Description of the Event / Activities / Competitions:

The Department of Mathematics organized an online Webinar on MATHEMATICS AS A START- UP IDEA" on 30.12.2020. This webinar refers to the mathematics and startup ideas on business.
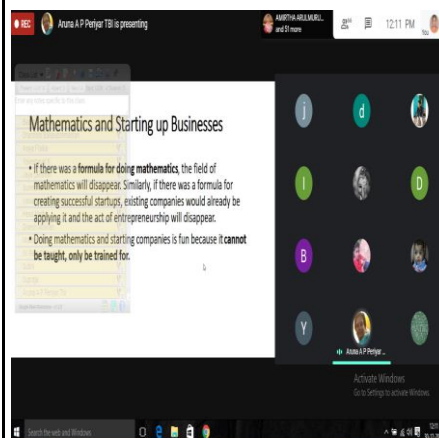

Startup ideation isn't simply brainstorming. In fact, ideation is perhaps the most important aspect of starting a startup. After all, the problem you choose will dictate your future team and execution. Ideation is about picking a compelling problem in right market and making sure you have founder market fit. It's also about constantly re-evaluating assumptions, pressure testing your ideas and validating them as you build. Being great at recognizing startup ideas can be the cornerstone to a massively successful career as either a founder, or investor.

The resource person of this webinar Dr. A.P.Aruna, CEO, Periyar TBI has interacted with the students and taught about the start –up ideas on business and motivation talks are given by the resource person. Totally 69 students are participated and benefited on it.
