(57) Abstract :

The present invention relates to automatic pearl millet seed remover using Artificial Intelligence. The primary object of the present invention is removing the pearl millet seed based on the Artificial Intelligence algorithm. Another object of the present invention to classify the quality of the seeds such as A1, A2 and A3. Another object of the present invention to update the details of quantity of the seeds into a cloud database so that customer or client is able to view the stack details.
