1. INTRODUCTION

Transition from School to University life is one of the most challenging events in a student's life. When new students enter an Institution, they come with diverse thoughts, backgrounds and preparations. They come into a new unfamiliar environment and most of them have little knowledge of a University. An important task, therefore, is to welcome new students to Higher Education and prepare them for new role.

Objectives:

- The main objective of the programme is to bridge the gap between the subjects studied at the school level and the subjects they would be studying in Graduation
- The programme also aims to provide students the confidence and skills in bridging the gap and to have a gradual take off from school level to college level

Implementation:

- DEEKSHARAMBH - Student Induction Programme, 2022 was organized for the newly admitted students of Faculty of Science & Humanities for the academic year 2022 - 2023.
- On 12.8.22, the Inauguration ceremony of Deeksharambh- SIP was held at the Multipurpose Indoor stadium at 10:00am. As per the plan the SIP was scheduled for 14 days from 16.8.2022 to 5.9.2022. The sessions were handled on the prescribed topics by the deputed Faculty members of different departments.
- Pretest was conducted during the initial phase and post test was conducted during the final phase of the schedule and the performance of the students were analysed and recorded. Remedial measures are also planned to be implemented during the regular classes to enhance the basic knowledge in their core subjects, numerical ability and language competency.

2. Deeksharambh - Student Induction Programme

Student Induction Programme (SIP) is to help new students adjust and feel comfortable in the new environment, inculcate in them the ethos and culture of the Institution, help them build bonds with other students and faculty members and expose them to a sense of larger purpose and self-exploration.

- The term induction is generally used to describe the whole process whereby the incumbents adjust to or acclimatize to their new roles and environment in the Institution and connect them with the people in it.
- Student Induction Programme engages with the new students as soon as they come into the Institution, before regular classes start. At the start of the induction, the incumbents learn about the Institutional policies, processes, practices, culture and values and their mentor groups are formed.
- Students Induction could cover a number of different aspects (SAGE):

Socializing: meeting other new students, senior students, students union, lecture by eminent people;

Associating: visit to department of study, campus tour, important places in local area;

Governing: rules and regulations, student support;

Experiencing: Subject lectures, study skills, small group activities, physical activity, creative and performing arts, literary activities, universal human values, etc.,

2.1 Daily Activities

Following are the activities under the induction programme in which the student would be fully engaged throughout the day for the entire duration of the programme

1. Physical Activity
2. Creative Arts
3. Mentoring and Universal Human Values
4. Literary Activity
5. Proficiency Module
6. Lectures by Eminent People
7. Familiarization to Department / Branch
8. Visits to Local Area
9. Extra-Curricular Activities
10. Code of conduct

2.2 Physical Activity

This would involve a daily routine of physical activity with games, sports, exercise and yoga.

2.3 Creative Arts

Students should be exposed to skill related to the arts - visual arts or performing arts like painting, model making, sculpture designing, pottery, music, dance, etc., These would allow for creative expression. It would develop a sense of aesthetics and also enhance creativity which would, hopefully, flow into their studies later.

2.4 Mentoring and Universal Human Values

Mentoring and connecting with faculty members is the most important part of induction. Hopefully, it would set up a healthy relationship between the students and the faculty.

Mentoring takes place in the context and setting of universal human values. It gets the student to explore oneself and allows one to experience the joy of learning, stand up to peer pressure, take decisions with courage, be aware of relationships, be sensitive to others, understand the role of money in life and feeling prosperity, etc., Human values as enshrined in our constitution like justice, liberty, equality, fraternity, human dignity and the unity and integrity of the Nation can also be part of this discussion. Focus should be on inculcating values of equality and responsibility towards one's fellow citizens of any case, class or creed. During discussion, issues and requirements of students should be assessed and addressed. Mentor-Mentee relationship can help students form a bond with faculty members which can be of great help during various tough times in study courses.

Methodology of mentoring this content is extremely important. It must be through do's and don'ts, but by getting students to explore and think by engaging them in a dialogue. It is best taught through group discussions and real life activities rather than lecturing. The role of group discussions, however, with clarity of thought of the teachers cannot be over emphasized. It is essential or giving exposure, guiding thoughts and realizing values.

Following topics may be discussed during the Mentoring sessions.

- Student aspirations, family expectations
- Gratitude towards people helping me
- Human needs of (i) self and (ii) body
- Peer Pressure
- Prosperity
- Relationships

Small groups of preferably 20 students with a faculty mentor each can be used for discussions and open thinking towards the self. Discussion of Universal Human Values could even continue for rest of the semester and not stop with the Induction programme. A follow up in the later semester could even be considered.

A student should feel free to approach his / her faculty mentor, when facing any kind of problem, whether academic or financial or psychological etc., (For every 10 undergraduate first year students there would be a senior student as a student guide; and for every 20 students, there would be a faculty mentor). Such a group should remain for the entire 3 / 4 / 5 years duration of stay of the student. Therefore, it would be good to have groups with the students as well as teachers from the same department / discipline.

2.5 Literary Activity

Literary activity would encompass reading, writing and possibly, debating, enacting a play, etc.,

2.6 Proficiency Modules

This period can be used to overcome some critical lacunas that students might have in the core subjects, computer familiarity. These should run like crash courses, so that when normal courses start after the induction program, the student has to overcome the lacunas substantially.

2.7 Lectures by Eminent People

This period can be utilized for lectures by eminent people. It would give the students exposure to people who are socially active or in public life.

2.8 Familiarization to Department / Branch

Students should be familiarized with their School / Department / Programme of Study / Laboratories / Workshops / ICT facilities and also other facilities.

2.9 Visits to Local Area

Visits to the landmarks of the city or a hospital or orphanage could be organized. This would familiarize them with the area as well as expose them to the under privileged.

2.10 Extra-Curricular Activities

The new students should be introduced to the extra-curricular activities at the University such as NCC / NSS / YRC / Clubs and Societies.

2.11 The Code of conduct

The Code of Conduct of the Institution is informed to the Students.

2.12 Schedule

The activities during the Induction programme can have an Initial phase, a Regular phase and a Closing phase. The Initial and Closing Phases would be one day each.

- Initial Phase: Inaugural Function
- Regular Phase: Regular phase of induction will start after the first day. There will be a regular programme to be followed every day. Some of the activities are on a daily basis, while some others are at specified periods within the induction programme. Activities can be scheduled at different times during the induction programme, as per the context and the feasibility of resource persons.
- A typical daily timetable, to be followed from day 2, will be scheduled from 09.15 am to 1.40pm pm and the same will be intimated to the students on Day1 after the Inaugural function; Saturdays and Sundays are off during Student Induction Programme. However, Saturdays may be planned for local visits. A typical timetable is shown in Appendix - 1 for reference.
- Closing Phase: Valedictory function (Feedback)

2.13 Outcomes

The goal of higher Education is to nurture human beings responsible for their betterment and capable of sustaining society and nature, besides enabling them to procure a position to earn their livelihood. The incoming undergraduate students are often influenced by their parents and society to join higher studies without understanding their own interests and talents. There is high probability that students fail to develop an understanding about the goals of Educational Institutes as well as higher education. The graduating student must have knowledge and meta-skills related to his / her work, and as a citizen.

Student Induction Programme is designed for the new students to help them feel comfortable, draw their attention towards exploring their academic interests and activities, reducing competition and making them work for excellence, promote bonding within them, build relations between teachers and students, open new horizons of life and leading to character building.

Mentoring based on Universal Human Values such as truth, righteous conduct, love, non-violence and peace can act as an anchor or pivot of the induction, and help in developing self-awareness and sensitivity, feeling of equality, compassion and oneness. Students' attention need to be drawn to society and nature. This will help them reflect on their relationship with

their families, which are extended to college as a family and connects students among themselves and with teachers, so that they can share any difficulty they might be facing and seek help.

Chemistry is the branch of science which deals with the investigation of the properties and changes of matter. From the way how our body exchanges oxygen to how our universe was created, all have a side of chemistry associated with it. Our life is completely dependent on chemistry. Right in the morning when we wake up, we need toothpaste and a toothbrush to clean our teeth; they are made up of certain chemicals. When we eat food, as soon as we swallow the first bite, the chemical reactions start in our body immediately. We know that all matter is made up of atoms, so chemistry is the study of everything around us.

------------------------	--

Dr.KarthickAsst prof Department of chemistry. PMIST, He taught about creativity in chemistry. Creative thinking is about developing novel and useful ideas and, in many ways, all learning in chemistry is creative. Students construct useful new meanings and understandings based on their experiences inside and outside of formal education. It is the role of the teacher to co-construct these new understandings and this requires creativity and imagination. This is particularly so in chemistry where we require students to imagine a world of atoms and molecules nobody has ever seen. Just as great fiction authors, such as J R R Tolkien, use words to construct imaginary worlds in the minds of the reader, chemistry teachers are the authors of their students' chemical imagination.

FEEDBACK

Based on the feedback received from the students the following measures are taken to be considered for the upcoming years.

- Instead of allotting the sessions for core subjects in common, it has been suggested to allot departmentwise.
- Students prefer more interactive sessions than the theoretical sessions.
- We have also planned to take into account, the technical and network issues that both students and faculty face, in attending the sessions.
- According to the feedback we have decided to allocate more sessions to enhance the creativity, logical thinking, numerical ability and communication skills.

10. Strategies for Follow up after Induction

The main objective of Deeksharambh is to enable the students to adapt themselves to the Institution ambiance as well as its etiquette. As the time allotted for the Induction Programme was limited, it is suggested to have continuous follow up during the regular sessions. Besides teaching the main subjects to the students, it is also recommended to give more focus on the basic skills, communication skills and logical reasoning thereby enabling the students to experience a smooth transformation from the school level to the college level. As we focus more on the holistic development of the students, we have insisted the faculty members to be more approachable, so that the students can share their problems confidently and can find a solution under the guidance and concerning approach of the faculty members. Mentor - Mentees are also allotted to guide, counsel and motivate the students in all their endeavours.

Strategies for Follow up after Induction (Same Semester)

It is recommended to strengthen the Mentor - Mentee gathering and to have a regular meet every week which should be scheduled in the academic time table. Other than the scheduled meeting it is also insisted to meet their respective Faculty mentors at any time if they are in need of any guidance or can contact them over the phone and get their assistance whenever there is a need. Get-together, field trips and a evening tea can be arranged to strengthen the Mentor- Mentee relationship and have a positive rapport between them.

Strategies for Follow up (Subsequent Semesters)

It is recommended to have a continuous follow up as per plan in the upcoming semesters. It is also suggested to organise cultural fest, symposiums, exhibitions and talent shows in the subsequent semesters periodically which can provide a platform for the students to expose their hidden talents and express their creativity.

11. Concluding Remarks

DEEKSHARAMBH - Student Induction Programme, 2022 successfully ended under the guidance of the Management, co-ordinated efforts of the SIP team and by the active participation of the students of Arts, Science & Humanities. Feedbacks were collected from the students and the suggestions were noted. Overall the induction programme has accomplished the objectives in bridging a smooth transition from the school level to the college level thereby making the students more confident in facing the upcoming challenges with sheer grit and determination.
