theorem                         | Cognitive     | Understanding |
| <b>UNIT 1</b>          | <b>Graphs and Subgraphs</b>   |               | <b>12 + 3</b> |

Introduction, definition – Degrees, subgraphs, Isomorphism, Ramsey numbers – Independent sets and coverings – Intersection graphs and line graphs – matrices and operations on graphs

|               |   |  |               |
|---------------|---|--|---------------|
| <b>UNIT 2</b> | <b>Degree sequences and connectedness</b> |  | <b>12 + 3</b> |
|---------------|---|--|---------------|

Degree sequences and graphic sequences – Walks, trails and paths – connectedness and components – Blocks and connectivity

|               |   |  |               |
|---------------|---|--|---------------|
| <b>UNIT 3</b> | <b>Eulerian and Hamiltonian Graphs, Trees</b> |  | <b>12 + 3</b> |
|---------------|---|--|---------------|

Eulerian and Hamiltonian Graphs – Trees – characterization of trees – centre of a tree

|               |                                |  |               |
|---------------|--------------------------------|--|---------------|
| <b>UNIT 4</b> | <b>Matchings and Planarity</b> |  | <b>12 + 3</b> |
|---------------|--------------------------------|--|---------------|

Matchings - Matchings in Bipartite graphs – Planarity – Definition – characterization of planar graphs – Thickness, crossing and outer planarity

|               |                      |  |               |
|---------------|----------------------|--|---------------|
| <b>UNIT 5</b> | <b>Colourability</b> |  | <b>12 + 3</b> |
|---------------|----------------------|--|---------------|

Chromatic number- Chromatic index – Five colour theorem – Four colour problem - Chromatic Polynomials

|                |           |                 |           |                  |          |              |           |
|----------------|-----------|-----------------|-----------|------------------|----------|--------------|-----------|
| <b>Lecture</b> | <b>60</b> | <b>Tutorial</b> | <b>15</b> | <b>Practical</b> | <b>0</b> | <b>Total</b> | <b>75</b> |
|----------------|-----------|-----------------|-----------|------------------|----------|--------------|-----------|

On successful completion of this course, the students will be able to:

| <b>Course Outcomes</b>  |  |  | <b>Domain</b> | <b>Level</b>  |
|---|--|--|---------------|---------------|
| <b>CO1</b>  | <b>Define</b> the Fuzzy sets , Fuzzy graphs and their principles.  |  | Cognitive     | Understanding |
| <b>CO2</b>  | <b>Understand</b> Fuzzy relations and Fuzzy graphs.  |  | Cognitive     | Analyzing     |
| <b>CO3</b>  | <b>Analyze</b> Fuzzy quantifiers and Multi conditional approximate reasoning   |  | Cognitive     | Analyzing     |
| <b>CO4</b>  | <b>Explain</b> the Fuzzification. Defuzzification and the various Defuzzification methods                                |  | Cognitive     | Understanding |
| <b>CO5</b>  | <b>Apply</b> the Fuzzy ranking methods in Civil Engineering, Mechanical Engineering, Industrial Engineering and Medicine |  | Cognitive     | Applying      |
| <b>UNIT 1</b>   | <b>Fuzzy sets</b>  |  |               | <b>12+ 3</b>  |
| Basic Definitions – Basic set theoretic operations for Fuzzy sets – Extensions: Types of Fuzzy sets – algebraic operations - Extension Principle: operation for type 2 fuzzy sets – algebraic operations with fuzzy numbers – special extended operations – Extended operations for LR-representation of fuzzy sets.  |  |  |               |               |
| <b>UNIT 2</b>   | <b>Fuzzy relations and Fuzzy Graphs</b>  |  |               | <b>12+ 3</b>  |
| Fuzzy relations and fuzzy sets – Composition of Fuzzy relations – Min-max composition and its properties – Fuzzy graphs – Special fuzzy relation - Possibility Theory – Possibility of fuzzy events – Possibility Vs Probability.   |  |  |               |               |
| <b>UNIT 3</b>   | <b>Fuzzy Logic</b>   |  |               | <b>12+ 3</b>  |
| Classical logic: An overview – Multi valued logic – Fuzzy propositions – Fuzzy quantifiers – Linguistic hedges – Inference from conditional fuzzy propositions– <b>Approximate reasoning</b> : An overview of fuzzy expert system – Fuzzy implications and their selection – Multi conditional approximate reasoning – The role of fuzzy relation equation. |  |  |               |               |
| <b>UNIT 4</b>   | <b>Fuzzy Systems</b>   |  |               | <b>12+ 3</b>  |
| Fuzzy controllers: An overview – Fuzzy rule base. Fuzzy inference engine. Fuzzification. Defuzzification and the various Defuzzification methods (the centre of area, the centre of maxima and the mean of maxima methods)  |  |  |               |               |
| Fuzzy controllers: An example – Fuzzy systems and Neural Networks – Automata – Dynamical Systems.   |  |  |               |               |
| <b>UNIT 5</b>   | <b>Decision making in Fuzzy Environment</b>  |  |               | <b>12+ 3</b>  |
| Individual decision making – Multiperson decision making – Multicriteria decision making – Multi stage decision making – Fuzzy ranking methods – Fuzzy linear programming – Applications in Civil Engineering,  |  |  |               |               |

Mechanical Engineering, Industrial Engineering and Medicine.

**PREREQUISITE:** Basic concepts of sets, groups and rings

**COURSE OUTCOMES:**

| <b>Course outcomes:</b>   | <b>Domain</b> | <b>Level</b>                 |
|---|---------------|------------------------------|
| <b>Define and Explain</b> Subgroups, Normal subgroups and Quotient Groups, Lagrange's Theorem.  | Cognitive     | Remembering<br>Understanding |
| <b>Define and Explain</b> Homomorphism Theorems, Isomorphism Theorems, Automorphisms Theorems, Cayley's theorem. Permutation groups, Another Counting principle.            | Cognitive     | Remembering<br>Understanding |
| <b>Define and Explain</b> Sylow's Theorems and their simple applications, Direct Products: External and Internal, Finite Abelian Groups.                                    | Cognitive     | Remembering<br>Understanding |
| <b>Define and Explain</b> Rings, Subrings, Ideals, Factor Rings, Homomorphism and Integral Domains. Maximal and prime ideals. The field of Quotients of an integral domain. | Cognitive     | Remembering<br>Understanding |
| <b>Define and Explain</b> Euclidean Ring, A Particular Euclidean Ring, Polynomial Ring, and Polynomial over the Rational Field, Polynomial Rings over Commutative Rings.    | Cognitive     | Remembering<br>Understanding |

**UNIT I** **15**

Definition & examples: Groups, Subgroups, Normal subgroups and Quotient Groups, Lagrange's Theorem.

**UNIT II** **15**

Homomorphism Theorems, Isomorphism Theorems, Automorphisms Theorems, Cayley's theorem. Permutation groups, Another Counting principle.

**UNIT III** **15**

Sylow's Theorems and their simple applications, Direct Products: External and Internal, Finite Abelian Groups.

**UNIT IV** **15**

Rings, Subrings, Ideals, Factor Rings, Homomorphism, Integral Domains. Maximal and prime ideals. The field of Quotients of an integral domain.

**UNIT V** **15**

Euclidean Ring, A Particular Euclidean Ring, Polynomial Ring, Polynomial over the Rational Field, Polynomial Rings over Commutative Rings.

| <b>LECTURE</b> | <b>TUTORIAL</b> | <b>TOTAL</b> |
| <b>60</b>      | <b>15</b>       | <b>75</b>    |

**TEXTBOOK**

Herstein, I.N., "Topics in Algebra", Willey Eastern 1975. Unit I -  
Chapter 2 (Section 2.1 - 2.6)

Unit II - Chapter 2 (Section 2.7 – 2.11)

Unit III - Chapter 2 (Section 2.12 – 2.14)

Unit IV - Chapter 3 (Section 3.1 - 3.6)

Unit V - Chapter 3 (Section 3.7 – 3.11)

**UNIT I Mathematical Logic :** **12**

Basic logical operations, conditional and biconditional statements, tautologies, contradiction, Normal forms.

**UNIT II The theory of inference for the statement Calculus:** **12**

Rules of inference, Consistency, Automatic Theorem proving, Predicate Calculus, quantifiers, Inference Theory of the Predicate Calculus.

**UNIT III Recurrence Relations and Generating Functions:** **12**

Polynomial expressions, telescopic form, recursion theorem, closed form expression, generating function, solution of recurrence relation using generating function.

**UNIT IV Lattices and Boolean Algebra:** **12**

Partial ordered sets, Properties of Lattices, Lattices as Algebraic Systems, Boolean Algebra.

**UNIT V Grammar and Languages:** **12**

Phrase structure grammars, rewriting rules, derivation sentential forms, language generated by grammar, regular, context free and context sensitive grammar and languages.

**COURSE OUTCOMES:**

| <b>Course outcomes:</b>  | <b>Domain</b> | <b>Level</b>                 |
|--|---------------|------------------------------|
| <b>CO1: Define and Explain</b> Decision theory in detail.  | Cognitive     | Remembering<br>Understanding |
| <b>CO2: Explain and solve</b> problems in PERT and CPM   | Cognitive     | Understanding<br>Applying    |
| <b>Explain</b> deterministic inventory control models and probabilistic Inventory Control Models and <b>solve</b> problems by using the methods: | Cognitive     | Understanding<br>Applying    |
| <b>Explain</b> Essential Features of Queueing System, Classification of Queueing Models and find solution of Queueing Models.                    | Cognitive     | Understanding<br>Remembering |
| <b>CO5: Explain</b> replacement and maintenance models and <b>solve</b> problems by using these methods.   | Cognitive     | Understanding<br>Applying    |

**UNIT I DECISION THEORY** **12**

Steps in Decision theory Approach - Types of Decision-Making Environments - Decision Making Under Uncertainty - Decision Making under Risk - Posterior Probabilities and Bayesian Analysis - Decision Tree Analysis - Decision Making with Utilities.

**UNITII PROJECT MANAGEMENT : PERT ANDCPM** **12**

Basic Differences between PERT and CPM - Steps in PERT/CPM Techniques - PERT/CPM Network Components and Precedence Relationships - Critical Path Analysis - Probability in PERT Analysis - Project time-cost Trade Off - Updating the Project - Resource Allocation .

**UNITIII DETERMINISTIC INVENTORY CONTROLMODELS** **12**

Meaning of Inventory Control - Functional Classification - Advantage of Carrying Inventory - Features of Inventory System - Inventory Model building - Deterministic Inventory Models with no shortage - Deterministic Inventory with Shortages  
Probabilistic Inventory Control Models:  
Single Period Probabilistic Models without Setup cost - Single Period Probabilities Model with Setup cost.

**UNIT IV QUEUEING THEORY** **12**

Essential Features of Queueing System - Operating Characteristic of Queueing System - Probabilistic Distribution in Queueing Systems - Classification of Queueing Models - Solution of Queueing Models - Probability Distribution of Arrivals and Departures - Erlangian Service times Distribution withk-Phases.

**UNIT V REPLACEMENT AND MAINTENANCE MODELS** **12**

Failure Mechanism of items - Replacement of Items Deteriorates with Time - Replacement of items that fail completely - other Replacement Problems.

| <b>Define and Explain</b> Context Free grammars   | Cognitive     | Remembering<br>Understanding |
| <b>CO4: Define and Explain</b> Pushdown Automata & properties of Context free languages | Cognitive     | Remembering<br>Understanding |
| <b>Define and Explain</b> Turning Machine and Chomski hierarchy.                        | Cognitive     | Remembering<br>Understanding |

**UNIT I** **12**

Strings,Alphabets and Languages (Section 1.1 of the Text)Finite Automata (Chapters 2, Sections 2.1 to 2.4)

**UNIT II** **12**

Regular expressions and Properties of Regular sets.(Sections 2.5 to 2.8 and 3.1 to 3.4)

**UNITIII** **12**

Context Free grammars (Section 4.1 to 4.5)

**UNIT IV** **12**

Pushdown Automata & properties of Context free languagesTheorem 5.3, 5.4 (without proof), (Section is 5.1 to 5.3 and 6.1 to 6.3)

**UNIT V** **12**

Turning Machine and Chomski hierarchy, (Sections 7.1 to 7.3 and 9.2 to 9.4)

**PREREQUISITE:** Nil

**COURSE OUTCOMES:**

| <b>Course outcomes:</b>   | <b>Domain</b> | <b>Level</b>                 |
|---|---------------|------------------------------|
| <b>CO1:</b> Define and Explain special algebraic structures and their properties.                             | Cognitive     | Remembering<br>Understanding |
| <b>CO2:</b> Define and Explain proficient in the theory of Modules  | Cognitive     | Remembering<br>Understanding |
| <b>CO3:</b> Define and Explain the methods of decomposition of rings.   | Cognitive     | Remembering<br>Understanding |
| <b>CO 4:</b> Define and Explain Chain conditions – Primary decomposition in Noetherian rings.                 | Cognitive     | Remembering<br>Understanding |
| <b>CO 5:</b> Define and Explain Artin rings – Discrete valuation rings – Dedekind domains – Fractional ideals | Cognitive     | Remembering<br>Understanding |

**UNIT-I**

**9**

Rings and ring homomorphism's – ideals – Extension and Contraction, modules and module homomorphism – exact sequences.

**UNIT-II**

**9**

Tensor product of modules – Tensor product of algebra – Local properties – extended and contracted ideals in rings of fractions.

**UNIT-III**

**9**

Primary Decomposition – Integral dependence – The going-up theorem – The going down theorem – Valuation rings.

**UNIT-IV**

**9**

Chain conditions – Primary decomposition in Noetherian rings.

**UNIT-V**

**9**

Artin rings – Discrete valuation rings – Dedekind domains – Fractional ideals.

| <b>UNIT 1</b>  |   |          |  |               |              | <b>15 hours</b> |          |
| The general solution of the homogeneous equation – The use of one known solution to find another – The method of variation of parameters – Power Series solutions. A review of power series – Series solutions of first order equations – Second order linear equations; Ordinary points.    |   |          |  |               |              |                 |          |
| <b>UNIT 2</b>  |   |          |  |               |              | <b>15 hours</b> |          |
| Regular Singular Points – Gauss's hypergeometric equation – The Point at infinity - Legendre Polynomials – Bessel functions – Properties of Legendre Polynomials and Bessel functions.   |   |          |  |               |              |                 |          |
| <b>UNIT 3</b>  |   |          |  |               |              | <b>15 hours</b> |          |
| Linear Systems of First Order Equations – Homogeneous Equations with Constant Coefficients – The Existence and Uniqueness of Solutions of Initial Value Problem for First Order Ordinary Differential Equations – The Method of Solutions of Successive Approximations and Picard's Theorem. |   |          |  |               |              |                 |          |

|               |  |                 |
|---------------|--|-----------------|
| <b>UNIT 4</b> |  | <b>15 hours</b> |
|---------------|--|-----------------|

Oscillation Theory and Boundary value problems – Qualitative Properties of Solutions– Sturm Comparison Theorems – Eigenvalues, Eigenfunctions and the Vibrating String.

|               |  |                 |
|---------------|--|-----------------|
| <b>UNIT 5</b> |  | <b>15 hours</b> |
|---------------|--|-----------------|

Nonlinearequations:AutonomousSystems;thephaseplaneanditsphenomena–Types of criticalpoints;Stability – critical points and stability for linear systems – StabilitybyLiapunov’s direct method – Simple critical pointsof nonlinear systems.

|                |           |                 |           |                  |          |              |           |

| <b>UNIT 1</b>   | <b>Bernoulli's Equation and Equations of Motion</b>   |          |                       |               |                          | <b>9 hours</b> |          |
| Introductory Notions – Velocity – Stream Lines and Path Lines – Stream Tubes and Filaments – Fluid Body – Density – Pressure. Differentiation with respect to the time – Equation of continuity – Boundary conditions – Kinematical and physical – Rate of change of linear momentum – Equation of motion of an inviscid fluid. |   |          |                       |               |                          |                |          |
| <b>UNIT 2</b>   | <b>Equations of Motion (Contd)</b>  |          |                       |               |                          | <b>9 hours</b> |          |
| Euler's momentum Theorem – Conservative forces – Bernoulli's theorem in steady motion – energy equation for inviscid fluid – circulation – Kelvin's theorem – vortex motion – Helmholtz equation.   |   |          |                       |               |                          |                |          |
| <b>UNIT 3</b>   | <b>Two-Dimensional Motion</b>   |          |                       |               |                          | <b>9 hours</b> |          |
| Two Dimensional Motion – Two Dimensional Functions – Complex Potential – basic singularities – source – sink – Vortex – doublet – Circle theorem. Flow past a circular cylinder with circulation – Blasius Theorem – Lift force. (Magnus effect)  |   |          |                       |               |                          |                |          |
| <b>UNIT 4</b>   | <b>Dynamics of Real Fluids</b>  |          |                       |               |                          | <b>9 hours</b> |          |
| Viscous flows – Navier-Stokes equations – Vorticity and circulation in a viscous fluid – Steady flow  |   |          |                       |               |                          |                |          |

|   |  |          |                      |               |               |                |          |
|---|--|----------|----------------------|---------------|---------------|----------------|----------|

| <b>PREREQUISITE</b>   |  |          | Basics of sets       |               |               |                |          |
| <b>On successful completion of this course, the students will be able to:</b>   |  |          |                      |               |               |                |          |
| <b>COURSE OUTCOMES</b>  |  |          |                      | <b>DOMAIN</b> | <b>LEVEL</b>  |                |          |
| <b>CO 1</b>   | <b>Explain</b> the distributions of distinct objects and non-distinct objects  |          |                      | Cognitive     | Understanding |                |          |
| <b>CO 2</b>   | <b>Apply</b> diverse counting strategies to solve varied problems involving strings, combinations, distributions, and partitions           |          |                      | Cognitive     | Applying      |                |          |
| <b>CO 3</b>   | <b>Solve</b> linear recurrence relations by recognizing homogeneity, linearity, constant coefficients, degree, and characteristic equation |          |                      | Cognitive     | Applying      |                |          |
| <b>CO 4</b>   | <b>Identify</b> the number of permutations with forbidden positions using rook polynomials   |          |                      | Cognitive     | Applying      |                |          |
| <b>CO 5</b>   | <b>Apply</b> Polya's theorem for finding number of permutations of given objects   |          |                      | Cognitive     | Applying      |                |          |
| <b>UNIT 1</b>   | <b>Permutations and combinations</b>   |          |                      |               |               | <b>9 hours</b> |          |
| Distributions of distinct objects – Distributions of non-distinct objects – Stirling's formula.   |  |          |                      |               |               |                |          |
| <b>UNIT 2</b>   | <b>Generating functions</b>  |          |                      |               |               | <b>9 hours</b> |          |
| Generating function for combinations – Enumerators for permutations distributions of distinct objects into non distinct cells – partitions of integers – Ferrers graphs – Elementary relations.         |  |          |                      |               |               |                |          |
| <b>UNIT 3</b>   | <b>Recurrence relation</b>   |          |                      |               |               | <b>9hours</b>  |          |
| Linear recurrence relations with constant coefficients- solutions by the technique of generating functions – A special class of nonlinear difference equations – Recurrence relations with two indices. |  |          |                      |               |               |                |          |
| <b>UNIT 4</b>   | <b>The principle of inclusion and exclusion</b>  |          |                      |               |               | <b>9 hours</b> |          |
| General formula – Permutations with restriction on relative positions – Derangements – Rook polynomials – permutations with forbidden positions.  |  |          |                      |               |               |                |          |
| <b>UNIT 5</b>   | <b>Polya's theory of counting</b>  |          |                      |               |               | <b>9 hours</b> |          |

Equivalence classes under a permutation group – Burnside theorem – Equivalence classes of functions – Weights and inventories of functions – Polya’s fundamental theorem – Generalization of Polya’s theorem

|                |           |                 |          |                  |          |              |           |

**TEXT BOOK**

1. James R. Munkres, "Topology", (2nd Edition) PHI Learning Pvt. Ltd., (Third Indian Reprint)

New Delhi, 2014

Unit I - Chapter 2: Sections 12 to 17

Unit II - Chapter 2: Sections 18 to 21 (Omit Section 22)

Unit III - Chapter 3: Sections 23 to 25

Unit IV - Chapter 3: Sections 26 to 29

Unit V - Chapter 4: Sections 30 to 35

**On successful completion of this course, the students will be able to:**

| <b>COURSE OUTCOMES</b>  |   |  | <b>DOMAIN</b> | <b>LEVEL</b>   |
|---|---|--|---------------|----------------|
| <b>CO 1</b>   | <b>Compare</b> models that can be constructed by ordinary differential equations of first order under study |  | Cognitive     | Applying       |
| <b>CO 2</b>   | <b>Utilize</b> compartment models to solve the problems involved in economics and medicine                  |  | Cognitive     | Applying       |
| <b>CO 3</b>   | <b>Analyze</b> mathematical models that can be developed by second order linear differential equations      |  | Cognitive     | Analyzing      |
| <b>CO 4</b>   | <b>Apply</b> linear difference equation to solve problems in finance and economics                          |  | Cognitive     | Applying       |
| <b>CO 5</b>   | <b>Identify</b> the solutions of the given problems that can be modeled through graphs                      |  | Cognitive     | Applying       |
| <b>UNIT 1</b>   | <b>Mathematical Modeling through Ordinary Differential Equations of First order</b>                         |  |               | <b>9 hours</b> |
| Linear Growth and Decay Models – Non-Linear Growth and Decay Models –Compartment Models – Dynamics problems – Geometrical problems  |   |  |               |                |
| <b>UNIT 2</b>   | <b>Mathematical Modeling through Systems of Ordinary Differential Equations of First Order</b>              |  |               | <b>9hours</b>  |
| Population Dynamics – Epidemics – Compartment Models – Economics –Medicine, Arms Race, Battles and International Trade – Dynamics   |   |  |               |                |
| <b>UNIT 3</b>   | <b>Mathematical Modeling through Ordinary Differential Equations of Second Order</b>                        |  |               | <b>9 hours</b> |
| Planetary Motions – Circular Motion and Motion of Satellites – Mathematical Modeling through Linear Differential Equations of Second Order –Miscellaneous Mathematical Models |   |  |               |                |
| <b>UNIT 4</b>   | <b>Mathematical Modeling through Difference Equations</b>   |  |               | <b>9 hours</b> |
| Simple Models – Basic Theory of Linear Difference Equations with Constant Coefficients – Economics and Finance – Population Dynamics and Genetics –Probability Theory         |   |  |               |                |

|  |   |                 |          |                  |          |              |                |
|--|---|-----------------|----------|------------------|----------|--------------|----------------|
| <b>UNIT 5</b>  | <b>Mathematical Modeling through Graphs</b> |                 |          |                  |          |              | <b>9 hours</b> |
| Solutions that can be Modeled through Graphs – Mathematical Modeling in Terms of Directed Graphs, Signed Graphs, Weighted Digraphs and Unoriented Graphs |   |                 |          |                  |          |              |                |
| <b>LECTURE</b>   | <b>45</b>                                   | <b>TUTORIAL</b> | <b>0</b> | <b>PRACTICAL</b> | <b>0</b> | <b>TOTAL</b> | <b>45</b>      |
| <b>TEXT BOOK</b>   |   |                 |          |                  |          |              |                |

| <b>UNIT 1</b>  |   |          |                                 |               |          |               | <b>9 hours</b> |
| Introduction to SPSS – Starting SPSS – SPSS Main Menus – Working with the Data Editor – SPSS Viewer – Importing and Exporting data. Plotting of Charts: Simple Bar diagram, Multiple Bar Diagram and Pie Diagram.  |   |          |                                 |               |          |               |                |
| <b>UNIT 2</b>  |   |          |                                 |               |          |               | <b>9 hours</b> |
| Descriptive Statistics and Frequencies using SPSS. Measures of central tendencies: Arithmetic mean, Median, Mode, Geometric mean and Harmonic Mean. Measures of Dispersion: Range, inter quartile range, Mean Deviation and Standard deviation. Measures of Skewness and Kurtosis. |   |          |                                 |               |          |               |                |
| <b>UNIT 3</b>  |   |          |                                 |               |          |               | <b>9 hours</b> |
| Testing of Hypothesis: Type I error and Type II Errors – Concept of p values – Basic Concepts of One Sample t-test, Independent Samples t-test, Paired samples t-test using SPSS with interpretation.  |   |          |                                 |               |          |               |                |
| <b>UNIT 4</b>  |   |          |                                 |               |          |               | <b>9 hours</b> |

Analysis of Variance: Basic concepts of ANOVA – One Way and Two-Way ANOVA using SPSS with interpretation. Chi-square Test for Independence of attributes using SPSS.

**UNIT 5** **9 hours**

Correlation: Karl Pearson's coefficient of Correlation – Spearman's Rank correlation – Simple linear Regression using SPSS with interpretation.
