

## **Criterion 1 – Curricular Aspects**

Key Indicator	1.1	Curriculum Design and Development
Metric	1.1.3	Average percentage of courses having focus on employability/ entrepreneurship/ skill development offered by the department.

## DEPARTMENT OF CIVIL ENGINEERING

## SYLLABUS COPY OF THE COURSES HIGHLIGHTING THE FOCUS ON EMPLOYABILITY/ ENTREPRENEURSHIP/ SKILL DEVELOPMENT

1. List of courses for the programmes in order of

S.	Programme name
No.	
1	Bachelor of Technology(Civil Engineering)(Full Time)
2	Bachelor of Technology((Civil Engineering)(Part Time)
3	Master of Technology(Environmental Engineering)(Full Time)
4	Master of Technology(Environmental Engineering)(Part Time)

2. Syllabus of the courses as per the list.

- Legend : Words highlighted with **Blue Color** Words highlighted with **Red Color** Words highlighted with **Purple Color**
- Entrepreneurship
- Employability
- Skill Development

Name of the Course	Course Code	Year of introduction	Activities/Content with direct bearing on Employability/ Entrepreneurship/ Skill development
Calculus and Linear Algebra	XMA101	2018-19	Skill Development - Assignment and Seminar
Electrical and Electronic Engineering Systems	XBE102	2018-20	Skill Development - Assignment and Seminar
Physics	XAP103	2018-21	Skill Development - Assignment and Seminar
Engineering Graphics and Design	XEG104	2018-22	Skill Development- Understand the views of the objects, Drawings under various views
Speech Communication	XGS105	2021-22	Skill Development - Assignment and Seminar
Constitution of India	XUM106	2017-18	Skill Development - Assignment and Seminar
Electrical and Electronic Engineering Systems Laboratory	XBE107	2021-22	Skill Development - Assignment and Seminar
Applied Physics for Engineers Laboratory	XAP108	2008-09	Skill Development - Assignment and Seminar
Calculus, Ordinary Differential Equations and Complex Variable	XMA201	2018-19	Skill Development - Assignment and Seminar
Programming for Problem Solving	XCP202	2013-14	Employability- Test,Assignment, Seminar,Poster Presentation
Chemistry	XAC203	2008-09	Skill Development-Assignment, Seminar
Technical Communication	XGS204	2021-22	Skill Development - Assignment and Seminar
Workshop Practices	XWP205	2008-09	Skill Development- Understand the views of the objects, Drawings under various views
Engineering Mechanics	XEM206	2008-09	Skill Development - Assignment and Seminar
Programming for Problem Solving Laboratory	XCP207	2013-14	Employability- Test,Assignment, Seminar,Poster Presentation
Chemistry Laboratory	XAC208	2008-09	Skill Development - Assignment

			and Seminar		
Disaster Preparedness & Planning	XCE302	2019-20	Skill Development - Album and Seminar		
Computer Aided Civil Engineering Drawing	XCE303	2019-20	Skill Development-Assignment and Tutorial		
Engineering Mechanics	XCE304	2014-15	Skill Development-Assignment and Tutorial		
Energy Science and Engineering	XCE305	2014-15	Employability-Field work and Assignments		
Surveying – I	XCE306	2014-15	Skill development- Assignment		
Introduction to Civil Engineering	XCE307	2019-20	Skill Development - Assignment and Seminar		
Effective Technical Communication	XGS308	2016-17	Skill Development-Assignment, Seminar, Technical Report		
Inplant Training - I	XCE309	2014-15	Skill Development-Assignment, Seminar, Technical Report		
Digital Land surveying and mapping	XCEM09	2019-20	Entrepreneurship-Case study		
Concrete Technology	XCE402	2011-12	Skill development-Literature survey		
Engineering Geology	XCE403	2008-09	Employability, Quiz/case study		
Mechanics of Fluids	XCE404	2015-16	Skill Development-Assignment and Tutorials		
Entrepreneurship Development	XUM405	2016-17	Skill development- Tutorials and Assignment		
Mechanics of Solids	XCE406	2013-14	Skill development- Tutorials and Assignment		
Geotechnical Engineering	XCE407	2015-16	Employability, Quiz/case study		
Surveying II	XCE408	2014-15	Skill development- Tutorials and Assignment		
Material Testing and Evaluation	XCE409	2018-19	Skill development- Tutorials and Assignment		

Mechanics of Materials	XCE501	2019-20	Employability-Tutorials, solving complex problems
Hydraulic Engineering	XCE502	2019-20	Skill Development-Assignment, Seminar, Technical Report
Structural Analysis	XCE503	2019-20	Employability-Tutorials, solving complex problems
Hydrology & Water Resources Engineering	XCE504	2019-20	Skill Development-Assignment, Seminar, Technical Report
Environmental Engineering	XCE505	2019-20	Employability –Tutorials and Case Study
Constitution of India	XUM506	2019-20	Skill Development-Assignment, Seminar, Technical Report
Transportation Engineering	XCE507	2019-20	Skill Development-Assignment, Seminar, Technical Report
Construction Engineering & Management	XCE508	2019-20	Skill Development-Assignment, Seminar, Technical Report
Professional Practice, Law & Ethics	XCE509	2019-20	Skill Development-Assignment, Seminar, Technical Report
In-plant Training - II	XCE510	2019-20	Skill development-Field work
Survey Camp	XCEM08	2008-09	Skill Development-Assignment, Seminar, Technical Report
Structural Engineering	XCE601	2019-20	Employability –Tutorials and Seminar
Engineering Economics, Estimation & Costing	XCE602	2019-20	Skill Development - Assignment and Seminar
Elective-I	XCEE**	2019-20	Skill Development - Assignment and Seminar
Elective-II	XCEE**	2019-20	Skill Development - Assignment and Seminar
Elective-III	XCEE**	2019-20	Skill Development - Assignment and Seminar
Elective-IV	XCEE**	2019-20	Skill Development - Assignment and Seminar

Elective V	XCEE**	2021-22	Skill Development-Assignment, Seminar, Technical Report
Elective-VI	XCEE**	2021-22	Skill Development-Assignment, Seminar, Technical Report
Elective VII	XCEE**	2021-22	Skill Development-Assignment, Seminar, Technical Report
Project Phase – I	XCE705	2021-22	Employability- Field visit
Inplant Training - III	XCE706	2021-22	Skill development-Field work
Real Estate and Valuation	XCEM01	2019-20	Skill development-Field work
Elective VIII	XCEE**	2021-22	Skill Development - Assignment and Seminar
Project Phase– II	XCE804	2021-22	Skill Development - Assignment and Seminar
Mechanics of Solids-I	PCE102	2012-13	Skill Development-Assignment and Tutorial
Fluid Mechanics and Machinery	PCE103	2012-13	Skill Development-Assignment and Tutorial
Strength of Materials Lab	PCE104	2012-13	Employability-Field work and Assignments
Fluid Mechanics and Machinery Lab	PCE105	2012-13	Skill Development-Assignment and Tutorial
Mechanics of Solids-II	PCE201	2012-13	Employability-Tutorials and Assignments
Geotechnical Engineering - I	PCE202	2012-13	Employability – Tutorials, Seminar and Assignments
Concrete Technology	PCE203	2012-13	Skill development- Drawing Preparation
Disaster Management	P**204	2012-13	Entrepreneurship-Case study
Geotechnical Engineering Lab	PCE205	2012-13	Employability-Field work and Document Preparation

Chemistry and Microbiology for Environmental Engineers	YEN101	2014-15	Skill development-Case study, Assignment
Unit Operation and Processes in Environmental Systems	YEN102	2019-20	Employability- Case study, Problem solving
Air Pollution and Control	YEN103C	2014-15	Employability- Case study, Assignment
Environment Economics	YEN103B	2018-19	Skill development-Report writing
Environmental Policies and Legislation	YEN104C	2018-19	Employability- Case study, Seminar
Environmental Quality Measurements Laboratory - I (Water & Wastewater)	YEN105	2014-15	Skill development-Analysis
Microbiology Laboratory	YEN106	2014-15	Skill development- Analysis
Research Methodology and IPR	YRM107	2014-15	Skilldevelopment-Reportwriting
Transport of Water and Waste water	YEN201	2014-15	Employability-Case study, Assignments
Biological Treatment of Waste water	YEN202	2018-19	Employability- Case Study
Solid and Hazardous Waste Management	YEN203	2014-15	Employability- Case study, field visit
Environmental Geotechnology	YEN204B	2018-19	Skill development- Case study, Assignments
Environmental Quality Measurements Laboratory - II (Air, Noise and Solidwaste)	YEN205	2014-15	Skill development- analysis
Unit Operation Laboratory	YEN206	2014-15	Skill Development- analysis
Mini Project	YEN207	2014-15	Skill development-Experimental work

Ground Water Contamination and Transport Modeling	YEN301A	2014-15	Employability- Case study		
Industrial Safety	YMEOE1	2018-19	Employability- Case Study, Report writing		
Dissertation Phase - I	YEN303	2014-15	Employability- Design and Analysis		
Dissertation Phase - I	YEN401	2014-15	Employability- Design, Analysis Fabrication, Testing , Report preparation		
ChemistryandMicrobiologyforEnvironmental Engineers	QEN101	2018-19	Skill development-Case study, Assignment		
Microbiology Laboratory	QEN103	2018-19	Skill development- Analysis		
Unit Operation and Processes in Environmental Systems	QEN201	2018-19	Skill development- Analysis		
Environmental Quality Measurements Laboratory - I (Water &Waste water)	QEN203	2018-19	Skill development- Analysis		
Transport of Water and Wastewater	QEN301	2012-13	Employability-Case study, Assignments		
Environmental Quality Measurements Laboratory - II(Air, Noise and Solid waste)	QEN303	2018-19	Skill development- analysis		
Biological Treatment of Waste water	QEN401	2018-19	Employability- Case Study, Report writing		
Mini Project	QEN404	2012-13	Employability- Design and Analysis		
Project Work - Phase I	QEN501	2012-13	Employability- Design and Analysis		
Project Work - Phase II	QEN601	2012-13	Employability - Field work and Lab scale performance		

COURSE CODE	XMA101	L	Т	Р	С
COURSE NAME	CALCULUS AND LINEAR ALGEBRA	3	1	0	4
PREREQUISITES	NIL	L	Т	Р	Н
C:P:A= 3:0.5:0.5		3	1	0	4

#### **COURSE OBJECTIVES**

Understand the application of calculus and linear algebra in engineering.

COUR	<b>SE OUTCOMES</b>	DOMAIN	LEVEL
CO1	<i>Apply</i> orthogonal transformation to reduce quadratic form to canonical forms.	Cognitive	Remembering Applying
CO2	<i>Apply</i> power series to tests the convergence of the sequences and series. Half range Fourier sine and cosine series.	Cognitive Psychomotor	Applying Remembering Guided Response
CO3	<i>Find</i> the derivative of composite functions and implicit functions. Euler's theorem and Jacobian.	Cognitive Psychomotor	RememberingGuid ed Response
CO4	<i>Explain</i> the functions of two variables by Taylor's expansion, by finding maxima and minima with and without constraints using Lagrangian Method. Directional derivatives, Gradient, Curl and Divergence.	CognitiveAffec tive	Remembering Understanding Receiving
CO5	<i>Apply</i> Differential and Integral calculus to notions of Curvature and to improper integrals.	Cognitive	Applying

#### UNIT I MATRICES

Linear Transformation - Eigen values and Eigen vectors - Properties of Eigen values and Eigen vectors -Cayley-Hamilton Theorem – Diagonalisation of Matrices – Real Matrices: Symmetric - Skew-Symmetric and Orthogonal Quadratic form - canonical form - Nature of Quadratic form and Transformation of Quadratic form to Canonical form (Orthogonal only).

#### **UNIT II SEQUENCES AND SERIES**

Sequences: Definition and examples-Series: Types and convergence- Series of positive terms - Tests of convergence: comparison test, Integral test and D'Alembert's ratio test-Fourier series: Half range sine and cosine series- Parseval's Theorem.

#### **UNIT III MULTIVARIABLE CALCULUS: PARTIAL DIFFERENTIATION** 12L+3T

Limits and continuity -Partial differentiation - Total Derivative - Partial differentiation of Composite Functions: Change of Variables - Differentiation of an Implicit Function - Euler's Theorem- Jacobian.

#### MULTIVARIABLE CALCULUS: MAXIMA AND MINIMA AND UNIT IV 12L+3T **VECTOR CALCULUS**

Taylor's theorem for function of Two variables- Maxima, Minima of functions of two variables: with and without constraints - Lagrange's Method of Undetermined Multipliers - Directional Derivatives - Gradient, Divergence and Curl.

#### UNIT V DIFFERENTIAL AND INTEGRAL CALCULUS

12L+3T

## 12L+3T

Evolutes and involutes; Evaluation of definite and improper integrals; Beta and Gamma functions and their properties; Applications of definite integrals to evaluate surface areas and volumes of revolutions.

#### UNIT I FUNDAMENTALS OF DC AND AC CIRCUITS, MEASUREMENTS 9+3

Fundamentals of DC– Ohm's Law – Kirchhoff's Laws - Sources - Voltage and Current Relations – Star/Delta Transformation - Fundamentals of AC – Average Value, RMS Value, Form Factor - AC power and Power Factor, Phasor Representation of sinusoidal quantities, Simple Series, Parallel, Series Parallel Circuit - Operating Principles of Moving coil and Moving Iron Instruments (Ammeter, Voltmeter) and Dynamometer type meters (Watt meter and Energy meter).

#### UNIT II ELECTRICAL MACHINES

Construction, Principle of Operation, Basic Equations, Types and Application of DC Generators, DC motors - Basics of Single-Phase Induction Motor and Three Phase Induction Motor- Construction, Principle of Operation of Single-Phase Transformer, Three phase transformers, Auto transformer.

#### UNIT III SEMICONDUCTOR DEVICES

Classification of Semiconductors, Construction, Operation and Characteristics: PN Junction Diode -

9+3

9+3

Zener Diode, PNP, NPN Transistors, Field Effect Transistors and Silicon Controlled Rectifier – Applications

#### UNIT IV DIGITAL ELECTRONICS

Basic of Concepts of Number Systems, Logic Gates, Boolean Algebra, Adders, Subtractors, multiplexer, demultiplexer, encoder, decoder, Flipflops, Up/Down counters, Shift Registers.

#### UNIT V MICROPROCESSORS

Architecture, 8085, pin diagram of 8085, ALU timing and control unit, registers, data and address bus, timing and control signals, Instruction types, classification of instructions, addressing modes, Interfacing Basics: Data transfer concepts – Simple Programming concepts.

UNIT - I MECHANICS OF SOLIDS											

**Mechanics:** Force - Newton's laws of motion - work and energy - impulse and momentum - torque - law of conservation of energy and momentum - Friction.

**Elasticity:** Stress - Strain - Hooke's law - Stress strain diagram - Classification of elastic modulus - Moment, couple and torque - Torsion pendulum - Applications of torsion pendulum - Bending of beams - Experimental determination of Young's modulus: Uniform bending and non-uniform bending.

#### **UNIT -II ELECTROMAGNETIC THEORY**

Laws of electrostatics - Electrostatic field and potential of a dipole; Dielectric Polarisation, Dielectric constant, internal field - Clausius Mossotti Equation - Laws of magnetism - Ampere's Faraday's law; Lenz's law - Maxwell's equation - Plane electromagnetic waves; their transverse nature - expression for plane, circularly and elliptically polarized light - quarter and half wave plates - production and detection of plane, circularly and elliptically polarized light.

#### UNIT -III OPTICS, LASERS AND FIBRE OPTICS

**Optics:** Dispersion- Optical instrument: Spectrometer - Determination of refractive index and dispersive power of a prism- Interference of light in thin films: air wedge - Diffraction: grating.

**LASER**: Introduction - Population inversion -Pumping - Laser action - Nd-YAG laser -  $CO_2$  laser - Applications

**Fibre Optics:** Principle and propagation of light in optical fibre - Numerical aperture and acceptance angle - Types of optical fibre - Fibre optic communication system (Block diagram).

#### **UNIT -IV SEMICONDUCTOR PHYSICS**

**Semiconductors**: Energy bands in solids - Energy band diagram of good conductors, insulators and semiconductors - Concept of Fermi level - Intrinsic semiconductors - Concept of holes - doping - Extrinsic semiconductors - P type and N type semiconductors - Hall effect.

**Diodes and Transistors**: P-N junction diode - Forward bias and reverse bias - Rectification action of diode - Working of full wave rectifier using P N junction diodes - PNP and NPN transistors - Three different configurations - Advantages of common emitter configuration - working of NPN transistor as an amplifier in common emitter configuration.

#### **UNIT -V QUANTUM PHYSICS**

Introduction to quantum physics, black body radiation, Compton effect, de Broglie hypothesis, wave – particle duality, uncertainty principle, Schrodinger wave equation (Time dependent and Time independent), particle in a box, Extension to three dimension - Degeneracy.

#### **COURSE OBJECTIVES**

- To prepare the student to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- To prepare the student to communicate effectively
- To prepare the student to use the techniques, skills, and modern engineering tools necessary for engineering practice

COUF	RSE OUTCOMES	DOMAIN	LEVEL
C01	<i>Apply</i> the national and international standards, <i>construct</i> and <i>practice</i> various curves	Cognitive Psychomotor Affective	Apply Guided response Respond
CO2	<i>Interpret, construct</i> and <i>practice</i> orthographic projections of points, straight lines and planes.	Cognitive Psychomotor Affective	Understand Mechanism Respond
CO3	<i>Construct Sketch</i> and <i>Practice</i> projection of solids in various positions and true shape of sectioned solids.	Cognitive Psychomotor Affective	Apply overt response Respond
CO4	<i>Interpret, Sketch</i> and <i>Practice</i> the development of lateral surfaces of simple and truncated solids, intersection of solids.	Cognitive Psychomotor Affective	Understand Overt response Respond
CO5	<i>Construct sketch</i> and <i>practice</i> isometric and perspective views of simple and truncated solids.	Cognitive Psychomotor Affective	Apply Overt response Respond

## UNIT IINTRODUCTION, FREE HAND SKETCHING OF ENGG OBJECTS6L+12PAND CONSTRUCTION OF PLANE CURVE6L+12P

Importance of graphics in engineering applications – use of drafting instruments – BIS specifications and conventions as per SP 46-2003.

Pictorial representation of engineering objects – representation of threedimensional objects in two dimensional media – need for multiple views – developing visualization skills through free hand sketching of three dimensional objects.

Polygons & curves used in engineering practice – methods of construction – construction of ellipse, parabola and hyperbola by eccentricity method – cycloidal and involute curves – construction – drawing of tangents to the above curves. Practice on basic tools of CAD.

#### UNIT II PROJECTION OF POINTS, LINES AND PLANE SURFACES

6L+12P

General principles of orthographic projection – first angle projection – layout of views – projections of points, straight lines located in the first quadrant – determination of true lengths of lines and their inclinations to the planes of projection – traces – projection of polygonal surfaces and circular lamina inclined to both the planes of projection-CAD practice on points and lines

#### UNIT III PROJECTION OF SOLIDS AND SECTIONS OF SOLIDS

Projection of simple solids like prism, pyramid, cylinder and cone when the axis is inclined to one plane of projection – change of position & auxiliary projection methods – sectioning of above solids in simple vertical positions by cutting plane inclined to one reference plane and perpendicular to the other and above solids in inclined position with cutting planes parallel to one reference plane – true shapes of sections-CAD practice on solid models.

#### UNIT IV DEVELOPMENT OF SURFACES AND INTERSECTION OF SOLIDS

Need for development of surfaces – development of lateral surfaces of simple and truncated solids – prisms, pyramids, cylinders and cones – development of lateral surfaces of the above solids with square and circular cutouts perpendicular to their axes – intersection of solids and curves of intersection –prism with cylinder, cylinder & cylinder, cone & cylinder with normal intersection of axes and with no offset-CAD practice on intersection of solids.

#### UNIT V ISOMETRIC AND PERSPECTIVE PROJECTIONS

Principles of isometric projection – isometric scale – isometric projections of simple solids, truncated prisms, pyramids, cylinders and cones – principles of perspective projections – projection of prisms, pyramids and cylinders by visual ray and vanishing point methods-CAD practice on isometric view.

#### **COURSE OBJECTIVES**

• Understand the application of Calculus, Ordinary Differential Equations and Complex Variable in engineering.

COUR	SE OUTCOMES	DOMAIN	LEVEL
CO1	<b>Find</b> double and triple integrals and to find line, surface and volume of an integral by <b>Applying</b> Greens, Gauss divergence and Stokes theorem.	Cognitive	Remember, Apply
CO2	<b>Solve</b> first order differential equations of different types which are solvable for p, y, x and Clairaut's type.	Cognitive	Apply
CO3	<b>Solve</b> Second order ordinary differential equations with variable coefficients using various methods.	Cognitive	Apply
CO4	<ul><li>Use CR equations to verify analytic functions and to find harmonic functions and harmonic conjugate.</li><li>Conformal mapping of translation and rotation. Mobius transformation.</li></ul>	Cognitive Psychomotor	Remember, Apply Guided Response
CO5	<ul><li>Apply Cauchy residue theorem to evaluate contour integrals involving sine and cosine function and to state Cauchy integral formula, Liouvilles theorem.</li><li>Taylor's series, zeros of analytic functions, singularities, Laurent's series.</li></ul>	Cognitive Affective	Apply Receiving

#### UNIT I MULTIVARIABLE CALCULUS (INTEGRATION)

Multiple Integration: Double integrals (Cartesian) - change of order of integration in double integrals - Change of variables (Cartesian to polar) - Triple integrals (Cartesian), Scalar line integrals - vector line integrals - scalar surface integrals - vector surface integrals - Theorems of Green, Gauss and Stokes.

#### UNIT II FIRST ORDER ORDINARY DIFFERENTIAL EQUATIONS 9L+3T

Exact - linear and Bernoulli's equations - Euler's equations - Equations not of first degree: equations solvable for p - equations solvable for y- equations solvable for x and Clairaut's type.

#### UNIT III ORDINARY DIFFERENTIAL EQUATIONS OF HIGHER ORDERS 9L+3T

Second order linear differential equations with variable coefficients- method of variation of parameters -Cauchy-Euler equation- Power series solutions- Legendre polynomials- Bessel functions of the first kind and their properties.

#### UNIT IV COMPLEX VARIABLE – DIFFERENTIATION

Differentiation-Cauchy-Riemann equations- analytic functions-harmonic functions-finding harmonic conjugate- elementary analytic functions (exponential, trigonometric, logarithm) and their properties-

#### 9L+3T

Conformal mappings- Mobius transformations and their properties.

### UNIT V COMPLEX VARIABLE – INTEGRATION

Contour integrals - Cauchy-Goursat theorem (without proof) - Cauchy Integral formula (without proof)-Liouville's theorem (without proof)- Taylor's series- zeros of analytic functions- singularities- Laurent's series – Residues- Cauchy Residue theorem (without proof)- Evaluation of definite integral involving sine and cosine- Evaluation of certain improper integrals using the Bromwich contour.

#### **UNIT I PROGRAMMING FUNDAMENTALS AND I/O STATEMENTS**

Introduction to components of a computer system, Program - Flowchart - Pseudo code - Software -Introduction to C language - Character set - Tokens: Identifiers, Keywords, Constants, and Operators sample program structure -Header files – Data Types- Variables - Output statements – Input statements.

#### UNIT II CONTROL STRUCTURES AND ARRAYS

Control Structures - Conditional Control statements: Branching, Looping - Unconditional control structures: switch, break, continue, goto statements - Arrays: One Dimensional Array - Declaration -Initialization - Accessing Array Elements - Searching - Sorting - Two Dimensional arrays - Declaration -Initialization - Matrix Operations - Multi Dimensional Arrays - Declaration - Initialization. Storage classes: auto - extern - static. Strings: Basic operations on strings.

#### UNIT III FUNCTIONS AND POINTERS

Functions: Built in functions – User Defined Functions - Parameter passing methods - Passing arrays to functions - Recursion - Programs using arrays and functions. Pointers - Pointer declaration - Address operator - Pointer expressions & pointer arithmetic - Pointers and function - Call by value - Call by Reference - Pointer to arrays - Use of Pointers in self-referential structures-Notion of linked list.

#### **UNIT IV** STRUCTURES AND UNIONS

9

9

9

Structures and Unions - Giving values to members - Initializing structure - Functions and structures - Passing structure to elements to functions - Passing entire function to functions - Arrays of structure - Structure within a structure and Union.

#### UNIT V FILES

File management in C - File operation functions in C - Defining and opening a file - Closing a file - The getw and putw functions - The fprintf & fscanf functions - fseek function – Files and Structures.

UNIT	I PERIOI	DIC PROPERTIES	AND WATER CHE	EMISTRY				8L+3T		

Effective nuclear charge, penetration of orbitals, variations of s, p, d and f orbital energies of atoms in the periodic table, electronic configurations, atomic and ionic sizes, ionization energies, electron affinity and electronegativity, polarizability, oxidation states, coordination numbers and geometries, hard soft acids and bases, molecular geometries. **Water Chemistry**-Water quality parameters-Definition and explanation of hardness, determination of hardness by EDTA method-Introduction to alkalinity.

#### UNIT II USE OF FREE ENERGY IN CHEMICAL EQUILIBRIA

Thermodynamic functions: energy, entropy and free energy. Estimations of entropy and free energies. Free energy and emf. Cell potentials, the Nernst equation and applications. Acid base, oxidation reduction and solubility equilibria. Corrosion-Types, factors affecting corrosion rate and Control methods. Use of free energy considerations in metallurgy through Ellingham diagrams. Advantages of electroless plating, electroless plating

of nickel and copper on Printed Circuit Board (PCB).

#### UNIT III ATOMIC AND MOLECULAR STRUCTURE

Schrodinger equation. Particle in a box solution and their applications for conjugated molecules and nanoparticles.. Molecular orbitals of diatomic molecules and plots of the multicenter orbitals. Equations for atomic and molecular orbitals. Energy level diagrams of diatomic molecules. Crystal field theory and the energy level diagrams for transition metal ions and their magnetic properties. Band structure of solids and the role of doping on band structures.

#### Intermolecular forces and potential energy surfaces

Ionic, dipolar and Vander waals interactions. Equations of state of real gases and critical phenomena. Potential energy surfaces of H<sub>3</sub>, H<sub>2</sub>F and HCN and trajectories on these surfaces.

#### UNIT IV SPECTROSCOPIC TECHNIQUES AND APPLICATIONS

Principles of spectroscopy and selection rules. Electronic spectroscopy-chromophore, auxochromes, types of electronic transition and application. Fluorescence and its applications in medicine. Vibrational spectroscopy-types of vibrations, Instrumentation and applications. Rotational spectroscopy of diatomic molecules. Nuclear magnetic resonance spectroscopy-concept of chemical shift and applications-magnetic resonance imaging. Diffraction and scattering.

#### UNIT V STEREOCHEMISTRY AND ORGANIC REACTIONS

Representations of 3 dimensional structures, structural isomers and stereoisomers, configurations and symmetry and chirality, enantiomers, diastereomers, optical activity, absolute configurations and conformational analysis. Isomerism in transitional metal compounds

#### Organic reactions and synthesis of a drug molecule

Introduction to reactions involving substitution, addition, elimination, oxidation, reduction, cyclization reactions and ring opening reactions. Synthesis of a commonly used drug molecule- Aspirin and paracetamol.

#### **COURSE OBJECTIVES**

Upon successful completion of the course, student will have:

- *Ability to apply mathematics, science, and engineering.*
- Ability to design and conduct experiments, as well as to analyze and interpretdata.
- Ability to identify, formulate, and solve engineeringproblems.
- Ability to apply modern engineering tools, techniques and resources to solve complex mechanical engineering activities with an understanding of thelimitations.
- Ability to comprehend the thermodynamics and their corresponding processes that influence the behavior and response of structural components.
- Ability to apply principles of engineering, basic science, and mathematics (including multivariate calculus and differential equations) and thermodynamics to model, analyze, design, and realize physical systems, components, orprocesses.

COURSE OUTCOMES		DOMAIN	LEVEL	
CO1	<i>Explain</i> the principles forces, laws and theirapplications.	Cognitive	Understanding, Apply	
CO2	<i>Classification</i> of friction, and <i>apply</i> the forces in Trusses and beams.	Cognitive	Understanding, Apply	
CO3	<i>Explain</i> and <i>Apply</i> moment of Inertia and Virtual work	Cognitive	Understanding, Apply	
<b>CO4</b>	Outline and Examine Dynamics	Cognitive	Understanding, Apply	
CO5	<i>Explain</i> free and forced vibration	Cognitive	Remember, Understanding	

#### UNIT I INTRODUCTION TO ENGINEERING MECHANICS

Force Systems Basic concepts, Particle equilibrium in 2-D & 3-D; Rigid Body equilibrium; System of Forces, Coplanar Concurrent Forces, Components in Space – Resultant- Moment of Forces and its Application; Couples and Resultant of Force System, Equilibrium of System of Forces, Free body diagrams, Equations of Equilibrium of Coplanar Systems and Spatial Systems; Static indeterminacy.

#### UNIT II FRICTION AND BASIC STRUCTURAL ANALYSIS

Types of friction, Limiting friction, Laws of Friction, Static and Dynamic Friction; Motion of Bodies, wedge friction, screw jack & differential screw jack; Equilibrium in three dimensions; Method of Sections; Method of Joints; How to determine if a member is in tension or compression; Simple Trusses; Zero force members; Beams & types of beams; Frames & Machines.

9L+3T

#### UNIT III CENTROID, CENTRE OF GRAVITY AND VIRTUAL WORK AND ENERGY METHOD

Centroid of simple figures from first principle, centroid of composite sections; Centre of Gravity and its implications; Area moment of inertia- Definition, Moment of inertia of plane sections from first principles, Theorems of moment of inertia, Moment of inertia of standard sections and composite sections; Mass moment inertia of circular plate, Cylinder, Cone, Sphere, Hook.

Virtual displacements, principle of virtual work for particle and ideal system of rigid bodies, degrees of freedom. Active force diagram, systems with friction, mechanical efficiency. Conservative forces and potential energy (elastic and gravitational), energy equation for equilibrium. Applications of energy method for equilibrium. Stability of equilibrium.

## UNIT IVREVIEW OF PARTICLE DYNAMICS AND INTRODUCTION TO9L+3TKINETICS OF RIGID BODIES

Rectilinear motion; Plane curvilinear motion (rectangular, path, and polar coordinates). 3-D curvilinear motion; Relative and constrained motion; Newton's 2nd law (rectangular, path, and polar coordinates). Work-kinetic energy, power, potential energy. Impulse-momentum (linear, angular); Impact (Direct and oblique). Types of motion, Instantaneous centre of rotation in plane motion and simple problems; D'Alembert's principle and its applications in plane motion and connected bodies; Work energy principle and its application of connected bodies; Kinetics of rigid bodyrotation.

#### UNIT V MECHANICAL VIBRATIONS

# Basic terminology, free and forced vibrations, resonance and its effects; Degree of freedom; Derivation for frequency and amplitude of free vibrations without damping and single degree of freedom system, simple problems, types of pendulum, use of simple, compound and torsion pendulums.

**CO5** Acquiring knowledge of fluid mechanics fundamentals, including concepts of mass and momentum conservation

### **COURSE CONTENT**

### UNIT I FLUID PROPERTIES AND FLUID STATICS12 hrs

Fundamental definitions dimensions and units – fluid properties – classification of fluids. Concepts of fluid pressure and its measurement (manometer) – forces on solid surfaces buoyancy and floatation – fluid mass under relative equilibrium.

### UNIT II FLUID KINEMATICS12 hrs

Lagrangian and Eulerian methods – Classification of flow – Streamlines, path lines and streak lines – Continuity equation – Velocity potential and Stream function – Flow nets.

### UNIT III FLUID DYNAMICS

Euler's and Bernoulli's equations – Application of Bernoulli's equation – orifice meter, Venturimeter, Pitot tube, flow through orifice, mouthpiece, weir and notch, momentum principle. Flow through pipes: Loss of energy in pipes – pipes in series and parallel – moody diagram.

### UNIT IV DIMENSIONAL ANALYSIS AND SIMILITUDE

Dimensional homogeneity - Non Dimensional parameter -  $\Pi$  theorem - dimensional analysis - choice of variables - Rayleigh methods. Model analysis - similitude, types of similarities, force ratio, similarity laws - model classification, scale effects.

### UNIT V BOUNDARY LAYER

Definition of boundary layer – Displacement, momentum and energy thickness – laminar and turbulent boundary layers – Total drag on flat plate due laminar and turbulent boundary layer - Separation of boundary layers and its control.

### **COURSE CONTENT**

### UNIT I BASIC SURVEYING

Introduction to Plane and Geodetic Surveying –Scales- Chain surveying- Distance Measurement –offsets- Field Book- Compass Instrument - Measurement of angles and directions - Magnetic declination and its variation- Local attraction - traverse-Plane Table Surveying – Principle-Equipment -Two point and three point problem.

### UNIT II LEVELLING

Leveling - terms and definitions - Instruments and its parts -Temporary and permanent adjustments - Reduction of level - Height of collimation and Rise and fall methods - Reciprocal leveling -Longitudinal and cross sectioning - Contouring -Capacity of reservoirs.

### UNIT III THEODOLITE AND TACHEOMETRY

Description of theodolite - Measurement of horizontal angles and vertical angles - Methods of repetition and reiteration –Tachometry - Tachometric systems - Determination of Instrument constants-Problems in tachometry survey.

### UNIT IV TRIANGULATION

Triangulation system, Requirements for selection of triangulation stations - Satellite station, signals, Phase of signal -Trignometrical leveling Both base of object accessible and inaccessible, problems.

### UNIT V MODERN SURVEYING

Introduction to advance surveying - Total Station and Global positioning system - Geographic information system (GIS)- Photogrammetry - Stereoscopy – Principle of Electromagnetic distance measurement

### PRACTICAL

- 1. Chain surveying- Distance Measurements.
- 2. Magnetic declination and its variation.
- 3. Two point and three point problem.
- 4. Height of collimation and Rise and fall methods.
- 5. Longitudinal and cross sectioning Contouring.
- 6. Single plane method and double plane method.
- 7. Determination of Instrument constants.
- 8. Determination of reduce level using theodalite by Angle of elevation and depression method.
- 9. Area calculation and contouring using Total Station.
- 10. Co ordinate measurement using Global positioning.

UNIT I	I ST	ΓRE	SS, S	ГRA	IN A	ND D	EFOR	MATI	ON O	F SOI	LIDS				

Stress, Strain, Hooke's Law, Elastic Constants, Thermal stress, deformation of simple and compound bars – shear modulus, bulk modulus, relationship between elastic constants, biaxial state of stress – stress at a point – stress on inclined plane – Principal stresses and Principal planes.

### UNIT II ANALYSIS OF PLANE TRUSS, THIN CYLINDERS/SHELLS

Stability and equilibrium of plane frames – types of truss – analysis of forces in truss members method of joints, method of sections– Graphical Method - Thin cylinders and shells – under internal pressure – deformation of thin cylinders and shells.

### UNIT III TRANSVERSE LOADING AND STRESSES OF BEAMS

Beams–Types of Supports, Types of Load –Relationship between Bending Moment and Shear Force–Shear Force and Bending Moment Diagrams for Statically Determinate Beam with Concentrated Load, Uniformly Distributed Load, Uniformly Varying Load. Theory of Simple Bending – Analysis of Stresses.

### UNIT IV DEFLECTION AND SHEAR STRESSES OF BEAMS

Double Integration Method - Macaulay's Methods - Area Moment Method - Conjugate Beam Method for computation of Slopes and Deflections of determinant beams-Variation of Shear Stress– Shear Stress distribution in Rectangular and I Sections, Solid and Hollow Circular Sections, Angle and Channel Sections.

### UNIT V TORSION AND SPRINGS

Stresses and deformation in circular (solid and hollow shafts) – stepped shafts – shafts fixed at both ends – leaf springs – stresses in helical springs – deflection of springs

### PRACTICAL

- 1.Tension test on HYSD bar / MS rod
- 2. Impact Test(Izod and Charpy)
- 3. Hardness Test(Brinells and Rockwell)
- 4. Test on timber
  - i) Compressive strength test
  - ii)Tensile strength test
  - iii)Shear Strength test
  - iv) Static bending test
- 5. Deflection Test

### **COURSE CONTENT**

### UNIT I ENTREPRENEURIAL TRAITS AND FUNCTIONS

Definition of Entrepreneurship; competencies and traits of an entrepreneur; factors affecting Entrepreneurship Development; Role of Family and Society; Achievement Motivation; Entrepreneurship as a career and national development.

# UNIT II NEW PRODUCT DEVELOPMENT AND VENTURE CREATION

Ideation to Concept development; Sources and Criteria for Selection of Product; market assessment ; Feasibility Report ;Project Profile; processes involved in starting a new venture; legal formalities; Ownership; Case Study.

### UNIT III ENTREPRENEURIAL FINANCE

Financial forecasting for a new venture; Finance mobilization; Business plan preparation; Sources of Financing, Angel Investors and Venture Capital; Government support in startup promotion.

### UNIT IV LAUNCHING OF SMALL BUSINESS AND ITS MANGEMENT

Operations Planning - Market and Channel Selection - Growth Strategies - Product Launching – Incubation, Monitoring and Evaluation of Business - Preventing Sickness and Rehabilitation of Business Units.

### UNIT V TECHNOLOGY MANAGEMENT, IPR PORTFOLIO FOR NEW PRODUCT 9 VENTURE

Technology management; Impact of technology on society and business; Role of Government in supporting Technology Development and IPR protection; Entrepreneurship Development Training and Other Support Services.

### **COURSE CONTENT**

### UNIT I SOIL PROPERTIES Index properties including consistency limits and grain size distribution - Identification

and classification of soil - Textural HRB and BIS specification -Soil water - Concept effective and neutral stresses - Darcy's law, Permeability -Seepage flow, seepage pressure, exit gradient - significance of Laplace equation - quick sand condition, Soil sensors applied in field, Modern advancements, Trenchless Technology.

#### UNIT II COMPACTION AND CONSOLIDATION

Compaction – Factors affecting compaction – Field compaction – Field compaction controls, CBR value. Consolidation of soils - Terzaghi's one dimensional consolidation theory - pressure void ratio relationship - prediction of pre

9

consolidation pressure – Total settlement and time rate settlement – secondary compression – coefficient of consolidation – Curve fitting methods, consolidation models.

### UNIT III STRESS DISTRIBUTION AND SHEAR STRENGTH

Vertical stress distribution in soil - Boussinesq's and Westerguard's equations – New mark's influence chart – Principle, Construction and use - Equivalent point load and other approximate procedures, stress isobars & pressure bulbs Shear Strength; Mohr – Coulomb failure criterion and models – shear properties of cohesion less and cohesive soils - Shear Strength. Parameters for under consolidated, normally consolidated and over consolidated clays

### UNIT IV BEARING CAPACITY AND SUB SOIL INVESTIGATION

Bearing capacity - Ultimate and allowable theories of bearing capacity - Terzaghi, Balla, Skempton, Mayerhof & Hansan. I.S.Code on B.C., Determination of BC, factors affecting BC, limits of total and differential settlement, Methods of exploration, geophysical and conventional methods; Sounding drilling and boring technique; Field tests – penetration tests

### UNIT V FOUNDATIONS

Foundations - types & selection, footing, rafts and floating foundation, -Philosophy of deep foundation, piles, estimation of individual and group capacity of piles in cohesive and non-cohesive soils, static and dynamic approaches, pile load test, settlement of pile groups, negative skin friction.

### PRACTICAL

### S.No.

### **List of Experiments**

- 1. Moisture content of Soil
- 2. Atterberg Limits Test
- 3. Grain Size Distribution-Sieve Analysis and Hydrometer Analysis
- 4 Field Density of soil by Sand Replacement method and Core Cutter method
- 5 Relative Density of Soil and Free Swell index of soil
- 6 Specific Gravity by Pycnometer and density bottle
- 7 Moisture- Density relationship using standard Proctor test.
- 8 Permeability determination(constant head and falling head methods)
- 9 Direct shear test on cohesionless soil.
- 10 Unconfined compression test on cohesive soil
- 11 Triaxial compression test
- 12 One dimensional consolidation test(co-efficient)

### **COURSE CONTENT**

UNIT I

INTRODUCTION TO ECONOMICS	8
Flow in an economy, Law of supply and demand, Concept of Engineering Economics Engineering efficiency, Economic efficiency, Scope of engineering economics- types costing, element of costs, preparation of cost sheet and estimation, Marginal cost Marginal Revenue, Sunk cost, Opportunity cost	of

#### **UNIT II BREAK-EVEN ANALYSIS & SOCIAL COST BENEFIT ANALYSIS**

Margin of Safety, Profit, Cost & Quantity analysis-Product Mix decisions and CVP analysis, Profit/Volume Ratio (P/V Ratio), Application of Marginal costing, Limitations Social Cost Benefit Analysis: compare different project alternatives, Calculate direct,

indirect and external effects; Monetizing effects; Result of a social cost benefit analysis.

#### **UNIT III** VALUE ENGINEERING & COST ACCOUNTING

Value engineering - Function, aims, Value engineering procedure - Make or buy decision.Business operating costs, Business overhead costs, Equipment operating costs

#### **UNIT IV REPLACEMENT ANALYSIS**

Replacement analysis – Types of replacement problem, determination of economic life of an asset, Replacement of an asset with a new asset.

#### UNIT V **DEPRECIATION**

Depreciation- Introduction, Straight line method of depreciation, declining balance method of depreciation-Sum of the years digits method of depreciation, sinking fund method of depreciation, Annuity method of depreciation, service output method of depreciation.

### **COURSE CONTENT**

### UNIT I BASIC PRINCIPLES OF GOOD TECHNICAL WRITING

Style in technical writing, out lines and abstracts, language used in technical writing: technical words, jargons etc.,

### UNIT II SPECIAL TECHNIQUES

Technical writing: Definition, description of mechanism, Description of a process, Classifications, division and interpretation.

# UNIT III REPORT/ PROJECT

Layout the formats: chapters, conclusion, bibliography, annexure and glossary, Graphics aids etc - Presentation of the written project 10 - 15 minutes

# UNIT IV SOUNDS OF ENGLISH LANGUAGE

Vowels, consonants, diphthongs, word stress, sentence stress, intonation patterns, connected speech etc. - Vocabulary building – grammar, synonyms and antonyms, word roots, one-word substitutes, prefixes and suffixes, idioms and phrases.

### UNIT V READING COMPREHENSION

Reading for facts, meanings from context, scanning, skimming, inferring meaning, critical reading, active listening, listening for comprehension etc.

### **COURSE CONTENT**

### UNIT I WATER AND ENVIRONMENT Public water supply schemes, Forms and properties of water -per capita demand population forecasts - variation in demand pattern - Water Quality standards - water borne diseases – planning of public water supplies. SOURCES AND TRANSMISSION OF WATER **UNIT II** 12 Types of water sources- Intake structures -wells, infiltration galleries – Transmission of water through pipes and channel - Hydraulics of pipe flow - use of charts and nomograms for computations – pipe materials - laying, jointing and testing of pipes-Distribution networks. **UNIT III** WATER TREATMENT 12 Layout of Treatment plants for conventional water treatment plant. Principles and Functions of Screen, Flash Mixer, Flocculator, Sedimentation Tank, Slow and Rapid Sand Filters, and Disinfection Process- advanced water treatment techniques. **UNIT IV** WASTE WATERTREATMENT 12 Characteristics and composition of sewage - cycles of decomposition of organic wastes -

D.O, BOD and COD and their significance. Treatment methods - Layout of waste water treatment plant - Activated sludge process and its modifications; Tricking filters and Rotating biological contactors - oxidation pond- Operational problems -planning organizing and controlling of plant operations and Trouble shooting.

#### UNIT V **DISPOSAL OPTIONS**

Land disposal - sewage farming practice - dilution - discharge into rivers, estuaries and ocean - river pollution - oxygen sag - self-purification - eutrophication. - sludge treatment - properties and characteristics of sludge - sludge digestion and drying beds -Recycle and reuse.

### PRACTICAL

- 1. Determination of pH, turbidity and conductivity.
- 2. Determination of the available chlorine in bleaching powder and estimation of the residual chlorine.
- 3. Determination of optimum dosage of coagulant
- 4. Determination of Iron and Fluoride.
- 5. Determination of Phosphorous
- 6. Determination of Potassium
- 7. Determination of Total Solids and Suspended solids.
- 8. Determination of Biochemical Oxygen Demand.
- 9. Determination of Chemical Oxygen Demand.
- 10. Determination of Ammonia Nitrogen.
- 11. Demonstration of Bacteriological analysis of water.

### **COURSE CONTENT**

# UNIT I INTRODUCTION

BIS conventions and specifications- Symbols of the buildings- Size, Layout, Lettering and Dimensioning- Principles of isometric projections - Isometric scales Classification of buildings- Perspective projection -Building bye-laws - floor area ratio, open spaces-orientation of buildings.

UNIT I	IIPRINCIPLES OF PLANNING15
	Functional design of residential buildings and circulation principles- Positioning of various components of buildings - Development of plan, elevation, section and openings
UNIT I	IIICOMPONENTS OF BUILDINGS18
	Isolated and Combined footings –Raft and Spread footings-Columns – Beams-Slabs-Staircases-Doors, Windows and Ventilators-Building services.
UNIT I	IVPUBLIC BUILDINGS AND TRUSSES18
	Planning of educational buildings-Hospitals- Offices - Factory buildings -Roof trusses.
UNIT V	V COMPUTER AIDED DRAFTING 9
	Introduction to Coordinates, Units, Dimension, Line, Ray, Polyline, Arc, Hatch, Offset, Scale, Layer, Colour, etc., using CAD
PRAC	TICAL 30
1.	Bonds in masonry-Walls and quoins
2.	Drawing of footings

- 3. Drawing of doors and windows
- 4. Drawing of staircase
- 5. Drawing of Steel truss
- 6. Plan, elevation and section of two bed room single storeyed building
- 7. Plan, elevation and section of two bed room two storeyed building
- 8. Plan, elevation and section of school building
- 9. Practising CAD

- **CO4** Understand the concept of response spectrum and Cognitive Understand application of structural dynamics.
- **CO5** Design Earthquake resistant structures with codal Cognitive Evaluation recommendations.

### **COURSE CONTENT**

### UNIT I THEORY OF VIBRATIONS

Concept of inertia and damping – Types of Damping – Difference between static forces and dynamic excitation – Degrees of freedom – SDOF idealisation – Equations of motion of SDOF system for mass as well as base excitation – Free vibration of SDOF system – Response to harmonic excitation – Impulse and response to unit impulse – Duhamel integral.

Affective

### UNIT II MULTIPLE DEGREE OF FREEDOM SYSTEM

Two degree of freedom system – Normal modes of vibration – Natural frequencies – Mode shapes - Introduction to MDOF systems – Decoupling of equations of motion – Concept of mode superposition (No derivations).

### UNIT III ELEMENTS OF SEISMOLOGY

Causes of Earthquake – Geological faults – Tectonic plate theory – Elastic rebound – Epicentre – Hypocentre – Primary, shear and Raleigh waves – Seismogram – Magnitude and intensity of earthquakes – Magnitude and Intensity scales – Spectral Acceleration – Information on some disastrous earthquakes.

### UNIT IV RESPONSE OF STRUCTURES TO EARTHQUAKE

Response and design spectra – Design earthquake – concept of peak acceleration – Site specific response spectrum – Effect of soil properties and damping – Liquefaction of soils – Importance of ductility – Methods of introducing ductility into RC structures.

### UNIT V DESIGN METHODOLOGY

IS 1893, IS 13920 and IS 4326 – Codal provisions – Design as per the codes – Base isolation techniques – Vibration control measures – Important points in mitigating effects of earthquake on structures.

CO1	List and	explain	the	basic	concepts	of	total	quality	Cognitive	
	concepts	and its lir	nitati	ions.						

- **CO2** Analyze and explain the customer satisfaction, employee Cognitive involvement, supplier selection and appraise the performance by TQM principle.
- CO3 Explain and apply the statistical process control tools. Cognitive
- **CO4** Select and explain the different TQM tools and their Cognitive significance.
- CO5 Explain the importance aspects of different quality Cognitive Understanding systems.

### **COURSE CONTENT**

### UNIT I INTRODUCTION

Definition of quality – Dimensions of quality – Quality planning – Quality costs – Analysis techniques for quality costs – Basic concepts of Total Quality Management – Historical review –Principles of TQM – Leadership – Concepts – Role of senior management – Quality Council –Quality statements – Strategic planning – Deming philosophy – Barriers to TQM implementation.

### UNIT II TQM PRINCIPLES

Customer satisfaction – Customer perception of quality – Customer complaints – Service quality –Customer retention – Employee involvement – Motivation, empowerment, teams, recognition and reward – Performance appraisal – Benefits – Continuous process improvement – Juran trilogy – PDSA cycle – 5S – Kaizen – Supplier partnership – Partnering – Sourcing – Supplier selection – Supplier rating – Relationship development – Performance measures – Basic concepts – Strategy – Performance measure.

### UNIT III STATISTICAL PROCESS CONTROL (SPC)

The seven tools of quality – Statistical fundamentals – Measures of central tendency and dispersion – Population and sample – Normal curve – Control charts for variables and attributes – Process capability – Concept of six sigma – New seven management tools.

### UNIT IV TQM TOOLS

Benchmarking – Reasons to benchmark – Benchmarking process – Quality Function Deployment (QFD) – House of quality – QFD process – Benefits – Taguchi quality loss function – Total Productive Maintenance (TPM) – Concept – Improvement needs – FMEA – Stages of FMEA.

### UNIT V QUALITY SYSTEMS

Need for ISO 9000 and other quality systems – ISO 9000:2000 quality system – Elements –Implementation of quality system – Documentation – Quality auditing – TS 16949 – ISO 14000 –Concept, requirements and benefits.

### Semester V

Subject Name BUSINESS COMMUNICATION

Subject Code XGS 507

L	Т	Р	С	C	Р	A
1	0	0	1	3	0	0

*Course Outcome: After the completion of the course, students will be able to* 

- CO1 To choose and apply different styles to various forms of business communication.
- CO2 Identify the proper tone of language required in writing and speaking in business communication.
- CO3 Display knowledge on grammar and other linguistic features in writing various forms of business communication.
- CO4 To distinguish between letters and memos and various forms of Business Communication.
- **CO5** Learn how to write business reports, minutes, proposals.

### **COURSE CONTENT**

UNIT I	9
	Introduction to business communication; modern developments in the style of writing letters memos and reports: block letters, semi block letters, full block letters, simplified letters etc.,
UNIT II	9
	The language used in memos/minutes/telephone memos/ letters/ assignments art of writing E-mail etc. Advantages of written and spoken communication.
UNIT III	9
	The use of active and passive voice; the use of grammar, propriety, accuracy, exactness, the tone & other elements of language used in these writings.
UNIT IV	9
	The format of various types of Reports/ projects etc.,
UNIT V	9
	Writing Business reports, proposals and minutes.

works.

#### UNIT I **IRRIGATION ENGINEERING**

Catchment area - Ayacut- Duty, delta and base period- relationship - Irrigation efficiencies - Crop water requirement - Estimation of consumptive use of water.

#### **UNIT II** METHODS OF IRRIGATION

Surface and subsurface irrigation-Sprinkler and Drip irrigation- Lift irrigation- Tank irrigation- Well irrigation - Flooding methods.

#### **UNIT III** HYDRAULIC STRUCTURES

Weir and Barrage - Site selection for dam construction- Gravity dam -Earthen dam- Arch dam - Buttress dam- Diversion head works with drawings- Canal drop-Canal regulators-Canal outlets- Forces acting on dam – Spillway.

#### **UNIT IV CANAL IRRIGATION**

Classifications of canals- Canal alignment- Canal lining -Cross drainage works including drawing -River training works.

#### UNIT V WATER RESOURCES AND MANAGEMENT

Water resources survey - water resources of India and Tamilnadu -Estimation of water requirements for irrigation and drinking-Single and multipurpose reservoir-Storage of reservoir -National water policy- Water prizing-Water losses - Participatory irrigation management-Irrigation scheduling-water distribution.

UNIT I	METHODS OF DESIGN OF CONCRETE STRUCTURES	15
	Methods and principles of Design-Properties of Concrete and Steel –Code specified for structural members –Working stress method- Yield line theory- Design of be slabs.	
UNIT II	LIMIT STATE DESIGN FOR FLEXURE	15
	Design of one way and two way slab - singly anddoubly reinforced beams - conbeams –Flanged beams – Staircase.	ntinuous
UNIT III	LIMIT STATE DESIGN FOR SHEAR, BOND AND TORSION	15
	Behaviour of RC members in bond and anchorage – Design requirements –Beha RC beams in shear and torsion – Design of RC members for combined bending st torsion.	
UNIT IV	DESIGN OF COLUMNS AND FOOTINGS	15
	Types of columns-Design of shortcolumns and long columns-Footings- rectangular and circular footing –Raft and pile foundations.	Square,
UNIT V	DESIGN OF MISCELLANEOUS STRUCTURES	15
	Liquid retaining structures-Bridge deck slabs-Retaining walls-Culverts	
PRACTICA	L	30
Design and d	rafting of slabs, beams and columns using software.

## CO5

#### **COURSE CONTENT**

#### UNIT I INTRODUCTION

Properties of steel – Structural steel sections – Limit State Design Concepts – Loads on Structures – Metal joining methods using welding, bolting – Design of bolted and welded joints – Eccentric connections - Efficiency of joints – High Tension bolts.

12

12

12

#### UNIT II TENSION MEMBERS

Types of sections – Net area – Net effective sections for Angles and Tee – Design of connections in tension members – Use of lug angles – Design of tension splice – Concept of shear lag.

#### UNIT III COMPRESSION MEMBERS

Types of compression members – Theory of columns – Basis of current codal provision for compression member design – Slenderness ratio – Design of single section and compound section compression members – Design of lacing and battening type columns – Design of column bases – Gusseted base.

#### UNIT I CONCRETE TECHNOLOGY

Cements – Grade of cements - concrete chemicals and Applications – Grade of concrete - manufacturing of concrete – Batching – mixing – transporting – placing – compaction of concrete – curing and finishing - Testing of fresh and hardened concrete – quality of concrete – Extreme Weather Concreting - Ready Mix Concrete - Non-destructive testing.

#### UNIT II CONSTRUCTION PRACTICES

Specifications, details and sequence of activities and construction co-ordination – Site Clearance – Marking – Earthwork - masonry – stone masonry – Bond in masonry - concrete hollow block masonry – flooring – damp proof courses – construction joints – movement and expansion joints – pre cast pavements – Building foundations – basements – temporary shed – centering and shuttering – slip forms – scaffoldings – de-shuttering forms – Fabrication and erection of steel trusses – frames – braced domes – laying brick – weather and water proof – roof finishes – acoustic and fire protection.

#### UNIT III SUB STRUCTURE CONSTRUCTION

Techniques of Box jacking – Pipe Jacking -under water construction of diaphragm walls and basement-Tunneling techniques – Piling techniques - well and caisson - sinking cofferdam - cable anchoring and grouting-driving diaphragm walls, sheet piles - shoring for deep cutting - well points -Dewatering and stand by Plant equipment for underground open excavation.

#### UNIT IV SUPER STRUCTURE CONSTRUCTION

Launching girders, bridge decks, off shore platforms – special forms for shells - techniques for heavy decks – in-situ pre-stressing in high rise structures, Material handling - erecting light weight components on tall structures - Support structure for heavy Equipment and conveyors -Erection of articulated structures, braced domes and space decks.

## UNIT V CONSTRUCTION EQUIPMENT

Selection of equipment for earth work - earth moving operations - types of earthwork equipment - tractors, motor graders, scrapers, front end waders, earth movers – Equipment for foundation and pile driving. Equipment for compaction, batching and mixing and concreting - Equipment for material handling and erection of structures - Equipment for

#### UNIT I INTRODUCTION TO ENVIRONMENTAL STUDIES AND ENERGY

Definition, scope and importance – Need for public awareness – Forest resources: Use and over-exploitation, deforestation, case studies. Timber extraction, mining, dams and their effects on forests and tribal people – Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems – Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies - Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizerpesticide problems, water logging, salinity, case studies - Energy resources: Growing energy needs, renewable and non-renewable energy sources, use of alternate energy sources. case studies - Land resources: Land as a resource, land degradation, man induced landslides, soil erosion and desertification - Role of an individual in conservation of natural resources – Equitable use of resources for sustainable lifestyles.

#### **UNIT II** ECOSYSTEMS AND BIODIVERSITY

Concept of an ecosystem – Structure and function of an ecosystem – Producers, consumers and decomposers - Energy flow in the ecosystem - Ecological succession -Food chains, food webs and ecological pyramids - Introduction, types, characteristic features, structure and function of the (a) Forest ecosystem (b) Grassland ecosystem (c) Desert ecosystem (d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries) - Introduction to Biodiversity - Definition: genetic, species and ecosystem diversity -Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

#### **UNIT III ENVIRONMENTAL POLLUTION**

Definition – Causes, effects and control measures of: (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear hazards – Soil waste Management: Causes, effects and control measures of urban and industrial wastes – Role of an individual in prevention of pollution – Pollution case studies - Disaster management: flood, earthquake, cyclone and landslide.

#### **UNIT IV** SOCIAL ISSUES AND THE ENVIRONMENT

Urban problems related to energy – Water conservation, rain water harvesting, watershed management – Resettlement and rehabilitation of people; its problems and concerns, Climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust, Wasteland reclamation - Consumerism and waste products - Environment Production Act - Air (Prevention and Control of Pollution) Act - Water (Prevention and control of Pollution) Act - Wildlife Protection Act - Forest Conservation Act - Issues involved in enforcement of environmental legislation – Public awareness.

#### UNIT V HUMAN POPULATION AND THE ENVIRONMENT

Population growth, variation among nations – Population explosion – Family Welfare Programme – Environment and human health – Human Rights – Value Education - HIV / AIDS – Women and Child Welfare – Role of Information Technology in Environment and human health - Case studies.

#### CONSTRUCTION PLANNING AND SCHEDULING UNIT II

Basic concepts in the development of construction plans- types of project plans - work breakdown structure - planning techniques - bar charts - preparation of network diagram critical path method -program evaluation and review technique -.

#### UNIT III **RESOURCE PLANNING**

Materials- inventory control: types of inventory, EOQ - different tools for inventory controls. Equipment: Classification of construction equipment- planning and selecting of equipment. Manpower: Classes of labour - cost of labour- labour productivity.

#### **UNIT IV** TENDERING AND CONTRACT ADMINISTRATION

9

Tender notice-Tender document-EMD-SD-Prebid conference-Award and signing of contract agreement-Site meeting-Payment of bills-Breach of contract-Liquidated damages-Project closure

#### UNIT V QUALITY CONTROL AND SAFETY MANAGEMENT

Introduction to construction quality - Inspection, quality control and quality assurance – Quality circle - Quality management system. - Construction safety – accidents and injuries - Personal protective equipments - Health and safety act and OSHAS regulations - Safety and health management system- Safety manual.

UNIT I	ESTIMATION OF BUILDINGS 20
	Process of estimating - Construction activities and sequence – Units of measurements – Methods of estimating – Calculation of quantities of brick work, PCC, RCC, wood work, plastering, white washing, colour washing, painting, varnishing etc., relating to residential and non-residential multi- storeyed buildings.
UNIT II	ESTIMATION OF OTHER STRUCTURES 20
	Estimation of services – Sanitary and water supply installations –Estimation of other structures – Bituminous and cement concrete roads –Irrigation works - Retaining walls and culverts – Steel structures.
UNIT III	SPECIFICATION 10
	Specifications – Sources – Detailed and general specifications – Introduction of estimation software.
UNIT IV	RATE ANALYSIS15
	Analysis of rates using standard data and schedule of rates for conventional items – Principles of pricing of new items.
UNIT V	VALUATION 10
	Necessity – Basics of valuation – Capitalized value – Depreciation – Escalation – Value of property – Calculation of Standard rent – Report preparation.
PRACTICA	AL 30
1. Buil	ding marking
2. Estin	mation using Spread Sheet

#### UNIT I SOURCES, CLASSIFICATION AND REGULATORY FRAMEWORK

Types and Sources of solid wastes - Need for solid waste management – Elements of integrated waste management and roles of stakeholders - Salient features of Indian legislations on management and handling of municipal solid wastes , hazardous wastes, biomedical wastes, E-wastes, Lead Acid batteries, plastics and fly ash - Financing waste management.

#### UNIT II WASTE CHARACTERIZATION AND SOURCE REDUCTION

Waste generation rates and variation - Composition, physical, chemical and biological properties of solid wastes –Hazardous characteristics - TCLP tests – waste sampling and characterization plan - Source reduction of wastes –Waste exchange - Extended producer responsibility - Recycling and reuse.

#### UNIT III STORAGE, COLLECTION AND TRANSPORT OF WASTES

Handling and segregation of wastes at source – storage and collection of municipal solid wastes – Analysis of Collection systems - Need for transfer and transport – Transfer

9

stations Optimizing waste allocation –compatibility, storage, labeling and handling and Transport of hazardous wastes.

#### UNIT IV WASTE PROCESSING TECHNOLOGIES

Course Objectives: of waste processing – material separation and processing technologies – biological and chemical conversion technologies – methods and controls of Composting - thermal conversion technologies and energy recovery – incineration- solidification and stabilization of hazardous wastes – bio medical waste treatment.

#### UNIT V WASTE DISPOSAL

Waste disposal options – Disposal in landfills - Landfill Classification, types and methods – site selection - design and operation of sanitary landfills, secure landfills and landfill bioreactors – leachate and landfill gas management – landfill closure and environmental monitoring – Rehabilitation of open dumps – landfill remediation

#### UNIT I INTRODUCTION

History of Information Systems and its Importance, Basics, Changing Nature of Information Systems, Need for Distributed Information Systems: Role of Internet and Web Services. Information System Treats and attacks, Classification of Threats and assessing Damages Security in mobile and Wireless Computing-Security Challenges in Mobile Devices, authentication service Security, Security Implication for Organizations, Laptops security Concepts in Internet and World Wide Web: Brief review of Internet Protocols TCP/IP, IPV4, and IPV6. Functions of various networking components-routers, bridges, switches, hub, gateway and Modulation Techniques.

#### UNIT II SYSTEMS VULNERABILITY SCANNING

Overview of vulnerability scanning, Open Port / Service Identification, Banner / Version check, Traffic Probe, Vulnerability Probe, Vulnerability Examples, OpenVAS, Metasploit. Networks Vulnerability Scanning - Netcat, Socat, understanding Port and Services tools - Datapipe, Fpipe, WinRelay, Network Reconnaissance – Nmap, THC-Amap and System tools. Network Sniffers and Injection tools – Tcpdump and Windump, Wireshark, Ettercap, Hping Kismet.

#### UNIT III NETWORK DEFENCE TOOLS

Firewalls and Packet Filters: Firewall Basics, Packet Filter Vs Firewall, How a Firewall Protects a Network, Packet Characteristic to Filter, Stateless VsStateful Firewalls, Network Address Translation (NAT) and Port Forwarding, the basic of Virtual Private Networks, Linux Firewall, Windows Firewall, Snort: Introduction Detection System, Cryptool.

## UNIT IV TOOLS FOR SCANNING

Scanning for web vulnerabilities tools: Metasploittool,Nikto, W3af, HTTP utilities - Curl, OpenSSL and Stunnel, Application Inspection tools – Zed Attack Proxy, Sqlmap. DVWA, Webgoat, Password Cracking and Brute-Force Tools – John the Ripper, L0htcrack, Pwdump, THC-Hydra.

#### UNIT V INTRODUCTION TO CYBER CRIME AND LAW

9

9

9

9

Cyber Crimes, Types of Cybercrime, Hacking, Attack vectors, Cyberspace and Criminal Behavior, Clarification of Terms, Traditional Problems Associated with Computer Crime, Introduction to Incident Response, Digital Forensics, Computer Language, Network Language, Realms of the Cyber world, A Brief History of the Internet, Recognizing and Defining Computer Crime, Contemporary Crimes, Computers as Targets, Contaminants and Destruction of Data, Indian IT ACT 2000,Introduction to Cyber Crime Investigation:Password Cracking, Key loggers and Spyware, Virus and Worms, Trojan and backdoors, Steganography, DOS and DDOS attack, SQL injection, Buffer Overflow, Attack on wireless Networks.

#### **COURSE CONTENT**

#### UNIT I INTRODUCTION – PREFABRICATED STRUCTURES

General Civil Engineering requirements in the prefabrication techniques – material used in prefabrication - Modular co-ordination, standardization, Disuniting, of Prefabricates, production, transportation, erection.

#### UNIT II PREFABRICATED COMPONENTS

**Prefabricated structures -** Long wall and cross-wall large panel buildings - one way and two way prefabricated slabs, Framed buildings with partial and curtain walls, - columns – shear wall.

#### UNIT III DESIGN PRINCIPLES

Loading criteria - Disuniting of structures- Design of cross section based on efficiency of material used –Problems in design because of joint flexibility – Allowance for joint deformation – Code books used in practice.

#### UNIT IV DESIGN OF JOINTS

Joints for different structural connections – Dimensions and detailing – Design of expansionjoints.

#### UNIT V DESIGN OF INDUSTRIAL BUILDINGS

Components of single-storey industrial sheds with crane gantry systems, Design of R.C. Roof Trusses, Roof Panels, Design of R.C. crane - gantry girders, corbels and columns, wind bracing design-case study of industries. Case study in prefabrication industries.

*Course Outcome: After the completion of the course, students will be able to* 

CO1	<i>List</i> and generally <i>explain</i> the main sources of energy and their primary applications nationally and internationally	Cognitive Affective	Understand Respond
CO2	<i>Understand</i> effect of using these sources on the environment and climate	Cognitive	Understand
CO3	<i>Describe</i> the challenges and problems associated with the use of various energy sources, including fossil fuels, with regard to future supply and the impact on the environment.	Cognitive	Understand
CO4	<i>List</i> and describe the primary renewable energy resources and technologies.	Cognitive	Understand
CO5	<i>Quantify</i> energy demands and make comparisons among energy uses, resources, and technologies.	Cognitive Affective	Understand Respond

**CO6** *Understand* the Engineering involved in projects Cognitive Understand utilizing these sources

#### **COURSE CONTENT**

#### UNIT I INTRODUCTION TO ENERGY SCIENCE

Scientific principles and historical interpretation to place energy use in the context of pressing societal, environmental and climate issues; Introduction to energy systems and resources; Introduction to Energy, sustainability & the environment

#### UNIT II ENERGY SOURCES

Overview of energy systems, sources, transformations, efficiency, and storage. Fossil fuels (coal, oil, oil-bearing shale and sands, coal gasification) - past, present & future, Remedies & alternatives for fossil fuels - biomass, wind, solar, nuclear, wave, tidal and hydrogen; Sustainability and environmental trade-offs of different energy systems; possibilities for energy storage or regeneration (Ex. Pumped storage hydro power projects, superconductor-based energy storages, high efficiency batteries)

## UNIT III ENERGY AND ENVIRONMENT

Energy efficiency and conservation; introduction to clean energy technologies and its importance in sustainable development; Carbon footprint, energy consumption and sustainability; introduction to the economics of energy; How the economic system determines production and consumption; linkages between economic and environmental outcomes; How future energy use can be influenced by economic, environmental, trade, and research policy

#### UNIT IV CIVIL ENGINEERING PROJECTS

Coal mining technologies, Oil exploration offshore platforms, Underground and under-sea oil pipelines, solar chimney project, wave energy caissons, coastal installations for tidal power, wind mill towers; hydro power stations above-ground and underground along with associated dams, tunnels, penstocks, etc.; Nuclear reactor containment buildings and associated buildings, design and construction constraints and testing procedures for reactor containment buildings; Spent Nuclear fuel storage and disposal systems

## UNIT V ENGINEERINGFOR ENERGY CONSERVATION

Concept of Green Building and Green Architecture; Green building concepts (Green building encompasses everything from the choice of building materials to where a building is located, how it is designed and operated); LEED ratings; Identification of energy related enterprises that represent the breath of the industry and prioritizing these as candidates; Embodied energy analysis and use as a tool for measuring sustainability. Energy Audit of Facilities and optimization of energy consumption

#### UNIT I Importance of Civil Engineering and Materials

**Basic Understanding**: Basics of Engineering and Civil Engineering; Broad disciplines of Civil Engineering; Importance of Civil Engineering, Possible scopes for a career, Professional ethics.

5

**History of Civil engineering**: Early constructions and developments over time; Ancient monuments & Modern marvels; Development of various materials of construction and methods of construction; Industrial lectures and Case studies

**Overview of National Planning for Construction and Infrastructure Development**: Position of construction industry vis-à-vis other industries, five year plan outlays for

construction; current budgets for infrastructure works

**Materials and methods of constructions**: Stones, bricks, mortars, Plain, Reinforced &Prestressed Concrete, Construction Chemicals; Structural Steel, High Tensile Steel, Composites; Plastics

#### UNIT II Introduction of Architecture, Environmental and Management Studies

**Fundamentals of Architecture & Town Planning**: Aesthetics in Civil Engineering, Examples of great architecture, fundamentals of architectural design & town planning; Building Services; Green Buildings; Development of Smart cities

**Basics of Construction Management**: Temporary Structures in Construction; Construction Methods for various types of Structures; Major Construction equipment; Automation & Robotics in Construction; Modern Project management Systems; Advent of Lean Construction; Importance of Contracts Management

**Environmental Engineering & Sustainability**: Water treatment systems; Effluent treatment systems; Solid waste management; Recycling and Sustainability in Construction; Repairs and rehabilitation of structures

#### UNIT III Introduction of Geotechnical, Water resource and Ocean Engineering

**Geotechnical Engineering**: Basics of soil mechanics, rock mechanics and geology; various types of foundations; basics of rock mechanics &tunneling

**Hydraulics, Hydrology & Water Resources Engineering**: Fundamentals of fluid flow, basics of water supply systems; Underground Structures; Multipurpose reservoir projects

**Ocean Engineering**: Basics of Wave and Current Systems; Sediment transport systems; Ports & Harbors and other marine structures

#### UNIT IV Introduction of Structural Engineering, Transportation Engineering and Remote Sensing

**Structural Engineering**: Types of buildings; tall structures; various types of bridges; Water retaining structures; Other structural systems; Experimental Stress Analysis; Power plant structures;

**Traffic & Transportation Engineering**: Investments in transport infrastructure development in India for different modes of transport; Developments and challenges in integrated transport development in India: road, rail, port and harbor and airport sector; PPP in transport sector; Intelligent Transport Systems; Urban Public and Freight Transportation; Road Safety under heterogeneous traffic; Sustainable and resilient pavement materials, design, construction and management;

**Surveying & Geomatics**: Traditional surveying techniques, Total Stations, Development of Digital Terrain Models; GPS, LIDAR

#### UNIT V Computational Methods in Civil Engineering

**Computational Methods, IT in Civil Engineering:** Typical software used in Civil Engineering- Finite Element Method, Computational Fluid Dynamics; Computational Geotechnical Methods; highway design (MX), Building Information Modeling; Highlighting typical available software systems (SAP, STAAD, ABAQUS, MATLAB, ETAB, NASTRAN, NISA, MIKE 21, MODFLOW, REVIT, TEKLA, AUTOCAD,...GEOSTUDIO, EDUSHAKE, MSP, PRIMAVERA, ArcGIS, VisSIM, ...)

#### TUTORIALS

- 1. Develop a Strategic Plan for Civil Engineering works for next ten years based on past investments and identify one typical on-going mega project
- 2. Identify ten best civil engineering projects with high aesthetic appeal with one possible factor for

15

8

4

5

each; List down the possible systems required for a typical Smart City.

- 3. List top five tunnel projects in India and their features; collect and study geotechnical investigation report of any one Metro Rail (underground) project;
- 4. Visit a construction site and make a site visit report. Collect visual representations prepared by a Total Station and LIDAR and compare; Study typical Google street map and Google Earth Map and study how each can facilitate the other
- 5. Collect the history of a major rehabilitation project and list the interesting features

#### UNIT I GENERAL GEOLOGY

Introduction-Branches of geology useful to civil engineering, scope of geological studies in various civil engineering projects. Department dealing with this subject in India and their scope of work- GSI, Granite Dimension Stone Cell, Petrology-Rock forming processes. Specific gravity of rocks. Ternary diagram. Igneous petrology- Volcanic Phenomenon and different materials ejected by volcanoes. Types of volcanic eruption. Mineralogical composition, structures & textures in rocks.

#### UNIT II PHYSICAL GEOLOGY

Physical Geology- Weathering. Erosion and Denudation. Factors affecting weathering and product of weathering. Engineering consideration. Superficial deposits and its geotechnical importance: Water fall and Gorges, River meandering, Alluvium, Glacial deposits, Laterite (engineering aspects), Desert Landform, Loess, Residual deposits of Clay - with flints, Solifluction deposits, mudflows, Coastal deposits.

## UNIT III GEOLOGICAL HAZARDS

Geological Hazards- Rock Instability and Slope movement: Concept of sliding blocks. Different controlling factors. Instability in vertical rock structures and measures to prevent collapse. Types of landslide. Prevention by surface drainage, slope reinforcement by Rock bolting and Rock anchoring, retaining wall, Slope treatment. Ground water: Factors controlling water bearing capacity of rock. Pervious & impervious rocks and ground water. Lowering of water table and Subsidence. Earthquake: Magnitude and intensity of earthquake. Seismic sea waves.Rock masses as construction material: Definition of Rock masses. Main features that affects the quality of rock engineering and design. Basic element and structures of rock those are relevant in civil engineering areas.

#### UNIT IV ENGINEERING GEOLOGY

Geology of dam and reservoir site- Required geological consideration for selecting

6

6

6

dam and reservoir site. Failure of Reservoir. Favourable &unfavorable conditions in different types of rocks in presence of various structural features, precautions to be taken to counteract unsuitable conditions, significance of discontinuities on the dam site and treatment giving to such structures.

#### UNIT V ROCK MECHANICS

Rock Mechanics- Sub surface investigations in rocks and engineering characteristics or rocks masses; Structural geology of rocks. Classification of rocks, Field & laboratory tests on rocks, Stress deformation of rocks, Failure theories and sheer strength of rocks, Bearing capacity of rocks.

#### PRUCTICAL

- 1. Study of physical properties of minerals.
- 2. Study of different group of minerals.
- 3. Study of Crystal and Crystal system.
- 4. Identification of minerals: Silica group: Quartz, Amethyst, Opal; Feldspar group: Orthoclase, Plagioclase; Cryptocrystalline group: Jasper; Carbonate group: Calcite; Element group: Graphite; Pyroxene group: Talc; Mica group: Muscovite; Amphibole group: Asbestos, Olivine, Hornblende, Magnetite, Hematite, Corundum, Kyanite, Garnet, Galena, Gypsum.
- 5. Identification of rocks (Igneous Petrology): Acidic Igneous rock: Granite and its varieties, Syenite, Rhyolite, Pumice, Obsidian, Scoria, Pegmatite, Volcanic Tuff. Basic rock: Gabbro, Dolerite, Basalt and its varieties, Trachyte.
- 6. Identification of rocks (Sedimentary Petrology): Conglomerate, Breccia, Sandstone and its varieties, Laterite, Limestone and its varieties, Shales and its varieties.
- 7. Identification of rocks (Metamorphic Petrology): Marble, slate, Gneiss and its varieties, Schist and its varieties. Quartzite, Phyllite.
- 8. Study of topographical features from Geological maps. Identification of symbols in maps.

#### UNIT - I CONSTRUCTION MATERIALS

Brick and Stones, Cements, M-Sand, Ceramics, and Refractories, Bitumen and asphaltic materials, Timbers, Glass and Plastics, Structural Steel and other Metals, Paints and Varnishes, Acoustical material, geo-textiles, rubber, asbestos, laminates and adhesives, Graphene, Carbon composites and other engineering materials including properties and uses

#### UNIT - II INTRODUCTION TO MATERIAL TESTING

Mechanical behaviour and mechanical characteristics; Elasticity – principle and characteristics; Plastic deformation of metals; Tensile test – standards for different materials (brittle, quasi-brittle, elastic etc.,) True stress – strain interpretation of tensile test; hardness tests; Bending and torsion test; strength of ceramics; Internal friction, creep – fundamentals and characteristics; Brittle fracture of steel – temperature transition approach

#### UNIT- III STANDARD TESTING & EVALUATION

Mechanical testing and discussion, Naming systems for various irons, steels and nonferrous metals - Elastic deformation; Plastic deformation; Impact test

#### **UNIT-IV** FRACTURE MECHANICS

Background; Fracture toughness – different materials; Fatigue of material; Creep, concept of fatigue; Structural integrity assessment procedure and fracture mechanics

#### UNIT – V SPECIAL CONCRETES

Plain, Reinforced and steel fibre/ glass fibre-reinforced, light-weight concrete, High Performance Concrete, Polymer Concrete

#### PRACTICAL

- 1. Test on Bricks and Blocks
- 2. Test on Timber specimens
- 3. Tests on coarse and fine aggregates
- 4. Tests on Concrete Cubes and Beams
- 5. Hardness tests (Brinnel's and Rockwell)
- 6. Tests on closely coiled and open coiled springs
- 7. Concrete Mix Design as per BIS
- 8. Tests on unmodified bitumen and modified binders with polymers
- 9. Bituminous Mix Design and Tests on bituminous mixes Marshall method

#### **Course Objectives**

- To introduce the students to the basic concepts and principles of construction management.
- To familiarize the students with the various construction management techniques including scheduling, resource management.
- To study the elements of quality control and safety of construction projects.

Course be able	Outcome: After the completion of the course, students will to	Domain C or P or A	Level	
CO1	<b>Understand</b> the basic concepts of construction management such as types and functions of management, life-cycle stages of projects, project delivery types of contracts, and bidding	Cognitive	Understanding	
CO2	Ascertain a basic ability to plan, control and monitor construction projects with respect to time and cost	Cognitive Affective	Understanding Respond	
CO3	Understanding of modern construction practices.	Cognitive	Understanding	
CO4	<b>Receiving</b> an idea how construction projects are administered with respect to contract structures and issues.	CognitiveAffec tive	Understanding Respond	
CO5	<b>Ability</b> to put forward ideas and understandings to others with effective communication processes.	Cognitive Affective	Understanding Respond	

#### **COURSE CONTENT**

## UNIT I BASICS OF CONSTRUCTION

Unique features of construction, construction projects types and features, phases of a project, Agencies involved and their methods of execution

UNIT II	CONSTRUCTION PLANNING AND SCHEDULING	13
	Stages of project planning: pre-tender planning, Pre-construction planning, detailed construction planning, Process of development of plans and schedules, work break- down structure, activity lists, estimating durations, sequence of activities, Techniques of planning- Bar charts, Gantt Charts. Networks:Basic terminology, types of precedence relationships, preparation of CPM networks: activity on link and activity on node representation, computation of float values, PERT- determining three time estimates, analysis	
UNIT III	CONSTRUCTION METHODS & EQUIPMENT BASICS	9
	Types of foundations and construction methods; Basics of Formwork and Staging; Common building construction methods (conventional walls and slabs; conventional framed structure with block work walls; Basics of Slip forming for tall structures)Equipment for Earthmoving, Dewatering; Concrete mixing, transporting & placing; Cranes, Hoists and other equipment for lifting; Equipment for transportation of materials.	
UNIT IV	PROJECT PLANNING, ORGANIZING, MONITORING & CONTROL	9
	Site layout including enabling structures, developing site organization, Documentation at s Manpower: planning, organizing, staffing, motivation; Materials: concepts of plann procurement and inventory control; Equipment: basic concepts of planning and organizi Funds: cash flow, sources of funds; and S-Curves. Earned Value; Resource Scheduling- chart, resource constraints and conflicts; resource aggregation, allocation, smoothening leveling. Common Good Practices in Construction. Supervision, record keeping, perior progress, reports, periodical progress meetings. Updating of plans: purpose, frequency methods of updating. Common causes of time and cost overruns and corrective measures.	ing, ing; Bar and odic
UNIT V	CONSTRUCTION QUALITY & CONTRACTS MANAGEMENT	9

Concept of quality, quality of constructed structure, use of manuals and checklists for quality control, role of inspection, basics of statistical quality control. Safety, Health and Environment on project sites: accidents; their causes, effects and preventive measures, costs of accidents, occupational health problems in construction, organizing for safety and health. Importance of contracts; Types of Contracts, parties to a contract; Common contract clauses (Notice to proceed, rights and duties of Various parties, notices to be given, Contract Duration and Price. Performance parameters; Delays, penalties and liquidated damages; Force Majeure, Suspension and Termination. Changes & variations, Dispute Resolution methods.Classification of costs, time cost, trade-off in construction projects, compression and decompression.

0.5

0.5

At the end of the course the student will be able to

1

- To provide basics of digital surveying and mapping of earth surface using total station, GPS and mapping software.
- The course starts with introduction to land surveying followed by fundamentals of total station and its working & measurements for land surveying.
- Fundamentals, working & measurements using GPS for land surveying will be discussed.
- Followed by mapping fundamentals, digital surveying procedure, working, data reduction etc.
- Finally, the course will deals with working and demonstration of a digital land surveying and mapping of an area.

	e Outcome: After the completion of the course, students able to	Domain C or P or A	Level
CO1	Understand the importance of digital surveying and mapping of earth surface.	Cognitive	Understanding
CO2	Understand the importance of total station and its working & measurements for land surveying.	Cognitive	Understanding
CO3	Understand the importance of Fundamentals, working & measurements using GPS for land surveying.	Cognitive	Understanding
CO4	Learn some of the best management practices in, digital surveying procedure, working, data reduction etc.	Psychomotor Affective	Guided ResponseRespon ding
CO5	Understand the concepts of preparation of master demonstration of a digital land surveying and mapping of an area.	Psychomotor Affective	Guided ResponseRespon ding

### **COURSE CONTENT**

#### FUNDAMENTALS OF LAND SURVEYING & GPS

10

Overview -Fundamentals -GPS and Land Surveys- CORS Networks - Practical Application /-Strengths -Weaknesses - Coping with Reality.

**TOTAL STATION:** Introduction to GPS - Spatial data. Total station survey – practice.

#### **GEOGRAPHIC INFORMATION SYSTEM (GIS) REVELUTION:**

Building a Foundation - Sources of Information-System Maintenance-Potential Users - Potential for Misapplication,

### GEOMETRY

Plane Geometry - Land Point & Line - Straight Land Line -Plumb Line - Level -Land Distances - Elevation –Area- Horizontal Angles - Degrees, Minutes & Seconds- Maps or Plats.

#### SURVEY APPLICATIONS

10

Traversing using various instruments, Contouring Characteristics, uses and methods Measurements of areas and volumes using different methods, setting out works buildings, curves, and Project surveys Highways, Railways and Waterways.

loading conditions.

**CO4** Examine the stability of structural members by studying the Cognitive Analyse reactions and internal forces.

CO5 Assess the output of shafts and springs for its maximum energy. Cognitive Knowledge

### **COURSE CONTENT**

### UNIT I SIMPLE STRESSES & STRAINS

Concept and types of Stress and Strain, Hooke's Law, Elastic moduli and the relationship between them, Thermal stress, deformation of simple and compound bars.

#### UNIT II STRAIN ENERGY

Strain energy and strain energy density – strain energy in traction, shear in flexure and torsion – Strain Energy due to axial force - Resilience - stresses due to impact and suddenly applied load - Principal stress and principal planes - Mohr's circle

### UNIT III TRANSVERSE LOADING AND STRESSES OF BEAMS

Beams – types of supports and loads – shear force and bending moment for simply supported, cantilever and over hanging beams. Theory of simple bending – analysis of stresses.

### UNIT IV ANALYSIS OF PLANE TRUSS, THIN CYLINDERS / SHELLS

Types of truss – analysis of forces in truss members -method of joints- method of sections. -Thin cylinders and shells – under internal pressure – deformation of thin cylinders and shells

### UNIT V TORSION AND SPRINGS

Stresses and deformation in solid and hollow circular shaft– stepped shafts – shafts fixed at both ends. Spring – leaf springs – stresses in helical springs – deflection of springs.

### **COURSE CONTENT**

#### UNIT I PROPERTIES OF FLUID AND FLUID STATICS

**Basic Concepts and Definitions** – Distinction between a fluid and a solid; Density, Specific weight, Specific gravity, Kinematic and dynamic viscosity; variation of viscosity with temperature, Newton's law of viscosity; vapour pressure, boiling point, cavitation; surface tension, capillarity, Bulk modulus of elasticity, compressibility.

**Fluid Statics** - Fluid Pressure: Pressure at a point, Pascal's law, Hydrostatic Law, Pressure measuring devices-manometers and its types- Pressure gauges and its types

### UNIT II FLUID KINEMATICS AND DYNAMICS

Classification of fluid flow - Types of Flow lines-stream function, velocity potential function, flow net- Continuity equation along stream lines and Cartesian coordinates. Equations of motion - Euler's equation; Bernoulli's equation – Derivation; Energy Principle; PRACTICAL applications of Bernoulli's equation: Venturimeter, orifice meter and Pitot tube; Momentum principle

### UNIT III FLOW THROUGH PIPES AND OPEN CHANNEL FLOW

Laminar flow through: circular pipes,-Hegen Poisullis Equation a Laminar flow through parallel plates. Loss of head through pipes, Darcy-Wisbech equation, minor losses, total energy equation- hydraulic gradient line- Pipes in series, equivalent pipes- pipes in parallel, power transmission through pipes., Syphon and Water hammer.

Comparison between open channel flow and pipe flow, geometrical parameters of a channel, classification of open channels, classification of open channel flow, Velocity Distribution of channel section

### UNIT IV DIMENSIONAL ANALYSIS AND HYDRAULIC SIMILITUDE

Dimensional homogeneity, Rayleigh method, Buckingham's Pi method and other methods. Dimensionless groups. Similitude, Model studies, Types of models. Application of dimensional analysis and model studies to fluid flow problem.

### UNIT V HYDRAULIC MACHINES

Turbines – classification –Pelton wheel –Francis and Kaplan turbines – draft tubes – performance of turbines – specific speed and their significance.

Pumps:-Centrifugal pump – description and working – head, discharge and efficiency of a Centrifugal pump. Reciprocating pump - description and working – types –working principle and use.

#### **Course Objectives**

• Upon Completion of this subject, the students can able to have hands on experience in flow measurements using different devices and also perform calculation related to losses in pipes and also perform characteristic study of pumps, turbines etc.,

Course Outcome:	Domain C or P or A	Level
Determine the coefficient of discharge through pipe and notch	Psychomotor	Respond
Verify the principle of Bernoullis Equation.	Psychomotor	Measure
Determine the minor losses for various fittings.	Psychomotor	Measure
Perform test on Efficiency of the Pumps	Psychomotor	Measure
Perform test on Efficiency of the Turbines	Psychomotor	Respond

#### LIST OF EXPERIMENTS

- 1. Determination of the Coefficient of discharge of given Orifice meter.
- 2. Determination of the Coefficient of discharge of given Venturi meter.
- 3. Verification of Bernoullis Equation.
- 4. Determination of friction factor for a given set of pipes.
- 5. Determination of minor losses for various fitting.
- 6. Determination of rate of flow through notches
- 7. Conducting performance test on centrifugal pump and draw their characteristic curves
- 8. Conducting performance test on Reciprocating pump and draw their characteristic curves
- 9. Conducting performance test submersible pump and draw their characteristic curves
- 10. Conducting load test on Pelton Turbine and draw their characteristic curves
- 11. Conducting load test on Francis Turbine and draw their characteristic curves
- 12. Study about Axial flow turbine- Kaplan turbine.

### **COURSE CONTENT**

# UNIT IDEFLECTIONS OF BEAMS9

Introduction, Equation of Elastic Curve, Methods for Determining Deflections (Double Integration, Macaulay's Method, Moment-Area Method). Strain energy and dummy unit load approaches to deflection of Simple and Curved members.

### UNIT II INDETERMINATE BEAMS

Propped cantilever and fixed beams-fixed end moments and reactions– Theorem of Three Moments – Shear force and Bending moment diagrams for continuous beams.

### UNIT III COLUMNS AND THICK CYLINDERS

Introduction – Short and Long Columns, Euler's Theory, Rankine-Gordon Formula, Eccentrically Loaded Columns - Thick cylinders – compound cylinders.

### UNIT IV ENERGY PRINCIPLES

Castigliano's theorems – principle of virtual work – Maxwell's reciprocal theorems.application of energy theorems for computing deflections in beams and trusses.

### UNIT V INDETERMINATE BEAMS AND FRAMES

Degree of static and kinematic indeterminacies for beams and plane frames - analysis of indeterminate pin-jointed frames - rigid frames.

2	2	0	4

**Course Objectives** 

- To understand the soil properties, composition and structure
- To Familiarize the students an understanding of permeability and seepage of soils
- To learn the stress-strain relationship
- To know about the strength of soil and its analysis

	e Outcome: After the completion of the course, students	Domain	Level
will be	e able to	C or P or A	
CO1	Identify and analyze various types of soils for	Cognitive &	Remembering &
	engineering utilization.	Psychomotor	Observation
CO2	Determine the necessary index and engineering	Cognitive	Analyzing
	properties of soils.	Affective	Respond to
		Psychomotor	Phenomena
			Observation
CO3	Predicts the stress distribution pattern of soil	Cognitive,	Application
		Affective & Psychomotor	Respond to
		rsycholilotoi	Phenomena
			Manipulation
<b>CO4</b>	Illustrate the failure modes of Soil	Cognitive &	Understanding
		Psychomotor	Manipulation
CO5	Investigate the soil using appropriate methods and	Cognitive &	Remembering
	equipments.	Psychomotor	Observation

### **COURSE CONTENT**

	UNIT I	SOIL PROPERTIES AND SUB SOIL INVESTIGATION
--	--------	--

9

Origin of Soils and Rocks; Rock cycle; Soil minarology; Index properties including consistency limits and grain size distribution – Identification and classification of soil – Textural HRB and BIS specification

Methods of exploration, geophysical and conventional methods; Sounding drilling and boring

technique; Field tests - penetration tests

### UNIT II SOIL - WATER STATICS

Concept effective and neutral stresses – Darcy's law, Permeability – Field and Laboratory permeability tests –Seepage flow, seepage pressure, exit gradient - Flownet – significance of Laplace equation – quick sand condition, Liquefaction

### UNIT III COMPRESSIBILITY AND CONSOLIDATION OF SOIL

Compaction – Factors affecting compaction – proctor test – Field compaction – Field compaction controls, CBR value and CBR test

Consolidation of soils – Terzaghi's one dimensional consolidation theory – pressure void ratio relationship – prediction of pre consolidation pressure – Total settlement and time rate settlement – secondary compression – coefficient of consolidation – Curve fitting methods, consolidation models.

### UNIT IV STRESSES IN SOIL FROM SURFACE LOADS

Vertical stress distribution in soil - Boussinesq's and Westerguard's equations – Newmark's influence chart – Principle, Construction and use - Equivalent point load and other approximate procedures, stress isobars & pressure bulbs

### UNIT V SHEAR STRENGTH OF SOIL

Shear Strength; Mohr – Coulomb failure criterion and models – laboratory and field tests – shear properties of cohesion less and cohesive soils - Shear Strength. Parameters for under consolidated, normally consolidated and over consolidated clays; Soil sensors applied in field, Modern advancements; Trenchless Technology

### **COURSE CONTENT**

### UNIT I CONSTITUENT MATERIALS

Cement: - Properties - Testing – modern methods of analysis - Blended Cements; Aggregates: Classification- Properties - Testing - Artificial aggregates; Water: Various sources - Quality Testing; Admixtures and Chemicals: Properties – Uses - Use of eco-friendly recyclable and sustainable materials

### UNIT II FRESH CONCRETE

Rheology - Workability: Factors affecting - Measurement - Testing; Manufacture of concrete: Process -Compaction; Properties: Segregation - Bleeding - Setting times - Curing - Finishing.

### UNIT III HARDENED CONCRETE

Strength: Compressive - Tensile - Flexure - Strength relationships - Testing as per IS codes – Factors influencing strength – NDT techniques; Thermal properties: Durability of concrete: Shrinkage - Creep - Cracks - Acid, Sulphate and Chloride attack.

# 9

9

#### UNIT IV CONCRETE MIX DESIGN

Concepts of mix design - Factors influencing mix design – ACI and IS code recommended mix design methods; Non-pumpable concrete; Pumpable concrete:.

### UNIT V SPECIAL CONCRETES

Manufacture, Properties and Uses: High strength and high performance concrete -Waterproofing concrete - Fiber Reinforced concrete - Light weight and High Density Concrete - Aerated - No fines - Organic concrete; Special concreting methods: Self compacting concrete - Hot and Cold weather concreting - Prepacked - Vacuum - Gunite and Shotcrete – Ferrocement - Quality control - Sampling and testing-Acceptance criteria

CO5 Develop rudimentary ability to respond to their Cognitive Application surroundings with potential disaster response in areas where they live, with due sensitivity

### **COURSE CONTENT**

## UNIT I INTRODUCTION TO DISASTERS

Importance & Significance, Types of Disasters, Climate Change, DM cycle

### UNIT II RISK ASSESSMENT

Risk, Vulnerability, Types of Risk, Risk identification, Emerging Risks, Risk Assessment, Damage Assessment, Risk modeling.

### UNIT III DISASTER MANAGEMENT

Phases, Cycle of Disaster Management, Institutional Framework, Incident Command System, DM Plan, Community Based DM, Community health and safety, Early Warning and Disaster Monitoring, Disaster Communication, Role of GIS and Remote Sensing, Do's and Don'ts in various disasters.

### UNIT IV DISASTER RISK MANAGEMENT IN INDIA

Hazard and Vulnerability profile of India, Components of Disaster Relief: Water, Food, Sanitation, Shelter, Health, Waste Management, Institutional arrangements (Mitigation, Response and Preparedness), Disaster Management Act and Policy – Other related policies, plans, programmes and legislation

### UNIT V DISASTER MANAGEMENT: APPLICATIONS AND CASE STUDIES

Landslide Hazard Zonation, Earthquake Vulnerability Assessment of Buildings and Infrastructure, Drought Assessment, Coastal Flooding, Forest Fire, Man Made disasters, Space Based Inputs for Disaster Mitigation and Management, Cast Study

#### **Course Objectives**

- To understand the handling of equipments
- To provide the hands on training in determination of Engineering and index properties of soils, applied in field problems.
- To provide the knowledge on the use of experimental results pertaining to foundation problems

Course be able	e Outcome: After the completion of the course, students will e to	will Domain Level C or P or A				
CO1	<i>Identify</i> and <i>analyze</i> various types of soils for engineering utilization.	Psychomotor	Remembering & Observation			
CO2	<i>Determine</i> the necessary index and engineering properties of soils.	Psychomotor	Analyzing Respond to Phenomena Observation			
CO3	<i>Investigate</i> the soil using appropriate methods and equipments.	Psychomotor	Remembering Observation			

### **COURSE CONTENT**

### Experiments in Geotechnical Engineering

- Water content determination ( Oven drying method )
- Grain size distribution Sieve analysis and Hydrometer analysis
- Determination of Specific gravity by Pycnometer and density bottle method
- Determination of Liquid and Plastic limit (Casagrande method)
- Determination of Shrinkage limit of soil
- Determination of moisture-density relationship (Standard Proctor's)
- Determination of Permeability by Constant and Variable head method
- Determination of in-situ density by sand replacement and core cutter method
- Determination of Relative density Sand
- Unconfined compression test for fine grained soils
- Triaxial Compression Test
- Direct shear test for coarse grained soils
- California Bearing Ratio (CBR) Test

• Plate load test, SPT and SCPT – study experiments

Subject Na	me : SOLID AND HAZARDOUS WASTE MANAGEMENT
Subject Co	ode : YEN203
Designed b	
Prerequisit	
L	T P C L T P H
3	
	COURSE CONTENT
UNIT I	SOURCES, CLASSIFICATION AND REGULATORY FRAMEWORK 9
	Types and Sources of solid and hazardous wastes - Need for solid and hazardous waste management – Elements of integrated waste management and roles of stakeholders - Salient features of Indian legislations on management and handling of municipal solid wastes, hazardous wastes, biomedical wastes, lead acid batteries, electronic wastes , plastics and fly ash – Financing waste management.
UNIT II	WASTE CHARACTERIZATION AND SOURCE REDUCTION 20
	<ul> <li>properties of solid wastes – Hazardous Characteristics – TCLP tests – waste sampling and characterization plan - Source reduction of wastes –Waste exchange - Extended producer responsibility - Recycling and reuse</li> <li>Practical: Composition of MSW, Determination of Physical and Chemical Properties of MSW</li> </ul>
UNIT III	STORAGE, COLLECTION AND TRANSPORT OF WASTES 9
	Handling and segregation of wastes at source – storage and collection of municipal solid wastes – Analysis of Collection systems - Need for transfer and transport – Transfer stations Optimizing waste allocation– compatibility, storage, labeling and handling of hazardous wastes – hazardous waste manifests and transport
UNIT IV	WASTE PROCESSING TECHNOLOGIES 12
	Objectives of waste processing – material separation and processing technologies – biological &chemical conversion technologies – methods and controls of Composting - thermal conversion technologies, energy recovery – incineration – solidification & stabilization of hazardous wastes- treatment of biomedical wastes
UNIT V	WASTE DISPOSAL 10
	Waste disposal options – Disposal in landfills - Landfill Classification, types and methods – site selection - design and operation of sanitary landfills, secure landfills and landfill bioreactors – leachate and landfill gas management – landfill closure and environmental monitoring – Rehabilitation of open dumps – landfill remediation

The student individually works on a specific topic approved by faculty member who is familiar in this area of interest. The student can select any topic which is relevant to his/her specialization of the programme. The topic may be experimental or analytical or case studies. At the end of the semester, a detailed report on the work done should be submitted which contains clear definition of the identified problem, detailed literature review related to the area of work and methodology for carrying out the work. The students will be evaluated through a viva-voce examination by a panel of examiners including one external examiner.

The student should continue the phase I work on the selected topic as per the formulated methodology. At the end of the semester, after completing the work to the satisfaction of the supervisor and review committee, a detailed report should be prepared and submitted to the head of the department. The students will be evaluated based on the report and the viva-voce examination by a panel of examiners including one external.

#### **COURSE CONTENT**

# UNIT I SOURCES, CLASSIFICATION AND REGULATORY FRAMEWORK

Solid and Hazardous Waste Management

**Department of Civil Engineering** 

Types and Sources of solid and hazardous wastes - Need for solid and hazardous waste management – Elements of integrated waste management and roles of stakeholders - Salient features of Indian legislations on management and handling of municipal solid wastes, hazardous wastes, biomedical wastes, lead acid batteries, electronic wastes , plastics and fly ash – Financing waste management.

#### UNIT II WASTE CHARACTERIZATION AND SOURCE REDUCTION

Waste generation rates and variation - Composition, physical, chemical and biological properties of solid wastes – Hazardous Characteristics – TCLP tests – waste sampling and characterization plan - Source reduction of wastes –Waste exchange - Extended producer responsibility - Recycling and reuse

**Practical:** Composition of MSW, Determination of Physical and Chemical Properties of MSW

#### UNIT III STORAGE, COLLECTION AND TRANSPORT OF WASTES

9

L

3

Т

0

Р

2

9

20

Handling and segregation of wastes at source – storage and collection of municipal solid wastes – Analysis of Collection systems - Need for transfer and transport – Transfer stations Optimizing waste allocation– compatibility, storage, labeling and handling of hazardous wastes – hazardous waste manifests and transport

#### UNIT IV WASTE PROCESSING TECHNOLOGIES

Objectives of waste processing – material separation and processing technologies – biological &chemical conversion technologies – methods and controls of Composting - thermal conversion technologies, energy recovery – incineration – solidification & stabilization of hazardous wastes- treatment of biomedical wastes

# UNIT V WASTE DISPOSAL

Waste disposal options – Disposal in landfills - Landfill Classification, types and methods – site selection - design and operation of sanitary landfills, secure landfills and landfill bioreactors – leachate and landfill gas management – landfill closure and environmental monitoring – Rehabilitation of open dumps – landfill remediation

3	0	0	3	

#### **COURSE CONTENT**

#### **UNIT I INTRODUCTION TO AIR POLLUTANTS**

**Department of Civil Engineering** 

Air resource management system - Air quality management - Scales of air pollution problem - Sources and classification of pollutants and their effect on human health vegetation and property - Global implications of air pollution - Meteorology Fundamentals - Atmospheric stability - Micrometeorology - Atmospheric turbulence - mechanical and thermal turbulence - Wind profiles - Atmospheric Diffusion - Atmospheric diffusion theories - Steady-state atmospheric diffusion equation - Plume rise - Diffusion models -Ambient air quality and emission standards – Air pollution indices – Air Quality Sampling and Monitoring.

#### **UNIT II CONTROL OF PARTICULATE CONTAMINANTS**

Settling chambers - Filters, gravitational, Centrifugal – multiple type cyclones, prediction of collection efficiency, pressure drop, wet collectors, Electrostatic Precipitation theory – ESP design – Operational Considerations – Process Control and Monitoring – Case Studies.

#### **UNIT III CONTROL OF GASEOUS CONTAMINANTS**

Absorption – principles - description of equipment-packed and plate columns - design and performance equations – Adsorption - principal adsorbents - Equipment descriptions – Design and performance equations - Condensation - design and performance equation -Incineration - Equipment description - design and performance equations - Biological Air Pollution Control Technologies – Bio-Scrubbers, Biofilters – Operational Considerations – Process Control and Monitoring – Case Studies.

#### **UNIT IV EMERGING TRENDS**

Process Modification - Automobile Air Pollution and its control - Fuel Modification -Mechanical Particulate Collectors - Entrainment Separation - Internal Combustion Engines - Membrane Process - Ultraviolet Photolysis - High Efficiency Particulate Air Filters – Technical & Economic Feasibility of selected emerging technologies for Air pollution control

#### UNIT V **INDOOR AIR QUALITY**

Sources and Causes of Indoor Air Quality Problems- Risk due to Indoor Air pollutantssources of indoor Air pollutants- Indoor Air Quality Regulations- Indoor Air Quality Models- Indoor Air Quality Control- Case Studies

L	Т	Р
0	0	16

#### **COURSE CONTENT**

The student individually works on a specific topic approved by faculty member who is familiar in this area of interest. The student can select any topic which is relevant to his/her specialization of the programme. The topic may be experimental or analytical or case studies. At the end of the semester, a detailed report on the work done should be submitted which contains clear definition of the identified problem, detailed literature review related to the area of work and methodology for carrying out the work. The students will be evaluated through a viva-voce examination by a panel of examiners including one external examiner.

Sem	lester	•	:	VI
Sub	ject I	Name	:	PROJECT WORK PHASE II
Sub	ject (	Code	:	QEN601
Designed by :		:	Department of Civil Engineering	
Prerequisite		:	None	
	L	Т	Р	С

L	Т	Р
0	0	30

# **COURSE CONTENT**

The student should continue the phase I work on the selected topic as per the formulated methodology. At the end of the semester, after completing the work to the satisfaction of the supervisor and review committee, a detailed report should be prepared and submitted to the head of the department. The students will be evaluated based on the report and the viva-voce examination by a panel of examiners including one external.

Semester	<b>Course Code</b>	Course Name		L	Т	Р	С		
I	YEN101	Chemistry and Microbiolog Environmental Enginee		3	0	0	3		
COURSE CONTENT									
UNIT I	FUNDAMENTA	LS ON ANALYTICAL CHEM	ISTRY				12		
	Oxidation and reduction reactions, balancing equation by electron method -Colloids – Redox potentials – partition co-efficient – Beer – Lambert's Law – Limitations – Electrode potential – Applications of potentiometry – pH measurements, glass electrodes, ion selective electrodes – Instrumentations- Atomic spectroscopy – Flame photometry – Atomic Adsorption Spectrophotometry – principle- UV– visible spectrophotometer -Application in determination of mercury, lead and cadmium in water samples. Chromatography – Gas chromatography – simple instrumentation – Application in measuring SO <sub>2</sub> , NO <sub>2</sub> & H <sub>2</sub> S by spectrophotometry.								
UNIT II	DEGRADATIO	N OF CHEMICALS					6		
	•	sformation of chemicals – DO, B odstuffs, detergents, pesticides and			noto cat	alysis -			
UNIT III	SOIL CHEMIST	TRY					9		
	Soil properties, c affected soil and i	lay minerals - acid-base and ion- ts remediation	-exchange re	eaction	s in so	il - salt			
UNIT IV	MICROORGAN	NISMS AND NUTRITIONAL R	EQUIREM	ENTS			9		
UNIT IVMICROORGANISMS AND NUTRITIONAL REQUIREMENTSBasic principles of microbiology- structure and function of microbial cell-pure and mixed cultures-metabolism-Aerobic and Anaerobic pathways- Microbial growth and growth kinetics-Classification and morphological aspects of Bacteria, Fungi, Protozoa and algae. Microbial Nutrition –Growth of micro-organism in different media, growth curve, methods of enumeration of micro-organisms, sterilization and disinfection.									

#### UNIT V MICROBIOLOGY IN WASTE WATER

Biological methods to treat waste water- Microbiology in air pollution control (biofilter and bio scrubber), biodegradation of toxic pollutant. Practical: culture, identify and explain microorganisms in environmental cultures

# UNIT I INTRODUCTION TO AIR POLLUTANTS

Air resource management system - Air quality management - Scales of air pollution problem - Sources and classification of pollutants and their effect on human health vegetation and property - Global implications of air pollution - Meteorology Fundamentals - Atmospheric stability – Micrometeorology - Atmospheric turbulence - mechanical and thermal turbulence - Wind profiles - Atmospheric Diffusion - Atmospheric diffusion theories - Steady-state atmospheric diffusion equation – Plume rise - Diffusion models - Ambient air quality and emission standards – Air pollution indices – Air Quality Sampling and Monitoring.

# UNIT II CONTROL OF PARTICULATE CONTAMINANTS

Settling chambers - Filters, gravitational, Centrifugal – multiple type cyclones, prediction of collection efficiency, pressure drop, wet collectors, Electrostatic Precipitation theory – ESP design – Operational Considerations – Process Control and Monitoring – Case Studies.

# UNIT III CONTROL OF GASEOUS CONTAMINANTS

Absorption – principles - description of equipment-packed and plate columns - design and performance equations – Adsorption - principal adsorbents - Equipment descriptions – Design and performance equations – Condensation - design and performance equation – Incineration - Equipment description - design and performance equations - Biological Air Pollution Control Technologies – Bio-Scrubbers, Biofilters – Operational Considerations – Process Control and Monitoring – Case Studies.

#### UNIT IV EMERGING TRENDS

Process Modification – Automobile Air Pollution and its control – Fuel Modification -Mechanical Particulate Collectors – Entrainment Separation – Internal Combustion Engines – Membrane Process – Ultraviolet Photolysis – High Efficiency Particulate Air Filters – Technical & Economic Feasibility of selected emerging technologies for Air pollution control

# UNIT V INDOOR AIR QUALITY

Sources and Causes of Indoor Air Quality Problems- Risk due to Indoor Air pollutantssources of indoor Air pollutants- Indoor Air Quality Regulations- Indoor Air Quality Models- Indoor Air Quality Control- Case Studies

Semester	<b>Course Code</b>	Course Name	L	Т	Р	С
IV	QEN402B	Environmental Geotechnology	3	0	0	3
		COURSE CONTENT				
UNIT I	SOIL PROFILE					9
		se system; Soil – environment interactions nedia; Water cycle with special reference	· •		water in	n
UNIT II	SOIL MINERAL	OGY				9
	Soil mineralogy; Mineralogical char	significance of mineralogy in deter- acterization	nining	soil be	ehavior	,
UNIT III	MECHANISMS (	<b>DF SOIL-WATER INTERACTIONS</b>				9
		yer models; Force of attraction and maction; Theories of Ion exchange; Infl interaction.				
UNIT IV	WASTE & ITS T	RANSPORT IN SOIL				9
	-	containment facilities; desirable propertition; contaminated site remediation	es of so	oil; cont	aminan	t
UNIT V	REMEDIAL TEC	CHNIQUES				9
	Introduction to advanced soil characterization techniques; volumetric water content; gas permeation in soil; electrical and thermal properties; pore –size distribution; contaminant analysis
