2019-23 / III / V

Description

XCE508 CONSTRUCTION ENGINEERING AND MANAGEMENT

The screenshot shows the Google Classroom interface for the course 'XCE508 CONSTRUCTION ENGG & MANAGEMENT'. The 'Classwork' tab is active, displaying a list of assignments. The most prominent is 'ASSIGNMENT 3 (CASE STUDY)', which was posted on Oct 30, 2021, and is due on Nov 6, 2021. The assignment instructions state: 'Write any one case study for bridge foundation (The foundation should be in deep type eg: pile or well)'. The status shows 25 students have turned in their work and 7 are assigned. Below this, other assignments like 'ASSIGNMENT 2', 'TEST', and 'ASSIGNMENT 1' are visible with their respective due dates.

This screenshot shows the 'Student work' view for 'ASSIGNMENT 3 (CASE STUDY)'. The page displays a list of students who have submitted their work, each with a score of 100. The students listed are Athavan Elangovan, Bala Gunaa, Chandru Chandru, and Deva Prakash. To the right, a preview of the submitted work is shown, including a handwritten case study for '1190120111107 - XCE...' and a document titled 'BALAGUNAA ASSIGN...'. The interface also shows a 'Return' button and a '100 points' indicator.

Business Challenge

The Client used to provide advisors with a third-party off-the-shelf solution for portfolio management. This meant recurring licensing fees and incapability to enhance the software with the Client's tailored features to fine-tune custom portfolios. The Client also required to reconceptualize the user experience. It implied the digital transformation of business processes, which was impossible with the off-the-shelf product.

The Client decided to get a proprietary custom financial software capable of providing advisors with the best customer engagement experience. Advisors demanded a business tool for a full cycle of operation with portfolios and a customizable interface layout. Through a proprietary solution, the Client also wanted to eliminate the license expenses and increase their business capitalization with a new valuable intangible asset.

Solution

The Client chose Devexperts due to their experience in the development of tailored wealth management solutions and a previous record of successfully delivered FinTech projects.

Devexperts developed both the front- and back-end of a new portfolio management solution, which incorporated the following features required by advisors:

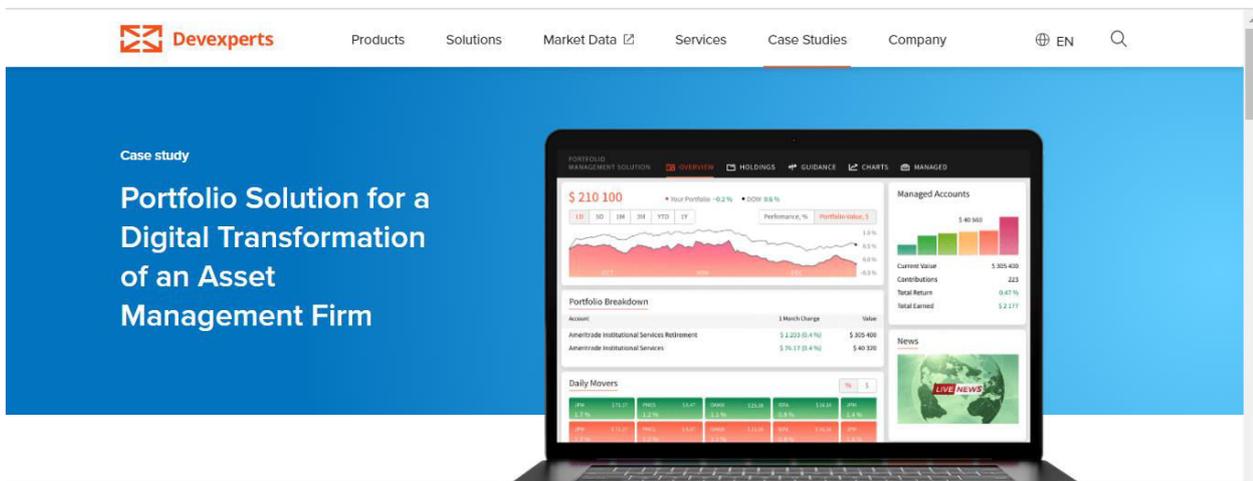

- Compilation and on-the-fly adjustment of custom portfolios
- Comparison of solution's portfolios with external accounts (held at any financial institution)
- Configuration of UI layout for the variability of portfolio visuals – intelligent customer engagement through the capability to shift and change portfolio information based on advisor's demands

On top of these features, the new proprietary portfolio management solution provides:

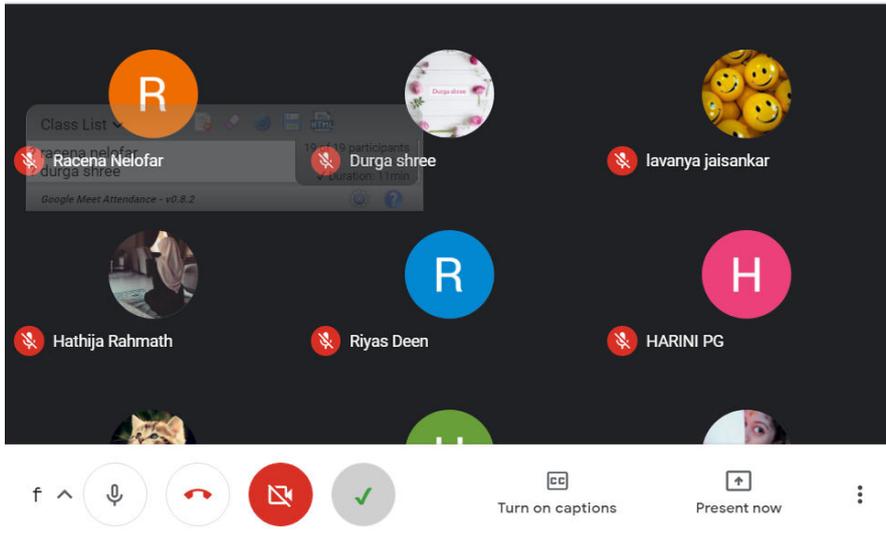

- Elaborate information with the risk-return ratio for portfolio returns evaluation based not solely on investment returns
- The fulfillment of customer demands according to short- and long-term investments – demonstration how different investment decisions and market conditions impact customers' goals

MAJOR POINTS IDENTIFIED:

- Timely and fast communication disseminated with the help of social media platforms to forecast the disaster (Gaja cyclone). Eg. WhatsApp status, Facebook, Blog news content etc.
- Cyclone Warning Dissemination System for direct dissemination of cyclone warnings to the cyclone prone coastal areas
- Some of the YouTube channels also made awareness about gaja cyclone.
