Total 193 Credits

Total Number of subjects proposed with the credits is given below:

S. No.	Type of Subject	Numbers	Total Credit
1	AECC (Theory & Lab)	02	04
2	Core Course (Theory & Lab)	24	104
3	DSE (Theory & Lab)+ Project	5+4	15 +37
4	SEC	07	21
5	GE	03	09
6	UMAN	03	00
7	LANG	01	3
	Minor courses, IPT & NSS / NCC...	5*	5*
Total			**193**+5*

*Extra credit

COURSE CODE	XGL101	L	T	P	SS	H	C
COURSE NAME	COMMUNICATION SKILLS IN ENGLISH	2	0	0	2	4	2
C:P:A - 2:0:0							

COURSE OUTCOMES:		Domain	Level
CO1	***Explain*** the process of communication and its types	Cognitive	Understanding
CO2	***Recall*** various sounds and use it in proper context	Cognitive	Remembering
CO3	***Organise*** meeting events and recording it constructively	Cognitive	Applying
CO4	***Adapt*** methods of framing questions and using punctuations	Cognitive	Creating
CO5	***Demonstrate*** the basic skills at the time of interview and presentations	Cognitive	Understanding

SYLLABUS		HOURS
UNIT I	**The Process of Communication**	
Communication- the process of communication - barriers of communication - different types of communication		9
UNIT II	**Phonetics**	
Pronunciation – Vowels – Consonants – Transcription of Words and Sentences		9
UNIT III	**Report Writing**	
Organizing successful meeting, One to one meeting, editing, criteria for successful meetings, memo, e mails		9
UNIT IV	**Grammar**	
Articles – Question Tag –Punctuation – Types of Sentences – Types of Questions, Cause and Effect.		9
UNIT V	**Presentation Skills**	
Presentation skills, Importance of body language in presentations, Verbal and Non Verbal communication		9
	Total Hours	**45**

COURSE OUTCOME		Domain	Level
CO1	***Recognize*** the importance of computer system, application and practice in Libre Office (FOSS) Writer.	Cognitive Psychomotor	Understand Origination
CO2	***Identify*** and ***define*** basic terms and concepts in computer hardware and peripheral devices and Libre Office (FOSS) Impress.	Cognitive Psychomotor	Understand Origination
CO3	***Establish*** the relationship between hardware and software. ***Arrange*** data and Apply formula in Libre Office (FOSS) Calc.	Cognitive Psychomotor	Apply Origination
CO4	***Identify*** the IO devices. ***Design*** database using Libre Office (FOSS) Base.	Cognitive Psychomotor	Remembrance Origination
CO5	***Identify*** flowchart component and ***apply*** in program and design a project using Libre Office (FOSS).	Cognitive Psychomotor	Understand Apply Origination

UNIT I - INTRODUCTION **12+6**

Introduction – Characteristics of computer – Evolution of computer - Generation of computer – classification of computer - The Computer system –Applications of computers

Lab: Libre Office Writer

1. Text Processing
2. Table Creation
3. Resume Creation
4. Mail Merge

UNIT II - COMPUTER ARCHITECTURE **12+6**

The Central processing unit (CPU) – Main Memory Unit – Interconnection Unit – Cache – Communication between various units of a computer system.

Lab : Libre Office Calc

1. Worksheet Creation
2. Employee Pay Details
3. Student Result Sheet
4. Simple Charts

UNIT III - PRIMARY AND SECONDARY MEMORY **12+6**

Primary memory : Memory representation – memory hierarchy - Random access memory – Types of Memory – Read only memory – types of ROM – **Secondary Memory** – Classification of secondary storage devices –Magnetic tape – Magnetic disk - Optical disk – Memory stick - Universal serial bus – Mass storage devices

Lab : Libre Office Impress

1. Power Point Preparation
2. Create Text And Images With Effects
3. Create Animation And Sound Effects

UNIT IV - INPUT AND OUT PUT DEVICES **12+6**

Input devices Types of input devices - Optical character recognition – Optical Mark recognition - Magnetic ink character recognition – Bar code reader – **Output devices** : Types of output - Classification of output devices - Terminals **Lab :** Libre Office Access 1. Importing Data From Data Base 2. Creating Macro 3. Result Processing

UNIT V	**COMPUTER PROGRAM AND LANGUAGES**	**12+6**

Computer Program : Developing a program - Algorithm – flow chart - decision table – program testing and debugging- Program documentation – Programming paradigms - Characteristics of good program – **Computer languages** : Evolution of programming language – Classification of programming Language – Generation of a programming language – features of a good programming language **Lab :** Libre Office Project 1. Creating A Greeting Card 2. Creating A Cover Page Of A Project

COURSE CODE	YSE104	L	T	P	C
COURSE NAME	ALGEBRA, CALCULUS AND ANALYTICAL GEOMETRY	4	1	0	5
PREREQUISITES	Basic of Mathematics	L	T	P	H
		4	1	0	5
C:P:A	4:0:0				

COURSE OUTCOMES		DOMAIN	LEVEL
CO1	*Evaluate the derivatives of given functions*	Cognitive	Understand
CO2	*Calculate the definite and indefinite integrals using various techniques.*	Cognitive	Understand, Remember
CO3	*Apply basic operations on matrices to find the inverse of a matrix*	Cognitive	Understand, Apply
CO4	*Solve problems using Binomial, exponential and logarithmic series expansions.*	Cognitive	Understand
CO5	*Calculate the distance between two points and explain section formulae, slope form and intercept form.*	Cognitive	Understand

UNIT I – DIFFERENTIAL CALCULUS **12+3**

Derivative of a function – Various formulae – Product and quotient rule of differentiation – Differentiation of function of function (chain rule) – Trigonometric functions – Inverse trigonometric functions – Exponential function – Logarithmic functions – Logarithmic differentiation - Higher derivatives – Successive differentiation – Leibnitz theorem.

UNIT II – INTEGRAL CALCULUS **12+3**

Constant of integration – Indefinite integral – Elementary integral formulae – Methods of integration – Integration by substitution - Integration by parts – Integration through partial fractions – Concept of definite integral – Properties of definite integral.

UNIT III – MATRICES AND DETERMINANTS **12+3**

Definition and types of matrices – Matrix Operation – Determinants – Solution of system of linear equations by Matrix method.

UNIT IV – SERIES **12+3**

Binomial theorem for a rational index – Exponential and Logarithmic series – Summation of the above series.

UNIT V – TWO DIMENSIONAL ANALYTICAL GEOMETRY **12+3**

Cartesian coordinate system – Introduction to polar coordinates – Distance between two points – Section formulae – Area of triangle – Locus and its equations – Straight line: Equation of a straight line parallel to an axis – slope form –normal form – Intercept form through two point –condition of concurrency of three lines.

CO2	***Identify*** the needs of problem solving concepts.	Cognitive Psychomotor	Understand Perception
CO3	***Demonstrate*** the usage of memory management and ***Be Aware*** of the utilization of the dynamics memory allocation concepts in the real time application.	Cognitive Psychomotor Affective	Apply Perception Receive
CO4	***Illustrate*** the concept of sorting & searching and ***Contribute*** more in the team work towards application development.	Cognitive Psychomotor Affective	Apply Mechanism Respond
CO5	***Develop*** and ***Establish*** the application software in C language.	Cognitive Psychomotor	Create Origination

UNIT I	INTRODUCTION TO C	9+6

History of C - Characteristics of C – Character set - Tokens – Identifiers – Keywords – Constants and Data Types - Operators and Expressions – Input and Output Functions – Conditional Control statements – Branching – Looping - Unconditional control structures - switch, break, continue, goto statements

Lab:

1. Programs using Expression Evaluation
2. Programs using Branching Statements
3. Programs using Looping Statement

UNIT II	PROBLEM SOLVING	9+6

Problem solving aspect - Top -down design - Implementation of algorithms– Program verification- Efficiency-Analysis of Algorithms–Fundamental Algorithms – swapping.

Lab:

1. Programs Using Computational Problems.
2. Programs Using Conditional Statements.

UNIT III	ARRAYS AND POINTERS	9+6

Arrays: One Dimensional Array – Two Dimensional – Multi Dimensional Arrays - Storage classes: auto – extern – static. Strings: Basic operations on strings. Functions: Built in functions – User Defined Functions - Parameter passing methods - Passing arrays to functions – Recursion - Pointer concept –Pointers and Functions - Call by value - Call by Reference – Pointers and Arrays - Pointers on pointer – Dynamic memory allocation- Operations on pointers.

Lab:

Programs using Arrays
Programs using Functions
Programs using Call by reference
Programs using dynamic memory allocation

UNIT IV	FACTORING METHODS AND MERGING, SORTING AND SEARCHING	9+6

Finding Square Root - LCM - GCD Generation of Prime Numbers -Array Techniques – Histogramming - Minimum and Maximum numbers. Two- way Merge Sort - Selection Sort - Binary Search - Hash Search - Text Processing-Keyword Searching in text.

Lab :
Program to find LCM and GCD
Programs for sorting
Programs for Searching
Programs using Strings

UNIT V	STRUCTURES AND FILES	9+6

Structures and Unions -Initializing structure - Passing structure to elements to functions - Arrays of structure - Structure within a structure and Union - Pointers and structures -File management in C - Defining and opening a file - Closing a file - The getw and putw functions - The fprintf & fscanf functions - fseek function – Files and Structures -Command line arguments

Lab:

Programs using Structures
Programs using Union
Program using Files
Program using Command line arguments

0–No relation 1–Low relation 2–Medium relation 3–Strong relation

COURSE CODE	XUM106	L	T	P	C
COURSE NAME	HUMAN ETHICS, VALUES, RIGHTS AND GENDER EQUALITY	3	0	0	0
PREREQUISITES	-	L	T	P	H
C:P:A	2.7:0:0.3	3	0	0	3

COURSE OUTCOMES		Domain	Level
CO1	***Relate*** and ***Interpret*** the human ethics and human relationships	Cognitive	Remember
CO2	***Explain*** and ***Apply*** gender issues, equality and violence against women	Cognitive	Understanding, Applying
CO3	***Classify*** and ***Develop*** the identify of human rights and their violations	Cognitive & Affective	Analyzing Receiving
CO4	***Classify*** and ***Dissect*** necessity of human rights and report on violations.	Cognitive	Understanding, Analyze
CO5	***List*** and **respond** to family values, universal brotherhood, fight against corruption by common man and good governance.	Cognitive & Affective	Remember, (Respond)

UNIT I	HUMAN ETHICS AND VALUES	7

Human Ethics and values - Understanding of oneself and others- motives and needs- Social service, Social Justice, Dignity and worth, Harmony in human relationship: Family and Society, Integrity and Competence, Caring and Sharing, Honesty and Courage, WHO's holistic development - Valuing Time, Co-operation, Commitment, Sympathy and Empathy, Self respect, Self-Confidence, character building and Personality.

UNIT II	GENDER EQUALITY	9

Gender Equality - Gender Vs Sex, Concepts, definition, Gender equity, equality, and empowerment. Status of Women in India Social, Economical, Education, Health, Employment, HDI, GDI, GEM. Contributions of Dr.B.R. Ambetkar, Thanthai Periyar and Phule to Women Empowerment.

UNIT III	WOMEN ISSUES AND CHALLENGES	9

Women Issues and Challenges- Female Infanticide, Female feticide, Violence against women, Domestic violence, Sexual Harassment, Trafficking, Access to education, Marriage. Remedial Measures – Acts related to women: Political Right, Property Rights, and Rights to Education, Medical Termination of Pregnancy Act, and Dowry Prohibition Act.

UNIT IV	HUMAN RIGHTS	9

Human Rights Movement in India – The preamble to the Constitution of India, Human Rights and Duties, Universal Declaration of Human Rights (UDHR), Civil, Political, Economical, Social and Cultural Rights, Rights against torture, Discrimination and forced Labor, Rights and protection of children and elderly. National Human Rights Commission and other statutory Commissions, Creation of Human Rights Literacy and Awareness. - Intellectual Property Rights (IPR). National Policy on occupational safety, occupational health and working environment.

UNIT V	GOOD GOVERNANCE AND ADDRESSING SOCIAL ISSUES	11

Good Governance - Democracy, People's Participation, Transparency in governance and audit, Corruption, Impact of corruption on society, whom to make corruption complaints, fight against corruption and related issues, Fairness in criminal justice administration, Government system of Redressal. Creation of People friendly environment and universal brotherhood.

				2	0	0	2
C	P	A		L	T	P	H
1.5	0	0.5		2	0	0	4

PREREQUISITE: Nil

COURSE OUTCOMES		DOMAIN	LEVEL
On the successful completion of this course students would be able to			
CO1	Ability to **identify** the features of a technical project report and Knowledge on the linguistic competence to write a technical report	Cognitive	Creating
CO2	Ability to ***integrate*** both technical COURSE skill and language skill to write a project.	Cognitive	Understand
CO3	Confidence to **present** a project in 10 to 15 minutes	Cognitive	Create
CO4	The learner ***identifies*** and absorbs the pronunciation of sounds in English Language and learns how to mark the stress in a word and in a sentence properly	Cognitive	Create
CO5	The program enables the speaker speaks clearly and fluently with confidence and it trains the learner to listen actively and critically.	Psychomotor	Perception

UNIT I	**12**
Basic principles of good technical writing, Style in technical writing, out lines and abstracts, language used in technical writing: technical words, jargons etc	
UNIT II	**12**
Special techniques used in technical writing: Definition, description of mechanism, Description of a process, Classifications, division and interpretation	
UNIT III	**12**
Report/ project layout the formats: chapters, conclusion, bibliography, annexure and glossary, Graphics aids etc - Presentation of the written project 10 – 15 minutes	
UNIT IV	**12**
Sounds of English Language; vowels, consonants, diphthongs , word stress, sentence stress, intonation patterns, connected speech etc. - Vocabulary building – grammar, synonyms and antonyms, word roots, one-word substitutes, prefixes and suffixes, idioms and phrases.	
UNIT V	**12**
Reading comprehension – reading for facts, meanings from context, scanning, skimming, inferring meaning, critical reading, active listening, listening for comprehension etc.

PREREQUISITE : Nil

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Describe*** the significance of natural resources and ***explain*** anthropogenic impacts.	Cognitive	Remember Understand
CO2	***Illustrate*** the significance of ecosystem, biodiversity and natural geo bio chemical cycles for maintaining ecological balance.	Cognitive	Understand
CO3	***Identify*** the facts, consequences, preventive measures of major pollutions and ***recognize*** the disaster phenomenon	Cognitive Affective	Remember Receiving
CO4	***Explain*** the socio-economic, policy dynamics and ***practice*** the control measures of global issues for sustainable development.	Cognitive	Understand Analyse
CO5	the impact of population and the concept of various welfare programs, and ***apply*** the modern technology towards environmental protection.	Cognitive	Understand Apply

UNIT I	**INTRODUCTION TO ENVIRONMENTAL STUDIES AND ENERGY**	**9**

Definition, scope and importance – Need for public awareness – Forest resources: Use and over-exploitation, deforestation, case studies. Timber extraction, mining, dams and their effects on forests and tribal people – Water resources: Use and over-utilization of surface and ground water, flood, drought, conflicts over water, dams-benefits and problems – Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies – Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies – Energy resources: Growing energy needs, renewable and non-renewable energy sources, use of alternate energy sources, case studies – Land resources: Land as a resource, land degradation, man induced landslides, soil erosion and desertification – Role of an individual in conservation of natural resources – Equitable use of resources for sustainable lifestyles.

UNIT II	**ECOSYSTEMS AND BIODIVERSITY**	**9**

Concept of an ecosystem – Structure and function of an ecosystem – Producers, consumers and decomposers – Energy flow in the ecosystem – Ecological succession – Food chains, food webs and ecological pyramids – Introduction, types, characteristic features, structure and function of the (a) Forest ecosystem (b) Grassland ecosystem (c) Desert ecosystem (d) Aquatic ecosystem (ponds, streams, lakes, rivers, oceans, estuaries) – Introduction to Biodiversity – Definition: genetic, species and ecosystem diversity - Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

UNIT III	ENVIRONMENTAL POLLUTION	9

Definition – Causes, effects and control measures of: (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear hazards – Solid waste management: Causes, effects and control measures of urban and industrial wastes – Role of an individual in prevention of pollution – Pollution case studies – Disaster management: flood, earthquake, cyclone and landslide.

UNIT IV	SOCIAL ISSUES AND THE ENVIRONMENT	9

Urban problems related to energy – Water conservation, rain water harvesting, watershed management – Resettlement and rehabilitation of people; its problems and concerns, climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust, Wasteland reclamation – Consumerism and waste products – Environment Protection Act – Air (Prevention and Control of Pollution) Act – Water (Prevention and control of Pollution) Act – Wildlife Protection Act – Forest Conservation Act – Issues involved in enforcement of environmental legislation – Public awareness.

UNIT V	HUMAN POPULATION AND THE ENVIRONMENT	9

Population growth, variation among nations – Population explosion – Family welfare programme – Environment and human health – Human rights – Value education - HIV / AIDS – Women and Child welfare programme– Role of Information Technology in Environment and human health – Case studies.

COURSE NAME	DISCRETE MATHEMATICS	3	1	0	4
PREREQUISTE	NIL	L	T	P	H
C:P:A	3:0:0	3	1	0	4

Course Outcome		Domain	Level
CO1	***Define*** the properties and laws of sets, relations and functions and ***Apply*** the operation of the sets using venn Diagram.	**Cognitive**	R,A_p
CO2	***Apply*** the concepts of logic and to find the normal forms. ***Explain*** the tautologies and Contradiction.	**Cognitive**	U,A_p
CO3	***Apply*** the counting principle permutation and combination and to ***solve*** the problem. ***Explain*** the pigeonhole principle.	**Cognitive**	U,A_p
CO4	***Explain*** the types of lattices and to ***show*** lattices as partially ordered sets.	**Cognitive**	U,A_p
CO5	***Apply*** **the** properties of semi groups and groups and ***Explain*** any set with binary operation as a semigroup and group with examples.	**Cognitive**	U,A_p

UNIT I **12**

Set notations – Basic definitions and set operations – Venn diagram – Algebraic laws of set theory – D Morgan's law. Relations: Properties of relations – Types of relations – Equivalence classes. Functions: Definition – Domain – Range and types of function- Classification of function.

UNIT II **12**

Statements - Normal forms – CNF – DNF – PCNF - PDN – Tautologies - Contradictions.

UNIT III **12**

Counting principles – The Pigeonhole principle – Counting – Permutations and Combinations – Combinatorial arguments – Countable and uncountable sets.

UNIT IV **12**

Lattices as partially ordered set – Types of lattices – Lattices as algebraic system.

UNIT V **12**

Binary operations – Semi groups - Groups – Examples and elementary properties.

Course Outcomes.		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** the operation of functional units of a computer	Cognitive Psychomotor	Knowledge
CO2	***Describe*** the computational operation of hardware units associated with a computing device.	Cognitive	Comprehension
CO3	***Demonstrate*** the operation of processing unit.	Cognitive Psychomotor	Application
CO4	***Compare*** the performance of different types of memory	Cognitive	Analyze
CO5	***Recognize*** the operation of interfacing devices.	Cognitive	Knowledge

UNIT I	BASIC STRUCTURE OF COMPUTERS	12

Functional Units - Bus Structures - Performance - Evolution - Machine Instructions and programs - Memory operations - Instruction and instruction sequencing - addressing modes - Basic I/O operations - stacks and queues - subroutines - Encoding of Machine instructions.

UNIT II	ARITHMETIC UNIT	12

Arithmetic - Design of fast adders - Binary Multiplication - Division - Floating point numbers and operations.

UNIT III	BASIC PROCESSING UNIT	12

Processing unit - Fundamental concepts - Execution of a complete instruction - Multiple bus organization - Hardwired control – Micro programmed control - pipelining - Basic concepts - Hazards - Inference on instruction sets. Data path and control considerations - Performance issues.

UNIT IV	MEMORY SYSTEM	12

RAM and ROM - Cache memories - Performance considerations - Virtual memories – secondary storage devices - Associative memories.

UNIT V	INPUT / OUTPUT ORGANIZATION	12

Accessing I/O devices - Interrupts - DMA - Buses - Interface circuits - standard I/O Interfaces. Case study of one RISC and one CISC processor.

CO5	***Analyze*** the techniques used in the various stages of Software Engineering.	Cognitive	Analyze

UNIT I	INTRODUCTION AND PLANNING A SOFTWARE PROJECT	12

Introduction - Definitions – Size Factors – Quality and Productivity factors – Managerial Issues.
Planning a Software Project – Defining the Problem – Developing a Solution Strategy – Planning the Development Process – Planning an Organizational Structure – Other Planning Activities.

UNIT II	COST ESTIMATION AND REQUIREMENTS SPECIFICATION	12

Software Cost Estimation – Cost Factors – Cost Estimation Techniques – Staffing – Level Estimation – Estimating Software Maintenance Costs.
Software Requirements Definition – Software Requirement Specification – Formal Specification Techniques – Language and Processors for Requirements.

UNIT III	SOFTWARE DESIGN	12

Software Design – Fundamental Design Concepts – Modules and Modularization Criteria – Design Notations – Design Techniques – Detailed Design Considerations – Real Time and Distributed System design – Test Plans – Milestones, Walkthroughs and Inspections – Design Guidelines.

UNIT IV	IMPLEMENTATION	12

Implementation Issues – Structured Coding Techniques – Coding Style – Standard and Guidelines – Documentation guidelines – Data Abstraction – Exception Handling – Concurrency Mechanisms.

UNIT V	TESTING AND MAINTENANCE	12

Verification and Validation Techniques – Quality Assurance – Walkthroughs and Inspections – Static Analysis – Symbolic Execution – Unit Testing and Debugging – System Testing – Formal Verification.
Software Maintenance – Enhancing Maintainability during Development – Managerial aspects – Configuration Management – Source Code Metrics – Other Maintenance Tools and Techniques.

YSE301			MULTIMEDIA SYSTEMS	L	T	P	C
				2	0	1	3
C	P	A		L	T	P	H
2	1	0		2	0	2	4

PREREQUISITE: YSE103

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Identify*** and ***describe*** the Multimedia components, various html tags, Image editing open source software tools	Cognitive	Understand
CO2	***Create*** webpage with necessary image document (text) and animation and practice in HTML.	Cognitive Psychomotor	Understand Application Set
CO3	Gain a working knowledge and ***develop*** their skills in editing and altering photographs.	Cognitive	Understand Application
CO4	Students can ***renovate*** the damaged photos. And export the files with various formats and printing devices.	Cognitive Psychomotor	Understand Analyze Set
CO5	Students can ***draw*** and ***develop*** short clips and banners with animation using flash and create Audio files. Using html image editing and 2D animation software, can ***develop*** and ***deploy*** a complete web site in internet.	Cognitive Psychomotor	Understand Create Set

UNIT I	**MULTIMEDIA SYSTEMS DESIGN**	**6+6**

Introduction – Multimedia applications and its impact – Multimedia System Architecture – Network architecture for multimedia. Evolving technologies for Multimedia–HDTV-UDTV-3D technologies and digital signal processing. Defining objects for Multimedia systems-Text-image – Audio and Video, Audio-recording

Lab Experiments Using Image Editing Tools

UNIT II	**IMAGE EDITING –BASICS**	**6+6**

Introduction about Image Editor- Navigating - Menus and panels- **Working with Images**- Zooming &Panning an Image-Working with Multiple Images, Rulers, Guides & Grids- Undoing Steps with History- Adjusting Color with the New Adjustments Panel-The New Masks Panel - The New Note Tool & the Save for Web & Devices Interface- The New Auto-Blend & Auto-Align Layers Commands- The New 3D Commands- **Resizing & Cropping Images**- Understanding Pixels & Resolution-The Image Size Command-Interpolation Options-Resizing for Print & Web-Cropping & Straightening an Image- Adjusting Canvas Size & Canvas Rotation.

Lab Experiments Using Image Editing Tools e

UNIT III	**HTML**	**6+6**

Introduction-webpage-Website- HTML Structure –-Basic Tags: – Heading-Paragraphs-Line Breaks –**HTML Elements**: - Introduction to elements of HTML -Working with Text - Working with Lists, Tables and Frames - Working with Hyperlinks, Images and Multimedia

Lab Experiments Using HTML

UNIT IV	**IMAGE AND TEXT EDITING- LAYERS AND EFFECTS**	**6+6**

Layers -Background Layer- Creating, Selecting, Linking & Deleting Layers- Locking &Merging

Layers-Copying Layers, Using Perspective & Layer Styles- Filling & Grouping Layers-Introduction to Blending Modes-Blending Modes, Opacity & Fill Creating & Modifying Text-**Photo Retouching** -The Red Eye Tool-The Clone Stamp Tool- The Patch Tool & the Healing Brush Tool-**Color Correction**:-Adjusting Levels-Adjust Curves-**Creating Special Effects**-Getting Started with Filters-Creating Text Effects- Applying Gradients to Text-**Exporting-** Saving with Different File Formats-Saving for Web & Devices-Printing Options

Lab Experiments Using Image Editing Tools

UNIT V	**2D ANIMATION**	**6+6**

Exploring the 2D environment – working with images - basic drawing and selection – shapes – color – text – layers – scene and frame label – symbol and instance – animation

Lab Experiments Using 2D Animation Tools

Course Code	YSE 302	L	T	P	C
Course Name	Operating Systems	3	1	0	4
Prerequisite	YSE103	L	T	P	H
C:P:A	3:0:0	3	1	0	4

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Identifying*** the functional architecture of an operating system.	Cognitive	Remember
CO2	Ability to explain the best CPU scheduling algorithms and Calculate scheduling problems	Cognitive	Understand Apply
CO3	Ability to ***express various*** memory management techniques and calculate paging problems.	Cognitive	Understand Apply
CO4	Indicate the importance of file system various Operating Systems.	Cognitive	Understand
CO5	***Classify*** functionality I/O system of an operating system	Cognitive	Understand

UNIT I	**OVERVIEW OF AN OPERATING SYSTEM**	**9+3**

Introduction to operating systems – review of computer organization – operating system structures – system calls – system programs – system structure – virtual machines. Processes: Process concept – Process scheduling – Operations on processes –Cooperating processes – Interposes communication – communication in client-server systems.

UNIT II	**PROCESS SCHEDULING AND SYNCHRONIZATION**	**9+3**

CPU Scheduling: Scheduling criteria – Scheduling algorithms – Multiple-processor scheduling – Real time scheduling –. Process Synchronization: The critical-section problem –Synchronization hardware – Semaphores – Classic problems of synchronization –critical regions –Deadlock: System model – Deadlock characterization –Methods for handling deadlocks – Deadlock prevention – Deadlock avoidance –Deadlock detection – Recovery from deadlock.

UNIT III	**STORAGE MANAGEMENT**	**9+3**

Memory Management: Background – Swapping – Contiguous memory allocation – Paging – Segmentation – Segmentation with paging. Virtual Memory: Background –Demand paging – Process creation – Page replacement – Allocation of frames –Thrashing..

UNIT IV	**FILE SYSTEMS**	**9+3**

File-System Interface: File concept – Access methods – Directory structure – File system mounting – Protection. File-System Implementation: Directory implementation – Allocation methods – Free-space management – efficiency and performance – recovery – log-structured file systems.

UNIT V	**I/O SYSTEMS**	**9+3**

I/O Systems – I/O Hardware – Application I/O interface – kernel I/O subsystem –streams – performance. Mass-Storage Structure: Disk scheduling – Disk management –Swap-space management – RAID – disk attachment – stable storage – tertiary storage.

COURSE OUTCOMES		DOMAIN	LEVEL
After the completion of the course, students will be able to			
CO1	***Recognize*** the importance of the Object Oriented Programming.	Cognitive Psychomotor	Remember Perception
CO2	***Identify*** and ***Achieve*** the Java Programming concepts and the relationships among them.	Cognitive Psychomotor	Understand Set
CO3	***Illustrate*** and ***practice*** the usage of Arrays, Interface and Packages and also ***Be Aware*** of the utilization of the concepts in the real time application.	Cognitive Psychomotor Affective	Apply Guided Response Receive
CO4	***Demonstrate*** the concept of Multithreaded Programming and Exception Handling and ***Contribute*** more in the team work towards application development.	Cognitive Psychomotor Affective	Apply Mechanism Respond
CO5	***Develop*** and ***Maintain*** the Java application software.	Cognitive Psychomotor	Create Complete Overt Response

UNIT I	**INTRODUCTION**	**9+12**

Fundamentals of Object Oriented Programming – Java Evolution – Overview of Java Language – Constants, Variables and Data Types – Operators and Expressions – Decision Making and Branching – Decision Making and Looping

Lab

1. Simple Java Programs
2. Decision Making, Branching and Looping

UNIT II	**CLASSES, OBJECTS AND METHODS**	**9+12**

Introduction – Defining a Class – Adding Variables – Adding Methods – Creating Objects – Accessing Class Members – Constructors – Method Overloading – Static Members – Nesting of Methods – Inheritance – Overriding Methods – Final Variables and Methods – Final Classes – Finalizer Methods – Abstract Methods and Classes – Visibility Control

Lab

3. Constructors and Method Overloading
4. Inheritance and Method Overriding

UNIT III	**ARRAYS, INTERFACE AND PACKAGES**	**9+12**

Arrays - One-Dimensional Array – Creating an array – Two-Dimensional Array – Strings – Vectors – Wrapper Classes – Interfaces: Multiple Inheritance – Packages

Lab

1. Arrays and Strings
2. Interfaces and Packages

UNIT IV	**MULTITHREADED PROGRAMMING**	**9+12**

Creating Threads – Extending the Thread Class – Stopping and Blocking a Thread – Life Cycle of a Thread – Using Thread Methods – Thread Exceptions – Thread Priority – Synchronization – Implementing the 'Runnable' Interface – Managing Errors and Exceptions – Types of Errors – Exceptions – Multiple Catch Statements – Using Finally Statement – Throwing our own Exceptions

Lab

3. Multi Threading
4. Exception Handling

UNIT V	APPLET PROGRAMMING	9+12

Introduction – Applet Life Cycle – Creating an Executable Applet – Designing a Web Page – Applet Tag – Adding Applet to HTML File – Running the Applet – Passing Parameters to Applets – Getting Input from the User - Abstract Windowing Toolkit

Lab

9. Applet Programming
10. Event Handling

COURSE NAME	SOFTWARE DESIGN AND ARCHITECTURE	3	1	0	4
PREREQUISITE	YSE206	L	T	P	H
C:P:A	3:0:0	3	1	0	4

COURSE OUTCOMES		DOMAIN	LEVEL
After the completion of the course, students will be able to			
CO1	***Describe*** the aids of software Design in different stages of the software lifecycle	Cognitive	Understand
CO2	***Apply*** Unified modelling language to document software Design.	Cognitive	Apply
CO3	***Analyze, Apply and Evaluate*** design patterns to enhance the software quality.	Cognitive	Analyze, Apply, Evaluate
CO4	***Design*** and ***understand*** software architecture for large scale software systems.	Cognitive	Design Understand
CO5	***Recognize*** major software architectural styles, and design patterns.	Cognitive	Remember

UNIT I - INTRODUCTION TO DESIGN PRINCIPLES	**12**
Introduction – Nature of Design process – The role of design activity - Software Design Process building models – Transferring design knowledge – Design in the software development process – A context for design – Linear development processes – Incremental development processes – Design qualities – the quality concept – Assessing quality concept.	
UNIT II - OO DESIGN	**12**
Object model – Classes and objects – Object oriented analysis – Key abstractions and mechanisms – Object oriented design – Identifying design elements - Design and Information flow – design process considerations – transform flow – transaction flow – transform analysis – transaction analysis.	
UNIT III - DESIGN PATTERN	**12**
Introduction to Design patters - Design context – Reusable solutions – Documenting reusable solutions– The Observer pattern – the Decorator pattern – the factory pattern – the singleton pattern – the command pattern – The adaptor and façade pattern – The template method pattern – other patterns	
UNIT IV - SOFTWARE ARCHITECTURE	**12**
Introduction – Software Architecture – Why Software architecture is important? – Quality Attributes: Understanding quality attributes – availability – interoperability – Modifiability – Performance – Security – Testability – Usability – other quality attributes – Architectural patterns – designing an architecture – Architecture in cloud – Architecture in edge.	
UNIT V - SOFTWARE ARCHITECTURE STYLES	**12**
Introduction – Data flow styles – Call-return styles – Shared Information styles – Event styles – Case studies for each style

2.75	0	0.25		3	0	0	3

PREREQUISTE: XES202

Course Outcomes		Domain	Level
CO1	***Understand*** and ***Recognize*** the concepts of disaster	Cognitive	Understand Remember
CO2	***Recognize and describe*** the causes and effects of disaster	Cognitive	Understand Remember
CO3	***Describe*** the various approaches of risk reduction	Cognitive	Remember
CO4	***Demonstrate*** the inter-relationship between disaster and development	Cognitive	Understand
CO5	Discuss hazard and vulnerability profile of India and respond to drills related to relief	Cognitive Affective	Remember Response

UNIT - I	**INTRODUCTION TO DISASTERS**	**6**

Concepts and definitions- Disaster, Hazard, Vulnerability, Resilience, Risks

UNIT - II	**DISASTERS: CLASSIFICATION, CAUSES, IMPACTS**	**12**

Differential impacts- in terms of caste, class, gender, age, location, disability Global trends in disasters, urban disasters, pandemics, complex emergencies, Climate change

UNIT - III	**APPROACHES TO DISASTER RISK REDUCTION**	**10**

Disaster cycle - its analysis, Phases, Culture of safety, prevention, mitigation and preparedness community based DRR, Structural- nonstructural measures, roles and responsibilities of- community, Panchayati Raj Institutions/Urban Local Bodies (PRIs/ULBs), states, Centre, and other stake-holders.

UNIT - IV	**INTER-RELATIONSHIP BETWEEN DISASTERS AND DEVELOPMENT**	**6**

Factors affecting Vulnerabilities, differential impacts, impact of Development projects such as dams, embankments, changes in Land-use etc. Climate Change Adaptation. Relevance of indigenous knowledge, appropriate technology and local resources

UNIT - V	**DISASTER RISK MANAGEMENT IN INDIA**	**11**

Hazard and Vulnerability profile of India Components of Disaster Relief: Water, Food, Sanitation, Shelter, Health, Waste Management Institutional arrangements (Mitigation, Response and Preparedness, DM Act and Policy, Other related policies, plans, programmes and legislation).

The project / fieldwork to understand vulnerabilities work on reduction of disaster risk and build a cultural safety.

PREREQUISITE: YSE206

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** and ***Express*** the importance of project evaluation and planning.	Cognitive	Remember Understand
CO2	***Describe*** and ***Select*** the appropriate project approach and effort estimation techniques.	Cognitive	Remember Understand
CO3	***Define*** and ***Defend*** the project activity planning and risk management.	Cognitive	Remember Understand
CO4	***Describe*** and ***Classify*** the project monitoring, control and managing contracts.	Cognitive	Remember Understand
CO5	***Define*** and ***Defend*** the managing people in software environments.	Cognitive	Remember Understand

UNIT I	**PROJECT EVALUATION AND PROJECT PLANNING**	**6+3**

Importance of Software Project Management – Activities Methodologies – Categorization of Software Projects – Setting objectives – Management Principles – Management Control – Project portfolio Management – Cost-benefit evaluation technology – Risk evaluation – Strategic programmme Management – Stepwise Project Planning.

UNIT II	**PROJECT LIFE CYCLE AND EFFORT ESTIMATION**	**6+3**

Software processes and Process Models – Choice of Process models – Incremental delivery– Rapid Application development – Agile methods – Extreme Programming – Scrum Model – Managing interactive processes – Basics of Software estimation – Software effort estimation techniques – COSMIC Full function points – COCOMO II: A Parametric Productivity Model – Staffing Pattern.

UNIT III	**ACTIVITY PLANNING AND RISK MANAGEMENT**	**6+3**

Objectives of Activity planning – Project schedules – Activities – Sequencing and scheduling – Network Planning models – Forward Pass & Backward Pass techniques – Critical path (CRM) method – Risk identification – Assessment – Management – PERT technique – Monte Carlo simulation – Resource Allocation – Creation of critical patterns – Cost schedules.

UNIT IV	**PROJECT MONITORING AND CONTROL**	**6+3**

Creation of Framework – Collection of data – Project termination – Visualizing progress – Cost monitoring – Earned Value Analysis – Change control- Software Configuration Management – Managing contracts – Contract Management.

UNIT V	**STAFFING IN SOFTWARE PROJECTS**	**6+3**

Managing people – Organizational behavior – Best methods of staff selection – Motivation – The Oldham-Hackman job characteristic model – Ethical and Programmed concerns – Working in teams – Decision making – Team structures – Virtual teams – Communications genres – Communication plans.

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** and ***Express*** the fundamentals of Data Base Management System and Relational database system	Cognitive	Remember Understand
CO2	***Recognize*** and ***Explain*** the Transaction Management and Storage implementation techniques	Cognitive	Remember Understand
CO3	***Sketch and show*** the Relational data base design for the real time application.	Cognitive Psychomotor	Apply Set
CO4	***Analyze and Apply*** proper Relational data base queries	Cognitive	Analyze Apply
CO5	***Design and Construct*** an application with suitable form design and data base	Psychomotor	Origination

UNIT I	INTRODUCTION	9+6

Data base system Applications - Purpose of Database System – Views of data – Data base languages- Relational Databases – Data base Design - Data Storage and querying – Database System Architecture – Data mining and Information retrieval - Data base users and administrators - History of Data base system

Lab : Working with DDL, DML ,DCL

UNIT II	RELATIONAL DATABASES	9+6

Structure of Relational Databases – Database schema –keys – schema diagram – Relational operations – Relational Algebra – Introduction to SQL – Overview of the SQL Query Languages – SQL data definition - Basic structure of SQL queries – Additional Basic operations – Set Operations –Null Values –Nested sub queries

Lab : Working with Database Queries, Trigger , View

UNIT III	DATABASE DESIGN	9+6

Data base design and the ER model - Overview of the design process - Entity– Relationship model – Constraints - Entity Relationship diagrams – Entity Relationship design issues – Extended ER features - Relational database design – Features of good relational designs –Atomic domains and First Normal form - Decomposition using functional dependencies

Lab : Working with PL/SQL Basics , Procedures and Functions

UNIT IV	TRANSACTION MANAGEMENT	9+6

Transaction Concepts – A simple Transaction model – Storage structure – Transaction atomicity and durability – Transaction Isolation - Serializability - Concurrency control – Lock based protocol – timestamp based protocol - Transaction Recovery – Failure classification – storage – Recovery and Atomicity

Lab : Working with Transaction control

UNIT V	IMPLEMENTATION TECHNIQUES	9+6

Storage and file structure - Overview of physical storage media – Magnetic disk and flash storage – RAID – File organization – Organization of records in files - Data dictionary storage - Indexing and hashing – Basic concepts – ordered indices – B+ Tree index files - Distributed data base - Distributed data storage - Distributed transactions

Lab : Working with Form Design

COURSE NAME	COMPUTER NETWORKS	3	1	0	4
PREREQUISITES	YSE202	L	T	P	H
C:P:A	2.8 : 0.2 :0	3	1	0	4

COURSE OUTCOMES		DOMAIN	LEVEL
CO1	***Recognize*** the importance of computer networks and ***explain*** the network models, media, layering.	Cognitive Psychomotor	Remember Guided
CO2	***Describe*** the functionalities of layer and ***indicate*** the various network connecting devices.	Cognitive	Understand
CO3	***Demonstrate*** the unicast and multicast routing.	Cognitive Psychomotor	Understand Response
CO4	***Match*** and ***Show*** the protocol for real time applications.	Cognitive Psychomotor	Remember Set
CO5	***Analyze*** the protocols of application layer and ***Design*** a simple networks.	Cognitive Psychomotor	Analyze Origination

UNIT I	NETWORK FUNDAMENTALS AND PHYSICAL LAYER	9+3

Introduction – Data Communications – Networks – Network Types – Internet History – Standards and Administration - Network Models – Protocol Layering – TCP/IP Protocol Suite – The OSI Model – Transmission Media – Switching

UNIT II	DATA LINK LAYER	9+3

Introduction to Data Link Layer – Link Layer Addressing - Error Detection and Error Correction - Data Link Control - MAC – Wired LANs: Ethernet - Wireless LANs – Other Wireless Networks - Connecting Devices and Virtual LANs

UNIT III	NETWORK LAYER	9+3

Introduction to Network Layer – Network Layer Protocols – Unicast Routing – Multicast Routing

UNIT IV	TRANSPORT LAYER	9+3

Introduction to Transport Layer – Transport Layer Protocols – User Datagram Protocol – Transmission Control Protocol – SCTP

UNIT V	APPLICATION LAYER AND SECURITY	9+3

Introduction to Application Layer – Standard Client Server Protocols – Multimedia – WWW and HTTP – FTP – Electronic Mail – TELNET - DNS

LECTURE	TUTORIAL	PRACTICAL	TOTAL HOURS
45	15	-	60

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** the basics of .net frame work	Cognitive Psychomotor	Remember Perception
CO2	***Express*** and ***relate*** decision and iteration control structures to implement programs	Cognitive Psychomotor	Understand Perception
CO3	***Predict*** and ***Create*** database connection and ***manipulate*** the data source	Cognitive Psychomotor	Understand Create Guided Response
CO4	***Choose*** and ***Apply*** controls and ***reproduce*** well-structured .NET applications	Cognitive Psychomotor	Remember Apply Guided Response
CO5	***Construct*** and ***demonstrate*** various real-world applications in ASP.NET with C#	Cognitive Psychomotor Affective	Create Mechanism Valuing

UNIT I	**INTRODUCTION TO .NET FRAMEWORK**	**7+6**

Managed Code and the CLR- Intermediate Language, Metadata and JIT Compilation - Automatic Memory Management.- Visual Studio .NET - Using the .NET Framework.- The Framework Class Library - .NET objects - ASP .NET - .NET web services – Windows Forms

Lab: 1. Familiarizing with .NET Environment

UNIT II	**INTRODUCTION TO C#.NET**	**11+6**

Variables and constants – data types – declaration. Operators – types – precedence. Expressions. Program flow – Decision statements – Loop statements – Value data types – Structures, Enumerations. Reference data types- Single dimensional – Multi-dimensional arrays – jagged arrays – dynamic arrays Windows programming – creating windows Forms – windows controls –Events. Menus and Dialog Boxes – Creating menus – menu items – context menu – Using dialog boxes – showDialog() method.

Lab: 1. Work with Console
2. Looping and Conditional Statements
3. Working with various Controls such as timer, calendar, etc.,
4. Create basic text editor

UNIT III	**APPLICATION DEVELOPMENT USING ADO .NET**	**9+6**

Architecture of ADO.NET – ADO.NET providers – Connection – Command – Data Adapter – Dataset. Accessing Data with ADO.NET - Connecting to Data Source, Accessing Data with Data set and Data Reader - Create an ADO.NET application - Using Stored Procedures.

Lab: 1. Insert, Delete, Update and Modify Operations
2. Store and retrieve data using Data Grids

UNIT IV	**INTRODUCTION TO ASP.NET**	**9+6**

ASP.NET Features**:** Change the Home Directory in IIS - Add a Virtual Directory in IIS Set a Default Document for IIS - Change Log File Properties for IIS - Stop, Start, or Pause a Web Site. Web Controls - HTML Controls, Using Intrinsic Controls, Using Input Validation Controls, Selecting Controls for Applications - Adding web controls to a Page. Server Controls - Types of Server Controls - Adding ASP.NET Code to a Page.

Lab: 1. Working with various Controls
2. Using stored Procedures
3. Form Creation with HTML

UNIT V	**APPLICATIONS OF ASP.NET WITH C#**	**9+6**

Windows Application: Creation of Media Player. Web Applications: Job Portal, E-mail and SMS Server, Online food ordering System.

Lab:

Real Time Projects

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Identify*** the factors that lead to the development and implementation of ERP systems	Cognitive	Remember
CO2	***Discuss*** the advantages and disadvantages of implementing an ERP system	Cognitive	Understand
CO3	***Describe*** how an integrated information system can support effective and efficient business processes	Cognitive	Understand
CO4	***Create*** process models that assist with process improvement and ERP implementation	Cognitive	Create
CO5	Study, ***analyze*** and ***Report*** future trends of ERP	Cognitive	Analyze

UNIT I	ERP AND TECHNOLOGY	9

Introduction – Related Technologies – Business Intelligence – E-Commerce and E-Business – Business Process Reengineering – Data Warehousing – Data Mining – OLAP – Product life Cycle management – SCM – CRM

UNIT II	ERP IMPLEMENTATION	9

Implementation Challenges – Strategies – Life Cycle – Pre-implementation Tasks – Requirements Definition – Methodologies – Package selection – Project Teams – Process Definitions – Vendors and Consultants – Data Migration – Project management – Post Implementation Activities.

UNIT III	ERP IN ACTION AND BUSINESS MODULES	9

Operation and Maintenance – Performance – Maximizing the ERP System – Business Modules – Finance – Manufacturing – Human Resources – Plant maintenance – Materials Management – Quality management – Marketing – Sales, Distribution and service.

UNIT IV	ERP MARKET	9

Marketplace – Dynamics – SAP AG – Oracle – PeopleSoft – JD Edwards – QAD Inc – SSA Global – Lawson Software – Epicor – Intuitive.

UNIT V	FUTURE TRENDS	9

Enterprise Application Integration – ERP and E-Business – ERP II – Total quality management – Future Directions – Trends in ERP.

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** and ***Discuss*** the scope of e-commerce	Cognitive	Remember Understand
CO2	***Sketch*** *and* ***Develop*** various Business strategies	Cognitive	Apply Analyze
CO3	***Survey*** and ***Identify*** the importance and future of e market and EDI	Cognitive	Analyze
CO4	***Justify*** *and* ***Explain*** the usage of Internet in e- commerce and various types of e-commerce	Cognitive	Evaluate Valuing
CO5	***Practice*** and ***Perform*** Various on line transactions	Affective	Responding to a phenomena

UNIT I	INTRODUCTION TO E-COMMERCE	9

Introduction - the scope of e-commerce – definition - electronic markets -electronic data interchange – internet commerce – the value chain – supply chain

UNIT II	BUSINESS STRATEGY IN AN ELECTRONIC AGE	9

Business Strategy – introduction to business strategy – strategic implications of IT – Technology – Business environment – business capability – existing business strategy – strategy formulation and implementation planning

UNIT III	BUSINESS TO BUSINESS ELECTRONIC COMMERCE	9

Electronic markets – Markets – usage of electronic markets – advantages and disadvantages – future of electronic markets – electronic data interchange – introduction – EDI definition – the benefits of EDI – EDI technology – EDI standards – EDI communications

UNIT IV	BUSINESS TO CONSUMER ELECTRONIC COMMERCE	9

Consumer trade transaction – the e-shop – advantages and disadvantages of consumer e-commerce – the internet – the development of internet – TCP/IP – internet components – uses of internet

UNIT V	ELEMENTS OF E-COMMERCE AND E-BUSINESS	9

Elements – e-Visibility – the e-shop – online payments – delivering the goods – after sales service – internet e-commerce security – e-business – internet bookshops – grocery supplies – software supplies and support – electronic news paper – internet banking

				3	0	0	3
C	P	A		L	T	P	H
3	0	0		3	0	0	3

PREREQUISITE: Nil

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Understand*** image formation and the role human visual system plays in perception of gray and color image data.	Cognitive	Understand
CO2	***Use*** of various applications of image processing in industry, medicine, and defense.	Cognitive	Apply
CO3	***Relate*** the signal processing algorithms and techniques in image enhancement and image restoration.	Cognitive	Remember
CO4	***Acquire*** an appreciation for the image processing issues and techniques and be able to apply these techniques to real world problems.	Cognitive	Apply
CO5	***Study*** independent study and analysis of image processing problems and techniques.	Cognitive	Remember

UNIT I	INTRODUCTION TO IMAGE PROCESSING SYSTEM	9

Introduction to image processing system-image sampling-quantization-resolution-human visual system-classification of digital images-image types-elements of an image processing system-image fil formats-application of digital image processing. Image transforms-Need for transform-image transforms-Fourier transform-DCT-DFT.

UNIT II	IMAGE ENHANCEMENT	9

Introduction-image enhancement in spatial domain-enhancement through point operation-types of point operation-histogram manipulation-linear gray-level transformation-nonlinear gray level transformation-local or neighborhood operation-median filter-spatial domain high-pass filtering or image sharpening-bit-plane slicing-image enhancement in the frequency domain-homomorphic filter-zooming operation.

UNIT III	IMAGE RESTORATION AND DENOISING	9

Introduction-image degradation-types of image blur-classification of image-restoration techniques-image-restoration model-linear image restoration techniques-Non- linear image restoration techniques-image denoising-classification of noise in image-Median filtering-Trimmed average filter-performance metrics in image restoration-applications of digital image restoration.

UNIT IV	IMAGE SEGMENTATION	9

Introduction-classification of image –segmentation techniques-region approach to image segmentation-clustering techniques-image segmentation based on thresholding-edge based segmentation-classification of edges-edge detection-edge linking-hough transform-active contour-Watershed transformation-shape representation-classification of shape representation techniques.

UNIT V	OBJECT RECOGNITION	9

Introduction-need for an object recognition system-automated object recognition system-patterns and pattern class-selection of measurement parameters-relationship between image processing and object recognition-approaches to object recognition –template matching based object recognition-structural pattern recognition-applications of object recognition. Case study implementation of Matlab in image processing.

C	P	A		L	T	P	H
3	1	0		3	1	2	6

PREREQUISITE : YSE303

After the completion of the course, students will be able to

CO1	***Recognize*** the difference between various objects and their relationships	Cognitive	Remember
CO2	***Express*** and ***Choose*** appropriate notation associated with each model	Cognitive Psychomotor	Understand Choose
CO3	***Design*** and ***Explain*** CASE TOOLS for the construction of UML Models	Cognitive Psychomotor	Analyze Set
CO4	***Construct*** various UML Models	Cognitive	Create
CO5	***Show*** the importance of System Analysis and Design in solving complex problems	Cognitive	Apply

UNIT I	**OBJECT MODELLING**	**9+3+6**

Object Oriented Philosophy – Object – Object State, behaviors and methods. Encapsulation and information hiding - Class Relationship among classes -polymorphism, aggregation and object containment, Meta classes.

Lab:

Problem Analysis and Project Planning Thorough study of the problem – Identify project scope, Objectives, infrastructure.

UNIT II	**OBJECT ORIENTED METHODOLOGIES**	**9+3+6**

Booch methodology- OMT- Coad/Yourdon approach- Shalear/ Mellor's approach- OOSE- Comparative study.

Lab:

Software Requirement Analysis Describe the individual Phases/ modules of the project, Identify deliverables.

UNIT III	**UML AND USE CASE MODELLING**	**9+3+6**

UML: an Introduction- Views and Diagrams- extended UML - Modeling requirements using use case diagrams – Components of use case model- Components of a use case diagram- steps in processing requirements specifications to construct use case diagram- Use case identification and description.

Lab:

Data Modelling Use work products – data dictionary, use case diagrams and activity diagrams, build and test class diagrams, sequence diagrams and add interface to class diagrams.

UNIT IV	**WORKFLOW AND BEHAVIORAL MODELING**	**9+3+6**

Modeling workflows using Activity diagrams: Components of activity diagrams- Steps in construction – Examples - Modeling behavior with state diagrams: Notations- Nesting of states- steps in construction – Examples. UML Interaction diagrams: Interaction diagrams – Components- steps in construction- examples. Collaboration diagrams- Timing diagrams- Interaction overview diagrams.

Lab:

Software Development and Debugging.

UNIT V	**STRUCTURAL MODELING**	**9+3+6**

Class diagrams- Object diagrams- Component diagrams- Deployment diagrams- Package diagrams- Composite structure diagrams. **CASE STUDIES:** Patterns and frameworks- Modeling ATM.

Lab:

Software Testing Prepare test plan, perform validation testing, coverage analysis, memory leaks, develop test case hierarchy, Site check and site monitor.

Lecture: 45	**Tutorial:15**	**Practical:30**	**Total:90**

COURSE OUTCOMES		DOMAIN	LEVEL
After the completion of the course, students will be able to			
CO1	***Recognize*** the significance of Web Technology.	Cognitive Psychomotor	Remember Perception
CO2	***Express*** the knowledge on HTML, CSS and JavaScript and PHP in Web Design.	Cognitive	Understand
CO3	***Employ*** the understanding of the Client and Server side scripts and actively ***participate*** in teams for the creation of static and dynamic web pages.	Cognitive Affective	Apply Respond
CO4	***Utilize*** the web designing tools effectively in the real world applications.	Cognitive	Apply
CO5	***Design*** and ***Establish*** the Website or Web based Software.	Cognitive Psychomotor	Create Set

UNIT I	INTRODUCTION TO WEB TECHNOLOGY & HTML	9+3+6

Introduction to Web Technology – Concept of Tier – Web Pages – Static Web Pages – Dynamic Web Pages – HTML Basics – HTML CSS – Links – Images – Tables – Lists - Frames - HTML forms and Input tags

Lab:1. Formatting tags, ordered list and unordered list.
2.Tables, frame, image map and hyperlink.

UNIT II	CSS & JAVASCRIPT	9+3+6

CSS Basics – Texts and Fonts – Links, Lists and Tables – Border and Outline – Position – Dimension and Display - Java Script Basics – Functions – Events – Conditional and Looping Statements – Forms

Lab:1.Font, color and style
2. Background and Links
3.Form Validation
4.Looping and Conditional Statements

UNIT III	PHP BASIC CONCEPTS	9+3+6

PHP - Basic Syntax – Data Types – Variables & Constants in PHP - String and Operators - Selective and Iterative flow of controls - PHP arrays & types - PHP function declaration - adding parameters - Server side includes - Built in functions

Lab:1. Strings and Operators
2.Flow of controls and Arrays
3.PHP Forms
4.PHP Functions

UNIT IV	PHP ADVANCED CONCEPTS	9+3+6

PHP File Handling - Opening a File - Closing a File - Check End-Of-File - Reading a File Line By Line - Reading File Character By Character - PHP File Upload - Exception Handling - Creating Custom Exception Class - Re-Throwing Exceptions - Cookies - Sessions - E-Mails

Lab:1.File Handling
2.Exception Handling
3. PHP Sessions and Cookies

UNIT V	PHP & MySQL	9+3+6

MySQL Database – Connect – Create DB – Create Table – Insert Data – Get Last ID – Insert Multiple - Select Data – Delete Data – Update Data – Limit Data

Lab:PHP with MySQL

After the completion of the course, students will be able to

CO1	***Recognize*** the foundations of Internet Protocol.	Cognitive	Remember
CO2	***Demonstrate*** the idea of bootstrap and auto configuration.	Cognitive	Understand
CO3	***Analyze*** the functions of file transfer protocol.	Cognitive	Analyze
CO4	***Manipulate*** the issues involved in design of voice and video over IP.	Psychomotor	Guided Response
CO5	***Control*** and ***maintain*** the internet security and firewall design.	Psychomotor	Complete overt response

UNIT I	**INTRODUCTION**	**9**

Internet Protocol : Routing IP Datagrams – Error and Control Messages (ICMP), Reliable Stream Transport Service (TCP) : TCP State Machine, Response to congestion – congestion, Tail Drop and TCP – Random Early Discard, Routing : Exterior Gateway Protocols and Autonomous Systems (BGP)

UNIT II	**INTERNET MULTICASTING**	**9**

Internet Multicasting – Mobile IP – Bootstrap And Auto configuration (BOOTP, DHCP).

UNIT III	**FILE TRANSFER SYSTEM**	**9**

The Domain Name System (DNS) – Applications : Remote Login (TELNET, Rlogin) – File Transfer and Access (FTP, TFTP, NFS).

UNIT IV	**APPLICATIONS**	**9**

Applications: Electronic Mail (SMTP, POP, IMAP, MIME) – World Wide Web (HTTP) – Voice and Video over IP (RTP).

UNIT V	**SECURITY**	**9**

Applications : Internet Management (SNMP) – Internet Security and Firewall Design (Ipsec) – The Future of TCP / IP (IPV6).

3	0	0		3	0	0	3

PREREQUISITE: YSE403

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** the basics of UNIX operating system	Cognitive	Remember
CO2	***Discuss*** various methods to handle signals and exceptions within a process and to control processes	Cognitive	Understand
CO3	***Describe*** how UNIX OS can support effective and efficient an interprocess communication	Cognitive	Understand
CO4	***Compare*** the Characteristics of TCP and UDP sockets	Cognitive	Analysis
CO5	***Create*** sockets to implement simple client server applications	Cognitive	Synthesis

UNIT I	INTRODUCTION & FILE SYSTEM	9

Overview of UNIX OS - File I/O – File Descriptors – File sharing - Files and directories – File types - File access permissions – File systems – Symbolic links - Standard I/O library – Streams and file objects – Buffering - System data files and information - Password file – Group file – Login accounting – system identification.

UNIT II	PROCESSES	9

Environment of a UNIX process – Process termination – command line arguments - Process control – Process identifiers - Process relationships terminal logins – Signals -threads.

UNIT III	INTERPROCESS COMMUNICATION	9

Introduction - Message passing (SVR4)- pipes – FIFO – message queues - Synchronization (SVR4) – Mutexes – condition variables – read – write locks – file locking – record locking – semaphores –Shared memory(SVR4).

UNIT IV	SOCKETS	9

Introduction – transport layer – socket introduction - TCP sockets – UDP sockets - raw sockets – Socket options - I/O multiplexing - Name and address conversions.

UNIT V	APPLICATIONS	9

Debugging techniques - TCP echo client server - UDP echo client server - Ping - Trace route - Client server applications like file transfer and chat.

				3	0	0	3
C	P	A		L	T	P	H
2.5	0.5	0		3	0	0	3

PREREQUISITE: YSE403

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Understand*** the basics of wireless sensor network.	Cognitive	Understand
CO2	***Demonstrate*** the idea behind in physical layer issues, medium Access control Protocols	Cognitive	Understand
CO3	***Analyze*** the network layer characteristics and protocols	Cognitive	Analyze
CO4	***Indicate*** the transport layer issues and protocols.	Cognitive	Understand
CO5	***Control*** and ***maintain*** the network management and Middleware services	Psychomotor	Complete overt response

UNIT I	INTRODUCTION	9

Introduction to wireless sensor networks - Challenges and Constraints - Application of sensor networks – Node architecture - Operating System - Fundamental aspects.

UNIT II	PHYSICAL LAYER AND MEDIUM ACCESS LAYER	9

Basic architectural framework – Physical layer – source encoding –channel encoding – modulation – Medium access control - Wireless MAC protocols – Characteristics of MAC protocols in sensor networks – Contention free MAC protocols - traffic adaptive medium access - Low-Energy Adaptive Clustering Hierarchy – Contention based protocols - Power Aware Multi-Access with Signaling – Data-Gathering MAC - Receiver-Initiated MAC.

UNIT III	NETWORK LAYER AND TRANSPORT LAYER	9

Routing metrics – Data centric Routing - Proactive routing – OLSR – Reactive Routing – AODV – Location Base Routing - Traditional Transport Control Protocols - TCP (RFC 793) - UDP (RFC 768) - Mobile IP - Feasibility of Using TCP or UDP for WSNs - Transport Protocol Design Issues – Examples of Existing Transport Control Protocols- CODA (Congestion Detection and Avoidance).

UNIT IV	NETWORK MANAGEMENT	9

Power Management - Local Power Management Aspects - Processor Subsystem – Communication Subsystem – Active Memory - Power Subsystem - Dynamic Power Management - Dynamic Operation Modes – Time Synchronization – Clocks and the Synchronization Problem – Time Synchronization in Wireless Sensor Networks - Reasons for Time Synchronization - Challenges for Time Synchronization.

UNIT V	BASICS OF TIME SYNCHRONIZATION	9

Synchronization Messages - Non determinism of Communication Latency -Time Synchronization Protocols – Lightweight Tree - Based Synchronization - Timing-sync Protocol for Sensor Networks Localization - Ranging Techniques - Time of Arrival - Time Difference of Arrival - Angle of Arrival – Received Signal Strength - Range - Based Localization - Triangulation - Range- Free Localization – Ad Hoc Positioning System.

COURSE OUTCOMES:

Course Outcomes	Domain	Level
After the completion of the course, students will be able to		
CO1: ***Recognize*** the fundamentals and techniques of Angular JS.	Cognitive	Remember
CO2: ***Express*** the knowledge on Invoking, MVC, Validation, Communication over http, cookies and file upload in AngularJS	Cognitive Psychomotor	Understand Guided Response

Introduction to AngularJS - Invoking Angular - Model View Controller - Formatting Data with Filters - Changing Views with Routes and $location - Validating User Input - Project Organization - Tools - Running Your Application - Testing with AngularJS - Relationship Between Model, Controller, and Template - Communicating Over $http - Directives and HTML Validation - API Overview - Communicating Between Scopes with $on, $emit, and $broadcast - Cookies - Internationalization and Localization - Wrapping a jQuery Datepicker - File Upload in AngularJS

Lab:

Create single page web applications using the MVC pattern of AngularJS

Understand the programming model provided by the AngularJS framework

Define Angular controllers and directives

Control Angular data bindings

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Analyze*** Multidimensional Intelligent model from typical system	Cognitive	Analyze
CO2	***Evaluate*** various mining techniques on complex data objects	Cognitive	Evaluate
CO3	***Understand*** Data Mining processes using Open Source Data Mining tool.	Cognitive	Understand
CO4	***Choose*** the appropriate techniques and algorithms for extracting data	Cognitive Affective	Apply Respond
CO5	***Recognize*** the knowledge of data mining, data preprocessing and data warehousing	Cognitive Psychomotor	Analyze Perception

UNIT I **INTRODUCTION** **9+6**

Introduction, Fundamentals of data mining, Data Mining Functionalities, Data Preprocessing : Needs Preprocessing the Data, Data Cleaning, Data Integration and Transformation, Data Reduction

Lab:

- Perform Data Preprocessing using tool
- Perform Visualization of data using tool

UNIT II **DATA WAREHOUSING** **9+6**

Data Warehouse and OLAP Technology for Data Mining Data Warehouse, Multidimensional Data Model, Data Warehouse Architecture, Data Warehouse Implementation, Further Development of Data Cube Technology, From Data Warehousing to Data Mining.

Lab:

Implement the following Multidimensional Data Models

i.Star Schema
ii.Snowflake Schema
iii.Fact Constellation

UNIT III **ASSOCIATION** **9+6**

Mining Association Rules in Large Databases, Association Rule Mining, Apriori Algorithm and Frequent pattern growth algorithm

Lab:

- Classification, Association and Clustering algorithms using tool
- Implement Apriori algorithm to generate frequent Item Sets

UNIT IV **CLASSIFICATION** **9+6**

Classification and Prediction, Classification by Decision Tree Induction, Bayesian Classification, Classification by Back propagation, Classification Based on Concepts from Association Rule Mining

Lab:

- Implement the following classification algorithms

i.Decision Tree Induction
ii.KNN

UNIT V	CLUSTERING	9+6

Cluster Analysis Introduction Types of Data in Cluster Analysis, A Categorization of Major Clustering Methods, Partitioning Methods, Density-Based Methods, Grid-Based Methods, Model-Based Clustering Methods, Outlier Analysis.

Lab:

- Implement the following clustering algorithms
  i.K-means
  ii.K-mediods

				2	1	0	3
C	P	A		L	T	P	H
2	0	0		2	1	0	3

PREREQUISITE: YSE206

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** the fundamentals of measurement and experimentation	Cognitive	Understand
CO2	***Examine*** various methods of software metrics	Cognitive	Analyze
CO3	***Differentiate*** software measurement data	Cognitive	Analyze
CO4	***Demonstrate*** the various methods of software reliability	Cognitive	Apply
CO5	***Classify*** the possible tools to manage software metrics	Cognitive	Analyze

UNIT I	FUNDAMENTALS OF MEASUREMENT AND EXPERIMENTATION	9

Measurement: what is it and why do it-Measurement in everyday life-Measurement in software engineering-The scope of software metrics -The representational theory of measurement-Measurement and models-Measurement scales and scale types-Meaningfulness in measurement.

UNIT II	EMPIRICAL INVESTIGATION AND SOFTWARE-METRICS DATA COLLECTION	9

Four principles of investigation- Planning formal experiments- Planning case studies. -What is good data-How to define the data-How to collect data-When to collect data-How to store and extract data.

UNIT III	ANALYZING SOFTWARE-MEASUREMENT DATA	9

Introduction- Analyzing the results of experiments-Examples of simple analysis techniques-More advanced methods-Overview of statistical tests. Measuring internal product attributes: size-Aspects of software size-Length-Reuse-Functionality-Complexity. Structure-Types of structural measures-Control-flow structure- Modularity and information flow attributes.

UNIT IV	SOFTWARE RELIABILITY: MEASUREMENT AND PREDICTION	9

Basics of reliability theory-The software reliability problem-Parametric reliability growth models-Predictive accuracy- Cost estimation: problems and approaches-Models of effort and cost-Problems with existing modeling methods- Dealing with problems of current estimation methods.

UNIT V	MEASUREMENT AND MANAGEMENT	9

Planning a measurement program-What is a metrics plan?-Why and what: developing goals, questions, and metrics- Where and when: mapping measures to activities- How: measurement tools-Who: measurers, analysts, and audience- Revising the plan. Measurement in practice-Success criteria-Measurement in the small-Measurement in the large.

YSE604A			CLIENT SERVER COMPUTING	L	T	P	C
				3	0	0	3
C	P	A		L	T	P	H
3	0	0		3	0	0	3

PREREQUISITE: YSE103, YSE402

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Understand*** the basics of client server computing	Cognitive	Remember
CO2	***Identify*** Client server architecture, elements and components of computer system. ***Analysis*** the performance of computer and efficiency of internal elements.	Cognitive	Knowledge Analysis
CO3	***Analyze*** the Database connectivity and support required for Client server system	Cognitive	Analysis
CO4	***recognize*** the application of client server computing using Visual C++.	Cognitive	Knowledge Analysis
CO5	***associate*** with Multiple document interface.	Cognitive	Comprehension

UNIT I	INTRODUCTION	9

Basic concepts of Client / Server – Upsizing Downsizing – Right sizing – Characteristics – File server – Database servers – Transactions servers – Groupware servers – Object Client/Servers – Web Servers – Middleware.

Client / Server building blocks – Operating System services – Base services – External services – server scalability – Remote procedure calls – Multiservers.

UNIT II	SERVER ARCHITECTURE	9

SQL Database servers – server architecture – Multithread architecture – Hybrid architecture – stored Procedures – Triggers – Rules – Client / Server Transaction Processing – Transaction models – Chained and nested transactions – Transaction processing monitors – Transaction Management Standards.

UNIT III	DATABASE CONNECTIVITY	9

Database Connectivity solutions : ODBC – The need for Database connectivity – Design overview of ODBC – Architecture – components – Applications – Driver Managers – Drivers – Data sources – ODBC 2.5 and ODBC 3.0.

UNIT IV	VISUAL C++	9

Visual C++: The Windows Programming Model – GDI – resource based programming – DLL and OLE Applications – Visual C++ components – frame work / MFC class Library – basic event handling – SDI – Appwizard – ClassWizard – Model and Models dialogues – other controls – Examples.

UNIT V	MDI	9

Multiple Document Interface – Data Management with Microsoft ODBC – OLE client – OLE server – Client / Server Data Exchange format – Dynamic Data Exchange.

PREREQUISITE: YSE503

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Identify*** the importance of XML and Web Services.	Cognitive	Remember
CO2	***Interpret*** the understanding on schemas and technologies of XML.	Cognitive	Understand
CO3	***Employ*** the suitable protocol for the development of the web services.	Cognitive	Apply
CO4	***Outline*** the architecture and technologies of Web Services.	Cognitive	Remember
CO5	***Distinguish*** the various methods of the XML Security.	Cognitive	Understand

UNIT I	INTRODUCTION	9
Role of XML – XML and the Web – Simple Object Access Protocol – Web Services – Revolutions of XML		
UNIT II	**XML TECHNOLOGY**	**9**
XML – Namespaces – Structuring with Schemas – Presentation Technologies – Transformation – XML Infrastructure Technologies		
UNIT III	**SOAP**	**9**
Overview of SOAP – HTTP – XML-RPC – SOAP Protocol – Message Structure – Intermediaries – Actors – Design Patterns And Faults – SOAP with Attachments		
UNIT IV	**WEB SERVICES**	**9**
Overview – Architecture – Key Technologies - UDDI – WSDL – ebXML – SOAP, Web Services and E-Commerce – Overview Of .NET And J2EE.		
UNIT V	**XML SECURITY**	**9**
Security Overview – Canonicalization – XML Security Framework – XML Encryption – XML Digital Signature – XKMS Structure – Guidelines for Signing XML Documents

3	0	0		3	0	0	3

PREREQUISITE: YSE402

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** the basics architectures and distributed database concepts.	Cognitive	Remember
CO2	***Demonstrate*** features of relational and object oriented database.	Cognitive	Understand
CO3	***Analyze*** the different database and implement spatial database	Cognitive	Analyze
CO4	***Differentiate*** various data models	Cognitive	Analyze
CO5	***Examine*** the cloud database and Big data storage analytics	Cognitive	Analyze

UNIT I	PARALLEL AND DISTRIBUTED DATABASES	9

Database System Architectures: Centralized and Client-Server Architectures – Server System Architectures – Parallel Systems- Distributed Systems – Parallel Databases: I/O Parallelism – Inter and Intra Query Parallelism – Inter and Intra operation Parallelism – Design of Parallel Systems- Distributed Database Concepts - Distributed Data Storage – Distributed Transactions – Commit Protocols – Concurrency Control – Distributed Query Processing – Case Studies.

UNIT II	OBJECT AND OBJECT RELATIONAL DATABASES	9

Concepts for Object Databases: Object Identity – Object structure – Type Constructors – Encapsulation of Operations – Methods – Persistence – Type and Class Hierarchies – Inheritance – Complex Objects – Object Database Standards, Languages and Design: ODMG Model – ODL – OQL – Object Relational and Extended – Relational Systems: Object Relational features in SQL/Oracle – Case Studies.

UNIT III	INTELLIGENT DATABASES	9

Active Databases: Syntax and Semantics (Starburst, Oracle, DB2)- Taxonomy- Applications- Design Principles for Active Rules- Temporal Databases: Overview of Temporal Databases- TSQL2- Deductive Databases: Logic of Query Languages – Datalog- Recursive Rules- Syntax and Semantics of Datalog Languages- Implementation of Rules and Recursion- Recursive Queries in SQL- Spatial Databases- Spatial Data Types- Spatial Relationships- Spatial Data Structures-Spatial Access Methods- Spatial DB Implementation.

UNIT IV	ADVANCED DATA MODELS	9

Mobile Databases: Location and Handoff Management - Effect of Mobility on Data Management - Location Dependent Data Distribution - Mobile Transaction Models - Concurrency Control - Transaction Commit Protocols- Multimedia Databases- Information Retrieval- Data Warehousing- Data Mining- Text Mining.

UNIT V	EMERGING TECHNOLOGIES	9

XML Databases: XML-Related Technologies-XML Schema- XML Query Languages- Storing XML in Databases-XML and SQL- Native XML Databases- Web Databases- Geographic Information Systems- Biological Data Management- Cloud Based Databases: Data Storage Systems on the Cloud- Cloud Storage Architectures-Cloud Data Models- Query Languages-

Introduction to Big Data-Storage-Analysis.

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** the significance of Management Principle.	Cognitive Psychomotor	Remember Perception
CO2	***Express*** the understanding of the concept of planning the events in organization.	Cognitive	Understand
CO3	***Employ*** the understanding of the various scheduling activities and actively ***participate*** in terms for the organizing of various events in organization.	Cognitive Affective	Apply Respond
CO4	***Utilize*** the directing effectively in the real world class room management.	Cognitive	Apply
CO5	***Design*** and ***Establish*** the principles of management concept in day to day activities.	Cognitive Psychomotor	Create Set

UNIT I	OVERVIEW OF MANAGEMENT	9

Definition - Management - Role of managers - Evolution of Management thought-Organization and the environmental factors – Trends and Challenges of Management in Global Scenario.

UNIT II	PLANNING	9

Nature and purpose of planning - Planning process - Types of plans –Objectives - Managing by objective (MBO) Strategies - Types of strategies - Policies - Decision Making - Types of decision Decision Making Process - Rational Decision Making Process - Decision Making under differen conditions

UNIT III	ORGANIZING	9

Nature and purpose of organizing - Organization structure - Formal and informal groups organization - Line and Staff authority - Departmentation - Span of control - Centralization and Decentralization - Delegation of authority - Staffing - Selection and Recruitment - Orientation - Career Development - Career stages – Training - -Performance Appraisal.

UNIT IV	DIRECTING	9

Creativity and Innovation - Motivation and Satisfaction - Motivation Theories - Leadership Styles - Leadership theories - Communication - Barriers to effective communication - Organization Culture - Elements and types of culture - Managing cultural diversity.

UNIT V	CONTROLLING	9

Process of controlling - Types of control - Budgetary and non-budgetary control techniques - Managing Productivity - Cost Control - Purchase Control - Maintenance Control - Quality Control - Planning operations.

COURSE OUTCOMES		DOMAIN	LEVEL
CO1	***Explain*** the basic concepts of quality management with effective leadership.	Cognitive	Understand
CO2	***Describe*** and ***Identify*** the Continuous process improvement	Cognitive Affective	Understand Receive
CO3	***Relate*** and ***Use*** the old and new seven management tools for statistical process control	Cognitive Affective	Understand Receive
CO4	***Distinguish*** the concept of total productive Maintenance with Continuous process improvement.	Cognitive	Understand
CO5	***Explain*** the different methods ISO	Cognitive	Understand

UNIT I INTRODUCTION	09
Definition of Quality, Dimensions of Quality, Quality Planning, Quality costs – Analysis Techniques for Quality Costs, Basic concepts of Total Quality Management, Historical Review, Principles of TQM, Leadership – Concepts, Role of Senior Management, Quality Council, Quality Statements, Strategic Planning, Deming Philosophy, Barriers to TQM Implementation.	
UNIT II TQM PRINCIPLES	**09**
Customer satisfaction – Customer Perception of Quality, Customer Complaints, Service Quality, Customer Retention, Employee Involvement, Motivation, Empowerment, Teams, Recognition and Reward, Performance Appraisal, Benefits, Continuous Process Improvement– Juran Trilogy, PDSA Cycle, 5S, Kaizen, Supplier Partnership – Partnering, sourcing, Supplier Selection, Supplier Rating, Relationship Development, Performance Measures – Basic Concepts, Strategy, Performance Measure.	
UNIT III STATISTICAL PROCESS CONTROL (SPC)	**09**
The seven tools of quality, Statistical Fundamentals–Measures of central Tendency and Dispersion, Population and Sample, Normal Curve, Control Charts for variables and attributes, Process capability, Concept of six sigma, New seven Management tools.	
UNIT IV TQM TOOLS	**09**
Benchmarking Reasons to Benchmark, Benchmarking Process, Quality Function Deployment (QFD) House of Quality, QFD Process, Benefits, Taguchi Quality Loss Function, Total Productive Maintenance(TPM) Concept, Improvement Needs, FMEA Stages of FMEA.	
UNIT V DEPRECIATION	**09**
NeedforISO9000 and Other Quality Systems, ISO9000:2000 Quality System Elements, Implementation of Quality System, Documentation, Quality Auditing, TS16949,ISO14000– Concept, Requirements and Benefits.

Course Outcome		**Domain**	**Level**
After the completion of the course, students will be able to			
CO1	***Recognize*** and ***describe*** the personal traits of an entrepreneur.	Affective Cognitive	Receiving Understand
CO2	***Determine*** the new venture ideas and ***analyze*** the feasibility report.	Cognitive	Understand Analyse
CO3	***Develop*** the business plan and ***analyze*** the plan as an individual or in team.	Affective Cognitive	Receiving Analyse
CO4	***Describe*** various parameters to be taken into consideration for launching and managing small business.	Cognitive	Understand
CO5	***Describe*** Technological management and Intellectual Property Rights	Cognitive	Understand

UNIT I	**ENTREPRENEURIAL TRAITS AND FUNCTIONS**	**9**

Definition of Entrepreneurship; competencies and traits of an entrepreneur; factors affecting Entrepreneurship Development; Role of Family and Society ; Achievement Motivation; Entrepreneurship as a career and national development;

UNIT II	**NEW PRODUCT DEVELOPMENT AND VENTURE CREATION**	**9**

Ideation to Concept development; Sources and Criteria for Selection of Product; market assessment ; Feasibility Report ;Project Profile; processes involved in starting a new venture; legal formalities; Ownership; Case Study.

UNIT III	**ENTREPRENEURIAL FINANCE**	**9**

Financial forecasting for a new venture; Finance mobilization; Business plan preparation; Sources of Financing, Angel Investors and Venture Capital; Government support in startup promotion.

UNIT IV	**LAUNCHING OF SMALL BUSINESS AND ITS MANGEI**	**9**

Operations Planning - Market and Channel Selection - Growth Strategies - Product Launching – Incubation, Monitoring and Evaluation of Business - Preventing Sickness and Rehabilitation of Business Units.

UNIT V	**TECHNOLOGY MANAGEMENT, IPR PORTFOLIO FOR NEW PRODUCT VENTURE**	**9**

Technology management; Impact of technology on society and business; Role of Government in supporting Technology Development and IPR protection; Entrepreneurship Development Training and Other Support Services.

3	1	0		3	0	2	5

PREREQUISITE: YSE206

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** the software quality assurance plan	Cognitive	Remember
CO2	***Demonstrate*** the software Testing concepts.	Cognitive	Understand
CO3	***Analyze*** the different testing strategies and methods for test case design.	Cognitive	Analyze
CO4	***Identify*** the levels of testing and management.	Psychomotor	Perception
CO5	***Describe*** various test process**.**	Psychomotor	Perception

UNIT I	INTRODUCTION TO SOFTWARE QUALITY ASSURANCE PLAN	9+6

An overview of software quality assurance plan- Software quality assurance plan purpose and scope – Software quality assurance management- Problem reporting and corrective action-Tools, Techniques and Methodologies-Risk Management.

Lab: 1. Preparation of project management plan.
2. Preparation of Requirement Management plan using any case tools.

UNIT II	INTRODUCTION TO SOFTWARE TESTING	9+6

Introduction to testing as an Engineering Activity – The evolving process of Software Engineering – The role of process in software quality – Testing as a process – Overview of the testing maturity model (TMM) – Testing fundamentals – Defects , hypothesis and tests.

Lab: 1**.** Case study preparation of cost estimation model.

UNIT III	STRATERGIES AND METHODS FOR TEST CASE DESIGN	9+6

Introduction to testing design strategies- The smart tester – Test case design strategies – Using black box approach to test case design – Random testing – Equivalence class partitioning boundary value analysis – strategies and methods for test case design II

Lab : 1. Test case generation manually for real time application.
2. Practice function testing using manual testing.
3. Practice black box testing concepts manually.

UNIT IV	LEVELS OF TESTING AND MANAGEMENT	9+6

The need for levels of testing – Unit test – Planning – Designing the unit tests –The test harness Integration test goals, strategies, design plan and documentation – The test organization

Lab : 1. Generate a test case and defect tracking report manually for real time application.
2. Practice creating software documentation for all the phases of software development life cycle with respect to any real time application

UNIT V	CONTROLING AND MONITORING THE TEST PROCESS	9+6

Measurements and Milestones for controlling and monitoring – Software Configuration and management – Reviews as a testing activity - Defect analysis and prevention – Process control and Optimization – Need for Testing Maturity Model – Structure of testing maturity model – Relationships of the TMM to other process improvement models.

Lab : 1. Simulate tools for path testing principles.
2. Simulate tools for testing based on control structures.

				3	0	1	4
C	P	A		L	T	P	H
4	0	0		3	0	2	5

PREREQUISITE: Data Mining and Data warehousing

Course Outcomes		**Domain**	**Level**
After the completion of the course, students will be able to			
CO1	***Analyze*** the HADOOP and Map Reduce technologies associated with big data analytics Explore on Big Data applications Using NOSQL, Pig and Hive	Cognitive	Analyze
CO2	***Design*** efficient algorithms for mining the data from large volumes.	Cognitive	Create
CO3	***Understand*** the fundamentals of various big data analysis techniques	Cognitive	Understand
CO4	***Apply*** the big data analytic techniques for useful business applications.	Cognitive	Apply
CO5	***Relate*** to Work with big data analytic platform	Cognitive	Remember

UNIT I	**UNDERSTANDING BIG DATA**	**9+6**

What is big data – Big data Analytics-Characteristics of Big data- why big data – unstructured data – industry examples of big data – Big data and Marketing – Fraud and Big data- Risk and Big data- Big data advances in Health care – Cloud and Big data

Lab:

- Installing and configuring R Studio.
- Program to create a vector.

UNIT II	**NO SQL MANAGEMENT**	**9+6**

Introduction to NoSQL – Difference between SQL and NoSQL-Types of NOSQL Databases-NOSQL Data model-relational vs aggregate data models – schemaless map-reduce – partitioning and combining – composing map-reduce calculations

Lab:

- Program to create a Simple Functions
- Program to create Data frame

UNIT III	**BASICS OF HADOOP**	**9+6**

Introduction to Hadoop - Hadoop Architecture- Map Reduce in Hadoop - Data format – analyzing data with Hadoop - Design of Hadoop distributed file system (HDFS) – HDFS concepts

Lab:

- Program to create list
- Program to create array
- Program to create time series

UNIT IV	**MAP REDUCE APPLICATIONS**	**9+6**

Classic Map-reduce – YARN – failures in classic Map-reduce and YARN – job scheduling – shuffle and sort – task execution – MapReduce types – input formats – output formats

Lab:

- Producing Frequency Distributions
- Creating a Charts

- Creating a Histogram in R

UNIT V	HADOOP RELATED TOOLS	9+6

Hbase – data model and implementations –Cassandra – cassandra data model – cassandra examples –Hadoop integration. Pig – pig data model Hive – data types and file formats – HiveQL

Lab:

- Generating Measures of Central Tendency
- Calculating a One-sample t-test in R

Course Outcomes		**Domain**	**Level**
After the completion of the course, students will be able to			
CO1	***Recognize*** and ***Express*** various Types of communication and Documentation.	Cognitive	Remember Understand
CO2	***Discuss*** and ***Practice*** the Characteristics and Elements of Spoken and Group Communication	Cognitive Affective	Understand Responding to a phenomena
CO3	***Discuss*** and ***Analyze*** the procedure to be followed in Group Communication	Cognitive	Understand Analyze
CO4	***Propose*** and ***Write*** various types of Letters, Resume, Proposals and Contracts	Affective	Responding to a phenomena
CO5	***Adapt*** and ***follow*** the appropriate Technology and Standards for documentation	Psychomotor Affective	Adaptation Valuing

UNIT I	**BASIC CONCEPTS**	**9**

Importance of communication and documentation - Different types of Communications - Spoken communication - written communication - Different types of documentation.

UNIT II	**SPOKEN COMMUNICATION**	**9**

Elements of good individual communication – getting over nervousness – organizing one self characteristics of effective communication – augmenting spoken words by actions and other means – other aspects of spoken communication like speeches – presentation - use of visual aids.

UNIT III	**GROUP COMMUNICATION**	**9**

Meeting – Effective participation – effective management of meetings – preparing minutes – "Virtual" meetings – audio conference – video conference – use of collaboration tools

UNIT IV	**DIFFERENT TYPES OF WRITTEN COMMUNICATION**	**9**

Principles of effective written communication – differences between written communication and spoken communication – resume writing – email - effective email techniques – proposals – contracts – user guides – external technical documentation for software – internal software technical documentation – users guides – letters and different types of letters – legal issue.

UNIT V	**TECHNOLOGY AND STANDARDS**	**9**

Use of various tools and technologies – need for standardization – role of processes and standards in documentation – on-line help – Impact of internet on documentation – common challenges in the harnessing of technology - course summary

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Understand*** the supervised, unsupervised and semi-supervised learning	Cognitive	Remember
CO2	**Apply** the apt machine learning strategy for any given problem	Cognitive	Apply
CO3	***Identify*** supervised, unsupervised or semi-supervised learning algorithms for any given problem	Cognitive	Knowledge Analysis
CO4	***Recognize*** the systems design that uses the appropriate graph models of machine learning	Cognitive	Knowledge Analysis
CO5	***Modify*** the existing machine learning algorithms to improve classification efficiency	Cognitive	Create

UNIT I	**INTRODUCTION**	**9+3**

Learning – Types of Machine Learning – Supervised Learning – The Brain and the Neuron – Design a Learning System – Perspectives and Issues in Machine Learning – Concept Learning Task – Concept Learning as Search – Finding a Maximally Specific Hypothesis – Version Spaces and the Candidate Elimination Algorithm – Linear Discriminants – Perceptron – Linear Separability – Linear Regression.

UNIT II	**LINEAR MODELS**	**9+3**

Multi-layer Perceptron – Going Forwards – Going Backwards: Back Propagation Error – Multi-layer Perceptron in Practice – Examples of using the MLP – Overview – Deriving Back-Propagation – Radial Basis Functions and Splines – Concepts – RBF Network – Curse of Dimensionality – Interpolations and Basis Functions – Support Vector Machines

UNIT III	**TREE AND PROBABILISTIC MODELS**	**9+3**

Learning with Trees – Decision Trees – Constructing Decision Trees – Classification and Regression Trees – Ensemble Learning – Boosting – Bagging – Different ways to Combine Classifiers – Probability and Learning – Data into Probabilities – Basic Statistics – Gaussian Mixture Models – Nearest Neighbor Methods – Unsupervised Learning – K means Algorithms – Vector Quantization – Self Organizing Feature Map

UNIT IV	**DIMENSIONALITY REDUCTION AND EVOLUTIONARY MODELS**	**9+3**

Dimensionality Reduction – Linear Discriminant Analysis – Principal Component Analysis – Factor Analysis – Independent Component Analysis – Locally Linear Embedding – Isomap – Least Squares Optimization – Evolutionary Learning – Genetic algorithms – Genetic Offspring: - Genetic Operators – Using Genetic Algorithms – Reinforcement Learning – Overview – Getting Lost Example – Markov Decision Process

UNIT V	**GRAPHICAL MODELS**	**9+3**

Markov Chain Monte Carlo Methods – Sampling – Proposal Distribution – Markov Chain Monte Carlo – Graphical Models – Bayesian Networks – Markov Random Fields – Hidden Markov Models – Tracking Methods

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** the importance of cloud computing behind all communications and day to day life activities.	Cognitive Psychomotor	Remember Perception
CO2	***Express*** the functionalities of each cloud services and aware of the various cloud service providers	Cognitive	Understand
CO3	***Employ*** the understanding of the various scheduling activities and actively ***participate*** in terms for the creation of various cloud services.	Cognitive	Apply Respond
CO4	***Utilize*** the cloud services tools effectively in the real world applications.	Cognitive	Apply
CO5	***Design*** and ***Establish*** the cloud services and cloud storage	Cognitive Psychomotor	Create Set

UNIT I	UNDERSTANDING CLOUD COMPUTING	9

Cloud Computing – History of Cloud Computing – Cloud Architecture – Cloud Storage – Need for Cloud Computing – Advantages and Disadvantages of Cloud Computing – Companies in the Cloud Today – Cloud Services.

UNIT II	DEVELOPING CLOUD SERVICES	9

Web-Based Application – Pros and Cons of Cloud Service Development – Types of Cloud Servic Development – Software as a Service – Platform as a Service – Web Services – On Demand Computing – Discovering Cloud Services Development Services and Tools – Amazon Ec2 - Google App Engine –IBM Clouds

UNIT III	USING CLOUD SERVICES	9

Collaborating on Calendars, Schedules and Task Management – Exploring Online Scheduling Applications – Exploring Online Planning and Task Management – Collaborating on Event Management – Collaborating on Contact Management – Collaborating on Project Management – Collaborating on Word Processing – Collaborating on Databases – Storing and Sharing Files.

UNIT IV	OUTSIDE THE CLOUD	9

Evaluating Web Mail Services – Evaluating Instant Messaging – Evaluating Web Conference Tools– Creating Groups on Social Networks – Evaluating on Line Groupware – Collaborating via Blogs and Wikis

UNIT V	STORING AND SHARING	9

Understanding Cloud Storage – Evaluating on Line File Storage – Exploring on Line Book Marking Services – Exploring on Line Photo Editing Applications – Exploring Photo Sharing Communities– Controlling it with Web Based Desktops.

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Understand*** the basic and advanced level of architecture and elements of computer system	Cognitive	Remember
CO2	***Analysis*** the performance of computer and efficiency of internal elements.	Cognitive	Analysis
CO3	***identify*** multiprocessor architecture, elements and components of computer system.	Cognitive	Knowledge Analysis
CO4	***recognize*** the application of microprocessor in different applications.	Cognitive	Knowledge Analysis
CO5	***associate*** with modern architecture.	Cognitive	Comprehension

UNIT I	COMPUTER ORGANIZATION	9

Basic concepts of computer organization, stored program model, Classes of computer architecture, Processor vs. System architecture, Elements of computer systems – processors, memories, I/Os, disks, buses

UNIT II	PERFORMANCE ANALYSIS OF COMPUTER ARCHITECTURE	9

Goals of computer architecture – performance, throughput, latency, power, cost. Processor performance vs. system performance, Comparison of various platforms in terms of performance and efficiency internal elements and architecture of processors, Instruction execution, Instruction set architectures, CISC vs. RISC architectures.

UNIT III	MULTIPROCESSOR ARCHITECTURE	9

Bus architecture, Multi Processor architecture, Memories and Caches, Cache coherency, Pipelining and data path elements System architecture elements, H/W component selection and datasheet analysis, Bill of Materials, IP selection and System on Chip integration, Standard interfaces and I/Os, Analog and Mixed signal element integration. Reset and clocking elements

UNIT IV	APPLICATION OF MULTIPROCESSOR	9

Multi processor system Application specific processors, Packet processing, Microcontrollers, Network controllers, DSP and Multimedia processors, GPU elements.

UNIT V	MODERN ARCHITECTURES	9

An overview of the latest Intel, ARM, TI, SPARC and Power PC architectures as modern SOC architectural elements

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Recognize*** the significance of Android development	Cognitive	Remember
CO2	***Summarize*** the knowledge on java, xml with android and ***detect*** about the android development.	Cognitive Psychomotor	Understand Perception
CO3	***Manipulate*** and utilize the layout, resources and user interface.	Cognitive Affective	Application Receiving
CO4	To ***know*** about the database in android	Cognitive	Understand
CO5	***Design*** and test the android environment using exception handling, accessing the cloud data.	Cognitive	Create

UNIT I	INTRODUCTION	9+6

Overview of JAVA Programming – Inheritance – Polymorphism – Android software layers – Android libraries – Components of android application – Application life cycle – Android studio – android project structure – Android manifest file – Structure of manifest file

Lab: 1. Installing Android
2. Create a simple application

UNIT II	ANDROID SDK TOOLS AND OTHERS	9+6

Android SDK tools – activity – methods to remember – Fragments – views – List vies and list activity – Intents and intent filter – native action

Lab: 1. Working with fragments
2. Working with Intents and intent filters.
3. Creating contact based application.

UNIT III	ANDROID LAYOUT, RESOURSES AND UI	9+6

Views – Layout – customized view – Resources – themes and style – material design – User interaction – dialogs – Activities – Toasts – menus – context menus – Additional menu – pop up menu

Lab:

1. Working with views
2. Creating Dialogs and toasts
3. Working with Pop-up Menu

UNIT IV	ANDROID STORAGE, SQLite and NOTIFICATIONS	9+6

Android storage options – File I/O – connecting to the internet – Databases in android – content providers – custom content provider – creating notifications – actions – expandable notification – layouts – priority

Lab: 1. Quotes provider app
2. SQLite database app
. 3. Implement notification

UNIT V	ANDROID ADAVANCED DEVELOMENT	9+6

Exception handling – Location based services – finding your current location using GPS -Accessing cloud storage – Bluetooth – NFC – managing WiFi – Telephony and SMS.

Lab: 1. Working with exception handling
2. Finding your location using GPS.
3. Bluetooth communication / SMS communication..

				3	0	0	3
C	P	A		L	T	P	H
3	0	0		3	0	0	3

PREREQUISITE: YSE403

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Describe*** the importance of information systems and ***Classify*** the threats and attacks in networks.	Cognitive	Remember Understand
CO2	***Describe*** and ***Defend*** the concepts of information security.	Cognitive	Remember Understand
CO3	***Define*** and ***Defend*** the project activity planning and risk management.	Cognitive	Remember Understand
CO4	***Predict*** and ***Apply*** the appropriate biometric system for security.	Cognitive	Understand Apply
CO5	***Identify*** and ***Apply*** the perfect law and Act in real life.	Cognitive	Remember Apply

UNIT I	**INTRODUCTION AND THREATS TO INFORMATION SYSTEMS**	**9**

History of Information Systems and its Importance, basics, Changing Nature of Information Systems, Need of Distributed Information Systems, Role of Internet and Web Services, Information System Threats and attacks, Classification of Threats and Assessing Damages. Security in Mobile and Wireless Computing- Security Challenges in Mobile Devices ,authentication Service Security, Security Implication for organizations, Laptops Security Concepts. Brief review of Internet Protocols-TCP/IP, IPV4, IPV6. Functions of various networking components-routers, bridges, switches, hub, gateway and Modulation Techniques.

UNIT II	**BUILDING BLOCKS OF INFORMATION SECURITY**	**9**

Basic Principles of Information Security, Confidentiality, Integrity, Availability and other terms in Information Security, Information Classification and their Roles. Security Threats to E Commerce, Virtual Organization, Business Transactions on Web, E Governance and EDI, Concepts in Electronics payment systems, E Cash, Credit/Debit Cards.

UNIT III	**PHYSICAL AND BIOMETRIC BASED SECURITY**	**9**

Physical Security - Needs, Disaster and Controls, Basic Tenets of Physical Security and Physical Entry Controls, Access Control- Biometrics, Factors in Biometrics Systems, Benefits, Criteria for selection of biometrics application, Design Issues in Biometric Systems, Interoperability Issues, Economic and Social Aspects, Legal Challenges. Models for Information Security- ISO 27001, SSE-CMM, Information Security Vs Privacy.

UNIT IV	**CRYPTOGRAPHY, FIREWALLS, NETWORK SECURITY, INTRUSION DETECTION AND VPN**	**9**

Cryptography- Applications and its roles, Digital Signature. Firewalls – need, proxy servers, Design and Implementation Issues, Policies. Network Security- Basic Concepts, Dimensions, Perimeter for Network Protection, Network Attacks, Need of Intrusion Monitoring and Detection, Intrusion Detection. Virtual Private Networks- Need, Use of Tunneling with VPN, Authentication Mechanisms, Types of VPNs and their Usage, Security Concerns in VPN.

UNIT V	**LAW, LEGAL FRAMEWORK AND ETHICS**	**9**

Cyber Crime, Information Security and Law, Types & overview of Cyber Crimes, Cyber Law Issues in E-Business Management, Overview of Indian IT Act, Ethical Issues in Intellectual property rights, Copy Right, Patents, Data privacy and protection, Domain Name, Software piracy, Plagiarism, Issues in ethical hacking.

PREREQUISITE: YSE206

COURSE OUTCOMES:

Course Outcomes	Domain	Level
After the completion of the course, students will be able to		
CO1: ***Recognize*** the significance of Software Reliability.	Cognitive	Remember
CO2: ***Express*** the knowledge on SDLC	Cognitive	Understand
CO3: ***Estimate*** the understanding of Software Quality Management.	Cognitive	Apply
CO4: ***Recognize*** the significance of Software Reliability Tools	Cognitive	Remember
CO5: ***Express*** the knowledge on Software testing .	Cognitive	Understand

UNIT I	INTRODUCTION TO SOFTWARE RELIABILITY	9

Software Reliability Definitions - software disasters - Errors - faults - failures - different views of software reliability – software requirements specification - Causes of unreliability in software - Dependable systems: reliable, safe, secure, maintainable, and available - Software maintenance

UNIT II	SOFTWARE RELIABILITY IMPROVEMENT	9

The phases of a Software Project - Monitoring the development process – The software life cycle models - software engineering - Structured Analysis and structured Design - Fault tolerance - Inspection - Software cost and schedule.

UNIT III	SOFTWARE QUALITY MANAGEMENT	9

Software quality modeling - Diverse approaches and sources of information - Fault avoidance, removal and tolerance - Process maturity levels (CMM) - Software quality assurance (SQA) - Monitoring the quality of software - Total quality management (TQA) - Measuring Software Reliability - The statistical approach - Software reliability metrics.

UNIT IV	SOFTWARE RELIABILITY TECHNIQUES AND TOOLS	9

Data Trends - Complete prediction Systems - overview of some software reliability models - The recalibration of the models - Analysis of model accuracy - Reliability growth models and trend analysis - Software Costs Models - Super models

UNIT V	SOFTWARE RELIABILITY ENGINEERING PRACTICE	9

Testing and maintaining more reliable software –logical testing – functional testing – algorithm testing – regression testing - fault tree analysis – failure mode effects and critical analysis – reusability - case studies

YSE904			USABILITY ENGINEERING	L	T	P	C
				3	0	0	3
C	P	A		L	T	P	H
3	0	0		3	0	0	3

PREREQUISITE: YSE205

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Identify*** the importance of Software Reuse and its components	Cognitive	Remember
CO2	***Interpret*** the understanding of Design Patterns	Cognitive	Understand
CO3	Clearly ***Understand*** the concepts of Structural Patterns	Cognitive	Understand
CO4	***Identify*** the various Behavioral Patterns and its functions	Cognitive	Remember
CO5	***Distinguish*** the various Architectural patterns.	Cognitive	Understand

UNIT I	**INTRODUCTION**	**9**

Software reuse success factors, Reuse driven software engineering business, Object oriented software engineering, applications and component sub systems, use case components, object components.

UNIT II	DESIGN PATTERNS	**9**

Design Patterns – Introduction, Creational patterns, factory, factory method, abstract factory, singleton, builder prototype.

UNIT III	STRUCTURAL PATTERNS	**9**

Structural Patterns- Adapters, bridge, composite, decorator, façade, flyweight, proxy. Behavioral Patterns – Chain of responsibility, command, interpreter.

UNIT IV	BEHAVIORAL PATTERNS	**9**

Behavioral Patterns – Iterator, mediator, memento, observer, stazte, strategy, template, visitor, other, design patterns- Whole part, master- slave, view handler, forwarder- receiver, client – dispatcher- server, publisher – subscriber.

UNIT V	ARCHITECTURAL PATTERNS	**9**

Architectural patterns – Layers, pipes and filters, black board, broker, model - view controller ,presentation- abstraction – control, micro kernel, reflection.

LECTURE	**TUTORIAL**	**PRACTICAL**	**TOTAL**
45	**-**	**-**	**45**

TEXTBOOKS

1. Ivar jacabson, Martin Griss, Patrick Hohson – Software Reuse. Architecture, Process and Organization for Bussiness Success, ACM Press, 1997.
2. Erich Gamma, Richard Helm, Ralph Johnson, John Vlissides – Design Patterns- Addison, 1995, Pearson Education.

				3	1	0	4
C	P	A		L	T	P	H
2.5	0.5	0		3	1	0	4

PREREQUISITE: YSE403

Course Outcomes		Domain	Level
After the completion of the course, students will be able to			
CO1	***Identify*** the components of IOT and learn the basic issues, policy and challenges in the Internet	Cognitive Psychomotor	Remember Perception
CO2	***Design*** the portable device , program the sensors and microcontrollers	Cognitive	Create
CO3	***Perceive*** the significance of ***build***ing the software agents in the real time environments	Cognitive Psychomotor	Create Perception
CO4	***Formulate*** and ***Establish*** the cloud based communication through wifi/ Bluetooth	Cognitive Psychomotor	Create Set
CO5	***Combine*** the needed internet resources and implement in the business model	Cognitive	Analyze

UNIT I	INTRODUCTION	9+3

Definition – phases – Foundations – Policy– Challenges and Issues - identification - security – privacy. Components in internet of things**:** Control Units – Sensors – Communication modules – Power Sources – Communication Technologies – RFID – Bluetooth – Zigbee – Wifi – Rflinks – Mobile Internet – Wired Communication

UNIT II	PROGRAMMING THE MICROCONTROLLER FOR IOT	9+3

Basics of Sensors and actuators – examples and working principles of sensors and actuators – Cloud computing and IOT – Arduino/Equivalent Microcontroller platform – Setting up the board - Programming for IOT – Reading from Sensors Communication: Connecting microcontroller with mobile devices – communication through bluetooth and USB – connection with the internet using wifi / ethernet

UNIT III	IOT PROTOCOLS	9+3

Protocol Standardization for IoT – Efforts – M2M and WSN Protocols – SCADA and RFID Protocols – Issues with IoT Standardization – Unified Data Standards – Protocols – IEEE 802.15.4 – BACNet Protocol – Modbus – KNX – Zigbee Architecture – Network layer – APS layer – Security

UNIT IV	WEB OF THINGS	9+3

Web of Things versus Internet of Things – Two Pillars of the Web – Architecture Standardization for WoT– Platform Middleware for WoT – Unified Multitier WoT Architecture – WoT Portals and Business Intelligence. Cloud of Things: Grid/SOA and Cloud Computing – Cloud Middleware – Cloud Standards – Cloud Providers and Systems – Mobile Cloud Computing – The Cloud of Things Architecture

UNIT V	INTERNET OF EVERYTHING	9+3

Differences Internet of Things and Internet of Everythings – IoE at a glance –Internet of Everything: Data, Networks and opportunities-Application - IoE for cities connecting people, process and data

LECTURE	TUTORIAL	PRACTICAL	TOTAL
45	15		60
