PROCEEDINGS OF THE THREE DAYS ONLINE WORKSHOP ON "EFFECTIVE E-CONTENT DEVELOPMENT FOR ENHANCED LEARNING EXPERIENCE OF STUDENTS"

1. PREAMBLE

Internal quality Assurance Cell (IQAC) of Periyar Maniammai Institute of Science and Technology (PMIST) has successfully conducted Three days online workshop on "Effective E-content development for enhanced learning experience of students" for faculty members from 24.11.2022 -26.11.2022.

ICT enabled teaching is being practiced in the institute. The entire campus is Wi-Fi enabled which helps the students to access the e-contents · All faculty members use ICT tools including e-resources for student centric teaching learning. Google Classroom is the learning management system used by the institution Google Meet and Zoom platforms are used for handling online classes. · Student centric learning method is practiced by incorporating experiential learning like laboratory practices, field visit, in-plant training, model presentations, etc. · Participative learning is accomplished by formative tools like group discussion, assignments, seminar, quiz, Jigsaw, flipped classroom etc.,

Govt of India announced nationwide lockdown on Mar, 24th2020, as preventive measure of COVID 19 pandemic in India and to ensure the safety of citizens. It was extended in phase still 31stMay 2020 after unlock in phases till 30thNovember 2020.

During this period Periyar Maniammai Institute of Science and Technology also announced complete lock down there by implementing Govt orders. In this challenging time, PMIST responded immediately and shifted to online mode for continuing teaching learning with the advancement of the technologies. Proper guidelines were provided for both students and faculty to get familiar with the online teaching and learning and also to complete the regular curriculum completion for the academic session.

2. THEME OF THE WORKSHOP

Offering training to teachers for preparing high quality E content with systematic Instructional design in a way to create and deliver content, monitor learners' participation and assess learners' performance thereby enhancing learning experience of the students.

a) Objectives

In the digital era, E learning is inevitable. As per NEP 2020, one of the fundamental principles is extensive use of technology in teaching and learning for educational planning and management. Academicians are experts in their domain with sufficient experience in teaching but most of them do not have plentiful exposure to on-line teaching-learning related activities such as creation of e content, course design, delivery etc., The barriers in application of ICT tools are lack of training and shortage of teachers qualified to use the technology confidently. Teachers need not be computer literate but essentially develop skills to integrate computer use into their teaching/learning activities. It will be an added advantage if the academicians are well trained in the development of quality e content.

The advancements in technology with modern digital devices and ICT tools have great potential to improve learning outcomes. The ability to construct effective and useful electronic contents persists to be one of the major obstacles in e-learning. Since the educational design is complex, and the main aim of developing E contentis to achieve enhanced learning experience learner centric. Teachers have to get exposed to effective usage of all modern ICT tools and a broad understanding of content development processes. An E content should be developed in four quadrants with technical standards, display standards, curriculum and pedagogical standards. The approach should always be the learner be guided to learn the concept in a pleasant way.

Hence this workshop has been planned to get fulfilled the following objectives.

1. Promote generation of e-Content in a creative way in all courses that enhance quality to teaching and learning
2. To elevate teachers as "experts" in e-Content creation
3. Providing the knowledge and skill for teachers to cater to present day learners and their learning styles.
4. Exploring the use of ICT tools to make learning process more productive and interactive
5. To start a Best Practice as developing expertise in online teaching by all faculty.

Some online learning models use asynchronous communication tools (e-mail, threaded discussion boards, newsgroups) to allow users to contribute at their convenience. Some online learners prefer Synchronous technologies (e.g., webcasting, chat rooms, desktop audio/video technology) are almost like face-to-face teaching strategies such as delivering lectures with groups of students. Many recent applications tend to combine multiple forms of synchronous and asynchronous. Faculty will be taught to support different models of online learning different technology applications are used.

b) Sub Themes

- Pre-Requisites, Roles and Responsibilities of Content Writer for E content module
- E-Content Module – The Four Quadrant
- Various stages of E content development
- Technical, Curriculum and Pedagogical Standards to be followed in E content preparation
- Exploring the ICT tools and Integration for E content development
- Practice for developing one E content module
- Enhancing quality and creativity in E content thereby improving the learner experience

3. TIME SCHEDULE OF ACTIVITIES OF THE WORKSHOP

S.No	Activity	Date
1.	Sanction of workshop proposal by NAAC	31.5.2022
2.	Request to Resource persons	15.6.2022 - 29.6.2022
3.	Brochure circulated to other institutions	16.7.2022
4.	Registration of participants	16.7.2022- 25.10.2022
5.	Intimation to the participants	5.11.2022
6.	E mail to the participants with the link	21.11.2022
7.	Conduct of workshop	24.11.2022-26.11.2022

4. Brochure copy of the workshop

DELIVERABLES

- Pre-Requisites, Roles and Responsibilities of Content Writer for E-content module
- E-Content Module - The Four Quadrant
- Various stages of E content development
- Technical, Curriculum and Pedagogical Standards to be followed in E content preparation
- Exploring the ICT tools and Integration for E content development
- Enhancing quality and creativity in E content thereby improving the learner experience

INSTRUCTIONS

- This workshop is open to all faculty members of AICTE/UGC recognized Institutes/Universities
- There is no registration fee for the participants for this workshop
- E-Certificate will be provided to the participants
- The last date for registration of the workshop 15.10.2022
- Intimation to the participants 5.11.2022
- Since the seats are limited, the participation will be confirmed on first come first basis
- Registration will be closed as soon as the seats are filled
- E-Certificate of completion of workshop will be given only to those candidates who will attend the workshop for full duration

Three days' online workshop on

EFFECTIVE E-CONTENT DEVELOPMENT FOR

ENHANCED LEARNING EXPERIENCE OF STUDENTS

DATE: 24.11.2022 - 26.11.2022

PERIYAR MANIAMMAI

Organized By
INTERNAL QUALITY ASSURANCE CELL, PMIST

Sponsored by
NAAC

Periyar Maniammai Institute of Science & Technology
Vallam, Thanjavur

ABOUT THE INSTITUTION

PeriyarManiammai Institute of Science & Technology (PMIST) has its origin from PeriyarManiammai College of Technology for Women (PMCTW) established in 1988. It was the culmination of the foresighted thoughts and vision of the great social reformer E V Ramasamy widely known as 'ThanthaiPeriyar' and his philanthropic wife AnnaiManiammaiar, who fought for the upliftment of the oppressed and liberation of women.

A Public Trust was formed to manage the institution under the able stewardship of the Esteemed Chancellor, Dr.K.Veeramani, who had developed it into a co-educational and multi-disciplinary higher educational institution. The Deemed to be University status was conferred on 17th August 2007 by MHRD, Government of India.

After attaining Deemed to be University status in 2007, the institution has undergone Three Cycles of Accreditation by NAAC

The institution is situated at 10 Km towards west of Thanjavur and 45 Km on the east of Tiruchirappalli, Tamil Nadu. It is located on a prime land area of 114.64 acres which once were barren and dry land with a scarce population in rural area. Such land has been transformed into a land of thick foliages and green vegetation. Now, it has been transformed into energy efficient, pollution free, Zero waste and well laid campus with an ambience for learning. The entire campus is a spectacle of green meadow shady trees and canopies and creepers.

ICT enabled teaching is being practiced in the institute. The entire campus is Wi-Fi enabled which helps the students to access the e-contents

THEME OF THE WORKSHOP

Offering training to teachers for preparing high quality E-content with systematic Instructional design in a way to create and deliver content, monitor learners' participation and assess learners' performance thereby enhancing learning experience of the students.

OVERVIEW OF THE WORKSHOP

In the digital era, E learning is inevitable. Extensive use of technology is adopted currently in teaching and learning for educational planning and management. Academicians are experts in their domain with sufficient experience in teaching but most of them do not have plentiful exposure to on-line teaching-learning related activities such as creation of e content, course design, delivery etc.,

The ability to construct effective and useful electronic contents persists to be one of the major obstacles in E learning. Since the educational design is complex and the main aim of developing E content is to achieve enhanced learning experience. Teachers have to get exposed to effective usage of all modern ICT tools and a broad understanding of content development processes.

OBJECTIVES

- Promote generation of E-Content in a creative way in all courses that enhance quality to teaching and learning
- To elevate teachers as "experts" in E Content creation
- Providing the knowledge and skill for teachers to cater to present day learners and their learning styles.
- Exploring the use of ICT tools to make learning process more productive and interactive

RESOURCE PERSONS

DR. KHANINDRA PATHAK
Professor Department of Mining Engineering Indian Institute of Technology, Kharagpur

DR. CHANDAN CHAKRABORTY
Professor, Computer Science and Engineering
National Institute of Technical Teachers Training and Research (NITTTR), Kolkata

DR. BANI BHATTACHARYA
Associate Professor
Centre for Educational Technology
Indian Institute of Technology
Kharagpur

DR. G.JANARDHANAN
Professor &Head Centre for Environment Management
National Institute of Technical Teachers Training and Research (NITTTR), Chennai

DR. P. MALLIGA
Professor of Computer Science &Engg.,
Head, Dept. of Educational Media and Technology,
National Institute of Technical Teachers Training and Research (NITTTR) Chennai

DR. V.SHANMUGANEETHI
Professor and Head Computer Science and Engineering
National Institute of Technical Teachers Training and Research
National Institute of Technical Teachers Training and Research (NITTTR), Chennai

8. PROGRAMME SCHEDULE

PROGRAMME SCHDULE

NAAC sponsored Three days online workshop on "Effective E-content Development for enhanced learning experience of students" (24.11.2022 to 26.11.2022)

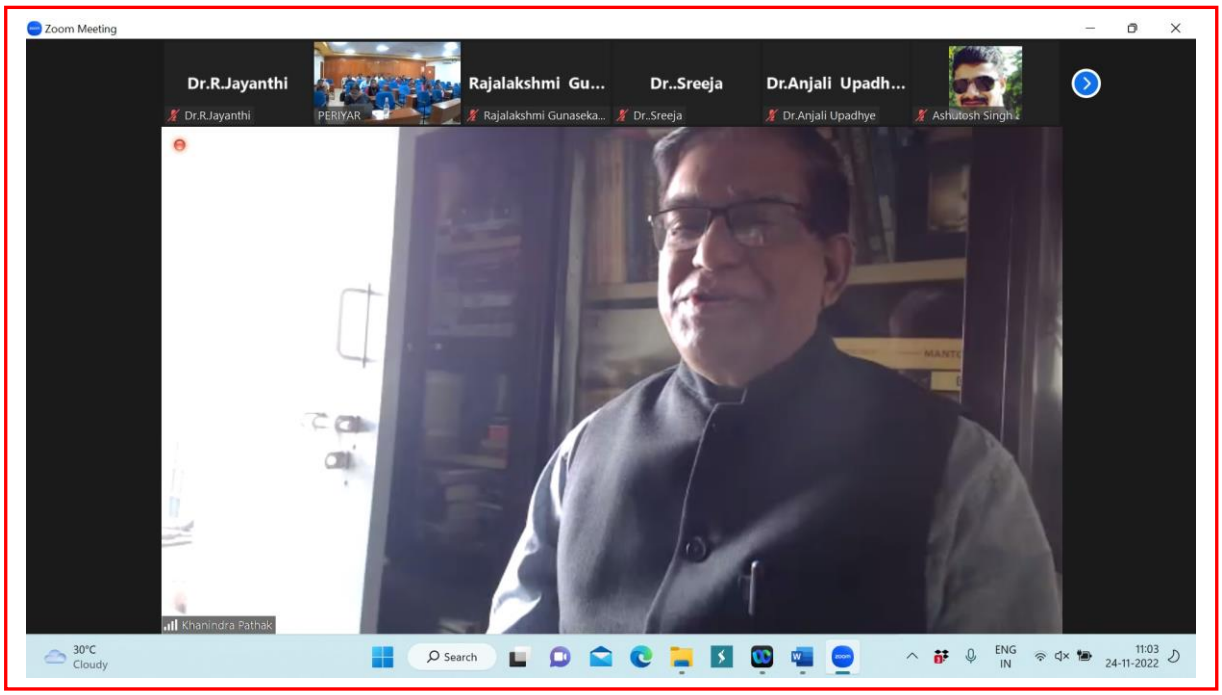
Day 1-24.11.2022			
Time	**Session No**	**Resource person**	**Topic**
10.00–10.30am		Inauguration	
11.00am -12.00 noon	I	**Dr.Khanindra Pathak** Professor, Department of Mining Engineering, Indian Institute of Technology, Kharagpur	Technical, Curriculum and Pedagogical Standards
2.00 - 3.00 pm	II	**Dr.V.Shanmuganeethi** Professor and Head, Computer Science and Engineering, National Institute of Technical Teachers Training and Research (NITTTR),Chennai	Video content development through FOSSE
3:30-4:30 pm	III	**Dr.R.Jayanthi,** Directori/c, IQAC, PMIST & **Dr.SPK.Babu,** Director, Centre For Students & Administrative Services, PMIST& **Dr.S.Kumaran**, Dean Research, PMIST	Assessment and Accreditation Methodology
Day 2-25.11.2022			
10.00–11.00	IV	**Dr.G.Janardhanan,** Professor & Head, Centre for Environment Management National Institute of Technical Teachers Training and Research (NITTTR),Chennai	Blended and Flipped approach for teaching

Time	SessionNo	Resource person	Topic
11:30-12:30	V	**Dr.S.Senthamilkumar,** Dean, Faculty of Engineering and Technology, PMIST **Dr.C.VSubramanian** Dean, Faculty of Architecture and Planning, PMIST **Dr.KV.Rajandran** Professor in Management studies, PMIST **Dr.J.Santhosh** Director, Center for Energy and Environment, PMIST	Assessment and Accreditation Methodology
2.00 – 3.00	VI	**Dr. Bani Bhattacharya** Associate Professor Department of Humanities & Social Sciences Indian Institute of Technology, Kharagpur	Pre-Requisites, Roles and Responsibilities of Content Writer for E-content module.
3.30 - 4.30	VII	**Dr. Bani Bhattacharya,** Associate Professor, Department of Humanities &Social Sciences Indian Institute of Technology, Kharagpur	Pre-Requisites, Roles and Responsibilities Of Content Writer For E-content module.
Day 3– 26.11.2022			
10.00**–** 11.00	VIII	**Dr.Chandan Chakraborty** Professor, Computer Science and Engineering National Institute of Technical Teachers Training and Research (NITTTR) Kolkata	Exploring the ICT tools and Integration for E-content development
11.30am– 12.30pm	IX	**Dr.P.Malliga** Professor of Computer Science & Engg.,& Head, Dept. of Educational Mediaand Technology, National Institute of Technical Teachers Training and Research, (NITTTR), Chennai	E-Content Module – The Four Quadrant-stages of E-content development
2.30-3.00pm		Valediction	

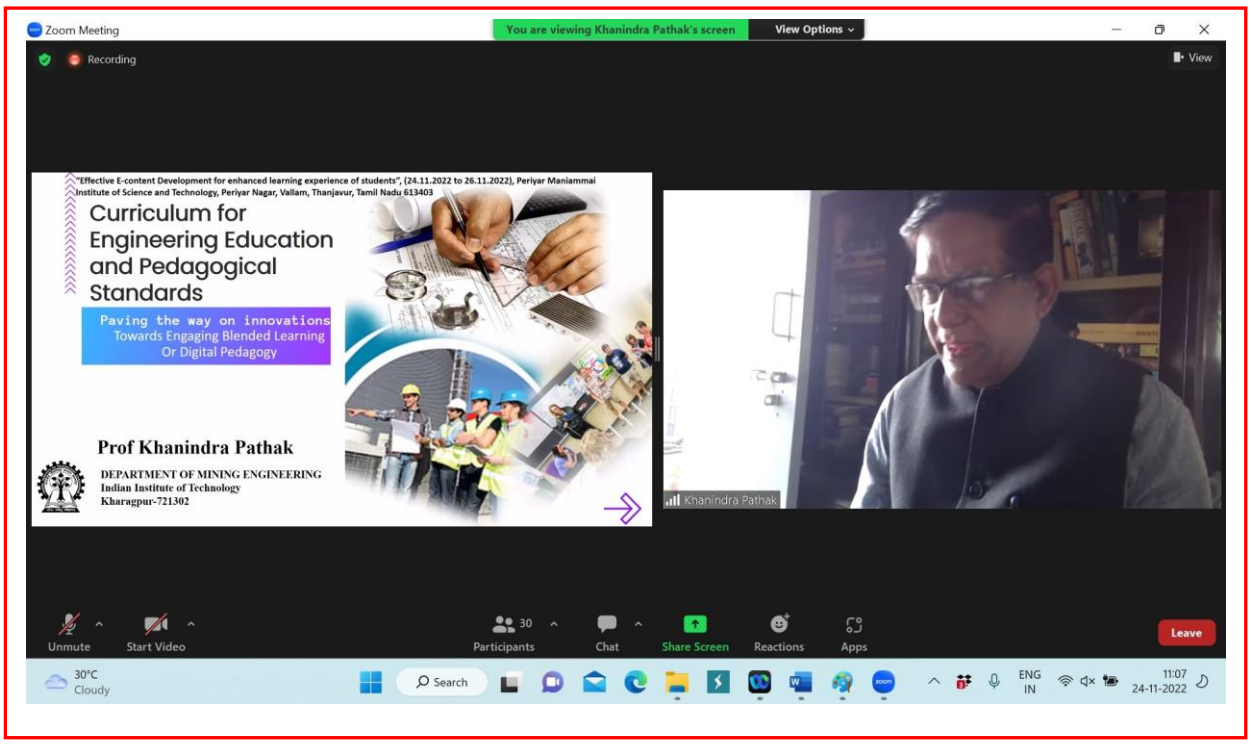
9. REPORT OF SESSIONS

During inauguration on 24.11.2022, Dr.R.Jayanthi, Director IQAC, PMIST welcomed the participants and Mr.P.Ilango , Co Coordinator , IQAC , PMIST briefed about the programme schedule and sessions. Dr.S.Velusamy, Vice Chancellor, PMIST inaugurated the workshop and highlighted the importance of e content development and told that it is a power tool and will lead to academic excellence. Dr. G.Sundarambal proposed vote of thanks.

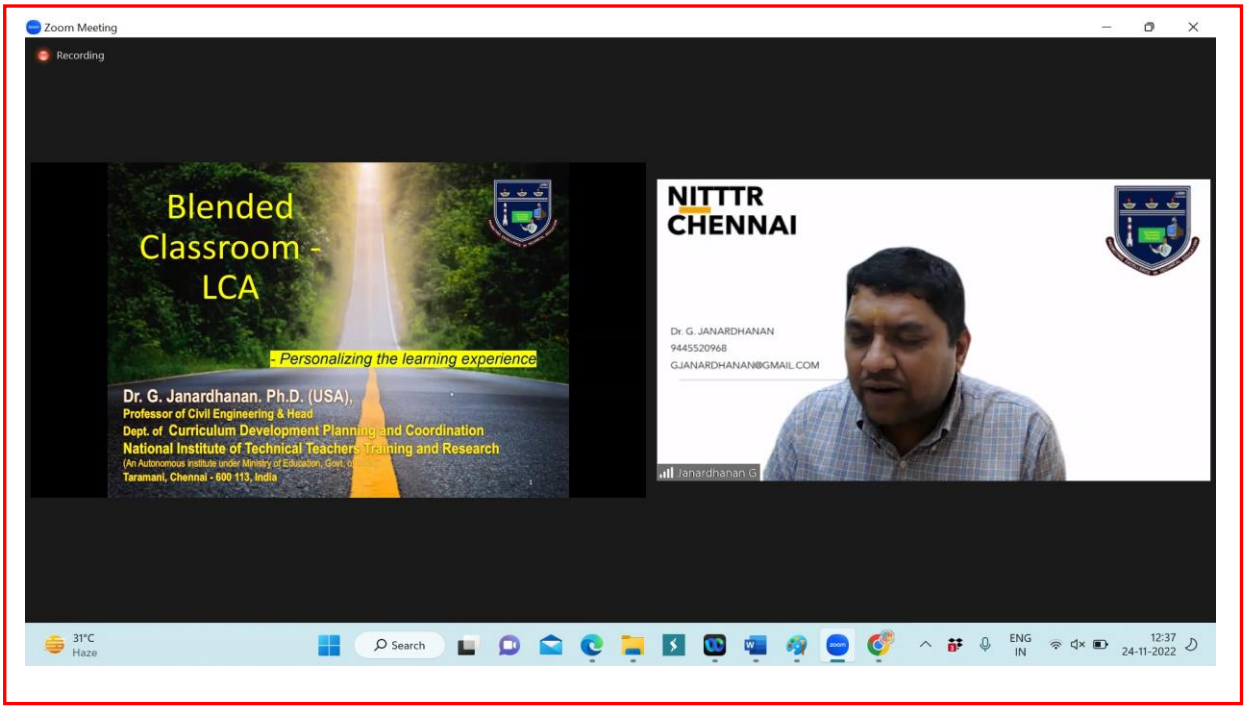
On 24.11.2022, the first session was handled by **Dr. Khanindra Pathak,** Professor, Department of Mining Engineering, Indian Institute of Technology, Kharagpur on "Technical, Curriculum and Pedagogical Standards". He gave an initial overview on standards for effective teaching pedagogy and digital learning. He explained the concepts of Blended learning and flipped learning. He explained that teachers need to design for paving the way for innovations towards engaging blended learning or digital pedagogy. He also added that the class rooms need to be interactive and engaging. In the student centric teaching the education has to build knowledge, empower learners and create computational thinkers.



Session I handled by Dr. Khanindra Pathak, Professor, Department of Mining Engineering, Indian Institute of Technology, Kharagpur



Dr. Khanindra Pathak, Professor, Department of Mining Engineering, Indian Institute of Technology, Kharagpur addressing on Pedagogical standards for e content development

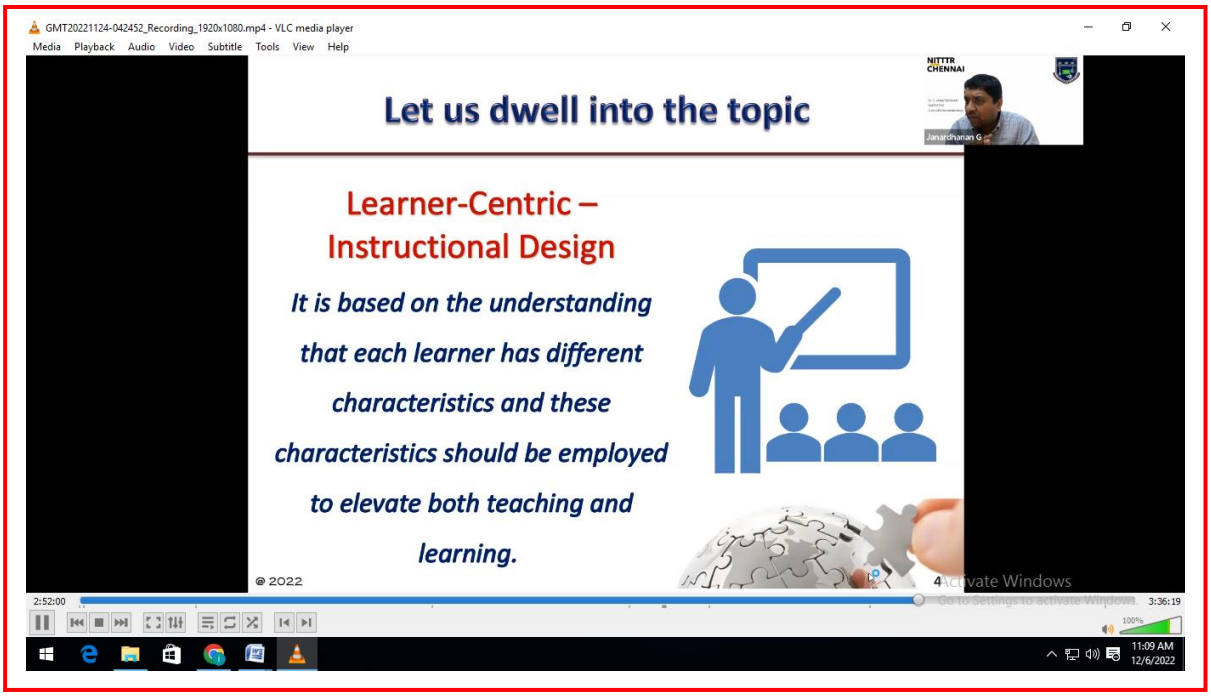


Dr.G.Janardhanan, Professor &Head Centre for Environment Management National Institute of Technical Teachers Training and Research (NITTTR),Chennai on "Blended and Flipped approach for teaching"

This can be achieved through proper design of curriculum and defined engagement

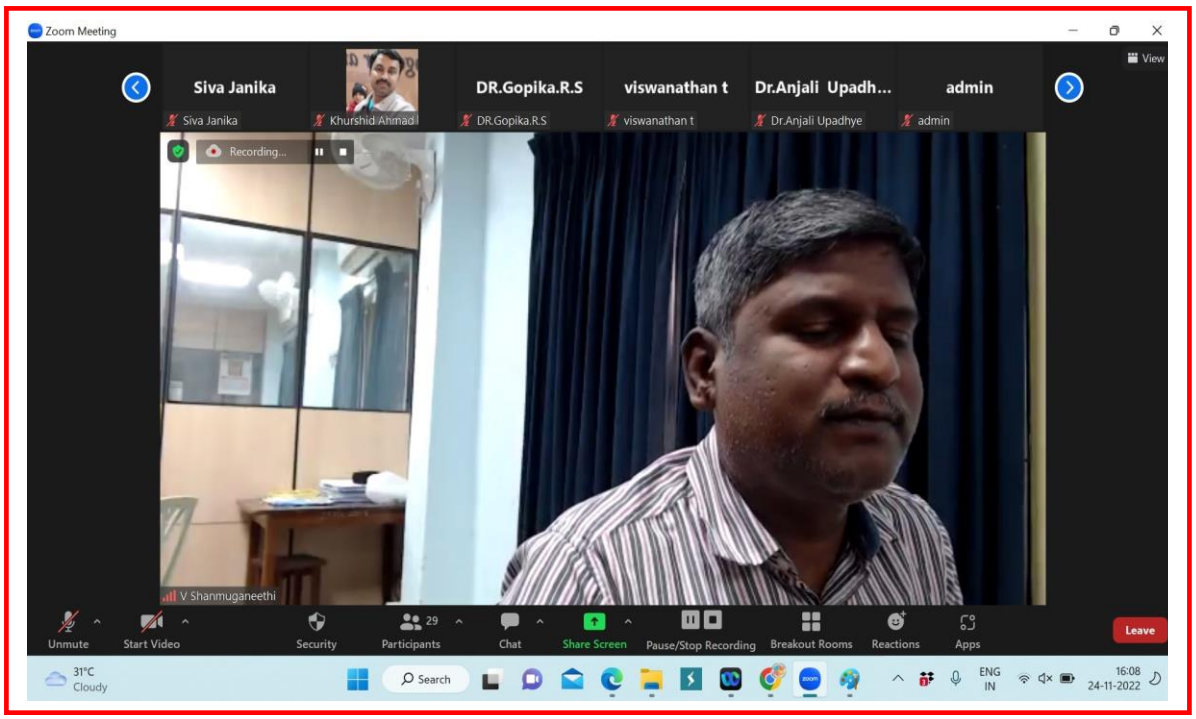
of contact hours and non-contact hours. He narrated the Factors governing e content development such as Learner -Teacher Interaction, Learner -Learner Interaction and Learner -Content Interaction.

Session II was handled by Dr.**G.Janardhanan,** Professor &Head Centre for Environment Management National Institute of Technical Teachers Training and Research (NITTTR),Chennai on "Blended and Flipped approach for teaching". He gave examples such as teaching Fibonacci series conceptually and with digital content and the participants were made aware of effectiveness of blended learning. In his lecture he explained the learner centric instructional design and its principles such as context, construction, collaboration and conversation along with learner characteristics.

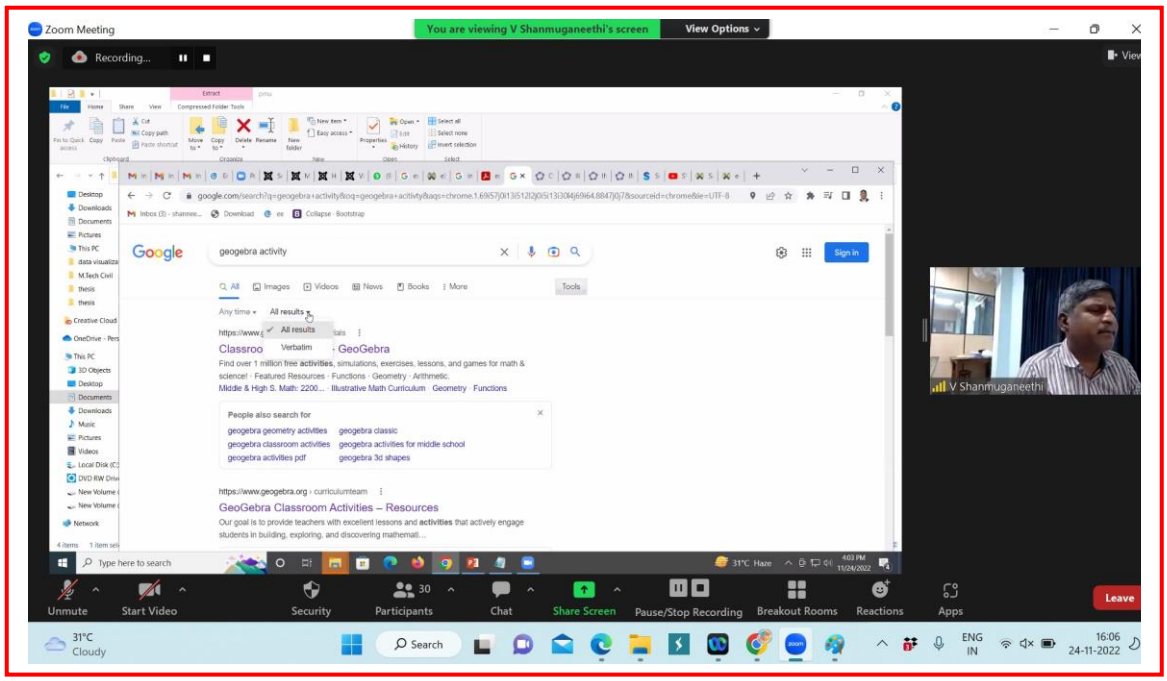


Dr.G.Janardhanan, Professor &Head Centre for Environment Management National Institute of Technical Teachers Training and Research (NITTTR), Chennai addressing on learner centric instructional design.

Session III was handled by **Dr. V.Shanmuganeethi,** Professor and Head Computer Science and Engineering National Institute of Technical Teachers Training and Research(NITTTR),Chennai on "Video content development through FOSSE".



Dr. V.Shanmuganeethi, Professor and Head Computer Science and Engineering National Institute of Technical Teachers Training and Research (NITTTR),Chennai addressing on eXe .learning.net



Dr. V.Shanmuganeethi, Professor and Head Computer Science and Engineering National Institute of Technical Teachers Training and Research (NITTTR), Chennai giving demo on the web page development using eXe. learning development

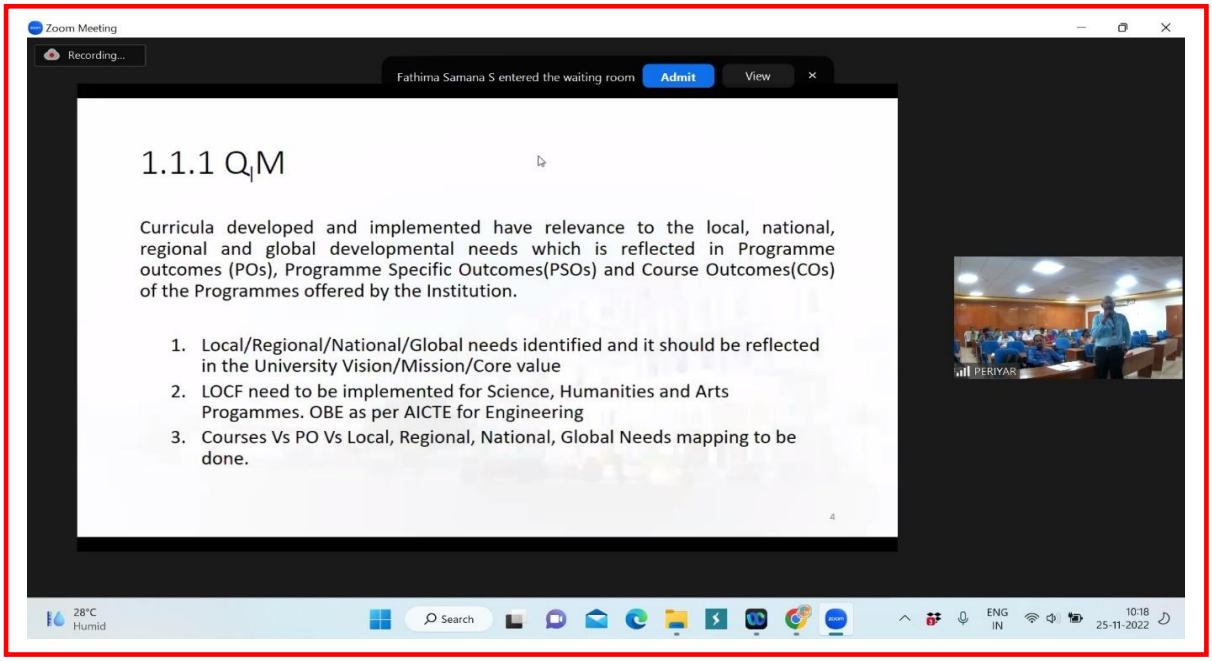
In his lecture he explained the step-by-step procedure of the software eXe.learning.net for publishing of web content of lecture materials.

He explained the add on features of the software such as Text, Tables, video development, Activity, Quiz, web links to the content. He also gave demo on the navigating pages through the different pages. He explained on how to define properties, defining outline, selecting i device, creating an I device through editor, save, load and export functions.

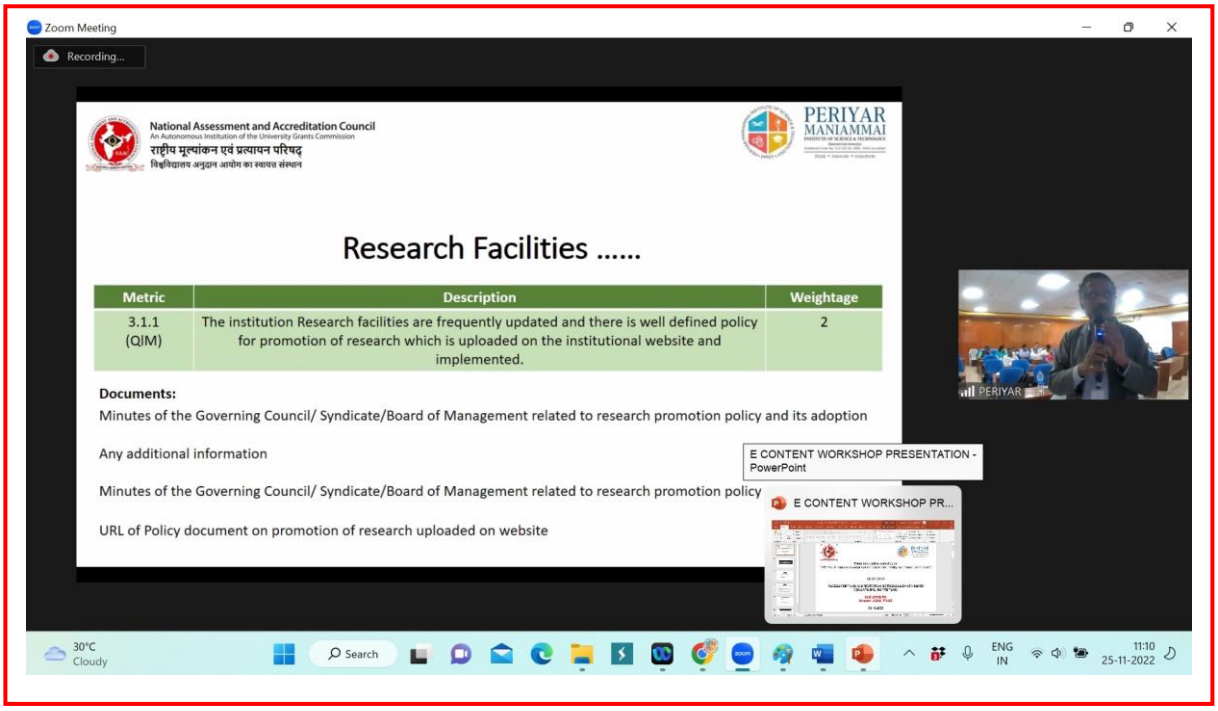
On 25.11.2022, in Sessions IV and V, "Assessment and Accreditation methodology" based on Revised frame work by NAAC has been carried out by Internal faculty members of PMIST.

Initially Dr.R.Jayanthi, Director i/c IQAC gave introduction on the Various criteria , Metrics and Key indicators , Qualitative and Quantitative nature of the metrics and the process flow of the Revised accreditation frame work by NAAC.

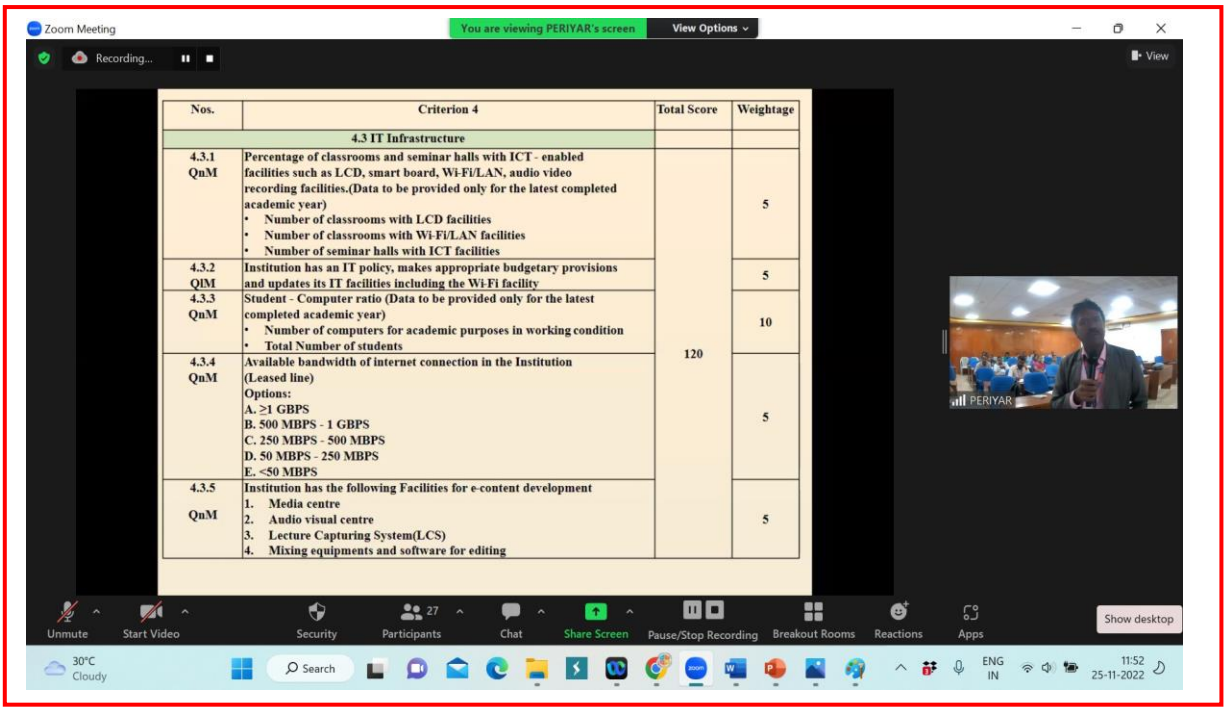
Criteria wise presentations were made along with weightages for each metric as per the NAAC manual and standard operating procedure.



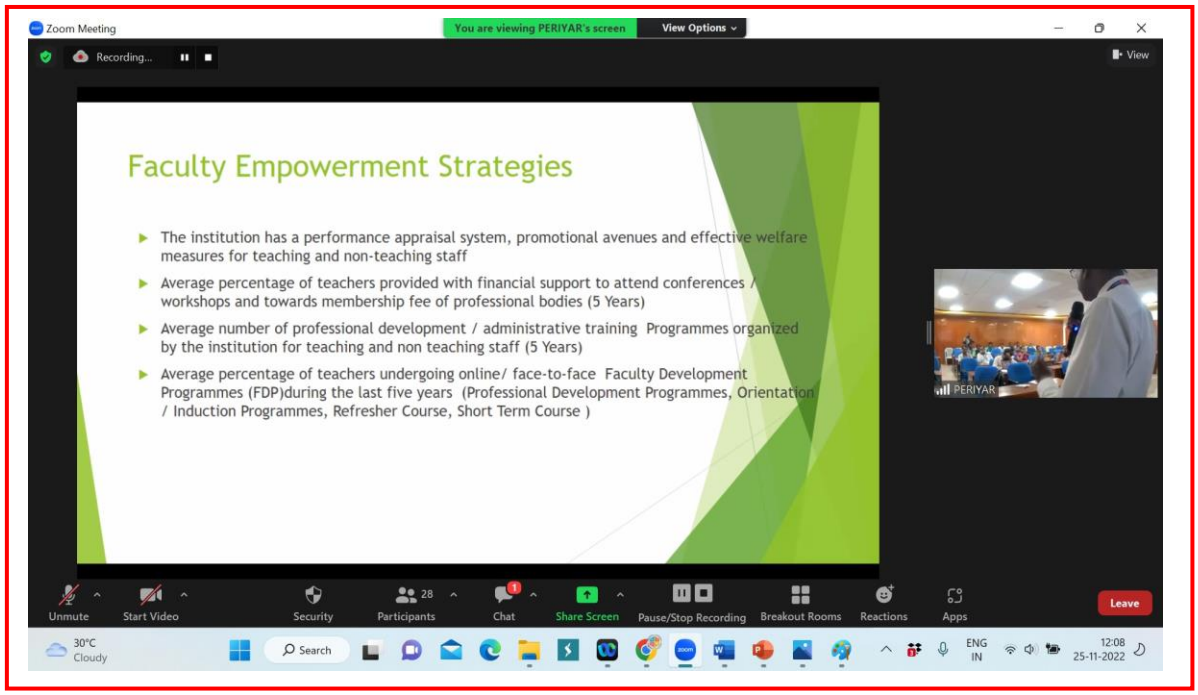
Dr.S.P.K.Babu, Professor, PMIST addressing on curricular aspects and teaching learning process as per the revised NAAC accreditation frame work



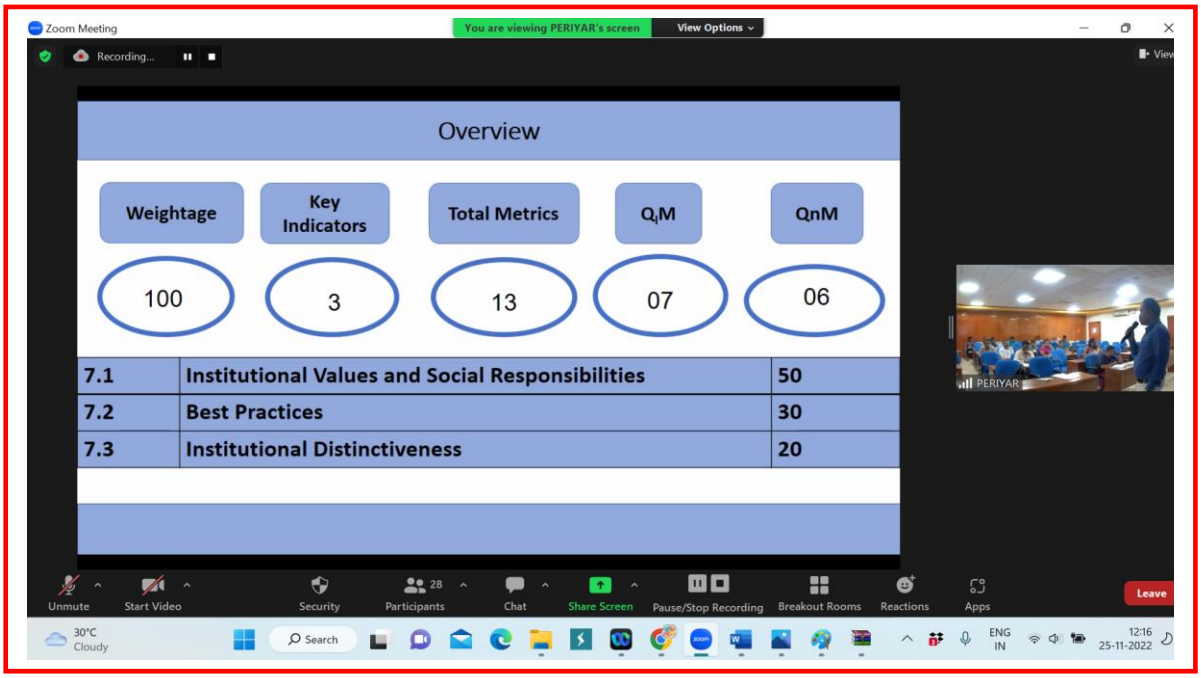
Dr.S.Kumaran, Dean Research, PMIST addressing on Criteria III as per the revised NAAC accreditation frame work



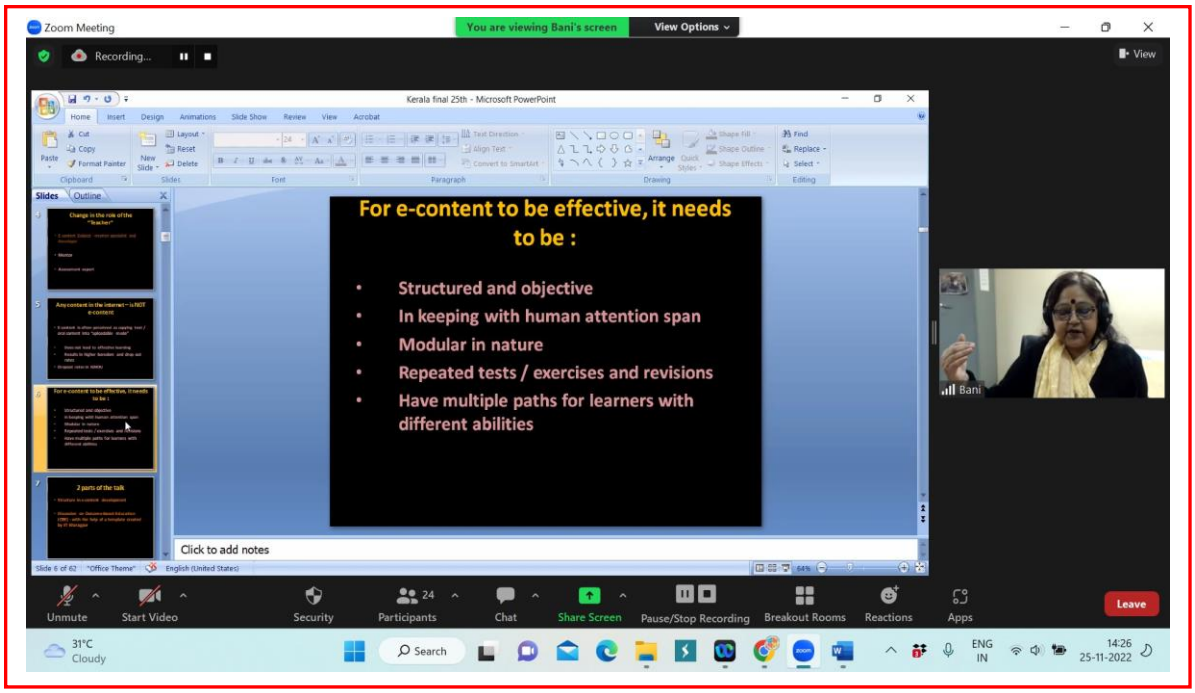
Dr.S.Senthamilkumar, Dean Faculty of Engineering and Technology, PMIST addressing on Criteria IV and V as per the revised NAAC accreditation frame work



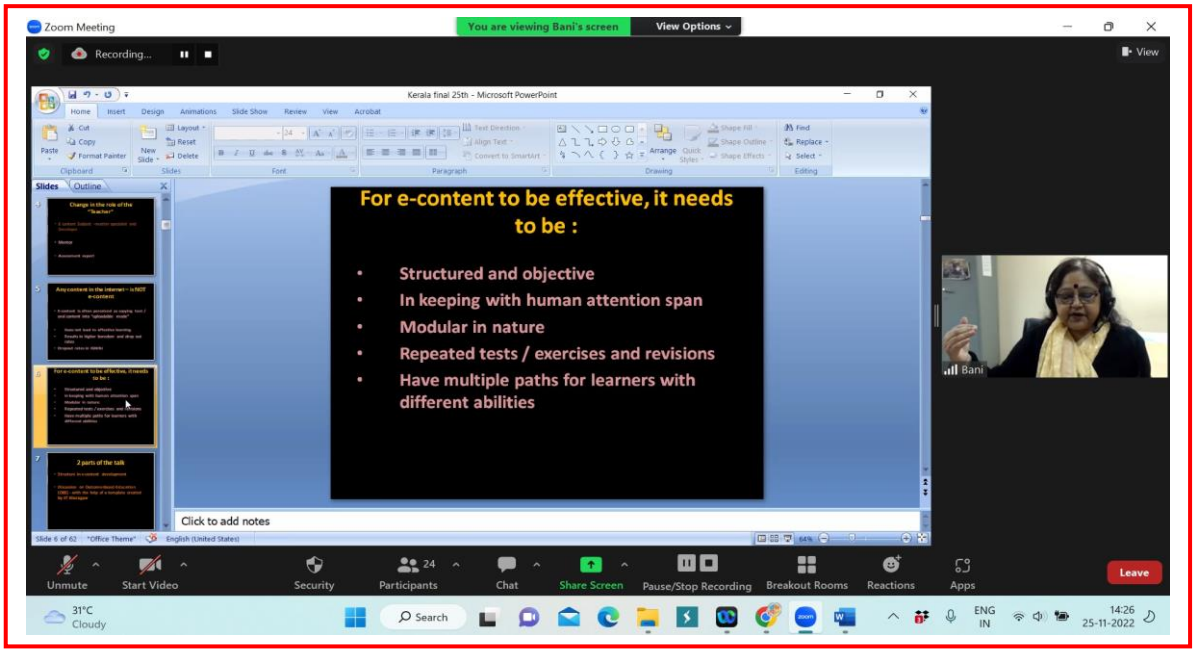
Dr.KV.Rajandran, Professor in Managemnet studies, PMIST addressing on Criteria VI as per the revised NAAC accreditation frame work



Dr.J.Santhosh, Director, CEE, PMIST giving an overview of Criteria 7 as per the NAAC frame work



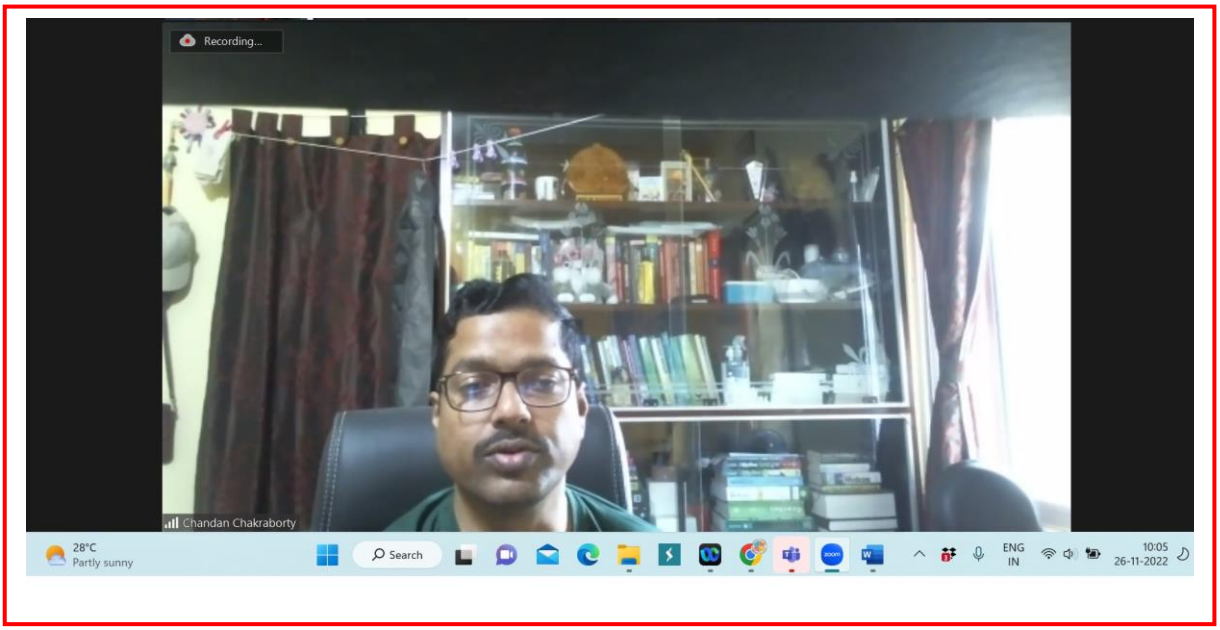
Dr. Bani Bhattacharya, Associate Professor, Department of Humanities & social Sciences, Indian Institute of Technology, Kharagpur addressing on Prerequisites for content development



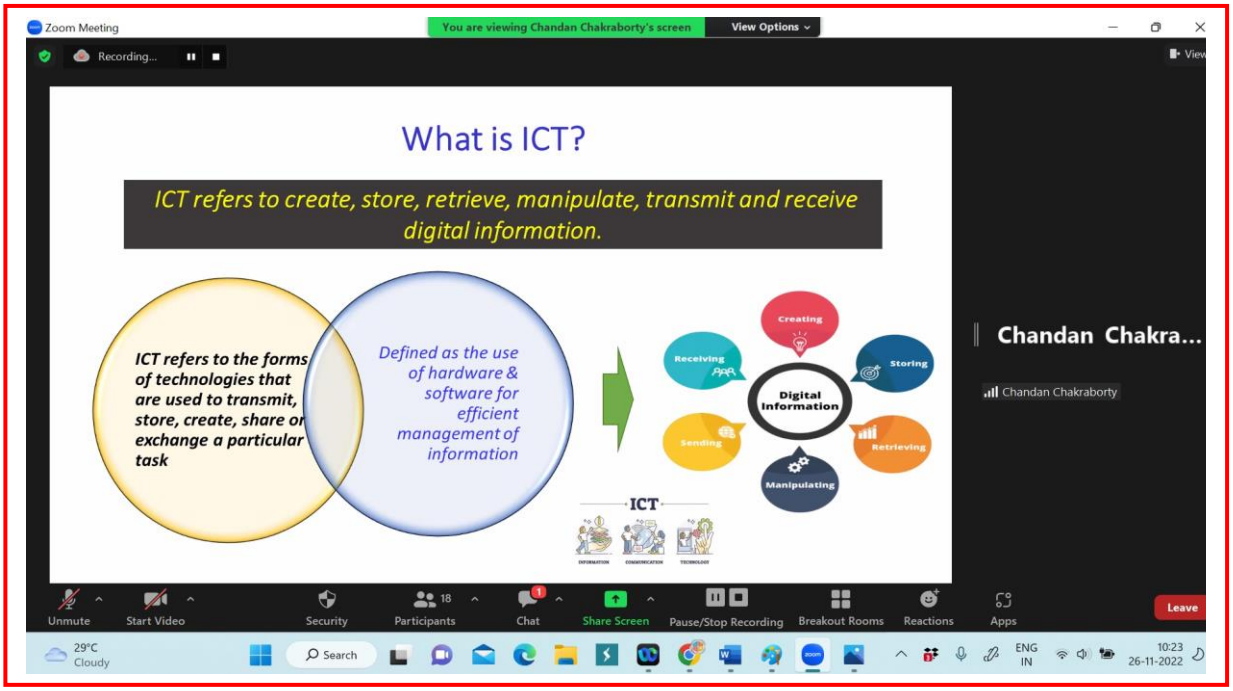
Dr. Bani Bhattacharya, Associate Professor Department of Humanities & social Sciences, Indian Institute of Technology, Kharagpur addressing on the factors for effective e content development

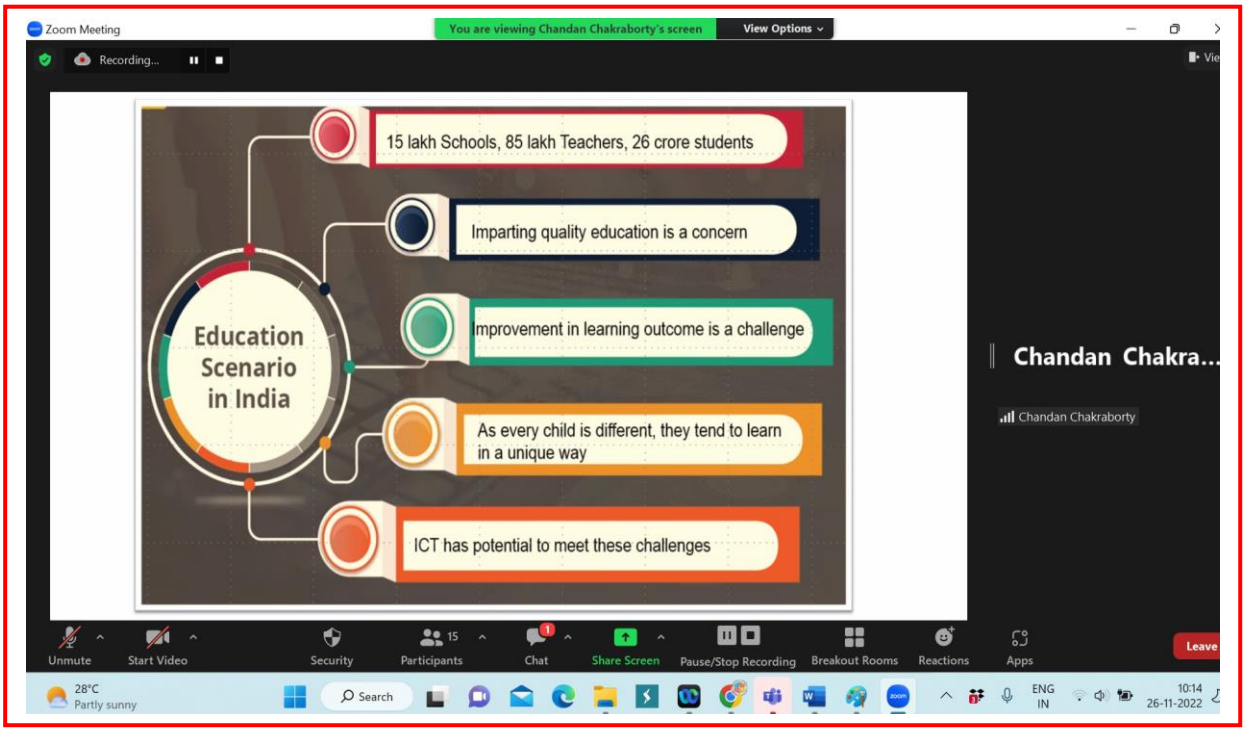
Sessions VI and VII were handled by **Dr. Bani Bhattacharya,** Associate Professor Department of Humanities & Social Sciences, Indian Institute ofTechnology,

Kharagpur on "Prerequisites, roles and responsibilities of e content writer for e content module". She started with Outcome based education and Blooms taxonomy. She explained the following responsibilities for e content writers such as . Define the learning level, Duration, Contact hours, number of teaching modules and their mapping, objectives and learning outcomes, assessment and evaluation strategies, course outline, production and editing related activities , free from plagiarism



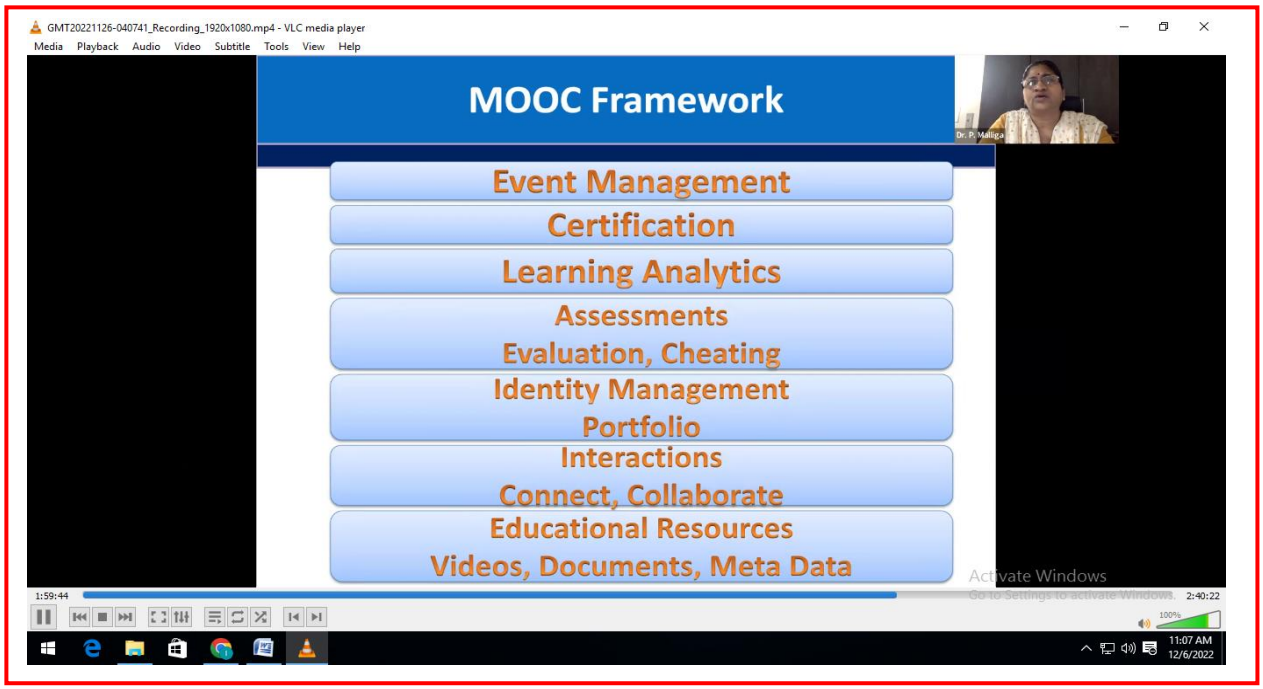
Dr.Chandan Chakraborty , Professor, Computer Science and Engineering . National Institute of Technical Teachers Training and Research (NITTTR), Kolkata addressing on the ICT tools

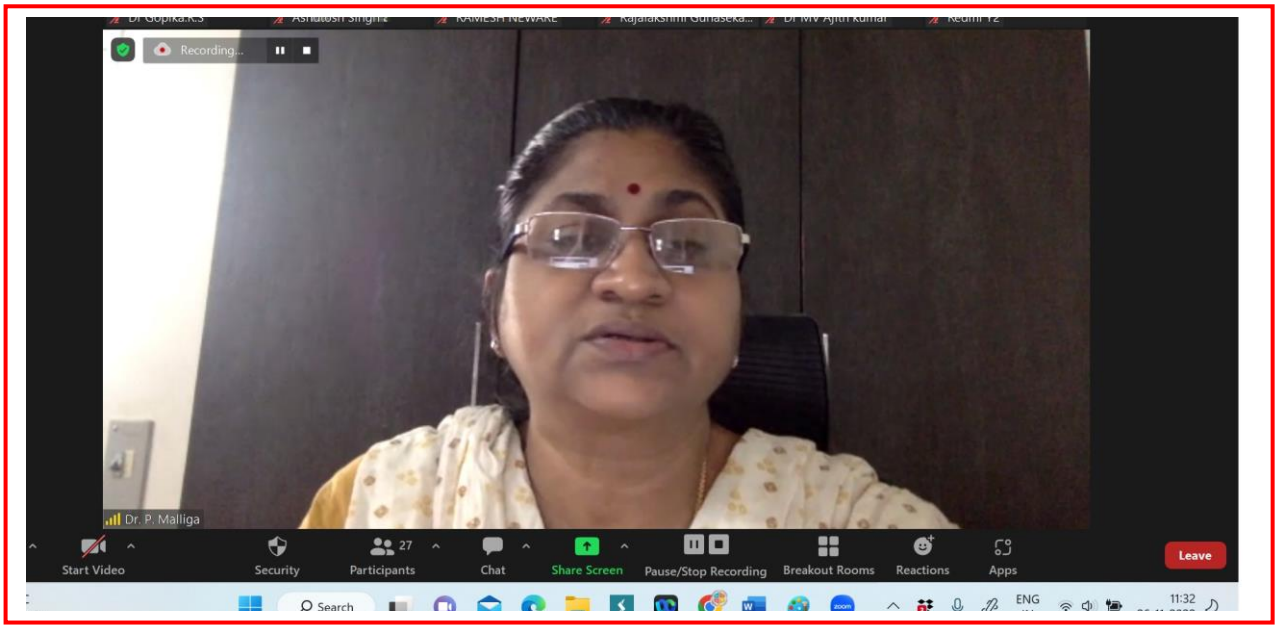


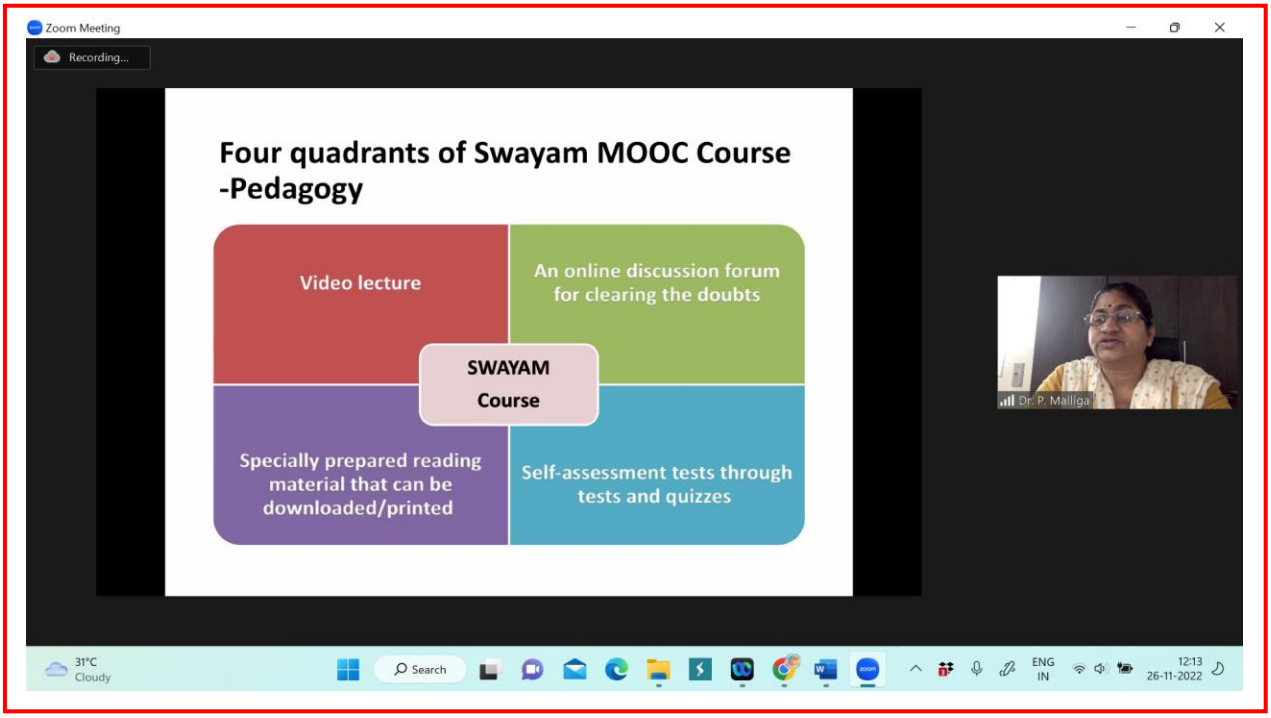


Dr.Chandan Chakraborty , Professor, Computer Science and Engineering , National Institute of Technical Teachers Training andResearch(NITTTR), Kolkata giving introduction on the ICT tools

On the third day 26.11.2022, Dr.Chandan Chakraborty , Professor, Computer Science and Engineering . National Institute of Technical Teachers Training and Research (NITTTR), Kolkata delivered on "Exploring the ICT tools and integration for e content development" in Session VIII. He covered the topics on properties of multimedia system, different stages of e content development, the process of integrating ICT in teaching learning, valuable ICT tools available.







Dr.P.Malliga, Professor in CSE and Head of Educational Media and Technology, National Institute of Technical Teachers Training and Research, NITTTR, Chennai handled the Session on Four quadrants

Dr.P.Malliga, Professor in CSE and Head of Educational Media and Technology, National Institute of Technical Teachers Training and Research, NITTTR, Chennai handled the Session IX on "E-Content Module – The Four Quadrant- stages ofE-content development" with brief introduction on NME-ICT and SWAYAM. She also

delivered on the procedure for proposal submission on e content development to UGC, CEC and NPTEL.

In total 93 participants registered online and 50 in house participants attended offline. The participants expressed their feedback about the workshop as very useful for teachers and sessions were excellently handled by the resource persons. They also expressed their concern to conduct practical sessions on E content development.

The Principal
Periyar Maniammai Institute of Science
& Technology (PMIST)
Periyar Nagar, Vallam
Thanjavur – 613403, Tamil Nadu

Respected Sir/Madam,

Greetings from NAAC.

This is with reference to your proposal seeking NAAC financial assistance/academic support for organizing state/national level workshop/seminar/conference in your institution on the topic **Effective E-content Development for enhanced learning experience of students**. After due consideration your proposal has been accepted for financial assistance of **Rs.30,000/-** (Rupees Thirty-Thousand only). Due to new Corona Virus Disease 2019 (COVID 19), NAAC encourages the HEIs organising seminars though online mode. Therefore, NAAC sponsorship for financial assistance under different heads has been revised. The balance amount required to organize this activity may kindly be mobilized at your end. The financial assistance is subject to the adherence to the enclosed procedures for release of sanctioned grants and settlement of the same. NAAC appreciates the initiative taken by your institution and hope that the institution will continue to strive for quality and excellence in Higher Education.

The seminar/workshop has to be conducted on the scheduled date(s) as mentioned in the seminar proposals sent to NAAC. In case of any change in scheduled date **due to COVID 19** the institution **should inform NAAC the exact date of the seminar**. The claims have to be received by NAAC **on or before a month after seminar/workshop**. In case of any delay in submission of the claims the reimbursement will not be made and NAAC will not be liable for the expenditure incurred.

Yours sincerely,

(Prof. S.C.Sharma)

Dear Professor,

Sub: Online Workshop on Effective E-content Development for enhanced learning experience of students"(24.11.2022 to 26.11.2022) sponsored by NAAC

On behalf of IQAC/ PMIST, we extend our sincere thanks for your kind acceptance to be a resource person to be conducted online from 24th Nov to 26th Nov 2022. The participants will certainly get benefited by your expertise in the field of e content development.

In this regard , the Brochure of the workshop and tentative program schedule are attached herewith for your view.

We request you to kindly send the lecture material for preparing the proceedings of the workshop to be sent to NAAC.
As per the NAAC guidelines, Honorarium of Rs. 2,000/- per lecture will be paid. The bank details may also be sent for making digital payment.

Let me know if there is any modification in the program schedule (Day /Time) , I will do accordingly as your convenience.

Thanks and Regards

To: IQAC PMU <iqac@pmu.edu>

Dear Dr Jayanthi
I would love to participate and talk on Technical, Curriculum and Pedagogical Standards to be followed in E content preparation.
However, I am not certain about my physical availability there at that time.
Best regards
Khanindra

To: IQAC PMU <iqac@pmu.edu>

Dear Madam,
I would be glad to give a 1 or 2 hour lecture (as the topic is quite large) on the topic : Pre-Requisites, Roles and Responsibilities of Content Writer for E content module.
Kindly let me know the venue of the conference so that I can decide if I can go to the venue - or deliver the lecture online

Thanking you,
Bani

PERIYAR MANIAMMAI INSTITUTE OF SCIENCE & TECHNOLOGY
(Deemed to be University)
Established Under Sec. 3 of UGC Act, 1956 • NAAC Accredited
think • innovate • transform

CERTIFICATE OF APPRECIATION

This to certify and appreciate that

Mr. P. Rangovan

Periyar Maniammai Institute of Science & Technology

has participated in Three days' online workshop on

Effective E-content development for enhanced learning experience of students

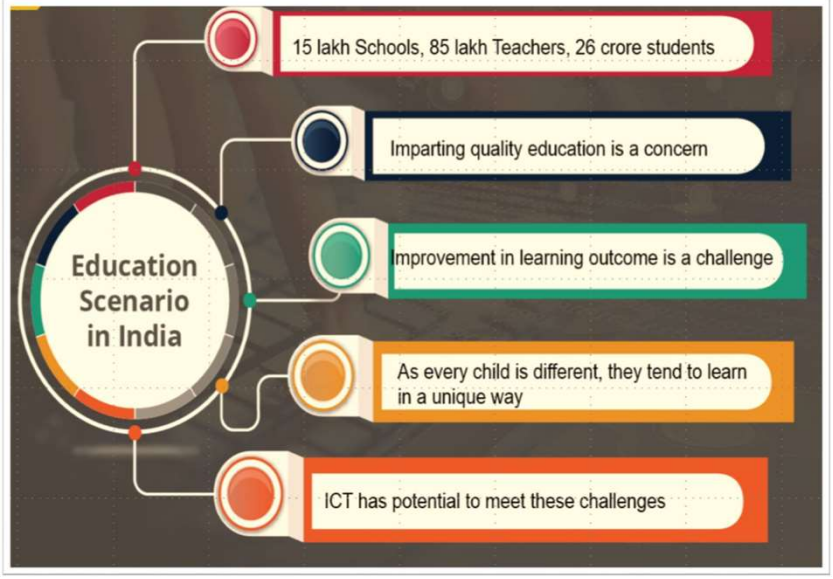
sponsored by National Assessment and Accreditation Council (NAAC) and organized by Internal Quality Assurance Cell (IQAC) of Periyar Maniammai Institute of Science & Technology, Vallam, Thanjavur from 24.11.2022 to 26.11.2022

Dr.R.JAYANTHI
Director i/c -IQAC

Dr.P.K.SRIVIDHYA
Registrar

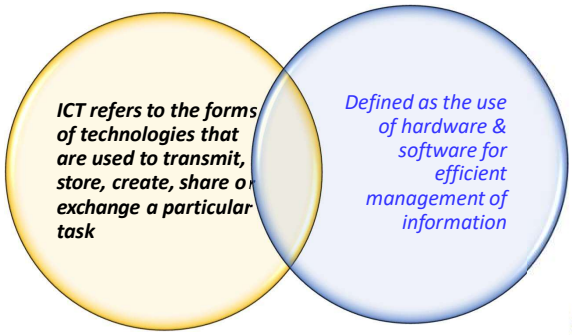
Exploring ICT Tools and Integration for e-Content Development

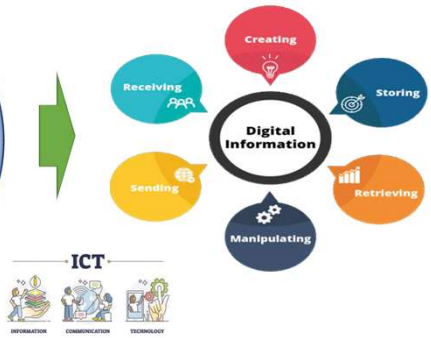
By
Prof. Chandan Chakraborty



What is ICT?

ICT refers to create, store, retrieve, manipulate, transmit and receive digital information.



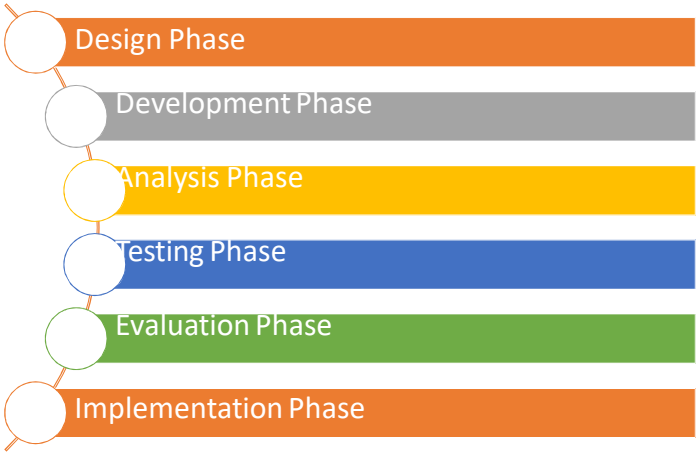


E-learning & E-content

- ***E-learning*** – Use of technology to enable people to learn anytime and anywhere

- ***E-content -*** Digital content prepared in pedagogical framework consisting of text, images, graphics, animation, video chart and many more

Different Phases of e-Content Development



Multimedia = Multi + Media

- **Multi : many, much, multiple**
- **Medium: Channel through information transmitted**
- **Use of computer system to present text, graphics, video, animation and sound in an integrated way.**

Properties of Multimedia System

- ***Computer Controlled***
- ***Integrated***
- ***Information are represented DIGITALLY only.***
- ***Interface to the final presentation media is usually INTERCATIVE.***

Components of a Multimedia System

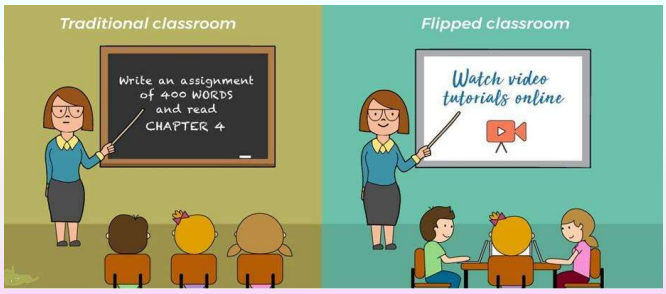
- ***Capture Devices***
  - *Video camera, Video Recorder, Keyboards, 3D input devices etc.*
- ***Storage Devices***
  - *Hard disks, CD-ROMs, DVD, Server, Cloud etc.*
- ***Communication Networks***
  - *Ethernet, FDDI, Intranets, Internets.*
- ***Computer Systems***
  - *Multimedia Desktop, Laptop, Workstations*
- ***Display Devices***
  - *Monitors, Mobiles, Interactive Panels etc.*

Multimedia Elements of e-Content

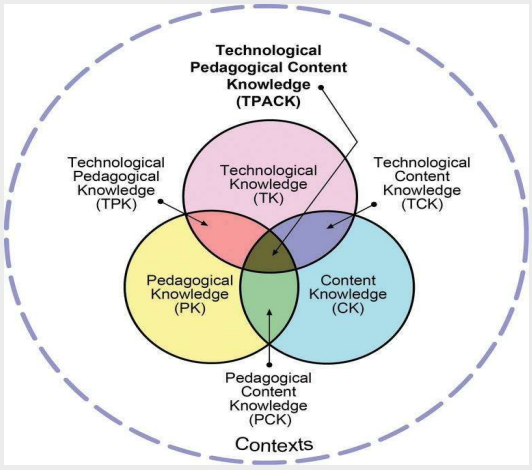
- ***Text***
- ***Pictures***
- ***Animation***
- ***Presentational***
- ***Sound***
- ***Video***

Blended learning

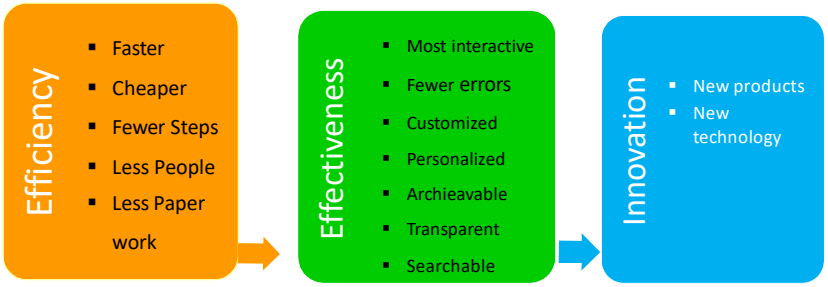
Class-room teaching:	Interactive Digital Content
▪ Classroom teaching cannot be eliminated ▪ Less emphasis	▪ More emphasis ▪ On demand learning interactive



How to Integrate ICT in Teaching-learning?

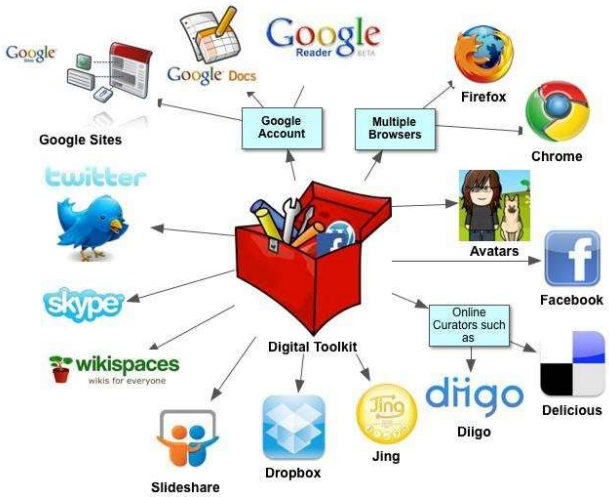


ICT Characteristics



Components of ICT

ONLINE RESOURCES



How to use ICT tools in the classroom

- *Establish a starting point for each student's ICT learning and integrate formative evaluation into key learning areas such as literacy and numeracy.*
- *ICT advancement planning Learning progress of learning curriculum.*
- *Evidence-based ICT learning in conjunction with subject learning.*
- *Besides traditional chalk- duster learning ICT helps in in-depth learning of the subject.*

There are various tools for developing literacy through ICT integration:

Drawing and graphics programs
Web creation and design
Digital video
Emails
Web searching
Wikis
Word Processors
Blogs
Spread sheets

Drawing and Graphics Programs: - Today, visual literacy is equally significant as before. Imagine showing our students how to use one of these drawing or graphics programs to our students so that they can use it creatively, to add an image to a newspaper article, to understand how sometimes a thousand words can be told by color, pictures or gesture. Use the medium.

Web Creation and Design: - Actually, these are the online word processor. Hence the possibilities in literacy lessons are never-ending but may be restricted to the teacher's abilities in ICT.

Digital Video: - Use the power of video to help students develop language skills.

Emails: - Emails are best for developing skills in online literacy. We all write differently online and also for a different audience.

Web Searching: - In the 21st century, the skill to find information is an important skill. What are the available strategies for navigating the internet and electronic texts? What are the clues and signposts?

Wikis: - This can be a knowledge repository for the students and the possibilities for wikis are extensive, such as blogs.

These provide opportunities for children to compose and write without having to master letter production by hand. The learning tools of ICT for childhood education provide many such methods for children and photographs. With the help of the video, we can develop the skills of literacy and language. It is a number one activity because it enables children to weave pictures and words together.

Blogs: - Blogs are a great method for learners to interact and communicate using an online word processor.

Spreadsheets: - Spreadsheets is just like a word processor, through which we can save the documents and have an adequate typing skill. Primary exit abilities comprise the ability to set columns, use basic formulas, insert and delete rows, modify font size, etc.

Presentation Software: - We can use PowerPoint or Prezi, regardless of which, one we like and most familiar with. Make sure that by the end of elementary school, students leave with skills like creating handouts and notes pages, setting up animations, designing their own slide designs, images and inserting tables, and smart art graphics.

ICT Tool for Presentation

Slideshare is used for everything you need to know and love in the form of presentations, documents, infographics, and so on.

With the help of the Google slides, we can work on the same presentation simultaneously.

Nearpod - *Create slideshows that are interactive using quizzes, images, text and questions*.

PowerPoint - *Presentation programme developed by Microsoft that creates a slide show of important information, charts, and images for a presentation. It is sometimes abbreviated as PP or PPT. It is most commonly used in presentations.*

Lesson up - *to make digital lessons that are fun and engaging*.

ICT Tools for Quizzing

With the help of the Google form quizzes, evaluations can be done so easily.

With the help of classmarker, online testing can be done easily.

Moodle - Modular Object-Oriented Dynamic Learning Environment.

- *An online educational platform that provides custom learning environments for students.*
- *Educators can use Moodle to create lessons, manage courses, and interact with teachers and students.*
- *Students can use Moodle to review the class calendar, submit assignments, take quizzes, and interact with their classmates.*

ICT Tools for Online Collaboration

In Google Spreadsheets, we can work simultaneously on the same spreadsheet.

Google Meet is a video-chatting service designed for video conferencing

Google Hangouts is a unified communications service that allows members to initiate and participate in text, voice or video chats, either one-on-one or in a group.

ICT Tools for Screen-recording

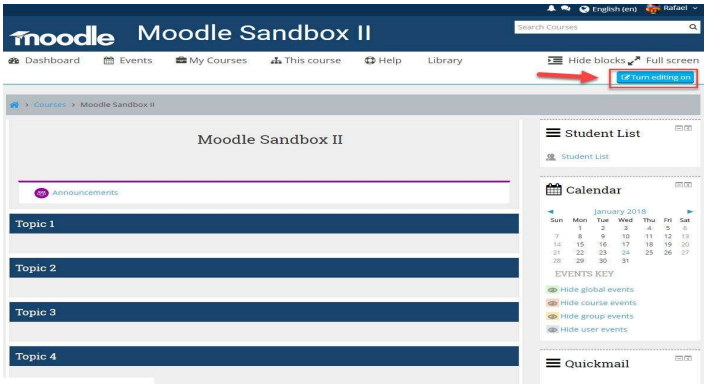
Open Broadcaster Software (OBS) - A free and open-source cross platform for streaming and recording program.

Screencastify - A Chrome browser extension that records the screen, face and voice and entire presentation.

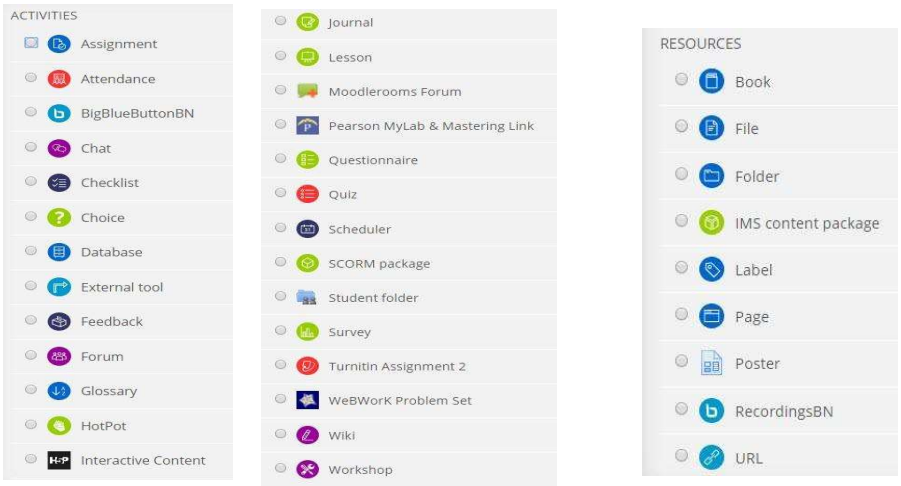
Learning Management System (LMS)

MOODLE -
Modular
Object-
Oriented
Dynamic
Learning
Environment

A free, open source Course Management System (**CMS**) / **LMS**



Moodle Main Features



Google Classroom

- To provide work and return work to students in an electronic manner.
- Simple to use, and works with the rest of the G Suite platform such as Docs, Drive, Gmail and Calendar.

Class Page

- Once you enter a class, you'll be presented with the class page. There are three tabs.
- **Stream** shows you all the latest class updates that have been posted.
- **Classwork** lists all the work you have been set
- **People** shows you all the teachers and fellow students in your class.

Mobile Use

- G Suite and Google Classroom work really well on iPads and smartphones, if you can't access a laptop or desktop computer at home. You will also get notifications of work being set if you install these apps.
- You will need to install the following to get the best of out of the tools. They're all free.

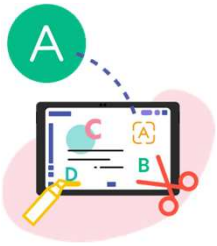
Benefits of using ICT tools in Classroom

- *Using a word processing programme, creates a text.*
- *Communicate with others via email.*
- *Capture and edit digital photos, videos, and graphics.*
- *Online text editing with internet links and images.*
- *Online questionnaire editing.*
- *Send a file to another student or teacher via email.*
- *To create a graph, use a spreadsheet.*
- *Make a presentation using basic animation functions.*

- *Make a presentation using video and audio clips.*
- *Participate in an internet discussion forum.*
- *Make and manage blogs or websites.*
- *Participate in social networking sites.*
- *Download or upload curriculum resources for students to use from/to websites or learning platforms.*
- *Teach students how to conduct themselves ethically online.*
- *Prepare materials for an interactive whiteboard.*

Challenges in using ICT tools in Teaching & Learning

- Insufficient number of internet-connected computers.
- Insufficient bandwidth or speed.
- Insufficient number of interactive whiteboards.
- Insufficient number of laptops/notebooks.
- Computers with no data and/or in need of repair.
- Teachers' insufficient skills.
- Inadequate technical support for teachers.
- Insufficient pedagogical support for teachers.
- Insufficient teaching content/material.



- There is a lack of content in the national language.
- It is too difficult to incorporate ICT use into the curriculum.
- There are no pedagogical models for using ICT for learning.
- Time management (fixed lesson time, etc.)
- Organisation of space (classroom size and furniture, etc.)
- Students are under pressure to prepare for exams and tests.
- The majority of parents are opposed to the use of ICT in schools.
- Teachers are uninterested.
- There is no or little benefit to using ICT for teaching.
- The use of ICT in teaching and learning is not the ultimate goal.

Teachers' Perceptions on implementing ICT tools in teaching and learning

- Students are more focused on their studies.
- Students work harder to understand what they are learning.
- Students feel more in control of their learning (they can repeat exercises if necessary, delve deeper into topics of interest, and so on).
- Students understand what they learn more easily.
- Students retain more of what they have learnt.
- ICT allows students to work together more effectively.
- ICT improves the classroom environment (students more engaged, less disturbing).

Advantages of using ICT

- Cost-efficient
- Provide the facility for easy student managemen
- Direct classroom teaching
- Improved modes of communication
- Eco-friendly-Eliminate the usage of paper
- Direct classroom teaching
- Minimize cost and saves time
- Improved data and information security

Advantages of using ICT

- Web-based LMS tools link teachers, students, researchers, and scholars and education together.
- Teachers are able to teach better with graphics, video and graphics which help them to simulate real classroom environment.
- Teachers can create interesting, well-designed and engaging classroom activities.
- Provide better teaching and learning methods by helping teachers to plan, prepare and conducting online assessment activities in more effective way.
- To spread awareness about the social impact of technological change in education.
- Promoting and improving the digital culture in universities, colleges, and schools.
- Automated solutions to paper-based manual procedures and processes.

Advantages of using ICT

- Spread awareness of the social impact of technological change in education.
- Web-based LMS tools connect students, educators, scholars and researchers, and education personnel together.
- Enhance E-learning and learning management system (LMS) Independent learning platforms for students.
- Teachers can teach better with images, videos and graphics while delivering lessons.
- Educators can create engaging, interesting, and well-designed classroom activities.
- Improve the administration and enhance the quality and efficiency of education.
- Promote and improve the digital culture in schools, colleges, and universities.

Disadvantages of using ICT

- Technology use in the classroom can be a distraction
- Technology can detract students from social interactions
- Technology can foster cheating
- Not all students have equal access
- Implementing computers and the internet is expensive
- Few believe that computers can limit imagination
- Implementing computers and the internet for ICT replace the convention education curriculums
- Managing courses online is difficult
- Misuse of technology

74

Roles and Responsibilities of e-content writers for e-content development

Need for E-learning in Education and Training

- The need to deal with :
  - Larger learner numbers
  - With distance learners
  - Increasing rate of obsolescence of knowledge
- With ever diminishing resources in terms of :
  - Land and infrastructure
  - Quality faculty

E-learning and e-content development : the future of Corporate training and Academic learning

- Availability of on-line tools and procedures
- Training / learning - becoming **"Life-long" activity**

Change in the role of the "Teacher"

- E content Subject –matter specialist and Developer
- Mentor
- Assessment expert

Any content in the internet – is NOT e-content

- E-content is often perceived as copying text / oral content into "uploadable mode"
- Does not lead to effective learning
- Results in higher boredom and drop out rates
- Dropout rates in IGNOU

For e-content to be effective, it needs to be :

- Structured and objective
- In keeping with human attention span
- Modular in nature
- Repeated tests / exercises and revisions
- Have multiple paths for learners with different abilities

2 parts of the talk

- Structure in e-content development
- Discussion on Outcome-Based-Education (OBE) - with the help of a template created by IIT Kharagpur

Structure :

-- Instructional Objectives in the Cognitive Domain

-- Specification Matrix

-- Evaluation

Cognitive Domain -
Thinking skills

Domain most involved in higher education / training/ development of intellectual abilities & skills

- **Six major categories / levels-**

Knowledge / Recall (→ Evaluation (highest)

Sub classification of cognitive domain into levels

EVALUATION ⟹ **Highest level**

SYNTHESIS

ANALYSIS

APPLICATION

COMPREHENSION

KNOWLEDGE ⟹ **Lowest level**

Instructional Objectives in E-content development

"Structure"
through
Instructional Objectives
in E-content Development

Instructional Objectives

A statement that states what students should be able to

DO

after receiving instruction

It has to be -

"SPECIFIC, MEASURABLE, OBSERVABLE, and from the point of view of the Learner"

IO and E-content development

- Instructional objectives in e-content are :
- concrete, achievable and measurable goals for each concept / skill to be attained by the learner

Instructional Objectives & ACTION VERBS

Instructional objectives should not be formulated with vague statements like " the student would understand / appreciate" etc

Instructional objectives are to be formulated with the help of "Action verbs"

Action Verbs indicate what the student will be able to actively do, like – "identify", "assess", "list", "solve", "analyse", "design", "compare", etc.

TAXONOMY CATEGORIES	SAMPLE VERBS FOR STATING SPECIFIC LEARNING OUTCOMES
Knowledge	Identifies, names, defines, describes, lists, matches, selects, outlines
Comprehension	Classifies, explains, summarizes, converts, predicts, distinguishes between
Application	demonstrates, computes, solves, modifies, arranges, operates, relates

Contd.

TAXONOMY CATEGORIES	SAMPLE VERBS FOR STATING SPECIFIC LEARNING OUTCOMES
Analysis	Differentiates, draws diagrams, estimates, separates, infers, orders, subdivides
Synthesis	Combines, creates, formulates, designs, composes, constructs, rearranges, revises
Evaluation	Judges, criticizes, compares, justifies, concludes, discriminates, supports

Are these IOs ?

1. Student will know Newton's Laws of Motion
2. The teacher will tell why…….. Or how……
3. Using the given data in table 1 calculate …….
4. Feel a strong commitment to professional ethics
5. Student will understand how to operate a …… machine to …….
6. Student will appreciate the concepts of sustainable development to engineering design
7. The teacher will teach the perspective view of …….using ……..
8. Learn the best design for a given application

Are these IOs ?

- Develop a knowledge of food-service equipment
- Be able to add a column of numbers
- Be able to apply scientific knowledge
- Internalizing the work-ethics of your organization
- Recognize tactless statements

In E-learning content development

Given Syllabus can be converted to E-content objectives

Difference between

Course description
Course Syllabus
Course Objective

• Course description tells you something about the content & general aims of a course.

• A syllabus provides a "Topic List".

-- depth / breadth of coverage of the topics not clear

-- Uniform depth / breadth of coverage across different teachers

A Course Objective describes the "desired outcome" of a course

Syllabus can be converted to Instructional Objectives.

An example on a course on "Communication Skills"

Syllabus: The course covers the following topics :

Topic – 1 Communication and Professionalism

Topic – 2 Communication: Consistency and Change

…….

Topic-wise Instructional Objectives :

In topic – 1 : (Communication and Professionalism)

At the end of the lesson, the Learner will be able to :

i) identify issues which require consistency in the midst of change

ii) assess basic elements of organizational communication with a major emphasis on small group and team communication.

In topic - 2 : (Communication: Consistency and Change)

i) list basic human and organizational communication needs

i) examine and list major attributes of communications media

Three Important features of a well-written Instructional Objective

- **The performance component**
- **The condition component**
- **The criterion component**

The Condition component ----:

All conditions – that make a significant difference to the nature of the performance" should be stated

Usually identifies :

Tools, procedures, materials, aids, or facilities to be used in performing the task. **("without reference to a manual" or "by checking a chart".)**

(Given a list of chemical elements be able to write valences of each)

The Criterion component - helps to gauge quality of performance

A standard against which to judge success of instruction

Students will know if they have met / exceeded expectations

A "criterion of acceptable performance" increases the communicating power of objectives

This component tells the learner – **How often / how well / how much - for** performance – to be considered competent

Only those criterion should be used that are **"Important / indispensable"** in evaluating the performance

Some common criteria :

Speed / time limit on the performance

Minimum **marks** for passing / grades

How **often** something needs to be done

Level of **accuracy** (within 0.5% accuracy)

Quality of the performance (information is factual / pertinent / treatment is courteous

Examples of learning objectives :

Write a customer reply letter with no spelling mistakes by using a word processor.

Observable Action: Write a customer reply letter
Measurable Criteria: with no spelling mistakes
Conditions of Performance: using a word processor

Copy a table from a spreadsheet into a word processor document within 3 minutes without reference to the manual.

Observable Action: Copy a table from a spreadsheet into a word processor document
Measurable Criteria: within 3 minutes
Conditions of Performance: without referencing the manual.

Work out - examples

- **Learn forklift operations by studying the operator's manual and lift a load of 10 - 15 quintals into a dumpster**
- **Smile at all customers, even when exhausted, unless the customer is irate.**
- **After training, the worker will be able to load a dumptruck within 3 loads with a scooploader, in the hours of darkness, unless the work area is muddy.**

Need for a Specification Matrix

Without an advance plan, some areas in a course will be over represented while others may stay untouched.

- **It is easier to develop lesson plans & build test items on some topics than on others and they get over-represented.**
- **It is also easier to deal with "lower –level" topics in class and also build test items on lower levels – so these get over-represented**

- **To help in this exercise, a specification matrix is used.**

It allows one to decide on the :

- **levels of learning in each of the topics**
- **provides a clear picture of the weightage of each level of learning in each topic, as well as the total score for each topic and each level.**

Specification Matrix - Thermodynamics (Theory)

	Know	Comp	Appl	Analy	Synth	Eval	Total
1. Introduction	1	2	-				3
2. Temperature	3	3	4				10
3. Heat	6	3	3				12
4. Laws of Perfect gases	1	1	4				6
5. Internal Energy	1	1	2				4
6. Transmission of heating	1	2	-				3
7. Laws of Thermodynamics	2	3	1				6
8. Method of heating and expanding gases and vapours	7	5	7				19
9. Thermodynamics cycle	6	6	8				20
10. Engine power measurement	6	5	8				19
11. Entropy	1	1	-				2
TOTAL	35	32	37				104
Percentage	33.6%	30.7 %	35.7%				100

Specification Matrix allows one to decide on the :

detailed topic and structure of the course

- **Decide on the levels of learning one wants the students to attain in each topic .**
- **The matrix also provides a clear picture of the weightage of each level of learning in each topic, as well as the total score for each topic and each level.**
- **Instructional objectives for every topic and consequently, the test items would then seek to adhere to these levels of learning**

Role of Evaluation in the structure of E-content development

Alignment …..
the crucial issue in Evaluation
in
E-learning

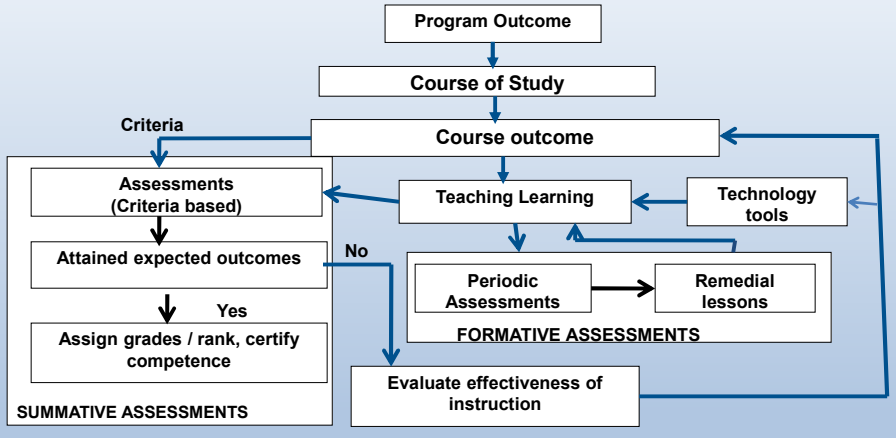
OBE

Impact of Assessment system on teaching and learning



Direct Assessment methods

- Semesters Exam.
- Assignment
- Lab Assignments
- Project
- Seminar
- Viva

43

Evaluation Rubric - Direct Methods

Sl No	Assessment methods	Marks/ Weightage
1	Mid. Semester (T1)	30
2	End. Semester (T2)	50
3	Assignment (T3)	20

44

Indirect Assessment Methods

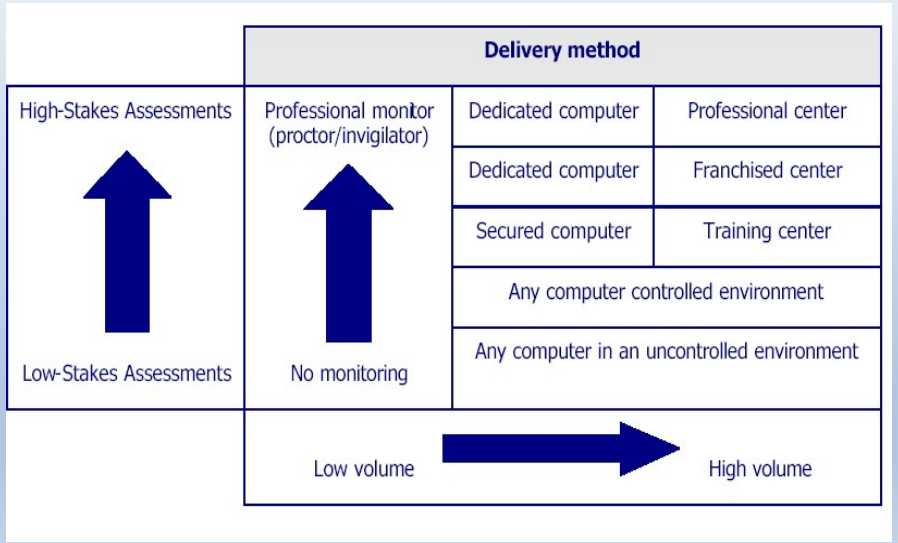
- **Alumni Feedback:**
  - ➢ **feedback and suggestions about program satisfaction with respect to program outcomes.**
  - ➢ **feedback and suggestions for each of the course outcome**

- **Exit Survey: feedback collected from final year students**
  - ➢**Course outcome**
  - ➢**Program outcome**

- **Employer Feedback: feedback collected from the Employer of the students**
  - ➢**Course outcome**
  - ➢**Program outcome**

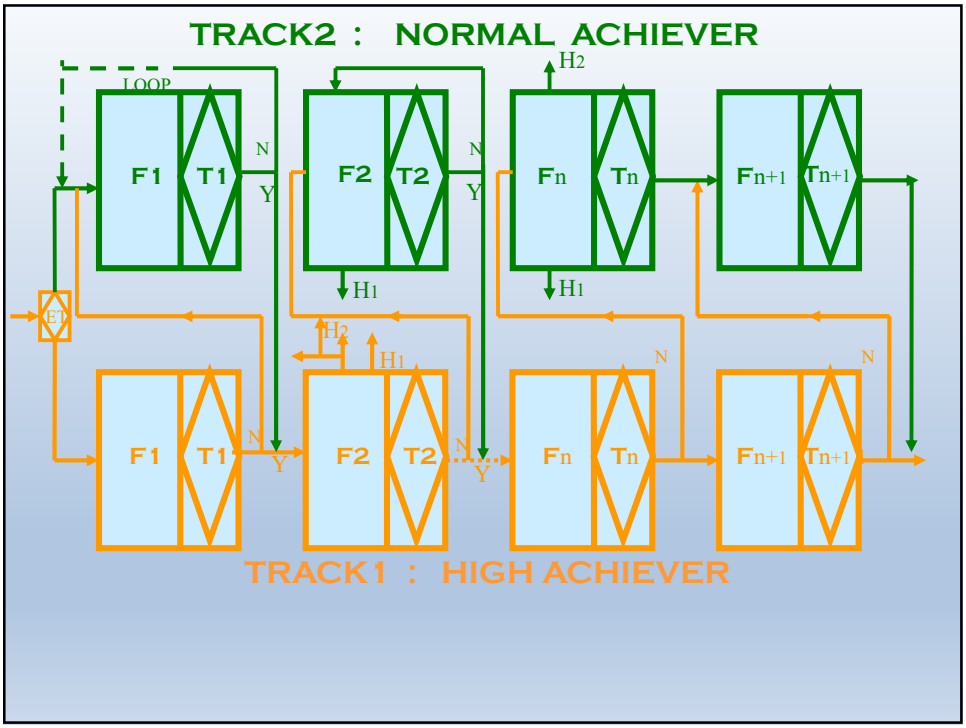
45

Delivery Environment



Adaptive assessments

- **This is an approach which varies the serial selection of questions according to the candidate performance on previous questions and allows :**
  - **Adjusting the level of difficulty of the question items presented to better suit the current ability level of the candidate**
  - **As a diagnostic aid to place candidates on courses at an appropriate level**



Some Implications of Evaluation in e-content development

- Creating electronic test –item bank
- Providing access to test-items based on "metadata" search
- Generating multiple equivalent test papers according to given criteria
- Conducting online tests
- Computing grades automatically
- Conducting test-item analysis
- Keeping records of student performance

Other design Issues in adaptive assessments

- How much confirmation participants need to make to move from one assessment block to another
- Whether to enable or set help buttons
- How to communicate rules for how scoring and pass/fail work
- How assessment results are to be archived

Security considerations

in

Evaluation in E-learning

Security Considerations

- ***Encrypted communications:*** communications between the browser and server need to be encrypted in online tests.
- ***Scheduling assessments:*** setting start times of assessments, the length of assessments, and the number of times that assessments may be taken.

Security Considerations (contd.)

- ***Monitoring assessments:***
  - started by the participant only when a proctor or invigilator has logged on after the candidate.
  - The monitor can also be limited to a range of IP addresses to ensure that a certain physical location is used to administer the assessment.
- ***Authoring secure assessments:*** There are many safeguards that can be taken during the assessment authoring process to help protect the security of the assessment (questions delivered in a random order)……

Security Considerations (contd.)

- ***Secure browsers:*** 'Lock down' computers used in assessments to keep students from accessing other applications and websites while engaged within a assessment. **This lockdown is usually performed via a secure browser**,
- The secure browser must be effectively authenticated by the server to prevent spoofing by technically competent cheats.

The goals and structure of Outcome Based Education

- ***Make engineering education system more learner-centric***
- ***Take care of individual differences amongst learners***
- ***Ensure mastery over not only domain knowledge but also over the knowledge ,skills and attitudes needed for the 21st century***

Outcome-based learning – explicit goals:

- ***Focusing more on objectives which promote higher order thinking skills such as Analysis, Synthesis, Evaluation and Creativity***
- ***Creation of objectives in terms of knowledge, skills and attitudes using measurable Action Verbs.***
- ***Ensuring evaluation procedure are in synch with stated objectives***

Implicit Goals of OBE

- MakIng students more responsible for their own learning
- Promoting Learning to learn, communication skills, working in groups
- Within limits, learners be allowed to follow their own pace, learning styles so that individual differences are largely taken care of
- Allow continuous modification / improvement in curricula, incorporation of better OERs, more effective teaching–learning strategies

Structure of OBE course curriculum

- Course overview
- Well-defined course objectives
- Module overview
- Module objectives
- Unit objectives (SIO)

- All problems must be explicitly linked to one or more instructional objectives.

- Module level learning strategies have to be suggested – eg,. references to selected learning resources (books, journals, websites, simulations, video lectures and virtual labs – as appropriate).
